

INTERNATIONAL YEAR OF MILLETS- 2023

International Conference on

STRATEGIES FOR GLOBAL FOOD AND NUTRITIONAL SECURITY, SUSTAINABILITY AND WELLNESS (NUTRI-2023)

December 04-06, 2023, CCSHAU, Hisar (Haryana) India

Chaudhary Charan Singh Haryana Agricultural University (CCSHAU), Hisar is one of the oldest and leading agricultural universities of the country that has made rapid strides and occupies a position of prominence among the agricultural universities of the country. The university is proud to have created a splendid infrastructure for education, research and extension in the fields of Agriculture, Agri-business, Agricultural Engineering & Technology, Community Science, Fisheries Science, Biotechnology and Basic Sciences & Humanities through its well-developed colleges, research stations and KVKs. The CCSHAU has been honoured with ICAR Sardar Patel Outstanding Institution Award twice during the year 1996 and 2016 in recognition to its contribution towards farming community and state economy. As United Nations is observing "International Year of Millets-2023", CCSHAU has taken a step forward in organizing an International Conference on "Strategies for Global Food and Nutritional Security, Sustainability and Wellness (NUTRI-2023)". We would like to extend a warm welcome to researchers, academicians, policy-makers, officers, administrators, agripreneurs, students, agro-industry representatives, progressive farmers, NGOs and other stakeholders across the globe for participation and sharing their knowledge in this focused international conference. The conference aims at providing a platform for exchange of ideas and outlook on the global food and nutrition security for wellbeing of the increasing population in the changing climatic scenario.

Sub-themes

- Millets for global nutritional security and well being
- Conventional breeding, biotechnology, bio informatics, genetic engineering, phenomics, genomics and proteomics for crop improvement
- Modelling, simulation tools and big data in agriculture research
- Post-harvest processing and value addition for food safety and security
- Agri-technology transfer, impact assessment and farmer empowerment
- Industry linkages and agri-business for food and nutrition security
- Agriculturally important fauna and aquafarming for farm economy
- Strategies for biotic and abiotic stress management in crop production and microbes in agriculture
- Mechanization, non-conventional energy resources and digitization for smart agriculture
- Climate change, conservation agriculture, resource management and integrated farming for sustainable agriculture
- Role of agriculture and allied education in food security
- Natural and organic farming for wellness

Why to Attend?

International Conference on "Strategies for Global Food and Nutritional Security, Sustainability and Wellness (NUTRI-2023)" intends to focus on sharing of knowledge on current global challenges i.e. food supply, nutritional security and well being of the mankind. These challenges require concerted efforts by the researchers, academicians, policy makers, administrators, agro-industries, farmers and other stakeholders.

This conference provides a suitable platform to bring forth the largest galaxy of participants from agriculture and allied sciences to exchange their experiences, research outputs and developed technologies. It will certainly lead to further boost the research and international collaborative projects.
