## From the Vice Chancellor's Desk

Chaudhary Charan Singh Haryana Agricultural University, (CCSHAU), is one of Asia's most prestigious agricultural universities. CCSHAU has made a name for itself on both at national and international level since its inception in 1970. The University has a state of the art infrastructure that creates the ideal environment for dynamic and focused education, research and extension. CCSHAU has been a pioneer in agricultural research and was one of the key players in India's Green and White Revolutions in the 1960s and 1970s, and it continues to have an impact in the agricultural sector. CCSHAU offers free tele-agricultural services through its Kisan Seva Kendra, Regional Research Stations, and Krishi Vigyan Kendras, all of which are dedicated to supporting farmers and disseminating the results of laboratory research to stakeholders. CCSHAU has also developed seven Community Radio Stations with the goal of presenting the farming community with the latest agricultural information.

In terms of credentials, CCSHAU has a long and rich history of accomplishments that give us a sense of pride and fulfilment. The Indian Council of Agricultural Research has recognised the university twice for its quality, awarding it the ICAR Best Institution Award in 1996-97 and the Sardar Patel Outstanding ICAR Institution Award in 2016-17, and it ranks among the top ICAR and MHRD universities. CCSHAU was rated the Best Agricultural University in the Atal Ranking of Institutions on Innovation and Achievements (December 2021). With this ranking CCSHAU has once again established itself as one of India's elite universities for innovation, entrepreneurship, and incubation. The University has produced many national and internationally renowned scientists/teachers. The faculty of this University have served on various coveted positions such as Director General (ICAR); Chairman, Agricultural Scientists Recruitment Board; Advisor, Planning Commission;

Vice-Chancellors; Deputy Director General (ICRISAT); Deputy Director Generals (ICAR); Directors of National Institutes etc. The illustrious alumni of this university are working all over the world and are holding executive positions in administration of various sectors. CCSHAU is proud to have hosted many eminent dignitaries. Our sense of pride increased manifold when President of India, Smt. Draupadi Murmu graced the University as the Chief Guest on the occasion of 25th Convocation of the University on April 24, 2023 and addressed our graduates.

Higher education has undergone a significant paradigm shift as well as amazing global expansion, and CCSHAU has adapted quickly to global goals and is addressing global challenges with cutting-edge methodologies. In keeping with the spirit of NEP 2020, a shift toward inter-disciplinary study and research is underway. The University has an ICT-enabled campus for seamless e-learning. At CCSHAU, our main mission is to make knowledge progression more efficient and active by bridging the gap between academia and the industry. CCSHAU continues to make significant progress in

agricultural education and research. The University also houses training institutes for skill development of the youth and faculty.

Along with academics, co-curricular activities are given equal importance, so as to produce young professionals well-equipped to handle challenges of their vocation. CCSHAU, Hisar has been organizing and hosting various sports and games events. During the past Academic Year itself the University hosted 21st All India Inter-Agricultural University Games & Sports Meet, 2022-23 and also organized 18th All India Vice-Chancellor Cricket Cup T-20 Tournament from November 3 to 16, 2022. The University has collaboration with a number of top-ranked universities in the United States, Japan, New Zealand, Poland, Czech Republic, Australia and many other nations on academic and research projects.

The research carried out at the university is of the highest quality. The University has released 292 varieties of cereals, pulses, horticultural and vegetable crops out of which 42 is released/ready for release in last three years. The University's scientists and scholars are doing multidisciplinary research in agricultural and related disciplines in order to develop need-based, location-specific technologies. Agricultural sciences, basic sciences, home/community sciences, fisheries science, biotechnology, management and engineering & technology are all part of our programmes. Experiential Learning Projects stimulate and nurture the entrepreneurial spirit of the students. Structured soft-skills training and competitive examination preparation are provided to make students more employable. We aim for a 100 percent placement rate and more and more number of our students are getting campus placement. The University's Agribusiness Incubation Centre assists aspiring entrepreneurs in both fostering their ideas and launching their businesses. This Centre continues to retain its position among the top incubation centres in the country.

The University organizes a significant number of national and international conferences, seminars, and workshops. An "International Conference on Climate Resilient Agriculture for Food Security and Sustainability (Intclimate-2023)" was organised from February 17-19, 2023 in which scholars from eleven countries participated and around 1200 presentations were made including oral and poster presentations. Such events expose students to a diverse range of experiences and instil traits like leadership and teamwork, which will be beneficial in their future careers. Similarly, another International Conference on Strategies for Global Food and Nutritional Security, Sustainability and Wellness (NUTRI-2023) was organized between 4-6 December, in which large number of prominent scientists from and India and abroad have participated.

All this could be possible thanks to the tireless work of our Deans, Directors, Officers, teachers and employees. We are motivated to increase our efforts even more in order to maintain our coveted position at the top. In future also the University intends continuing its chosen path of addressing the issues and needs of farmers in the context of current climate change and international market competition. The research endeavours of the University scientists will be in line with the constantly changing natural, technological, economic, and social environment and will aim at ensuring food and nutritional security. To achieve this, programmes for agricultural education, research, and extension programmes are re-oriented/re-defined in response to peer review and shifting demands. Our goal is to enhance the teaching, research, and extension education processes so that our students may effectively serve the society while also gaining recognition on a global scale.

Dear prospective students of the University, I can assure you that the University community will support and help you achieve your goals in life.

## COLLEGE OF AGRICULTURE

### PGDC -3: PG Diploma in Remote Sensing and GIS Applications in Agriculture and Environment

Nodal Department : Agricultural Meteorology

Collaborative Departments : Soil Science, Forestry, Soil and Water Engineering

#### Scope and Opportunities

Remote sensing and GIS is a relatively young scientific discipline and is an area of fast emerging technology witnessed phenomenal growth over the recent decades. The science of remote sensing is no more an art of mapping using satellite based sensors. Image processing facilities which were earlier restricted to selected major research areas have now become widely available with cooperatively low price processing equipments, digital data handling and processing led to the development of geographical information system followed by global positioning system. These technological tools enhanced our capability for exploring, mapping and monitoring resources at local, regional and global scale.

There is scarcity of human resource with the knowledge of this technology in the field of agriculture and environment. The job opportunities for the students passing out this course will be in central government remote sensing organizations, State government remote sensing application centers, agricultural and environmental research and management institutes, academic institutes of remote sensing and GIS. Beside this huge job opportunities will be available in private sector and overseas as well.

This post graduate course shall not only provide job avenues for students but also open a field of viable and effective interaction with national establishment related to various aspects of remote sensing.
