| | | | manipulations, large-scale production of biocontrol agents, bankable project preparation.Scope of genetically engineered microbes and parasitoids in biological control,genetics of ideal traits in biocontrol agents for introgressing and for progeny selections, breeding techniques of biocontrol agents. | |
| **Ent. 607** | 2+1 | Advanced Insecticide Toxicology | Penetration and distribution of insecticides in insect systems; insecticide selectivity; factors affecting toxicity of insecticides Sampling, extraction, clean-up and estimation of insecticide residues by various methods; calculations and interpretation of data; Biochemical and physiological target sites of insecticides in insects; developments in biorationals, biopesticides and newer molecules; their modes of action and structural – activity relationships; advances in metabolism of insecticides. | • Students learn to estimate insecticide residues by various methods (Sampling, extraction, clean-up, calculations and interpretation of data).<br>• Biochemical and biological techniques learned by students for detection of insecticide resistance in insects. |
| **Ent. 608** | 1+1 | Advanced Host Plant Resistance | To study the morphological, anatomical and biochemical adaptations of resistance; assembly of plant species - gene pool; insect sources – behaviour in relation to host plant factors. antibiosis index, tolerance index, plant resistance index. Estimation of plant resistance based on plant damage-screening and damage rating; evaluation based on insect responses; techniques and determination of categories of plant resistance; breakdown of resistance in crop varieties. | • Students learn the mechanism involved in developing resistance for orientation, feeding, oviposition etc.,<br>• Allelochemical bases of insect resistance studied by students.<br>• Macroculturing of test insects and field screening for determination of antixenosis index, antibiosis index, tolerance index, plant resistance index etc. studied by students. |
| **Ent.691** | 1 | Doctoral seminar | Doctoral seminar | • Students presentation skills and confidenceare developed. |
| **Ent.691** | 1 | Doctoral seminar | Doctoral seminar | • Students presentation skills, personality and confidence |

| | | | | |
|---|---|---|---|---|
| | | | | are developed. |
| **Ent.699** | 45 | Doctoral Research | Doctoral Research | • Students use practical knowledge in areas of Entomology.<br>• Students learn to take research observations / data and analyze them statistically. |

**Note:** The Details of courses offered by the department is given *(Annexure ENT-II)*

**6.4.6 Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Details of M.Sc. programmes offered by the Department:**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| **2018-19** | 16 | 24 | 0.67:1 |
| **2019-20** | 21 | 26 | 0.81:1 |
| **2020-21** | 24 | 29 | 0.83:1 |
| **2021-22** | 24 | 30 | 0.80:1 |
| **2022-23** | 22 | 32 | 0.68:1 |

**Details of Ph. D. programmes offered by the Department:**

| Year | Numberofstudents on roll | Numberof PG faculty | Student-teacher Ratio |
|---|---|---|---|
| **2018-19** | 12 | 24 | 0.50:1 |
| **2019-20** | 18 | 26 | 0.69:1 |
| **2020-21** | 26 | 29 | 0.90:1 |
| **2021-22** | 30 | 30 | 1:1 |
| **2022-23** | 24 | 32 | 0.75:1 |

**Note:** Details of courses offered by the Department is given in *Annexure ENT-II*

**6.4.7. Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

There is a system of annual self appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice-Chancellor. The performance of the faculty is also reviewed on the basis their results, feedback from the students. Students of Professional Elective course are placed in different institutions for In-plant training. Teachers visit these institutions during training period of students and conduct meetings with authorities of the institutes. Any suggestions provided by them are incorporated in the curriculum.The stakeholders' feedback on the overall performance and quality of the institutions is obtained through general meetings with parents and interaction with alumni. The teachers get informal

feedback from the students based on their parents' observation and suggestions. These suggestions are conveyed to the HODs and controlling officers.

**6.4.8 Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the Degree Programme | No. of students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Sc.** | 10 | 13 | 13 | 11 | 12 | 0 | 0 | 0 | 9.09 | 8.33 |
| **Ph.D.** | 4 | 5 | 7 | 8 | 6 | 0 | 0 | 16.66 | 0 | 0 |

**6.4.9 ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of Department of Entomology use ICT in teaching and practical. There is one Seminar Room with computer, LCD projector, smart LED and internet connection. All faculty members have computer printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, YouTube, emails and CD ROM in teaching all courses at UG, PG and Ph.D. level. For PG and Ph.D. students emails are also used.

**6.5.10** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.5.11** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.5.12** Certificate (Applicable when SSR is submitted for Programe)

I, the Dean, Surender K. Pahuja hereby certify that the information contained in the Section 6.4.1 to 6.4.9 is furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

## LIST OF PG COURSES OFFERED BY THE DEPARTMENT

### I$^{st}$ Semester

| Course No. | Credit hrs. | Course title |
|---|---|---|
| **Ent. 501** | 1+1 | Insect Morphology |
| **Ent. 503/Nema 502** | 2+0 | Principles of Taxonomy |
| **Ent. 505** | 1+1 | Insect Ecology |
| **Ent. 507** | 1+1 | Biological Control of Crop Pests and Weeds |
| **Ent. 509** | 1+1 | Plant Resistance to Insects |
| **Ent. 510/ Nema.512** | 1+1 | Principles of Integrated Pest Management |
| **Ent. 511** | 1+1 | Pests of Field Crops |

| | | |
|---|---|---|
| **Ent. 512** | 1+1 | Pests of Horticultural and Plantation Crops |
| **Ent. 516** | 1+1 | Soil Arthropods & their Management |
| **Ent. 517** | 1+1 | Vertebrate pest management |
| **Ent. 519** | 1+1 | Commercial Entomology |
| **Ent. 591** | 0+1 | Master's Seminar |
| **Ent. 599** | 20 | Master's Research |
| **Ent. 601** | 1+2 | Advanced Insect Systematics |
| **Ent. 602** | 1+1 | Immature stages of insects |
| **Ent. 603** | 2+0 | Advanced Insect Physiology |
| **Ent. 605** | 1+1 | Insect Behaviour |
| **Ent. 609** | 1+1 | Advanced Acarology |
| **Ent. 613/Pl. Path.606 /Nema-605** | 2+0 | Plant Biosecurity and Biosafety |
| **Ent. 691** | 1 | Doctoral Seminar-I |
| **Ent. 692** | 1 | Doctoral Seminar-II |
| **Ent. 699** | 45 | Doctoral Research |

**2nd Semester**

| Course No. | Credit hrs. | Course title |
|---|---|---|
| **Ent 502** | 2+1 | Insect Anatomy, Physiology and Nutrition |
| **Ent 504** | 2+1 | Classification of Insects |
| **Ent. 506** | 1+1 | Insect Pathology |
| **Ent 508** | 2+1 | Toxicology of Insecticides |
| **Ent. 513** | 1+1 | Storage Entomology |
| **Ent 514/Pl. Path. 514** | 1+1 | Insect Vectors of Plant Viruses and other Pathogens |
| **Ent.515** | 1+1 | General Acarology |
| **Ent 518** | 0+1 | Techniques in Plant Protection |
| **Ent 520/Nema 514/Pl. Path 520** | 2+0 | Plant Quarantine |
| **Ent. 604** | 1+1 | Advanced Insect Ecology |
| **Ent.606(HAU)/Ent.605(PAU)** | 2+0 | Recent Trends in Biological Control/Advanced Biological Control |
| **Ent 607(HAU)/Ent 606(PAU)** | 2+1 | Advanced Insecticide Toxicology |
| **Ent. 608** | 1+1 | Advanced Host Plant Resistance |
| **Ent. 610** | 1+1 | Agricultural Ornithology |
| **Ent. 611** | 1+1 | Molecular Approaches in Entomological Research |
| **Ent 612 (HAU)/Ent 603 (PAU)** | 2+0 | Advanced Integrated Pest Management |
| **Ent 692 HAU/PAU 591** | 1 | Doctoral Seminar II |

## PLACEMENT LIST OF LAST FIVE YEAR (2018-2023)
## PASSED OUT STUDENTS OF DEPTT. OF ENTOMOLOGY

### M.Sc. Students

| S. No. | Name | Admn. No. | Date of Passed out | Post/Designation | Placement address |
|---|---|---|---|---|---|
| **1** | Umesh | 2015A29M | 06.1. 2018 | Agriculture officer | Punjab National Bank, Dighal , Jhajjar |
| **2** | Parveen Kumar | 2015A30M | 11.5. 2018 | Manager (Quality Control/ Techincal) | Food Corporation of India, Patiala, Punjab |
| **3** | Vinayaka K.S. | 2016A20M | 19-6-2018 | Assistant Scientist | Bayer Crop Science |

| | | | | | |
|---|---|---|---|---|---|
| | | | | | Ltd, 52, "Appaji Ashreya", 2nd Floor, 2nd Main Road, GKVK Layout, Allasandra, Yelahanka, Begaluru-560065 |
| **4** | Gaurav Singh | 2016A21M | 13-6-2018 | Assistant Scientist | Maharana Partap Horticultural University, Karnal (MHU) |
| **5** | Anuj | 2017A37M | 20-7-2019 | Agricultural Officer | Punjab national bank, Murshidabad, West Bengal |
| **6** | Puneet | 2017A38M | 15-7-2019 | Assistant Plant Protection Officer (Entomology) | Central Insecticides Laboratory, Faridabad under DPPQ |
| **7** | Poonam | 2017A42M | 20-7-2019 | Assistant Grade-III (Technical) | Food Corporation of India, Divisional Office, SCO 73-74, Sector 2, Kurukshetra |
| **8** | Deepak | 2017A43M | 16-7-2019 | State Head (NPP)Haryana | UPL Limited, Head Quarter, Hisar |
| **9** | Amit | 2017A40M | 29-10-2019 | Rural Development Officer | Indian Bank |
| **10** | Ajay | 2017A41M | 14.9.2020 | Scientific Expert | Haryana Govt. biodiversity project, Kaithal |
| **11** | Chaand Josan | 2018A31M | 11.9.2020 | Horticultural Developmental Officer | IBDC, Ramnagar, Kurukshetra |
| **12** | Khyali Ram | 2018A35M | 10.9.2020 | Horticultural Developmental Officer | Horticulture Development , Govt. Of Haryana, Nathusari Chopta, Sirsa |
| **13** | Mohammad Thamseer M.K | 2019A47M | 6.9.2021 | Agricultural Field Officer (JGMS-1) | UCO Bank, Doddalahalli, Kanakapura Taluk, Ramanagar District, Karnataka |
| **14** | Sova Yadav | 2019A53M | 22.9.2021 | Employment Officer | Company- Aasaman Nepal, Janakpur, Nepal |
| **15** | Rahul Saini | 2019A50M | 16.9.2021 | Assistant Grade-III (Technical) | Food Corporation of India, North Zone, Haryana |
| **16** | Rajat Kaushik | 2020A44M | 12.9.2022 | Assistant Grade-III (Technical) | Food Corporation of India, North Zone, Haryana |

**Ph.D. Students**

| S. No. | Name of student | Admn. No. | Date of passed out | Where Placement | Placement address |
|---|---|---|---|---|---|
| 1. | Naveen Vikram Singh | 2012A18D | 22-2-2018 | Assistant Professor (Entomology) | Faculty of Agriculture, Kamla Nehru Institute of Physics and Social Science, Sultanpur, U.P. |

| | | | | | |
|---|---|---|---|---|---|
| 2. | Lalita Panwar | 2014A19D | 5-6-2018 | Assistant Professor (Entomology) | Regional Research Station, Kaul, CCSHAU, Hisar |
| 3. | Suman Devi | 2014A11D | 5-6-2018 | Assistant Professor (Entomology) | PDM University, Bahadurgarh, Jhajjar, Haryana |
| 4. | Shete Nilesh Suresh | 2012A21D | 10-7-2018 | Senior Techincal Officer (Ento.) | Regional Plant Quarantine Station, Haji Bunder Road, Sewri, Mumbai-400015 |
| 5. | Shalini Pandey | 2014A15D | 17-7-2018 | Assistant Professor (Entomology) | Agricultural University, Jodhpur- 342304 |
| 6. | Meenakshi Devi | 2014A12D | 17-8-2018 | Assistant Professor | SGT University, Chandu, Gurugram-122505 |
| 7. | Meenu | 2014A14D | 28-8-2018 | DES | KVK, Bhiwani, |
| 8. | Chitralekha | 2014A16D | 29-1-2019 | Assistant Scientist | Cotton Research Station, Sirsa, |
| 9. | Rinku | 2015A45D | 30-8-2019 | Assistant Professor | Department of Entomology, College of Agriculture, Kaul, Kaithal |
| 10. | Pradeep Kumar Dalal | 2014A13D | 16-9-2019 | Technical Assistant | Department of Seed Science and Technology, CCSHAU, Hisar |
| 11 | Purti | 2015A47D | 24-10-2019 | Assistant Professor | Jagannath University, Bahadugarh, Jhajjar, Haryana |
| 12 | Kavadana Sankara Rao | 2015A43D | 19-11-2019 | Subject Matter Specialist | KVK, Kondempudi, Visakhapatnam, Andhra pradesh |
| 13 | Mandeep Rathee | 2014A18D | 14-1-2020 | Technical Assistant | KVK, Kaithal, CCSHAU, Hisar |
| 14 | Swati Mehra | 2015A46D | 7.7.2020 | Assistant Scientist | Department of Entomology, CCSHAU, Hisar |
| 15 | Sangeeta Tiwari | 2016A42D | 6.10.2020 | AAO | Agriculture Department ,Chaukutiya, Almora, Uttatakhand |
| | Sudhanshu Bala Nayak | 2016A40D | 26.10.2020 | Assistant Director of Sericulture | Directorate of textile and handloom, Govt. of Odisha |
| 16 | Vijaya | 2016A41D | 29.10.2020 | Assistant Professor | Baddi University of Emerging Science and Technology, Baddi, Solan (HP) |
| 17. | Malik Mohammed Abdalsalam Abaker | 2017A45D | 4.8.2021 | Pest Management Specialist | Plant Protection Directorate, Gezira, Sudan |

| | | | | | |
|---|---|---|---|---|---|
| 18 | Naveen Rao | 2017A40D | 7.3.2022 | Assistant Professor | Department of Agriculture, Baba Farid Group of Institutions, Bathinda, Punjab |
| 19 | Rumi | 2015A44D | 20.9.2018 | Assistant Professor | COA, Bawal, CCSHAU, Hisar |

## Centre for Advanced Faculty Training:

The Department of Entomology, CCS Haryana Agricultural University, Hisar was identified by ICAR as Centre of Advanced Studies (CAS) during 1994, vide letter No.1- 2/93(CAS)/ UNDP dated 26.3.94. The Centre of Advanced Studies was re-designated as Centre of Advanced Faculty Training (CAFT) by ICAR during 2009-10 vide letter No.1(6)/2009 CAFT/HRD dated 1.1.2010. So far, the centre has organized 35 trainings covering various aspects of entomology *viz*., apiculture, pollinators, insect ecology, insecticide toxicology, host plant resistance, non-insect pests, stored grain pests, pest and pesticide management, biological control, integrated pest management, pest population dynamics and pest monitoring, application of techniques in entomological research, pest damage diagnosis and loss assessment, etc. Around 623 scientists/faculty members from different SAU's have been trained so far regarding various aspects of Agricultural Entomology.

## Details of CAFT trainings conducted:

| S. No. | Year | Name of Training | Date/Duration of Training | No. of Participants | Name of states to which participants belong |
|---|---|---|---|---|---|
| 1 | 2018-19 | Recent trends in pests status, pesticide usage and pest management Strategies in Agriculture" | 5$^{th}$ to 25$^{th}$ October, 2018 | 17 | Punjab,Gujrat,Jharkhand, Assam,Maharashtra,Karnataka, Andhra Pradesh,Tamil Nadu, Bihar,Rajasthan and Haryana |
| 2 | 2019-20 | Advances in Biology, Conservation, Rearing and Management of *Apis* & non-*Apis* bees | 4$^{th}$ to 24$^{th}$ October, 2019. | 24 | Assam, Bihar, Chhattisgarh, Gujarat, Karnataka, Madhya Pradesh, Maharashtra, Orissa, Punjab, Tamil Nadu and Uttarakhand |
| 3 | 2022-23 | "Current Scenario of Pesticide toxicology and its Impact on Future Agriculture" | 3$^{rd}$ to 23$^{rd}$ November, 2022 | 25 | Andhra Pradesh, Assam, Bihar, Haryana, Karnataka, Punjab, Rajasthan, Uttar Pradesh and Telangana |

**Note: For every training conducted under CAFT a compendium was released by the Department of Entomology.**

## Students trainings conducted by Department of Entomology during 2018-2023

| Sr. No. | Name of the Event | Year | Date of Organization |
|---|---|---|---|
| **1.** | 12 days online training course on "Bee keeping as an Entrepreneurship" for students | 2021 | 16.12.2021 to 27.12 2021 |
| **2.** | ICAR sponsored 10 days short course on 'Scientific management of *Apis mellifera* colonies for nutritional and economic security' for scientists of ICAR institutes and SAU's | 2022 | 25.01 2022 to 03.02.2022 |

| | | | |
|---|---|---|---|
| **3.** | 10 days online training on 'Commercial Apiculture' for 84 UG and PG students of SC category | 2022 | 24.02.2022 to 05.03.2022 |

## DIFFERENT ACTIVITIES CONDUCTED DURING 2018-23

Welcome of Chief Guest Prof. B. R. Kamboj, Vice-Chancellor, CCS HAU, Hisar during Advanced Faculty Training on "Current Scenario of Pesticide Toxicology and its Impact on Future Agriculture" from 3rd to 23rd Nov., 2022 at CCS HAU, Hisar

Address to trainees by Chief Guest Prof. B. R. Kamboj, Vice-Chancellor, CCS HAU, Hisar during Advanced Faculty Training-2022 at CCS HAU, Hisar

Demonstration of spray technology during Advanced Faculty Training-2022 at Entomology Farm of CCS HAU, Hisar

Practical of residue analysis during Advanced Faculty Training-2022 at Residue Laboratory of Deptt of Entomology, CCS HAU, Hisar

Demonstration of Drone Spray Technology during Advanced Faculty Training- 2022 at Deptt of Entomology, CCS HAU, Hisar

Welcome ceremony address by Prof. B. R. Kamboj, Vice-Chancellor, CCS HAU, Hisar during Advanced Faculty Training "Advances in Biology, Conservation, Rearing and Management of *Apis* & non-*Apis* bees" from 4th -24th October, 2019 at CCS HAU, Hisar

Practical of honey bee colony handling during Advanced Faculty Training-2019 at apiary of Deptt of Entomology, CCS HAU, Hisar

Trainee participant handling honey bee colony during Advanced Faculty Training-2019 at apiary of Deptt of Entomology, CCS HAU, Hisar

Valedictory Function of Advanced Faculty Training on "Recent trends in pests status, pesticide usage and pest management Strategies in Agriculture" during 2018 at Deptt of Entomology, CCS HAU, Hisar

B. Sc. Ag. (Hons) students dealing with *Apis mellifera* colony during "Bee keeping Module- 2023" at Apiary of Dept. of Entomology, CCS HAU, Hisar

Ms. Sindhu Sheoran got first position at Hawkesbury Institute for the Environment (HIE) 3MT competition held on 14th July, 2022. She won the People's choice award for her talk on "Evaluating relationships between floristic diversity and pollinator communities in agro-ecosystems". Sindhu represented HIE and her name was also included in the R2 honour board of the Western Sydney University, Australia. She is a Ph.D. student of Department of Entomology, CCS HAU, Hisar and doing her research work at WSU under dual degree programme of the University. Earlier in 2019, Hounorable Vice-Chancellor and President Prof. Barney Glover, WSU, Australia formalised the dual degree partnership agreements with ICAR and CCS HAU, Hisar.

Vice Chancellor & President Prof. Barney Glover awarding first position certificate to Ms. Sindhu Sheoran, at Hawkesbury Institute for the Environment at Western Sydney University, Australia in July, 2022.

# Programme - 7

## M. Sc. Extension Education

## and

## Ph.D. Extension Education

## 6.4 About the Department

The Department of Extension Education came into existence in 1963 in the College of Veterinary Sciences. The Department of Extension Education was established under the Extension Wing scheme of the Government of India to carry out teaching and research activities in Extension Education besides undertaking field extension work in the adopted villages. After the establishment of College of Agriculture in 1962, the Government of India sanctioned another scheme whereby the teaching, research and field activities were also strengthened in agricultural extension including the commencement of M.Sc. and Ph.D. programme and the creation of the Directorate of Extension Education in the year 1970. Dr. J. C. Sharma was the founder Head of the Department. Presently, the Department of Extension Education besides undertaking research and extension activities is also looking after the teaching requirements of two colleges *viz*. College of Agriculture and College of Agricultural Engineering and Technology. The main objectives of the department are as under:

### Objectives of the Department

- To impart teaching in Extension Education to UG and PG students.
- To organize seminars, conferences and workshops on important issues.
- To carry out extension activities in the field using extension education methodologies and approaches.
- To acquaint the students with practical know how for conducting trainings and various kinds of demonstrations at farmers field.
- To undertake strategic and action researches.
- To provide advisory services through the extension staff working in the Directorate of Extension Education.

**6.4.1. Brief History of the Degree Programme:** *Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

M.Sc. and Ph.D. programme in Extension Education was initiated in the year 1970. Entry qualification for Master's programme is B. Sc (Agriculture). Minimum duration of the programme is 2 years and maximum duration is 4 years. Medium of instruction is English. Almost all the students after completing their degrees have joined in public or in private organizations, thus, 100 per cent placement is achieved. During the period under report 20 students have completed M. Sc programme out of which two are foreign nationals (*Annexure EXT-I*). Presently ten M. Sc students are on roll.

### Objectives of initiating M. Sc. programme:

- To produce quality and specialized professional in extension education in areas of transfer of technology, communication, adoption and diffusion of technologies of agriculture and allied fields
- To undertake strategic and action researches for development of agriculture and its allied fields especially assessment of constraints and adoption gaps of technologies, training need assessment of various stakeholders to help in designing the extension strategies for sustainable development of agriculture with accelerated growth and income of the farmers
- To inculcate agri-preneurship among the PG students.

### Accomplishments of M. Sc. programme:

- So far 206 M.Sc. students have passed out from the department.

- Out of these 20 M. Sc passed out students during the period under report, three students, *viz*., Mr Pankaj Pawar has joined as P O in the Bank, Mr. Amit has joined as Horticultue Development Officer in State department of Horticulture and Ms. Neelam Kumari joined as Assistant Professor in Sardar Vallabbhai Patel University of Agriculture and Technology, Meerut,
- Seven students opted for **higher studies (Ph.D.) during last five years** *(Annexure EXT-I*).

**Objectives of initiating Ph.D. programme:**

Ph.D. programme in the department was initiated during 1970.

- To develop understanding about recent advances in concept, approaches, models and theories of extension and communication.
- To undertake strategic and action researches for development of agriculture & its allied fields especially assessment of constraints and adoption gaps of technologies, training need assessment of various stakeholders help in designing the extension strategies for sustainable development of agriculture with accelerated growth and income of the farmers
- To produce quality and specialized professional in extension education in areas of transfer of technology, communication, adoption and diffusion of technologies of agriculture and allied fields.
- To inculcate agri-preneurship among the PG students.

**Accomplishments of Ph.D. programme:**

- The Department has conferred degree to 84 Ph. D. students till now. During the period under report 10 students have completed their Ph. D. programme and 10 are on roll.
- Out of 10 Ph. D. passed out students during the period under report, nine students have joined as Assistant Professor in various universities, one student joined as Subject Matter Specialist (SMS) and one student joined as assistant manager in NGO, Gurugarm and *(Annexureext-II).*
- During period under report 9 students have cleared UGC NET
- One students- Mr. Dharmender have been awarded UGC Rajiv Gandhi Fellowship

**Note:** List of students' publications is given in *Annexure EXT– II*

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programmeneed to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

One post of Associate Professor, six posts of Assistant Professor and equivalent in teaching, four in research and six in extension are sanctioned. There are 8 Professors/equivalents (Seven professors promoted under CAS and one is selected professor). Out of these four are posted in teaching, one in research, one at KVK Faridabad, one performing as Director Extension Education in Gandhi Bhawan, moreover, one as Director EEI Nilokheri. One Associate Professor is displaying the duties of Joint Director (Extension). The five Assistant Professors are working in different KVKs and one Assistant Scientist in the department in research scheme.

| S. No. | Sanctioned faculty | In Place* | Vacant | Faculty recommended by ICAR/UGC |
|---|---|---|---|---|
| 1 | Professor and equivalent (0) | 02 | - | 0 |
| 2 | Associate Professor and equivalent (1) | - | 01 | 01 |
| 3 | Assistant Professor and equivalent (6) | 02 | 02 | 03 |

*The number of faculty under Professors and Associate Professors also includes personal promotees under CAS.

Note: All the faculty of this programme is assigned the responsibilities for the multiple programmes.

### 6.4.3. Technical and Supporting staff

In the Department of Extension Education, there are 6 posts sanctioned for technical and supporting staff. In position there are 3 posts of technical and supporting staff.

| S. No. | Designation | Sanctioned | In Place* | Vacant | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|---|
| 1. | Assistant | 1 | 1 | - | 01 |
| 2. | SSS/Steno | 1 | 1 | - | - |
| 3. | Clerk | 1 | 1 | - | - |
| 4. | Project Operator | 1 | - | 01 | - |
| 5. | Messenger | 1 | - | 01 | - |
| 6. | Lab Assistant | 1 | 1 | - | 01 |
| Total | | 06 | 04 | 02 | 02 |

*The technical and supporting staff assigned the responsibilities for the multiple programmes need to be clearly marked

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

The department has well established UG and PG lab having multimedia facilities, two smart class rooms and departmental library**.** Hence, sufficient numbers of rooms/lab are there to meet the course curricula requirements.

### Specific Labs

| Name of Lab | Equipments | Purpose |
|---|---|---|
| **AV Lab** | Computer, LCD screen, sound system tables with 40 chairs display boards with exhibits. | Designing and printing of visual aids such as posters, charts etc. |

| | | |
|---|---|---|
| Departmental Library (Room No. 53) | Reference material, books, thesis etc are referred by PG students for preparation of assignments, synopsis and thesis work. | Used by teachers and PG students for preparation of assignments, synopsis and thesis work etc. |
| Lecture Room-4 | Interactive Panel with smart class room facility with sitting capacity of 70. | Used for UG and PG teaching. |
| Lecture Room-5 | Interactive Panel with smart class room facility with sitting capacity of 70. | Used for UG and PG teaching. |

**List of equipments at present available in the department:**

| S. No. | Name of equipment | Location/lab. No. |
|---|---|---|
| 1. | Computer with LCD Screen, 1 video camera, 3 still cameras, 2 TV/Monitor, VHS VCR, OHP, Slide projector, PA system. | AV Lab 5A |

**Theory and practical batches**

- At M.Sc level, the department offers 12 courses with practical components. There are limited seats in M.Sc. programme with an average intake of 4-5 students. Some courses are offered as minor courses for students of other departments. There is only one batch for theory classes and one batch for practical classes in all the courses with an average of 4-20 students.
- Similarly, at Ph.D. level there are limited seats in Ph.D. programmes. Hence, there is only batch for theory classes and one batch for practical classes in all the courses. For Ph. D. the department of Extension Education offers 09 courses of which 08 courses have practical components.

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

At PG level, besides imparting theoretical knowledge, students are provided practical skills and hands-on-training as per the curriculum requirements.

| Course No. | Credit Hours | Practical and Hands-on-training | How far students are getting desired practical and hands –on-training as per curriculum |
|---|---|---|---|
| **EXT 501*** | 1+1 | Extension education and its importance in Agriculture development and also to expose the students with various rural development programmes aimed at poverty alleviation.The students will be learning about the new innovations in the Agricultural Extension. | Students visit to Gram Panchayat to study on-going Rural Development Programmes, visit to KVK, NGO and extension centers of State Agricultural University and State Departments, Bottom up planning, report preparation and presentations programme for rural. |
| **EXT 502*** | 2+1 | Concept, meaning and process of communication and various methods and modern media of communication, information | Exercise different oral and write communication. Analyze communication studies under field conditions.Radio and |

| | | | |
|---|---|---|---|
| | | management and journalistic writing of various information materials. | TV journalism-script writing, layout, design and editing. Communication drills to improve oral communication skills. |
| **EXT 503*** | 2+1 | The students will earn innovation-diffusion-adoption process and factors influencing thereby. | Case studies as well as content analysis of adoption studies, identification of adopter categories on a selected technology, current farm technologies ,identification of opinion leaders ,study of factors affecting adoption, presentation of reports on adoption and diffusion of innovations. |
| **EXT 504** | 2+1 | The students will learn the Statistical Package for Social Sciences for choosing appropriate statistics for data analysis. | How to select and formulate the research problem, objectives and selection of variables. Developing the conceptual framework of research. Development of data collection devices. Testing their validity and reliability. Techniques of interviewing and collection of data, hands on experiences on SPSS, coding, tabulation and analysis. Writing of thesis and research articles. |
| **EXT 505*** | 2+1 | Students will gain knowledge on information and communication technologies and how these ICT tools can be used for Agricultural Extension. | Content analysis of ICT projects. Handling of ICT tools. Designing extension content. Online extension service. Project work on ICT enabled extension. Creation of extension blogs. Visit to ICT extension projects. |
| **EXT 506** | 2+1 | The planning and development of enterprises for extending sustainable livelihoods for rural people. To help the students to gain knowledge and skills in different concepts and techniques of management in extension organizations. | Field visit to Successful enterprises- Development of Project Proposal–case studies of success/failure enterprises-exercise on market survey-field visit to financial institutions- Simulated exercise to understand management process-Field visit to extension organizations. Group activity on leadership development skills. |
| **EXT 507** | 2+1 | To orient the students about key concepts, importance, scope & conceptual frame work, growth & development of Human Resource Development. | Gain expertise by visiting different training organization store view ongoing activities & facilities; analysis of training methods followed by training institutions for farmers and extension workers studies. Study of HRD in organization in terms of performance, organizational development, employees welfare. |
| **EXT 508** | 2+1 | Designing the message, graphic formats and devices and presentation of data. Low cost visuals. Exposure of the students to various Digitized video material in multimedia. | Preparation of low cost projected and non-projected visuals. Designing and layout of charts, posters, flashcards etc. Power point presentations. Generating computer aided presentation graphics. Scanning and evaluation of visuals. |
| **EXT 509** | 1+1 | This course is to orient the student different participatory approaches for technology development and transfer and also to expose | Simulated exercises on space related methods, time related method and relation oriented methods; |

| | | | |
|---|---|---|---|
| | | the students with various participatory tools and techniques likes pace related, time related, relation orientedmethods. | documentation of PTD and dissemination; Preparation of action plan; participatory monitoring and evaluation of developmental programmes. |
| **EXT 510** | 2+1 | To learn about an overview of the concept of gender, their rights, responsibilities and relationships on development. The students will also learn the gender equity concerns as fundamental human rights in agriculture and allied sectors. | Through visits to rural institutions engaged in Women empowerment and SWOT analysis of the unit; visit to center for women development-NIRD to study the different activities. Visit to gender cell office of the Commissioner and Director of Agriculture, Hyderabad, to study the mainstreaming of gender concerns . |
| **EXT 511** | 1+1 | The course is intended to orient the students with the concept of distance education, characteristics of distance education, evolution, methods of distance education, different approaches in planning distance education, educational technology, managements of resources for distance education. | To visit the university, this is implementing the distance education programmes. Detailed study of their programme in relation to educational technology, methodology, curriculum development, evaluation and assessment. Exercise on development of curriculum for distance education exclusively for farming community. |
| **EXT 601** | 2+1 | Understand agricultural knowledge information system (AKISs) ITK. Advances in extension, ICT enabled extension services; Market led extension, public private partnership, implications of WTO-understand extension reforms and farmer field schools, ATMA, FSBE & CIGs etc., ATIC, IVLP & Kisan Call Centres. | Analysis of ITK systems, integration of ITK and formal research system, analysis of cases on cyber extension and privatization of extension. Analysis of ATMA and SREP. Practicing bottom up planning. Visit to public-private-farmer partnership. Food and nutritional security and bio-diversity projects and programmes. |
| **EXT 602** | 2+1 | Develop & standardize attitude scale using different techniques of attitude scale construction.<br>Develop skills of using projected & semi projected techniques, computer package analysis and participatory tools in Extension Research. | Practice in constructing and use of scale in various situations. Reliability and validity of the scales developed, application of semi projective and projective techniques. Content analysis, case studies. Practicing participatory tools and techniques. Hands on experience on computer preparation and data collection instruments. |
| **EXT 603** | 2+1 | Plan and design a training programme, plan & develop effective training sessions, manage difficult situations while organizing training programmes, use different advanced participatory training methods. | Techniques of participatory training need assessment. Formulation of course objective, design of training programmes. Simulation exercises. Participatory training methods role play& brainstorming, Group discussion and counseling and conducting experiential learning sessions. Training evaluation. Visit to training institutions and study of training technologies followed. |

| | | | |
|---|---|---|---|
| **EXT 604** | 2+1 | Understand & study the organization in terms of types, characteristics, needs, motives, organizational behaviour, organizational communication, organization development and to analyze the factors affecting organizations | Analysis of organization in terms of process-attitudes and values, motivation, leadership. Simulation exercises on problem-solving-study of organizational climate and organizational structure of development departments, study of departmentalization, span of control delegation of authority, decisions making patterns. |
| **EXT 605** | 2+1 | Understand agricultural education scenario in the country and curriculum development process plan & prepare course outline, lesson plan & skill plan. Develop appropriate teaching & learning styles. Use of innovative instructional aids & methods. | Formulation of instructional course objectives. Development and presentation of course outlines. Preparation & presentation of lesson plans for theory & practical with CAI design. Preparation of innovative low cost instructional aids. Development of model question bank. Preparation of schedule for teacher evaluation. Visit to distance education centre. |
| **EXT 607** | 1+1 | To help the students to know the concept, evaluation, history, classification, various media for advertising, socio-economic effects of advertising, trends in advertising and marketing, Govt. policy on advertising and marketing and to develop competency in creating advertisements for mass communication. | Visit to advertising agencies, advertising layout techniques for newspaper, radio, posters, TV, hoardings, wall paintings, case studies on institutional advertisement, advertisement campaign. |
| **EXT 608** | 2+1 | To familiarize the students with the working of print, electronic, News Media& Traditional folk media. To develop working skills for Print, Radio and T.V. Journalism to reach farming community and writing skills for different media. | Exercise on writing for print media–writing news/success stories/feature articles for different topics related to Agriculture & allied fields. Exercise of editing & proof reading the farm news for newspapers and script writing for Radio and T.V. Visit to media management organizations developing communication & media strategy for selected developmental programme / activity. |
| **EXT 609** | 2+1 | Develop understanding on different systems of technology transfer, develop appropriate communication & media strategy suitable to the system of technology transfer, analyse the constraints in systems of transfer technology and suggest suitable strategies. | Analysis of transferred technology and knowledge generation and consuming ystems. Formulation of communication strategies, study of attributes of selected fast spreading technologies, visit to TOT centers of ICAR and SAU, identification of key communicators, case studies of public-private partnerships |

*****Details of courses offered by the department is given in *Annexure EXT-III*

**6.4.6. Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

There is limited number of seats in M.Sc. & Ph.D. programmes. Hence the teacher student ratio is very low.

**Supervision of M.Sc. students in the Department:**

| Year | Number of PG faculty | Number of students on roll | Student-Teacher- Ratio |
|---|---|---|---|
| 2018-19 | 16 | 09 | 0.56:1 |
| 2019-20 | 19 | 10 | 0.52:1 |
| 2020-21 | 19 | 09 | 0.47:1 |
| 2021-22 | 17 | 09 | 0.52:1 |
| 2022-23 | 20 | 08 | 0.40:1 |

**Supervision of Ph.D. students in the Department:**

| Year | Number of PG faculty | Number of students on roll | Student-Teacher-Ratio |
|---|---|---|---|
| 2018-19 | 16 | 10 | 0.62:1 |
| 2019-20 | 19 | 13 | 0.68:1 |
| 2020-21 | 19 | 11 | 0.57:1 |
| 2021-22 | 17 | 08 | 0.47:1 |
| 2022-23 | 20 | 09 | 0.45:1 |

**6.4.7. Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feedback?*

There is a system of annual self appraisal report (SAR) with respect of all faculties. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice-Chancellor. The performance of the faculty is also reviewed on the basis their results and feedback from the students. Students of Professional Elective course are placed in different institutions under RAWE program. Teachers visit these institutions during training period of students and conduct meetings with authorities of the institutes. Any suggestions provided by them are incorporated in the curriculum. The stakeholders' feedback on the overall performance and quality of the institutions is obtained through general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are conveyed to the HODs and controlling officers.

**6.4.8. Student Intake and attrition in the programme for last five years**

| Programme | No. of students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 06 | 07 | 05 | 05 | 04 | 16.00 | - | - | - | - |
| Ph. D. | 02 | 04 | 02 | 04 | 03 | - | - | - | - | - |

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of the Department of Extension Education use ICT in teaching and practical for curricula delivery. All faculty members have computer printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. The faculty members use PPT, Internet, e-learning modules, smart classroom, digital cameras, e-mail, Whats App groups, CD ROMs etc in UG, PG (M.Sc. and Ph. D) teaching.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean, Surender K. Pahuja hereby certify that the information contained in the Section 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

# DETAILS OF COURSES OFFERED BY THE DEPARTMENT

## M. Sc. Courses

| Course No. | Course title | Credit hrs. | Semester |
|---|---|---|---|
| **EXT 501*** | Development perspectives of extension education | 1+1 | I |
| **EXT 502*** | Development communication and information management | 2+1 | I |
| **EXT 503*** | Diffusion and adoption of innovations | 2+1 | I |
| **EXT 504*** | Research methods in behavioral sciences | 2+1 | II |
| **EXT 505*** | E-extension | 2+1 | II |
| **EXT 506** | Entrepreneurship development and management in extension | 2+1 | II |
| **EXT 507** | Human resource development | 2+1 | I |
| **EXT 508** | Visual communication | 2+1 | I |
| **EXT 509** | Participatory methods for technology development and transfer | 1+1 | II |
| **EXT 510** | Gender sensitization for development | 2+1 | II |
| **EXT 511** | Perspectives of distance education | 1+1 | II |
| **EXT 591** | Master's seminar | 1 | I, II |
| **EXT 599** | Master's research | 20 | I, II |

** Compulsory for Master's programme*

## Ph.D. Courses

| Course No. | Course title | Credit hrs. | Semester |
|---|---|---|---|
| **EXT 601**** | Advances in agricultural extension | 2+1 | I |
| **EXT 602**** | Advanced design and techniquesin social science research | 2+1 | I |
| **EXT 603**** | Advances in training technology | 2+1 | II |
| **EXT 604** | Organizational development | 2+1 | II |
| **EXT 605** | Advanced instructional technology | 2+1 | I |
| **EXT 606** | Comparative extension | 3+0 | II |
| **EXT 607** | Advertising and marketing communication | 1+1 | I |
| **EXT 608** | Media management | 2+1 | I |
| **EXT 609** | Transfer of technology in agriculture | 2+1 | II |
| **EXT 691** | Doctoral seminar I | 1 | I, II |
| **EXT 692** | Doctoral seminar II | 1 | I. II |

*** Compulsory for Doctoral programme*

# Programme - 8

**M.Sc. Forestry**

**and**

**Ph.D. Forestry**

## 6.4 About the Department

Department of Forestry was established on 16.2.1982 to strengthen farm forestry research. Later, B.Sc. Forestry 4 year programme was started from 1986-87 as an initiative from ICAR with the objective to produce forestry trained graduates. However, B.Sc. (Forestry) was discontinued from academic year 1990-91 due to insufficient demands of forestry trained personnel at that time in the forestry sector. However the situation has changed now due to flourishing of wood industries which require particular forestry trained graduates to fulfill their multidimensional demands that arise from various forestry sectors.

M.Sc. Agroforestry programme was started from 1990-91 with intake capacity of 3 students and from 1998-99 Ph.D. Agroforestry Programme was also started. Since then 87 students have completed M.Sc. and 30 students have got Ph.D. degree from the Department of Forestry. Presently, Department of Forestry has M.Sc. Forestry and Ph.D. Forestry programmes under College of Agriculture. The department offers two undergraduate core courses to the B. Sc. (Hons) Agriculture under commercial Agriculture. The department of Forestry also offer two undergraduate core courses as per 5$^{th}$ Dean's committee recommendations. At PG level the department offers 11 M.Sc. and 08 Ph.D. courses.

The department has well qualified and experienced faculty members having vast experience and international exposure. All faculty members have obtained Ph.D. degree. Faculty members are using latestliterature and books for teaching to UG and PG classes. Teachers are using modern audio-visual aids & proper equipment for practical demonstration. Major emphasis is given for practical learning. Faculty of the Department is actively involved in academic pursuits at National and International levels.

Objectives of the Department

- To impart knowledge of forestry to students through course work, demonstration, practical work, seminar and thesis research work.
- To conduct research on different aspects of forestry.
- To disseminate the latest technology and extension activity of forestry/agroforestry

### 6.4.1 Brief History of the Degree Programme: *Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

B.Sc. Forestry programme was started from 1986-87 as an initiative from ICAR with the objective to produce forestry trained graduates. However, B.Sc. (Forestry) was discontinued from academic year 1990-91 due to insufficient demands of forestry trained personnel at that time in the forestry sector. Total 55 students completed B. Sc. (Forestry) degree programme in four batches (1990-1993). M.Sc. Agroforestry programme was started from 1990-91 with intake capacity of 3 students; and from 1998-99 Ph.D. Agroforestry Programme was also started. Since then 87 students have completed M.Sc. and 30 students have got Ph.D. degree from the Department of Forestry. Presently, Department of Forestry has M.Sc. Forestry and Ph.D. Forestry programmes under College of Agriculture.

**Objectives of initiating M.Sc. programme**

- To impart knowledge of forestry to students through course work, demonstration, practical work, seminar and thesis research work

- To conduct research on different aspects of forestry
- Research work on development of Agroforestry Models
- Tree Improvement work for development of genetically superior reproductive material
- Nursery technology for production of quality planting stock
- Production Technology for maximization of production and productivity of forest tree products

**Accomplishments of M.Sc. programme**

M.Sc. Agroforestry programme was started from 1990-91 with intake capacity of 3 students. Presently, Eight students (6 at COA Hisar + 2 at COA Bawal) are admitted every year in M.Sc. Forestry Programme. Department of Forestry has M.Sc. Forestry programme under College of Agriculture. Admission requirement for M.Sc. Forestry is B.Sc. (Hons.) Forestry or B.Sc. (Hons.) Horticulture or B.Sc. (Hons.) Agriculture. The students coming from non forestry stream have to complete 05 deficiency courses of 10 credit hours. All the postgraduate students who have completed their M.Sc. degree from the department are very well placed in Govt. /Private Sector/SAUs/NGOs/State Agriculture Dept/ Military and Para Military Forces. Most of students who completed M.Sc. during last five years have joined Ph.D. programme.

**Objectives of initiating Ph.D. programme**

- To impart knowledge of forestry to students through course work, demonstration, practical work, seminar and thesis research work
- To conduct research on different aspects of forestry:
- Research work on development of Agroforestry Models
- Tree Improvement work for development of genetically superior reproductive material
- Nursery technology for production of quality planting stock
- Production Technology for maximization of production and productivity of forest tree products

**Accomplishments of Ph.D. programme**

- Ph.D. Agroforestry programme was started from 1998-99 with intake capacity of 2 students. Presently, Department of Forestry has Ph.D. Forestry Programme with an intake capacity of three (2 at COA Hisar + 1 at COA Bawal ). Department of Forestry has Ph.D. Forestry programme under College of Agriculture. Admission requirement for Ph.D. Forestry is M.Sc. in Forestry/Agroforestry. All the postgraduate students who have completed their Ph.D. degree from the department are very well placed in Govt. /Private Sector/SAUs/NGOs. Three of the students who have completed their Ph.D. have joined as Assistant Professor in SAUs in last five years *(Annexure FOR-IV).* Details of students award received during the period under report are presented in the *Annexure FOR-II.* List of student's publication is presented in *Annexure FOR-III.*

**6.4.2 Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise,both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or anyother arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Sanctioned faculty | In Place* | Vacant | Faculty recommended by ICAR/UGC |
|---|---|---|---|---|
| **1** | Professor and equivalent (1) | 9 | - | - |
| **2** | Associate Professor and equivalent (1) | 1 | - | 1 |
| **3** | Assistant Professor and equivalent (15) | 7 | - | 3 |

*The number of faculty under Professors and Associate Professors also includes personal promotees under CAS.

Note: All the faculty of this programme is assigned the responsibilities for the multiple programmes.

**6.4.3 Technical and Supporting staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

In the Department of Forestry, there are 15 posts sanctioned for technical and supporting staff. Inposition there are 12 posts of technical and supporting staff. One post of AI, one beldar and one Driver are lying vacant.

| S. No. | Designation | Sanctioned | In Place | Vacant | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|---|
| 1. | Assistant/Steno | 02 | 02 | Nil | 01 |
| 2 | Clerk | 01 | 01 | Nil | 01 |
| 3. | Lab Asstt./Technician/ Attendants | 01 | 01 | Nil | 04 |
| 4. | Anyother (specify) Senior Technical Assistant | 01 | 01 | - | - |
| 5. | Anyother (specify) Agriculture Inspector/Beldars/Driver | 10 | 07 | 03 | - |
| | **Total** | **15** | **12** | **03** | **06** |

**Note:** All the staff members were assigned the responsibilities for the multiple programmes.

**6.4.4 Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

The department of Forestry has one PG lab and one seminar room. There is one seminar room equipped with LCD and internet facility. The Department has sufficient area in nursery and farm for conducting experiments on Research work on development of Agroforestry Models, Tree Improvement work for development of genetically superior reproductive material, Nursery technology for production of quality planting stock and Production technology for maximization of production and productivity of forest tree products.

**List of classroom and functional laboratories**

| | |
|---|---|
| No. of lecture rooms with sitting capacity | One , Sitting capacity: 20 |
| No. of lecture rooms with LCD | 1 |
| No. of labs with specialized purpose | 2 |
| Farm facilities | • Above 90 acre including nursery area<br>• The facilities of mist propagation unit exist in thenursery area. |

**List of equipments at present available in the department**

| S.No. | Name of equipment | Location |
|---|---|---|
| 1. | Mist Chamber | Nursery Area |
| 2. | Compound microscope with USB Camera | Departmental laboratory |
| 3. | Chlorophyll content meter | |
| 4. | Muffle Furnance | |
| 5. | BOD incubator (2 no) | |
| 6. | Analytical balance | |
| 7. | Soil moisture sensor | |
| 8. | Time lapse camera | |
| 9. | Seed Germinator | |

**Theory and practical batches**

At UG level, the Department of Forestry offers two courses i.e. FOR 101 (Introduction to Forestry), FOR 201 (Environmental Studies and Disaster Management) which have practical components. For practicals of these courses, two groups are made from each batch.

At M.Sc. level, the Department of Forestry offers 11 courses and out of these 09 courses (excluding deficiency courses) have practical components. There are limited seats in M.Sc. programme with an average of 8 students (including COA, Bawal). There is only one batch for theory and practical classes in all the courses.

Similarly, at Ph.D. level there are 03 seats (including COA, Bawal). Hence, there is only batch for theory classes and one batch for practical classes in all the courses. For Ph.D., the department of Forestry offers 8 courses and out of these 6 courses have practical components.

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical Courses/ Hands-on-training | How far students are getting desired practical andhands-on-training as per the curriculum |
|---|---|---|---|
| **M.Sc.** | 11 | 9 | • Learnt calculations of volume of felled as well as standing trees.<br>• Learnt how to prepare volume table.<br>• Understood the application of sampling procedures of standing trees.<br>• Prepared yield and stand table.<br>• Exposure for estimation of cell wall contents – hemicellulose and lignin<br>• Practiced for extraction of essential oils, resins, tannins and acetylation of wood.<br>• Visited to nearby forest based industries.<br>• Learnt the concept of forest community structure and its successional status<br>• Learnt about estimation of productivity of forest ecosystem<br>• Collected and preserved of specimens.<br>• Performed vegetation analysis<br>• Performed the measurement of biomass and productivity<br>• Quantified litter production and decomposition.<br>• Demonstration through video of national parks, wildlife sanctuaries, botanical gardens and arboreta.<br>• Surveyed and analysed land use systems in the adjoining areas.<br>• Depending upon outcome of survey and analysis suitable Agroforestry models were suggested for improvement of overall productivity.<br>• Collected identified and preserve important insect pests and disease specimens of forest plants.<br>• Detected insect infestation and seed borne mycoflora.<br>• Assessed losses due to diseases, insect pests etc.<br>• Observed habitat management of vertebrate pests.<br>• Tested in laboratory for estimating decay resistance in wood.<br>• Learnt about fire control methods and device<br>• Familiarized with the meteorological and plant protection equipment.<br>• Applied pesticides and bio-control agents in the management of insect pests, weeds, diseases in nurseries and plantations<br>• Extracted spores of arbuscular mycorrhizal (AM) fungi from soil and assessment of mycrorrhizal root infection.<br>• Studied practically floral biology, modes of reproduction and modes of pollination in forest trees.<br>• Studied practically pollen viability. Controlled pollination and pollen handling.<br>• Practiced manipulation of flowering through hormones.<br>• Identify the demarcation of ecotypes, races, and land-races in natural forest.<br>• Understood the experiment layout of species, provenance and progeny trials. Selection of superior phenotypes.<br>• Practiced marking of candidate trees, plus trees and elite trees. Students understood the concept of seed orchards.<br>• Compared of parents and their putative hybrids on the basis of important characters. |

| | | | |
|---|---|---|---|
| | | | • Iinduction score of polyploidy through colchicine treatment.<br>• Students got clarifications for plantation problems in Asia and India<br>• Reasons were explained to students about variation in plantation time.<br>• Planning of plantation programme, planting geometry and calculation of planting stock were described to students.<br>• Practiced for different cultural operations and site preparation for plantation.<br>• Prospects of wood based industries were described to students with examples.<br>• Management of Eucalyptus, Sissoo, Teak, Melia sp, Poplar, Acacias, Ailanthus and Bamboo plantations were described to students.<br>• Visited energy plantation for understanding production technology.<br>• Economics of plywood, pulpwood, timber and energy plantations was worked out by students.<br>• Demonstration on agro-forestry production relationships was organised.<br>• Preparation of enterprise, partial and complete budgets was discussed with student with examples.<br>• Case studies in formulation and appraisal of agro- forestry projects were described to students.<br>• Case studies on harvesting, post harvest management and marketing of agro-forestry products were discussed.<br>• Half-sib, full-sib family in trees were discussed with students.<br>• Grading system of plus trees in natural stands were practiced by students.<br>• Mating designs, complete designs – nested designs, factorial, single pair mating, full diallel, half diallel and partial diallel, incomplete pedigree designs – open pollinated mating and polycross mating were described with examples.<br>• Selected plus trees for biotic and abiotic stresses. |
| **Ph.D.** | 8 | 6 | • Students were given assignment on important trees for growth characteristics and effect of temperature, nutrients and water stress on growth behaviour of nursery plants along with preparation of growth and increment curves. All the aspects were discussed with students by including one tree species per week.<br>• Cytology of pine root tips was discussed with students with latest literature.<br>• Kryotypic analysis was discussed with students with latest literature.<br>• Mutagenic treatments with colchicine and MH were discussed with students with latest literature.<br>• Tissue culture of organs, and transformation experiments were discussed with students with latest literature.<br>• Resin tapping was discussed with students with latest literature.<br>• Observation of trees for menoecium and dioecium were discussed with students with latest literature.<br>• Diagnosis and design investigations were discussed with students with latest literature.<br>• Discounting in Agroforestry was discussed with students with latest literature. |

| | | | |
|---|---|---|---|
| | | | • Valuation of input and output and case study on B:C ratios for community forestry were discussed with students with latest literature.<br>• Scoring for multiple uses of different species and listing a hundred species of tropical origin were described.<br>• Market trends in tree based products were discussed with students with latest literature.<br>• Study of impact of agroforestry/social forestry on wildlife, Birds and small animals were discussed with students with latest literature.<br>• General of ergonomic data from Agroforestry practitioners in farmlands were discussed with students with latest literature.<br>• Farmers responses to Agroforestry/community forestry were discussed with students with latest literature.<br>• Studies on light and shade effects of trees on under storey plants were discussed with students with latest literature.<br>• The role of voluntary agencies/industries in promoting afforestation programmes were discussed with students with latest literature.<br>• The impact of training to farmers, agricultural officers and others in promoting Agroforestry was discussed with students with latest literature.<br>• Visit to agave & biofuel plantations and report on its management practices was discussed with students.<br>• Wasteland development, Fuel wood plantations, biomass productivity assessment and develop models for rehabilitation of saline and alkaline areas were discussed with students with latest literature.<br>• Studies on structure and functions of forestry interventions were discussed with students with latest literature.<br>• Analysis of the micro- environmental attributes viz. temperature, humidity, solar radiations, soil erosion, in-situ measurement of sediment load in native water bodies, native fauna and flora, measurement of particulate air pollutants and other gases were discussed with students with latest literature.<br>• Study of components of silvicultural system for sustained yield was discussed with students with latest literature<br>• Management strategies for even aged and uneven aged stands were discussed with students with latest literature<br>• Choice of site preparation methods, Plantation map, Quality planting stock, Planning for tree planting, Release cutting operation, Selection of thinning methods, Intensity of thinning, Analysis of site quality and biomass production for timber, pulp wood and fuel wood species, Problems in silviculture in tropical, subtropical plantation and their solutions were discussed with students with latest literature.<br>• Phenological studies in forest trees, nectar collection and analysis, pollination trapling distances, foraging behaviour, pollinator identification and visitation, were discussed with students with latest literature |

**6.4.6. Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D. Programme (as per ICAR/UGC guidelines). Mention the realisticfigure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Supervision of M.Sc. students in PG programme offered by the Department**

| Year | No. of students on roll | No. of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 10 | 17 | 0.58:1 |
| 2019-20 | 10 | 17 | 0.58:1 |
| 2020-21 | 11 | 17 | 0.65:1 |
| 2021-22 | 12 | 17 | 0.70:1 |
| 2022-23 | 14 | 17 | 0.82:1 |

**Supervision of Ph.D. students in Ph.D. programmes offered by the Department**

| Year | No. of students on roll | No. of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 07 | 17 | 0.41:1 |
| 2019-20 | 11 | 17 | 0.65:1 |
| 2020-21 | 10 | 17 | 0.58:1 |
| 2021-22 | 12 | 17 | 0.70:1 |
| 2022-23 | 11 | 17 | 0.65:1 |

**Note:**The detail of courses offered by the Department is given in *Annexure FOR-I*

**6.4.7 Feed back of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feedback?*

There is a system of annual self appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice- Chancellor of the University. The performance of the faculty is also reviewed on the basis of their results, feedback from the students. The stakeholders' feedback on the overall performance and quality of the institutions is obtained through general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are conveyed to the HODs and controlling officers.

**6.4.8. Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the degree programme | No. of students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Sc.** | 6 | 6 | 8 | 8 | 8 | 0 | 16.66 | 0 | 12.50 | 12.50 |
| **Ph. D.** | 4 | 4 | 4 | 3 | 3 | 25.0 | 0 | 0 | 0 | 0 |

**6.4.9 ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of Department of Forestry use ICT in teaching of theory and practical. There is one Seminar Room with computer, LCD projector and internet connection. All faculty members have computer with printer and internet connection in their offices. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, YouTube, emails and CD ROM in teaching all courses at UG and PG level. Teachers used to send important study material (including ppts) through email/ERP portal to M.Sc. and Ph.D. students.

| Courses | Total courses | Theory | Practical | Type of ICT Application |
|---|---|---|---|---|
| **M.Sc.** | 11 | For. 501<br>For. 502<br>For. 503<br>For. 504<br>For. 505<br>For. 506<br>For. 507<br>For. 508<br>For. 509<br>For. 510<br>For. 511<br>For. 591 | For. 502<br>For. 504<br>For. 505<br>For. 506<br>For. 507<br>For. 508<br>For. 509<br>For. 510<br>For. 511 | • Power point presentation and documentaries on Forestry practices<br>• LCD Projector with Computer assembly in the Lecture Room for teaching of theory classes.<br>• Well equipped Forestry laboratory with good quality microscope, camera facilities |
| **Ph.D.** | 8 | For. 601<br>For. 602<br>For. 603<br>For. 604<br>For. 605<br>For. 606<br>For. 607<br>For. 608<br>For. 691<br>For. 692 | For. 601<br>For. 602<br>For. 604<br>For. 605<br>For. 606<br>For. 607 | • Power point presentation and documentaries on Forestry practices<br>• LCD Projector with Computer assembly in the Lecture Room for teaching of theory classes.<br>• Well equipped Forestry laboratory with good quality microscope, camera facilities |

**6.4.10** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and PhD Degree Programmes, separately, and to be presented College-wise.

**6.4.11** Since the accreditation of Programmes is related to the All India Admission from ICAR and alsohaving weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean , Surender K. Pahuja hereby certify that the information contained in the Section 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

*Annexure FOR-I*

## COURSES OFFERED BY THE DEPARTMENT

| Semester I | | |
|---|---|---|
| **Course No.** | **Title of Course** | **Credit hrs.** |
| For. 101 | Introduction to Forestry | 2+1 |
| For. 201 | Environmental Studies and Disaster Management | 3+0 |
| For. 451 | Principle and Practices of Silviculture | 2+0 |
| For. 452 | Forest Mensuration | 1+1 |
| For. 453 | Principles of Tree Improvement | 1+1 |
| For. 454 | Wood Products and Utilization | 1+1 |
| For. 455 | Forest Management, Policy and Legislation | 1+1 |
| For. 503 | Forest Management | 2+0 |
| For. 505 | Forest Ecology and Biodiversity Conservation | 2+1 |
| For. 511 | Breeding Methods in Forest Trees | 2+1 |
| For. 591 | Masters Seminar | 1+0 |
| For. 603 | Advances in Wood and Non-Wood Forest Products | 3+0 |
| For. 605 | Forestry Interventions for Environment Amelioration | 1+1 |
| For. 607 | Advances in Forest Reproductive Biology | 1+1 |
| For. 608 | Advances in Agroforestry Research and Management | 2+0 |
| For. 691 | Doctoral Seminar-I | 1+0 |
| For. 692 | Doctoral Seminar-II | 1+0 |
| **Semester II** | | |
| For. 501 | Silviculture | 2+0 |
| For. 502 | Forest Biometry | 1+1 |
| For. 504 | Forest Products – Chemistry and Industries | 1+1 |
| For. 506 | Agroforestry Systems | 1+1 |
| For. 507 | Forest Protection | 1+1 |
| For. 508 | Tree Improvement | 1+1 |
| For. 509 | Plantation Forestry | 2+1 |
| For. 510 | Economics of Agroforestry Systems | 2+1 |
| For. 591 | Masters Seminar | 1+0 |
| For. 601 | Quantitative Silviculture | 2+1 |
| For. 602 | Advances in Tree Improvement | 2+1 |
| For. 604 | Agroforestry Systems and Management | 1+1 |
| For. 606 | Advances in Silviculture | 1+1 |
| For. 691 | Doctoral Seminar-I | 1+0 |
| For. 692 | Doctoral Seminar-II | 1+0 |

***Annexure FOR- II***

| Sr. No. | Name of student | Award Detail |
|---|---|---|
| **1.** | Kajal, 2018A27D | Best Thesis Award-2019 on the occasion of International Conference Global Perspective in Agricultural and Applied Sciences for Food and Environmental Security (GAAFES-2019) at UGC- HRDC Hall, Kumaun university, Nainital ,Uttarakhand, India. (1-2 December, 2019) |
| **2.** | Krishma Nanda, 2019A38D | Oral presentation award during Agmet 2020 |
| **3.** | Krishma Nanda, 2019A38D | Oral presentation award during Agmet 2022 |
| **4.** | Mamta Khaiper, 2020A34D | Participated in Prof. M.J. Narashiman Merit Academic Award Contest and received First Rank at North Zone of India |
| **5.** | Rawale Gauri, 2020A36D | Best Poster Presentation Award during IV$^{th}$ International Conference on Innovative and Current Advances In Agriculture and Allied Sciences held at Shimla (H.P) |
| **6.** | Monika, 2020A35D | 3$^{rd}$ Prize in Poster Presentation during ISPP North Zonal Seminar-2022 on 'Inter-Disciplinary Research Strategies for Climate Resilient Agriculture' |

**Krishma Nanda, 2019A38D Receiving Oral Presentation Award during AGMET 2022**

*Annexure FOR- III*

## LIST OF PUBLICATIONS

| S. No. | Details of the publication | NAAS Rating |
|---|---|---|

# Programme - 9

## M.Sc. Genetics & Plant Breeding

## and

## Ph.D. Genetics & Plant Breeding

## About the Department

The Department of Plant Breeding which Chaudhary Charan Singh Haryana Agricultural University inherited from its predecessor Punjab Agricultural University in 1963 is now the biggest department in terms of infrastructure, manpower and annual budget. The department has played an active and decisive role in shaping green revolution and transforming the economy of the Haryana State. The adoption of the crop varieties by the farmers has become quite visible as the State has not only realized self-sufficiency in food grain requirements, but also the 2nd largest contributor to the central food reserves. The department of Genetics and Plant Breeding has undertaken the responsibility of teaching, research and extension education activities in the field of crop improvement for the entire state of Haryana. The main thrust is on the research activities for developing high yielding varieties of different crops in the background of resistant to biotic and abiotic stresses. Therefore, yield and quality improvement with improved resistance for different agro climatic conditions is a major challenge as well as major objective of plant breeders. The department has released/identified 229 crop varieties of different crops and developed location specific production and protection technologies of these crop varieties. Out of which 117 were released at National and 112 at State level.

Besides these, breeding for quality and nutritional value in various crops have been recently strengthened in wake of export potential *vis-à-vis* market needs. Notably among them are low erucic acid and glucosinolates in Brassicas, high protein content in bread wheat, high aroma and low amylose in rice, increased shelf life in pearl millet flour, low anti-nutritional factors in pulses and forages, higher content of important secondary metabolites in medicinal and underutilized plants etc. are the frontier areas of research and the department got significant achievements in these areas. The department of Genetics, College of Basic Sciences & Humanities has been merged with the department of Plant Breeding, College of Agriculture *w.e.f.* 01.04.2010 and the department of Plant Breeding has been renamed as department of Genetics & Plant Breeding *w.e.f.* 01.04.2010.

The department at present has seven different sections, *viz*. Wheat & Barley, Bajra, Pulses, Oilseeds, Cotton, Forages and Medicinal, Aromatic & Potential Crops Section. Significant work was carried out on pearl millet, Pulses, Sorghum and oilseeds crops and the department has received appreciation and honoured as best performing research centers by ICAR in the country. The department has also contributed significantly towards generating human resource commensurate with present day needs of public and private sector by imparting contemporary teaching and reorienting post-graduate research. The active participation of the department in popularization and transfer of technology programmes through frontline field demonstrations, On-farm trials and trainings led to faster adoption of improved varieties by the farmers. The Bajra Section has developed three hybrids at National level during the period 2017-18 to 2021-22. Of these, two are biofortified HHB 299 and HHB 311 and one is marker-assisted selection derived hybrid HHB 67 Improved 2. The Centre takes pride in developing the first high iron & zinc biofortified bajra hybrid HHB 299 having high grain iron content (73 ppm) has been released for National A & B zone irrigated (Zone A -Rajasthan, Haryana, Gujarat, Madhya Pradesh, Punjab & Delhi and Zone B -Maharashtra and Tamil Nadu) of the country in the year 2018. AICRP on MULLaRP, IIPR, Kanpur conferred BEST CENTRE AWARD-2018 to Pulses Section for outstanding contribution in development of high yielding varieties of greengram. Forage & Bajra sections also received Best AICRP center award for the best AICRP center on Sorghum and pearl-millet respectively, during 2021-22. Best ICAR-AICRP on Pearl Millet Centre (2013-18) by ICAR was conferred during 53rd Annual Pearl Millet Workshop held at Agriculture University, Jodhpur (Raj) from March 22-24, 2018. Bajra Section also identified new disease namely Stem Rot of Pearl-millet incited by *Klebsiella aerogenes*.

Students experiments in the field

Scientist from Pulses Section receiving ICAR Best Centre Award (2018) for outstanding contribution in development of High Yielding Varieties of Greengram from Honourable Vice-President of India Sh. M. Muppavarapu Venkaiah Naidu.

Scientists' recognition by Vice-Chancellor, Prof. B. R. Kamboj for identification of new disease namely Stem Rot of Pearl-millet incited by *Klebsiella aerogenes* at global level.

Sorghum team scientists' recognition by Vice-Chancellor, Prof. B.R. Kamboj for receiving ICAR Best Performing Main Centre Award of Sorghum (2021-22).

## Objectives of the Department

- To impart theoretical knowledge of Genetics & Plant Breeding to the students through course work, demonstrations, practical exercise and seminars
- To guide PG research work, demonstrations, practical exercise and seminars
- Development of improved varieties/hybrids of cereals, pulses, oilseeds, cotton, forages, medicinal and under-utilized plants for different farming systems
- Development of cultivars/hybrids for various biotic and abiotic stresses
- Development of varieties/hybrids for quality traits

- Maintenance and characterization of germplasm for released, pre-released varieties.
- Genetic enhancement for heat tolerance, lodging resistance, water and nutrient use efficiency in various food and fodder crops
- Incorporation of multiple disease resistance in high yielding and wider adaptable genotypes
- Precision breeding through use of pre-breeding, systematic parent building and rapid generation advance in off-season nurseries.
- Demonstration of technology at farmer's field
- Seed production of released/recommended varieties

**6.4.1 Brief History of the Degree Programme:** *Clearly mention in which year the degree program was initiated along with its objective and accomplishments:* Year of start: 1970

| | |
|---|---|
| Objectives of initiating M.Sc. programme | • To impart practical knowledge of plant breeding to the students through course work, demonstrations, practical exercise and seminars.<br>• To guide PG research work, demonstrations, practical exercise and seminars.<br>• To develop future plant breeder with a mix of knowledge and skills for development of crop varieties, and with the innovativeness to meet future breeding challenges.<br>• To develop skills in students with breeding objectives like disease resistance, insect resistance etc. |
| Accomplishments of M.Sc. programme | • Till date the Department of Genetics and Plant Breeding has conferred degree to 430 M.Sc. students.<br>• Two students have joined as STA in CCSHAU, Hisar<br>• One student has joined Agriculture officers in national bank.<br>• One student joined as HDO in Govt. of Haryana<br>• One student has joined as forest ranger in MP and one as Section officer in Govt. of Delhi.<br>• One student has joined as Asstt. Professor in JAU, Jodhpur<br>• Two students went abroad for higher studies (Ph.D.) during last five years.<br>• Nineteen students have cleared NET exam conducted by ICAR-ASRB.<br>• Four students were awarded with Ram Dhan Singh Gold medal and one Gold medal in M.Sc. (Ag.) Genetics and Plant Breeding, S.K.R.A.U., Bikaner, Rajasthan for highest OGPA |
| Objectives of Ph.D. programme | • To impart theoretical knowledge of plant breeding to the students through initiatingcourse work, demonstrations, practical exercise and seminars.<br>• To guide PG research work, demonstrations, practical exercise and seminars.<br>• To develop skills in students for best utilization of plant genetic resources in breeding of different crops.<br>• To impart knowledge to students with ability to identify research imperatives in plant breeding, design and execute plant breeding research projects aimed at solving the problems within a changing agricultural environment.<br>• Maintenance and characterization of germplasm<br>• Development of cultivars/hybrids for various biotic and abiotic stresses.<br>• Development of appropriate crop production and protection technology for increasing productivity.<br>• Development of improved varieties/hybrids for different farming systems.<br>• Development of varieties/hybrids for quality traits |

| | |
|---|---|
| | • On-farm testing and transfer of technology.<br>• Nucleus and breeder seed production. |
| Accomplishments of Ph. D programme | • The Department of Genetics and Plant Breeding has conferred degree to 235 Ph.D. students till now.<br>• Two students were selected in ARS as Assistant Scientist.<br>• Eleven students have joined as Assistant Scientist in CCSHAU, Hisar and other universities.<br>• One joined as SCO, Govt. of Chattisgarh and one selected as ARO, Govt. of Rajashtan.<br>• Two students have joined NFL and two students have joined VNR, Raipur.<br>• One Student has joined Agriculture officers in national bank.<br>• One student has joined as STA in CCS HAU, Hisar, one joined as HDO and one joined as PGT (Biology) in Govt. of Haryana<br>• Two students have joined in IFFCO and FCI.<br>• Fifty-one students have cleared NET exam conducted by ICAR-ASRB.<br>• Four student got ICAR/CSIR -SRF. (*Annexure GPB-I*). |

Mention the impact of monitoring on the outcome of the College with reference to students' excelling in academics, research and extracurricular activities.

| **Specialization** | **No. of seats** | | | | | | **No. of students passed out** | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Genetics & Plant Breeding | Y 1 | Y 2 | Y 3 | Y 4 | Y 5 | **Total** | Y 1 | Y 2 | Y 3 | Y 4 | Y 5 | **Total** |

***6.4.2*** **Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| **S. No.** | **Sanctioned faculty** | **In place*** | **Vacant** | **Faculty recommended by the ICAR/UGC** |
|---|---|---|---|---|
| **1** | **Prof./Equivalent (2)** | 2 | - | 1 |
| **2** | **Associate Prof./Equivalent (18)** | - | 18 | 1 |
| **3** | **Assistant Prof./Equivalent (62)** | 40 | 22 | 3 |

*The number of faculty under Professors and Associate Professors also includes personal promotees under CAS.

**Note:** All the Faculty is assigned the responsibilities for the multiple programmes

***6.4.3*** **Technical and Supporting Staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Sanctioned Technical and supporting staff | Technical and supporting staff in place | Vacant position | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|
| 1. | Office staff | | | |
| | AO/Superintendent | | 1 | |
| | Assistant | 4 | 3 | |
| | SSS | 1 | | |
| | Clerk | 2 | 1 | 1 |
| | PA/Steno/JSS | | 1 | |
| | Messenger | | 1 | |
| | Peon | | | |
| | Sweeper | | 2 | |
| 2. | Lab staff | 8 | 1 | 2<br>1<br>2 |
| | ➢ Lab Assistant | 10 | 2 | 5 |
| | ➢ Lab Attendant | 1 | - | 1 |
| | ➢ SLA | 4 | 1 | |
| | ➢ Any other (Store Keeper) | 2 | | |
| 3. | Field staff | | | |
| | ➢ Beldar | 17 | 21 | 1<br>1 |
| | ➢ Farm and field worker (specify) Plant Observer | 3 AI + 13 TA | 2 | 4 |
| | ➢ Any other (Agriculture Inspector) | 4 | | 1 |
| 4. | Daftri | 1 | | |
| 5. | Driver | 1 | | |
| 6. | Liftman | | | |
| 7. | Computer operator | 1 | | |
| 8. | Technician/vehicle attendant | 1 | 2 | |
| 9. | Any other (specify) STA | 6+2 | - | 3 |

**Note:** All the technical and supporting staff is assigned the responsibilities for the multiple programmes

**6.4.4 Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm*

*facilities,workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

## List of classroom and functional laboratories

| | |
|---|---|
| Name of College/Department | Genetics and Plant Breeding |
| No. of lecture rooms with sitting capacity | Two lecture rooms (one with 50 seating capacity & one with 70 seating capacity) and one committee room of 30 seating capacity |
| No. of lecture rooms with LCD | 01 |
| No. of smart class-rooms | 02 (1 lecture room and one committee room) |
| No. of labs under Dean's office with specialized purpose | 17 ( Molecular Breeding, PG lab, UG lab, two Bajra quality labs, Two chemistry labs for forages quality analysis, two cotton biochemistry labs, two oilseeds biochemistry labs, two wheat quality lab, one pulse lab and three MAP labs ) |
| Farm facilities | 114 ha |
| Workshops | - |
| Any other instructional units being utilized for the award of the Degree Programme | - |

## List of major equipments at present available in the Department
## (Equipments costing more than Rs. 50,000)

| Sr. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Qubit 2.0 Fluorometer (Invitrogen) | Bajra Quality Lab |
| 2. | Gradient Thermal Cycler (PCR) | |
| 3. | Water Purification system | |
| 4. | Spectrophotometer, Evolution 201 | |
| 5. | Plant Canopy Analysis System | |
| 6. | Maxi Gel Vertical Unit | |
| 7. | Thermal Cycler | |
| 8. | Gel Doc System | |
| 9. | Deep Freezer, Cap 200 Ltr | |
| 10. | Nucleic Acid Sequencing Vertical Electrophoresis system | |
| 11. | Agrose gel elctrophoresis with Power Supply | |
| 12. | Mini protein tetra | Lab no. 75 and 76 |
| 13. | Autoclave vertical | |
| 14. | Refrigerated centrifuge | |
| 15. | BOD incubator | |
| 16. | Table top steam sterilizer | |
| 17. | Deep fridge | |
| 18. | Electronic balance | |
| 19. | Plant growth chamber | |
| 20. | Hot air oven | |

| | | |
|---|---|---|
| 21. | Deep Freezer | |
| 22. | Microscope (compound) | |
| 23. | Digital Balance | |
| 24. | Dry bath | |
| 25. | Nano -Spectrophotometer | |
| 26. | Ice flaker | |
| 27. | Water purification | |
| 28. | Spectrophotometer | |
| 29. | Gel electrophoresis | |
| 30. | RT-PCR | |
| 31. | Centrifuge | |
| 32. | PCR | |
| 33. | Gel documentation | |
| 34. | Lypholizer | |
| 35. | Bioanalyser | |
| 36. | Trinocular microscope | |
| 37. | Chlorophyll meter | |
| 38. | NDVI | |
| 39. | Infrared thermometer | |
| 40. | Spectrophotometer UV Visible | Cotton Section Lab No. 153 |
| 41. | Refrigerated Centrifuge FACI 9906 | |
| 42. | Millipore water purification system | |
| 43. | Solvent Extraction System | |
| 44. | Portable Ethylene Gas Analyze | |
| 45. | Vacuum Concentrator chiller | |
| 46. | UPLC | |
| 47. | Electrophoresis System 2D | |
| 48. | Chiller | |
| 49. | Linear Shaker | |
| 50. | Leaf Area Meter | |
| 51. | Water Potential Meter/Psychrometer | |
| 52. | Deep fridger (-20) | Cotton Section Lab No. 152 |
| 53. | PH meter | |
| 54. | Hot Air oven | |
| 55. | Water Bath | |
| 56. | Water Bath | |
| 57. | Electronic Balance | |
| 58. | UV-VIS | |
| 59. | Nikon Digital Camera Coolpix P1000 with Standard Accessories) | Pulses section |
| 60. | Computer HP 400 G4AIOI58500T Win 10 Pro 81320” TW - (Four) | Office |
| 61. | Printer HP Laser Jet Pro MFP M 128 - (Four) | |

| | | |
|---|---|---|
| 62. | Field King 8x8 Trailed Offset Disc HarrowWith Tyre (1) | Farm |
| 63. | Tractor MF 245 DI | |
| 64. | PCR machine | Pulses Lab |
| 65. | Deep freezer | |
| 66. | Digital Analytical Balance | Oil Seed Lab |
| 67. | HorizontalElectrophoresis Unit | |
| 68. | Computer with accessories | |
| 69. | Harrow | |
| 70. | Computer (2) | |
| 71. | Air Conditioner (2) | |
| 72. | Leaf Area Meter | |
| 73. | Electronic Balance (2) | |
| 74. | Hand Held Crop Sensor (NDVI) | |
| 75. | Deep Freezer (-80$^0$C) | |
| 76. | Deep Freezer (-20$^0$C) | |
| 77. | Refrigerator (2) | |
| 78. | PCR Machine | |
| 79. | Camera | |
| 80. | Water Purification System | |
| 81. | Tractor (John Deere) | |
| 82. | LCD Infrared Optical | |
| 83. | Display Panel Touch Screen | |
| 84. | Rotavator | |
| 85. | Plant Growth Chamber | |
| 86. | Gas Chramatography Unit | |
| 87. | pH cum EC Meter | |
| 88. | Gel Doc System | |
| 89. | Automated Liquid Handling Machine | |
| 90. | Automated Kjeldahl distillation with digestion unit | MAP Quality Lab |
| 91. | Refrigerator | |
| 92. | Deep Freezer | |
| 93. | Laboratory Grinding Mill | |
| 94. | Analytical Balance | |
| 95. | Rotatory Evaporator | |
| 96. | Automated Solvent Extraction System | |
| 97. | Recirculating Chiller | |
| 98. | Automatic Titrator | |
| 99. | Microplate Reader | |
| 100. | Microplate Thermomixer/Shaker | |
| 101. | Test tube rotator | |
| 102. | Vacuum Pump | |
| 103. | Automated Flash Chromatography (01) | |
| 104. | Fume Hoods (02) | |

| | | |
|---|---|---|
| 105. | Sub cell (model – 192 cell system) | Forage Biotechnology Lab |
| 106. | T-100 thermal cycler | |
| 107. | Gel Documentations System | |
| 108. | Automatic Kjeldahl with Accessory | Forage Quality Lab |
| 109. | Automatic Fiber Analyzer | |
| 110. | Fat Extractor | |
| 111. | Automatic distillation unit | |
| 112. | Spectrophotometer | |
| 113. | pH-meter (quantity 2) | |
| 114. | Automatic Universal Oven 500liter | |
| 115. | Automatic Universal Oven 1000liter | |
| 116. | Electronic Balance | |
| 117. | Water bath | |
| 118. | Magnetic stirrer with hot plate | |
| 119. | Autoclave | |
| 120. | High speed centrifuge with temperature control | |
| 121. | Refrigerator | |

**Mention theory and practical batches for PG Programmes**

Average number of batches with average number of students per batch for theory and practical classes is given below:

| Year | Theory | | Practical | |
|---|---|---|---|---|
| | M.Sc./M.Tech. | Ph.D. | M.Sc. | Ph.D. |
| 2018-19 | one | one | one | one |
| 2019-20 | one | one | one | one |
| 2020-21 | one | one | one | one |
| 2021-22 | one | one | one | one |
| 2022-23 | one | one | one | one |

**6.4.5. Conduct of Practical and Hands-On-Training:** *It is important to have a sound grasp of the theory that under lies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

*Students carrying out molecular studies in the laboratory*

| Degree/ Course No./ Credit Hrs. | Practical and Hands-on-training | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|
| M.Sc. | | |
| GP501 (2+1) | • Laboratory exercises on probability and chi-square;<br>• Demonstration of genetic principles using laboratory organisms; Chromosome mapping using three point test cross;<br>• Pedigree analysis in humans, Problems on HWE, Tetrad analysis;<br>• Visit to experimental farm, glass house and learning some practical considerations. | • Helping the students to develop their analytical, quantitative and problem solving skills from classical genetics. |
| GP502 (2+1) | • Floral biology in self and cross pollinated species, selfing and crossing techniques.<br>• Selection methods in segregating populations and evaluation of breeding material. | • To impart practical skills about plant breeding objectives and brreding methods for crop improvenment. |

| | | |
|---|---|---|
| | • Analysis of variance (ANOVA). Estimation of heritability and genetic advance,<br>• Maintenance of experimental records. Learning techniques in hybrid seed production using male-sterility in field crops. | |
| GP503 (2+1) | • Capacity building as learning the cytogenetics laboratory, various chemicals to be used for fixation, dehydration, embedding, staining, cleaning etc.<br>• Microscopy: various types of microscopes, Observing sections of specimen using Electron microscope; preparing specimen for observation - Fixative preparation and fixing specimen for light microscopy<br>• Studies in cereals-Studies on the course of mitosis in wheat, pearl millet - Studies on the course of mitosis in onion and Aloe vera - Studies on the course of meiosis in cereals, millets and pulses – Studies on the course of meiosis in oil seeds and forage crops– Using micrometers and studying the pollen grain size in various crops. | • To impart working of microscopes, to get knowledge about different types of laboratory microscopes and cytogenetic aspects of crop evolution. |
| GP504 (2+1) | • Exercises on factors affecting gene frequencies;<br>• Estimation of average affect of gene substitution and<br>• Breeding value; Exercises on in breeding and linkage disequilibrium. | • To impart knowledge about biometrical tools of population genetics. |
| GP505 (2+1) | • Problems on multiple factors inheritance - Partitioning of variance - Estimation of heritability and genetic advance - Covariance analysis - Metroglyph analysis - D2 analysis<br>• Grouping of clusters and interpretation - Cluster analysis - Construction of cluster diagrams and dendrograms - interpretation Correlation analysis - Path analysis.<br>• Statistical part-Line x tester analysis: interpretation of results - Estimation of heterosis: standard, mid-parental and better-parental heterosis.<br>• Estimation of inbreeding depression.<br>• Generation mean analysis: Analytical part and Interpretation, Estimation of different types of gene actions.<br>• Methods and steps to select the best model - Selection systems - Biplots and mapping genotypes. | • Helping the students to develop computational skills regarding component of variance and mating design etc. of plant breeding. |
| GP506 (2+1) | • Learning the precautions on handling of mutagens; Dosimetry .<br>• Studies of different mutagenic agents: Physical mutagens - Studies of different mutagenic agents: Chemical mutagens - Learning on Radioactivity – production of source and isotopes at BRIT, Trombay - Learning about gamma chamber; Radiation hazards-Monitoring–safety regulations and safe transportation of radioisotopes<br>• Visit to radio isotope laboratory<br>• Mutation breeding in forage crops and vegetative | • To impart practical knowledge of mutagenesis and various methods for detection of mutagens. |

| | | |
|---|---|---|
| | propagated crops.<br>• Procedure for detection of mutations for polygenic traits in M2 and M3 generations. | |
| GP507 (2+1) | • Male sterile line characterization in millets using morphological descriptors; restorer line identification and diversification of male sterile sources.<br>• Male sterile line creation in dicots comprising oilseeds, pulses and cotton; problems increation of CGMS system; ways of overcoming them- Male sterile line creation, diversification and restoration in forage crops; understanding the difficulties in breeding apomicts | To provide understanding of heterosis, mechanism and its exploiatation for yield improvement. |
| GP510 (2+1) | • Requirements for plant tissue culture laboratory- Techniques in plant tissue culture – Media components and media preparation -Aseptic manipulation of various explants; observations on the contaminants occurring in media – interpretations.<br>• Inoculation of explants; Callus induction and plant regeneration –Plan regeneration; standardizing the protocols for regeneration; Hardening of regenerated plants; establishing a screen house and hardening procedures.<br>• Visit to commercial micropropagation unit.<br>• Transformation using Agrobacterium strains, GUS assay in transformed cells / tissues.<br>• DNA isolation, DNA purity and quantification tests, gel electrophoresis of proteins and isozymes, PCR-based DNA markers, gel scoring and data analysis for tagging and phylogenetic relationship, construction of genetic linkage maps using computer software. | • To impart practical skills to use innovative approaches of molecular studies in plant breeding. |
| GP511 (2+1) | • Phenotypic screening techniques for sucking pests and chewing pests – traits to be observed at plant and insect level - Phenotypic screening techniques for nematodes and borers; ways of combating them; breeding strategies - Weeds – ecological, environmental impacts on the crops; breeding for herbicide resistance - Evaluating the available populations like RIL, NIL etc. for pest resistance; use of standard MAS procedures -<br>• Phenotypic screening methods for diseases caused by fungi and bacteria; symptoms and data recording; use of MAS procedures<br>• Screening varieties of major crops for acidity and alkalinity; their effects and breeding strategies-<br>• Understanding the climatological parameters and predisposal of biotic and abiotic stress factors;ways of combating them | • To appraise various abiotic and biotic stresses influencing crop yield their mechanism and genetics. |
| GP512 (2+1) | • Floral biology – emasculation - pollination techniques; Study of range of variation for yield and yield components – study of segregating populations - evaluation - Trait based screening for stress resistance in crops of importance– Use of descriptors for cataloguing<br>• Germplasm maintenance; learning on the Standard Evaluation System (SES) and | • To provide insight into advances in improvement of cereals and forage crops. |

| | | |
|---|---|---|
| | descriptors; use of softwares for database management and retrieval.Practical learning on the cultivation of fodder crop species on sewage water; analysing them for yield components and palatability - Laboratory analysis of forage crops for crude protein, digestibility percent and other quality attributes; Visit to animal feed producing factories learning the practice of value addition; visiting the animal husbandry unit and learning the animal experiments related with palatability and<br>• Digestibility of fodder. | |
| GP513 (2+1) | • Use of descriptors for cataloguing – Floral biology– emasculation pollination techniques; Study of range of variation for yield and yield components - study of segregating populations in Redgram, Greengram, Blackgram and other pulse crops.<br>• Attempting crosses between Blackgram and Greengram. Use of descriptors for cataloguing – Floral biology - emasculation – pollination techniques of oilseed crops like Sesame,Groundnut, Sunflower and Castor, Cotton:<br>• Use of descriptors for cataloguing – the germplasm of cotton for yield, quality and resistance parameters – learning the procedures on development of Bt cotton<br>• Visit to Cotton Technology Laboratory and Spinning Mills learning on cotton yarn production, its quality evaluation and uses. | • To provide insight into advances in improvement of legumes, oiulseeds and fibre crops. |
| GP514 (2+1) | • Grain quality evaluation in rice; correlating ageing and quality improvement in rice-Quality analysis in millets; estimation of antinutritional factors like tannins in different varieties/ hybrids; a comparison.<br>• Quality parameters evaluation in wheat; Quality parameters evaluation in pulses - Quality parameters evaluation in oilseeds-Value addition in crop plants; Post harvest processing of major field crops<br>• Quality improvement in crops through tissue culture techniques Evaluating the available populations like RIL, NIL etc. for quality Improvement using MAS procedures. | • To get insight into recent advances in improvement of quality traits in different crops. |
| GP515 (2+1) | • Identification of suitable areas/locations for seed production; Ear-to-row method and nucleus seed production-main characteristics of released and notified varieties, hybrids and parental lines;<br>• Identification of import ant weeds/objectionable weeds; determination of isolation distance and planting ratios in different crops;<br>• Seed production techniques of varieties in different crops; hybrid seed production technology of important crops. | • Imparting the students about production of nucleus and breeder seeds and procedure of releasing a variety. |
| GP516 (2+1) | • Plant exploration and collection; Techniques of study about germplasm coarse and finegrid surveys.<br>• Identification of wild registration relatives of | • To get complete knowledge about cataloguing and preservation of specimens, PGRs, collection, quarantine |

| | | |
|---|---|---|
| | crop plants; Example of collection, Sampling techniques of plant materials,<br>• visiting ports, airports to study the quarantine regulations.<br>• Techniques for the detection of insects, mites, nematodes, bacteria, weeds, pathogens and viruses on seed and planting materials and salvaging,<br>• Use of visual, qualitative, quantitative, microscopic, molecular and plant growth related techniques (controlled green houses/ growth chambers, etc), Detection of genetically engineered plants.<br>• Study of post-entry quarantine operation, seed treatment and other prophylactic treatments. | and exchange of germplasm. |
| GP517 (2+1) | • Basics of computer and operating systems-identification of useful germplasm;<br>• Evaluation of crop germplasm, Statistical techniques in management of germplasm.<br>• Estimation of sample size for storage and viability testing.<br>• Evaluation procedure and experimental protocols (designs and their analysis), Assessment of genetic diversity;<br>• Techniques of Characterization of germplasm,<br>• Molecular markers and their use in characterization. | • To impart the students knowledge for germplasm database management. |
| GP518 (2+1) | • Description of Botanical features, Cataloguing of cultivars, and varieties and species in medicinal aromatic crops, Floral Biology, Selfing and aromatic crops.<br>• crossing, Evaluation of hybrid progenies, Induction economic mutants, High alkaloid and high biotic and mutants, evolution of mutants through environmental. Physical and chemical mutagens,<br>• Introduction of polyploidy, screening of plants for biotic and abiotic stress and environmental pollution, in-vitro breeding in medicinal and aromatic crops. | • To impart knowledge about practices of breeding in plantation crops and spices. |
| Ph.D. | | |
| GP603 (2+1) | • Working out efficiency of selection methods in different population and interpretation<br>• Biparental mating–use of softwares in analysis and result interpretation – Triallel analysis– use of softwares in analysis and result interpretation-<br>• Quadriallel analysis – use of softwares in analysis and result interpretation<br>• Triple Test Cross (TTC) use of softwares in analysis and result interpretation - Advanced biometrical models for combining ability analysis - Selection of stable genotypes using stability analysis;<br>• Models in stability analysis Additive Main Effect and Multiplicative Interaction (AMMI) model - Principal Component Analysis model - Additive and multiplicative model – Shifted multiplicative model - Analysis and selection of genotypes – Methods and steps to select the best model- | • To impart knowledge of computation methods for mating design and component analysis in plant breeding. |

| | | |
|---|---|---|
| | • Selection systems - Biplots and mapping genotypes.<br>• Construction of linkage maps and QTL mapping – Strategies for QTL mapping; statistical methods in QTL mapping; Phenotype and Marker linkage studies. | |
| GP604 (2+1) | • Chromosome analysis in major field crops - Fluorescence in situ hybridization -<br>• Comparative genomic hybridization – Comparative analysis of plant genomes using molecular markers – Genetic map construction using molecular markers – Mapping major<br>• Genes using molecular markers–QTL mapping in plants – Comparison across mapping populations– Understanding the need genetic algorithms in QTL mapping<br>• Plant Genome Databases–Computational tools to explore plant genome databases –<br>• Comparative genomics – Comparison of genome sequences using tools pf bioinformatics-<br>• Advanced genomic technologies: TILLING and Eco-TILLING – DNA Array Technology - Linking genome sequences to phenotypes:<br>• Tools of transcriptomics, proteomics and metabolomics. | • To impart practical skills in advance molecular techniques in genome mapping. |
| GP608 (2+1) | • Demonstration of plant responses to stresses through recent techniques, water use efficiency, transpiration efficiency,<br>• Screening techniques under stress conditions such as electrolyte leakage, TTC, chlorophyll fluorescence, canopy temperature depression, stomatal conductance, chlorophyll estimation, heat/drought/salt shock proteins. | • To impart practical knowledge towards physiological efficiency, enhancement and biofortification of crops in plant breeding. |
| GP610 (1+1) | • In situ conservation of wild species –case studies at national and international levels, Ex situ techniques for active and long-term conservation of collections,<br>• Preparation and handling of materials, packaging, documentation; design of cold storage modules, conservation protocols for recalcitrant and orthodox seeds,<br>• Cytological studies for assessing genetic stability, *in vitro* cultures-embryo, cell/ suspension cultures, pollen cultures,<br>• Study of cryotank facility and vitrification techniques,visit to NBPGR/NBAGR | • To impart knowledge on methods of germplasm conservation. |
| GP611 (2+1) | • Preparation and sterilization of liquid and agar bacterial nutrient media;<br>• Assessment of generation time in the log-phage bacterial cultures;<br>• Handling of microorganisms for genetic experiments; Isolation of rhizobia from nodules; Gram staining of rhizobial cells;<br>• Examination of polyhydroxy butyrate (PHB) production in rhizobia; Demonstration of N2-fixing nodules/bacterial inoculation in the legume- Rhizobium symbiotic system;<br>• Analysis and isolation of plasmid DNA; Curing | • To apprise the students about molecular processes at DNA and RNA level in different microorganisms. |

| | | |
|---|---|---|
| | of plasmids. | |
| GP612 (2+1) | • Description of crops and cultivars, Cataloguing ofspecies and cultivars, floral biology,<br>• selfing and crossing, evaluation of hybrid progenies, Induction of economic, colour mutants, Increased alkaloid content in medicinal crops, high essential oil content in aromatic plants,<br>• Screening of plants for biotic and abiotic stresses and environmental pollution,<br>• *In-vitro* breeding in flower crops, medicinal and aromatic crops. | • To update knowledge about the recent trends in the breeding field of medicinal and aromatic plants. |

**6.4.6 Supervision of students in PG/PhD Programmes:** *Number of students being supervised by Faculty in case of Masters/Ph.D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Details of M.Sc. programme offered by the Department**

| Year | No. of students on roll | No. of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 37 | 48 | 0.77:1 |
| 2019-20 | 33 | 44 | 0.75:1 |
| 2020-21 | 36 | 36 | 1:1 |
| 2021-22 | 33 | 34 | 0.97:1 |
| 2022-23 | 35 | 42 | 0.83:1 |

**Details of Ph.D.programme offered by the Department**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 43 | 48 | 0.89:1 |
| 2019-20 | 47 | 44 | 1.06:1 |
| 2020-21 | 51 | 36 | 1.41:1 |
| 2021-22 | 48 | 34 | 1.41:1 |
| 2022-23 | 52 | 42 | 1.23:1 |

**Note:** Details of course offered by the Department is given in ***Annexure GPB-III***

**6.4.8 Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

There is a system of annual self appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Director for performance appraisal and finally approved by the Vice-Chancellor. The performance of the faculty is also reviewed on the basis of their results, feedback from the students. The students feedback were analysed by the HOD and the consolidated report about the drawbacks/ suggestions then communicated to the subject teachers for improvement in future.

**6.4.9 Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the Degree Programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 16 | 18 | 16 | 16 | 17 | 25.0 | 0.0 | 0.0 | 0.0 | 5.8 |
| Ph.D. | 8 | 12 | 11 | 13 | 12 | 12.5 | 0.0 | 27.2 | 0.0 | 0.0 |

**6.4.10 ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculties are using ICT tools for teaching learning purposes to create smart learning environment. Also during the COVID pandemic the faculty taught the courses online as well as hybrid mode (offline-online together) using the smart class room facility.

| Courses | Total courses | Theory | Practical | Type of ICT Application |
|---|---|---|---|---|
| M.Sc. | 19 | 19 | 16 | LCD, Smart Board |
| Ph.D. | 14 | 14 | 6 | LCD, Smart Board |

**6.4.10** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12** Certificate

I, the Dean Surender K. Pahuja hereby certify that the information contained in the Section 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

*Annexure GPB-I*

| Year | Name of Students | Admission No. | Placement Record |
|---|---|---|---|
| **M.Sc.** | | | |
| 2019-20 | RaoPankaj | 2013A57M | STA, CCSHAU, Hisar |
| | Puneet Kumar | 2015A70M | STA, CCSHAU, Hisar |
| 2020-21 | Seema Kamboj | 2018A60M | HDO, Govt. of Haryana |
| 2022-23 | Ankit Kumar | 2014A61M | Assistant Scientist, CCSHAU, Hisar |
| | Harsh Deep | 2016A56M | Assistant Scientist, CCSHAU, Hisar |
| **Ph.D.** | | | |
| 2018-19 | Sandeep | 2008BS17D | Assistant Scientist, CCSHAU, Hisar |
| | Divya | 2012A37D | Assistant Scientist, CCSHAU, Hisar |
| | Ashok Kr. Dehinwal | 2013A31D | Assistant Scientist, CCSHAU, Hisar |
| | Sunayana | 2014A31D | Assistant Scientist, PAU, Ludhiana |
| | Neeraj Kumar | 2015A33D | Assistant Scientist, CCSHAU, Hisar |
| 2019-20 | Kuldeep Jangid | 2015A31D | STA, CCSHAU, Hisar |
| | Sonika | 2012A35D | Assistant Professor, CCSHAU, Hisar |
| | Vijay Kumar S | 2015A28D | NFL |
| | Kavita | 2017A30D | PGT, Biology, Govt. of Haryana |

## COURSES OFFERED BY THE DEPARTMENT

| | Semester I | |
|---|---|---|
| **Course No.** | **Course Title** | **Credit hrs.** |
| GP501* | Principles of genetics | 2+1 |
| GP502* | Principles of plant breeding | 2+1 |
| GP504 | Population genetics | 2+1 |
| GP506 | Mutagenesis and mutation breeding | 2+1 |
| GP508 | Gene regulation and expression | 2+0 |
| GP510* | Biotechnology for crop improvement | 3+1 |
| GP512 | Breeding cereals, forages and sugarcane | 2+1 |
| GP514 | Breeding for quality traits | 2+1 |
| GP516 | Germplasm collection, exchange and quarantine | 2 +1 |
| GP591 | Master's seminar | 1+0 |
| GP601 | Advanced genetics | 2+0 |
| GP603 | Advanced biometrical and quantitative genetics | 2+1 |
| GP605 | Plant genetic resources and pre-breeding | 2+0 |
| GP607 | Crop-evolution | 2+0 |
| GP609** | Advances inbreeding of major field crops | 3+0 |
| GP611 | Microbial genetics | 2+1 |
| PGS503 | Intellectual property and its management in agriculture | 1+0 |
| PGS504 | Agricultural programme research, research ethics and rural development | 1+0 |
| GP691 | Doctoral seminar I | 1+0 |
| GP692 | Doctoral seminar II | 1+0 |
| GP201 | Principles of Plant Breeding | 2+1 |
| GP301 | Principles of Biotechnology | 2+1 |
| GP401 | Crop improvement | 1+2 |
| GP402 | Special techniques in Plant Breeding | 1+2 |
| GP403 | Heterosis Breeding in Crop Plants | 1+2 |
| GP404 | Plant Genetic Resources | 1+1 |
| GP405 | Crop Improvement for Biotic and Abiotic Stress | 1+2 |

*Compulsory for M.Sc.Programme **Compulsory for Ph.D. Programme

| Semester II | | |
|---|---|---|
| **Course No.** | **Course Title** | **Credit hrs.** |
| GP503 | Principles of cytogenetics | 2+1 |
| GP505* | Principles of quantitative genetics | 2+1 |
| GP507 | Heterosis Breeding | 2+1 |
| GP509 | Cell Biology and molecular genetics | 3+0 |
| GP511* | Breeding for biotic and abiotic stress resistance | 2+1 |
| GP513 | Breeding legumes,oilseed and fibre crops | 2+1 |
| GP515 | Maintenance breeding, concept of variety release and seed production | 1+1 |
| GP517/ SST516 | Data base management, evaluation and utilization of PGR | 2 +1 |
| GP518/PSML505 | Breeding of medicinal and aromatic crops | 2+1 |
| GP591 | Master's seminar | 1+0 |
| GP602 | Cellular and chromosomal manipulations for crop breeding | 2+0 |
| GP604 | Genomics in plant breeding | 2+1 |
| GP606 | Advances in plant breeding systems | 2+0 |
| GP608** | Breeding for designer crops | 2+1 |
| GP610/SST602 | In situ and ex-situ conservation of germplasm | 2+1 |
| GP612/PSMA602 | Advances in breeding of medicinal and aromatic crops | 2+1 |
| GP691 | Doctoral seminar I | 1+0 |
| GP692 | Doctoral seminar II | 1+0 |
| PGS503 | Intellectual property and its management in Agriculture | 1+0 |
| PGS504 | Agricultural research, research ethics and rural development programme | 1+0 |
| GP102 | Fundamentals of genetics | 2+1 |
| GP202 | Breeding for field crops | 2+1 |

*Compulsory for M.Sc.Programme **Compulsory for Ph.D. Programme

# Programme - 10

## M.Sc. Horticulture

## and

## Ph.D. Horticulture

## 6.4 About the Department

The Department of Horticulture, CCS Haryana Agricultural University, Hisar came in to existence with the establishment of College of Agriculture at Hisar in the then Punjab Agricultural University, Ludhiana during the year 1962. With the bifurcation of universities, a fulfledged department started working during 1970. The department has made steady progress in the field of research, teaching and transfer of technology during the entire period under report. The Department of Horticulture has attained creditable status through its sustained and dedicated efforts over the last 53 years. The department has been able to reach many heights in different aspects of research in the form of viable technology and their transfer to the farmers. From time to time, there has been a significant expansion with respect to infrastructure and other facilities for conducting smooth research, teaching and extension programmes. During this period, Research Stations were established at Buria and Bawal for generating information for recommending the technology for regional areas. With the establishment of dry land farming Research Station at Bawal, the department established its horticulture wing during the year 1974-75 in the south western part of the State. The germplasm suitable for dry land area were introduced with respect of ber, aonla, bael, jamun, mulberry, karonda and phalsa.With the efforts of research workers, this station is catering to the needs of south western part of the State for supplying plant material and production technology of these fruit crops. Another Regional Research Station particularly catering to horticultural needs was established in 1990 at Buria. Subtropical fruits like mango, litchi, loquat and low chilling temperate fruits like pear, peach, plum were introduced and evaluated. Separate degrees of M.Sc. (Horticulture) in Fruit Science and M.Sc.(Horticulture) in Floriculture & Landscape Architecture were started during 2010-11.

**Objectives of the Department**

- Crop improvement through introduction, selection and hybridization in fruits and flower crops
- To develop improved production technology for fruit and flower for different region of the state
- To standardize new propagation techniques and supply of healthy planting materials to the farmers
- Introduction and exploration of underutilized fruits for Haryana state
- To develop post harvest technologies of horticultural crops
- To develop climate resilient and resource conservation technologies for horticultural crops
- Dissemination of horticultural technologies through skill development, training and demonstration etc

### 6.4.1. Brief History of the Degree Programme: *Clearly mention in which year the degree programme was initiated along with its objective and accomplishments.*

| | |
|---|---|
| Objectives of initiating M.Sc. programme | • To impart theoretical and practical knowledge of horticulture (fruits and flowers) to the students through course work, demonstrations, practical exercise and seminars.<br>• To equip students with knowledge and practical skills necessary for production, management and post harvest handling of horticultural crops.<br>• To enable students to undertake research and development activities in various aspects of horticulture. |

| | |
|---|---|
| Accomplishments of M.Sc.programme | • Since 2018-19 to March, 2023, 68 students have completed their M.Sc. degree and 31 students are on roll.<br>• 31 students have joined as Agriculture Field Officer in Banks; STA/TA in different organizations and HDO and DHO in Department of horticulture, Govt. of Haryana. *(Annexure HORT-1)*<br>• Two students namely, Nisha Rani and Happy. are pursuing Ph.D abroad. |
| Objectives of initiating Ph.D programme | • To impart theoretical and practical knowledge of horticulture (fruits and flowers) to the students through coursework, demonstrations, practical exercise and seminars. |
| | • To equip students with knowledge and practical skills necessary for production, management and post harvest handling of horticultural crops.<br>• To enable students to undertake research and development activities in various aspects of horticulture. |
| Accomplishment of Ph.D. programme | Since 2018-19 to March, 2023, 25 students have completed their Ph.D degree and 28 students are on roll.<br>• Ten students have joined as Assistant Professor/Assistant Scientist after completing Ph.D.<br>• Fifteen students have joined as DHO/ HDO in Department of Horticulture, Govt. of Haryana after completing Ph.D.*(Annexure HORT-1)*<br>• 40 students qualified NET exam.*(Annexure HORT-II)*<br>• One students qualified ARS<br>• Students'research brought out 73 research papers, and 16 book chapters **(***Annexure HORT-III*). |

| **Degree programme offered by the Department** | **Specialization** | **No. of seats** | | | | | | **No. of students passed out** | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | Y1 | Y 2 | Y 3 | Y 4 | Y 5 | Total | Y 1 | Y 2 | Y 3 | Y 4 | Y5 | Total |
| **M.Sc.** | Horticulture – Fruit Science | 12 | 14 | 12 | 14 | 10 | 62 | 1 | 11 | 12 | 14 | 10 | 48 |

*Y1 =2018-19… .....Y5 =2022-23(till date)*

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention thenumber of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum,it should be clearly mentioned in the report.*

| S. No. | Sanctioned faculty | In place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| 1. | Professor and equivalent (0) | 9 | - | 1 |
| 2. | Associate Professor and equivalent (5) | 1 | 2 | 1 |
| 3. | Assistant Professor and equivalent (25) | 8 | 10 | 3 |

*The number of Professors and Associate Professors also includes personal promotees

**Note:** All the Faculty is assigned the responsibilities for the multiple programmes

**6.4.3. Technical and Supporting Staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in -place.*

| S. No. | Designation | Sanctioned | Inplace* | Vacant | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|---|
| 1. | **Office staff** | | - | - | 01 |
| | AO/Superintendent | - | - | - | - |
| | **Assistant** | 2 | 2 | - | - |
| | Clerk | 3 | 1 | 2 | - |
| | **PA/Steno** | 1 | - | 1 | - |
| | Messenger | 1 | - | 1 | - |
| | **Peon** | - | - | - | - |
| 2. | **Lab staff** | | - | - | 02 |
| | Lab Assistant | 3 | - | 3 | - |
| | **Lab Attendant** | - | - | - | - |
| | Any other/S.K. | 1 | - | 1 | - |
| 3. | **Field staff** | | | | 02 |
| | Beldar | 9 | 7 | 2 | - |
| | **Farm and field worker (Mali and Head mali)** | 11 | 5 | 6 | - |
| | **Anyother/ A.I.** | 4 | 3 | 1 | - |

*The technical and supporting staff is assigned the responsibilities for the multiple programmes.

**6.4.4. Classrooms and Laboratories:** *Mention the number of classrooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of classroom and functional laboratories**

| | |
|---|---|
| No.of lecture rooms with seating capacity | One |
| No.of lecture rooms with LCD | One |
| No. of labs under Dean'soffice with specialized purpose | 4 |
| Farm facilities | Yes |
| Seminar Room with LCD | One |

## List of major equipments

| Name of equipment | Location/ Lab No. |
|---|---|
| Pilot plant for sorting & grading of fruits | Director Farm Shed |
| Refrigerator | Farm Lab |
| Camera | Room No. 234 |
| Chain saw | Farm store |
| UV-Vis Spectrophotometer | Lab No.238 |
| Digital weighing balance | Lab No.238 |
| Digital weighing balance | Room No. 234 |
| Moisture Analyser | Lab No. 238 |
| Chlorophyll Concentration meter | Room No. 234 |
| Hydraulic lifting device along with tractor | Farm |
| D.G.Set 62.5 KVAAMF | Farm lab |
| Computer set | Room No. 248 |
| Ripening chamber | Farm lab |
| Chromo meter | Lab No.238 |
| Hot air oven and microwave oven | Lab No.238 |
| Leaf area meter | Lab No.238 |
| Laminar flow | Lab No. 235 |
| Vertical autoclave | Lab No. 235 |
| Rotary shaker | Lab No. 235 |
| Microscopes | Lab no. 238 |
| Micro pipette | Lab No. 235 |
| Double distillation unit | Lab No. 238 |
| Bio-safety cabinet | Lab No. 236 |
| Aonla pricking machine | Farm lab |
| Deep freezer | Lab No. 236 |
| Digital and hand refractometer | Lab No.238 |
| Shrink wrapping and sealing machines | Farm lab |
| Vernier callipers | Lab No.238 |
| conductivity meter | Lab No. 237 |

## Mention theory and practical batches for PG Programmes

| Year | Theory | | Practical | |
|---|---|---|---|---|
| | M.Sc. | Ph.D. | M.Sc. | Ph.D. |
| 2018-19 | 2 | 2 | 2 | 2 |
| 2019-20 | 2 | 2 | 2 | 2 |
| 2020-21 | 2 | 2 | 2 | 2 |
| 2021-22 | 2 | 2 | 2 | 2 |
| 2022-23 | 2 | 2 | 2 | 2 |

**6.4.5. Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only belearned through hands-on -practice. It is important that much of the learning material in any given course should be provided in away that allow students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per*

*the curriculum and meeting above mentioned requirements*

## M.Sc. (Horticulture) Fruit Science

| Course No./ Credit Hours | Practical and Hands-on-training | How far students are getting desired practical and hands-on-training as per the curriculum (bulletform) |
|---|---|---|
| FSC 501 (2+1) | • Identification of important cultivars<br>• Observations on growth and development,<br>• Practices in growth regulation<br>• Malady diagnosis<br>• Analyses of quality attributes<br>• Visit to tropical and arid zone orchards<br>• Project preparation for establishing commercial orchards | • Conducting visit of the students to orchard to identify important cultivars of tropical fruit and fruits of dry land area<br>• Estimation of growth and development parameters i.e. canopy volume, trunk girth, leaf area and various phenological and fruit development parameters of dry land fruits.<br>• Students are acquainted with practical exercise to growth regulation practices like pruning, training, girdling, bending and bud forcing methods for dryland fruits.<br>• To apprise the students about various malady of fruit plants by diagnosis in the field by symptoms, cause and management of tropical and dryland fruits.<br>• Determination of TSS, acidity, ascorbic acid, pigments, sugars, phenols, organolaptic and sensory quality.<br>• Exposure visit of students to progressive farmers field<br>• Project planning, presentation, business networking and report. |

|---|---|---|
| | | management.<br>• Determination of TSS, acidity, ascorbic acid, pigments, sugars, phenols, organolaptic quality.<br>• Exposure visit of students to progressive farmers field<br>• Project planning for subtropical and temperate fruit crops, presentation, business networking and report. |
| FSC 503<br>(2+1) | • Documentation of germplasm-maintenance of passport data and other records of accessions<br>• Field exploration trips, exercise onex situ conservation – cold storage<br>• Pollen/seed storage, cryopreservation<br>• Visits to National Gene Bank andother centers of PGR activities<br>• Detection of genetic constitution of germplasm, core sampling, germplasm characterization using molecular techniques | • To impart basic knowledge about the documentation of germplasm and accession through characterization and record maintenance.<br>• Exposure visit and to acquaint the students with various exercises on ex situ conservation-cold storage<br>• To impart practical knowledge about the various techniques of pollen/seed storage, and their viability test and cryopreservation.<br>• Visits to NBPGR,New Delhi<br>• Detection of genetic constitution of germplasm, using molecular techniques |
| FSC 504<br>(1+1) | • Study of different types of canopies<br>• Training of plants for different canopy types<br>• Canopy development through pruning, useof plant growth inhibitors, geometry of planting.<br>• Effect of different canopy types on production and quality of fruits | • To develop an understanding on practical skill of different types of canopies in various fruit crops<br>• To trained students by on hand practice regarding canopy development through pruning, use of plant bio stimulants, and geometry of planting for high productivity.<br>• To get practical knowledge about the influence of different tree size/ height control productivity and quality of fruit crops. |
| FSC 505<br>(2+1) | • Anatomical studies in rooting of cutting and graft union.<br>• Construction of propagation structures<br>• Study of media and PGR.<br>• Micropropagation - explant preparation, media preparation, culturing – in vitro clonal propagation, meristem culture, shoot tip culture, axillary bud culture, direct organogenesis<br>• Direct and indirect embryogenesis, micro grafting, hardening.<br>• Visit toTC labs and nurseries | • To impart practical knowledge by various microscopic and visual techniques about rooting in cutting and graft union.<br>• To acquaint the students about principles, methods, planning, construction of mist chamber/ poly/ shade/ net house.<br>• Preparation of media, explants, culturing, sterilization etc.<br>• Hand on practice of students in the tissue culture laboratory- meristem culture, shoot tip culture, axillary bud culture, direct organogenesis.<br>• To impart practical knowledge about the hardening of micrograft under protected conditions. |

| | | |
|---|---|---|
| FSC 506<br>(2+1) | • Characterization of germplasm<br>• Blossom biology, study of anthesis<br>• Estimating fertility status, practices in hybridization, ploidy breeding, mutation breeding<br>• Evaluation of biometrical traits and quality traits<br>• Screening for resistance<br>• Developing breeding programme for specific traits | • To collect data on morphological characterization of different fruit crops as per NBPGR- descriptor and to prepare report.<br>• To enable students with blossom biology, anthesis of different fruit crops.<br>• To get practical observations on fruit setting after hybridization and reporting<br>• To acquaint the students regarding principle and methods of ploidy and mutation breeding<br>• Estimation of biometrical and quality traits for different genotypes and reporting<br>• To enable students to undertake research for screening of fruit cvs/ hybrid/ mutants for biotic and abiotic stresses through various physiological and biochemical processes. |
| FSC 507<br>(2+1) | • Analyzing maturity stages of commercially important horticultural crops<br>• Improved packing and storage of important horticultural commodities<br>• Physiological loss in weight of fruits and vegetables<br>• Estimation of transpiration, respiration rate<br>• Estimation of quality characteristics in stored fruits and vegetables, cold chain management - visit to cold storage and CA storage units<br>• Visit to fruit and vegetable processing units, project preparation, evaluation of processed horticultural products | • Determination of maturity by physical , chemical and GDD basis of commercially important horticulturalcrops grown in Haryana<br>• To develop understanding of various packing material and storage methods- cold chain, CA, MAP, use of edible coating and their relevant application on shelf life extension fruit crops.<br>• Estimation of PLW, deacy losses, quality parameters, transpiration, respiration rate and ethylene release, in various fruit crops<br>• Visit to fruit processing units, project preparation, planning, presentation and reporting. |
| FSC 508<br>(2+1) | • Understanding dormancy mechanisms in seeds, tubers and bulbs and stratification of seeds, tubers and bulbs<br>• Techniques of growth analysis, evaluation of photosynthetic efficiency under differentenvironments<br>• Study of growth regulator functions, hormone assays,<br>• Understanding ripening phenomenon in fruits and vegetables<br>• Study of impact of physical | • To equip the students with practicl skill of dormancy mechanisms and stratification in seeds, tubers and bulbs<br>• To analyze growth parameters, under different environments, presentation and reporting.<br>• To imprt practical knowledge of growth regulator functions, hormone assays<br>• To enhance knowledge by practical skill regarding PGR in fruit crops |

| | | |
|---|---|---|
| | manipulations on growth and development and ripening. | • To develop an understanding of research activities on physiological & biochemical changes in ripening of fruit.<br>• To study the influence of different chemicals for accelerating / retarding ripening in fruit crops. |
| FSC 510 (1+1) | • Features of organic orchards, working out conversion plan<br>• Input analysis- manures, nutrient status assessment of manures<br>• Biocomposting, biofertilizers and their application, panchagavya preparation and other organic nutrients application<br>• Methods of preparation of compost, vermicompost, green manuring, preparation of neem products and application, BD preparations<br>• EM technology and products, biological/ natural control of pests and diseases, soil solarization, frame work for GAP. | • To understand practical knowledge about the organic orchards and conversion plan.<br>• Estimation of the physical and chemical properties of manures.<br>• To understand the preparation and processing and application methods for biocomposting, biofertilizer and cow based organic formulations, BD, Neem products and thier application in fruit crops.<br>• To enhance practical skill about EM technology and biological/natural control of pests and diseases, soil solarization, frame work for GAP. |
| FSC 511 (2+1) | • Designs of greenhouse, low cost poly tunnels<br>• Net house-Regulation of light, temperature, humidity ingreenhouses, media<br>• Greenhouse cooling systems,ventilation systems<br>• Fertigation systems, special management practices.<br>• Project preparation for greenhouses, visit to greenhouses | • To impart knowledge about, design and various componenets of greenhouse,<br>• To get knowledge through demonstration, practical exercise regarding regulation of environment-light, humidity, temperature and $CO_2$ in high tech green house<br>• To acquaint the student with practical skill regarding fertigation systems in green house<br>Project preparation forgreenhouse cultivation of fruit crops. |
| **M.Sc. (Horticulture) Floriculture & Landscape Architecture** | | |
| **CourseNo. /Credit Hours** | **Practical and Hands-on-training** | **How far students are getting desired practical and hands-on-training as per thecurriculum (bullet form)** |
| FLA 501 (2+1) | • Description of botanical features-Cataloguing of cultivars, varieties and species in flowers, floral biology<br>• Selfing and crossing, evaluation of hybrid progenies, seed production<br>• Induction of mutantsthrough physical and chemical mutagens, induction of polyploidy.<br>• Screening of plants for biotic and abiotic stresses and environmental pollution.<br>• In vitro breeding in flower and ornamental plants. | • Visit to Garden for identification of different ornamental plants like annual, perennial, herbs, shrubs, climbers and trees etc.<br>• To study different principles and methods of plant breeding used for developing new and exotic cultivars of ornamental plants<br>• To impart practical knowledge knowledge about Induction of mutants through physical and chemical mutagens, induction of |

| | | |
|---|---|---|
| | | polyploidy<br>• To get knowledge through practical work about different biotic and abiotic stresses which affect the plant growth and development |
| FLA 502<br>(2+1) | • Description of varieties<br>• Propagation techniques, mist chamber operation, training and pruning techniques<br>• Practices in manuring, drip and fertigation, foliar nutrition<br>• Growth regulator application, pinching, disbudding, Staking, harvesting techniques, post- harvest handling, cold chain<br>• Project preparation for regionally important cut flowers<br>• Visit to commercial cut flower units and case study | • To visit the botanical garden for identification of important varieties of commercial flower crops and presentation.<br>• To get knowledge by practice about different propagation techniques under open and protected conditions<br>To develop understanding about different training and pruning techniques<br>• To enable students with practical skill about different cultural practices like manuring, drip and fertigation, foliar nutrition, growth regulator application, pinching, disbudding, staking, harvesting, post- harvest handling and cold chain storage<br>• To get knowledge through demonstration about regionally important commercial cut flowers, theirproduction and marketing |
| FLA 503<br>(2+1) | • Description of species and varieties<br>• Propagation techniques, mist chamber operation<br>• Training and pruning techniques, practices in manuring, drip and fertigation,<br>• Foliar nutrition, growth regulator application, pinching, disbudding, staking, harvesting techniques<br>• Post-harvest handling, storage and cold chain<br>• Project preparation for regionally important commercial loose flowers<br>• Visits to fields, essential oil extraction units and markets | • To identify different species and varieties of flower crops and to prepare descriptor as per NBPGR.<br>• To get in hand practice about plant propagation techniques and mist chamber operation<br>• Practical demonstration of training and pruning techniques, manuring, drip andfertigation, growth regulator application, pinching, disbudding, staking, harvesting techniques etc.<br>• To understand the practices of post-harvest handling, storage and cold chain<br>• Estimation and extraction of essential oils from flowers. |
| FLA 504<br>(2+1) | • Selection of ornamental plants,<br>• Practices in preparing designs for home gardens, industrial gardens<br>• Institutional gardens, corporates, avenue planting, practices in planning and planting of special types of gardens, burlapping, lawn making<br>• Planting herbaceous and shrubbery borders<br>• Project preparation on landscaping for different situations<br>• Visit to parks and botanical gardens, case study on commercial landscape gardens | • To get knowledge about the suitable ornamental plants for preparing plan and designs for home, industrial, institutional gardens, corporates, and avenue planting.<br>• To get in hand practice about special types of gardens, burlapping, lawn making, planting herbaceous and shrubbery borders<br>• To learn through demonstration about how to do landscaping for different situations<br>• To perform visit to city parks, commercial landscape gardens. |

| | | |
|---|---|---|
| FLA 505<br>(2+1) | • Study of various protected structures<br>• Practices in design, layout and erection of different types of structures<br>• Practices in preparatory operations, soil decontamination techniques<br>• Practices in environmental control systems<br>• Practices in drip and fertigation techniques<br>• Special horticultural practices, determination of harvest indices and harvesting methods<br>• Post-harvest handling, packing methods, project preparation,<br>• Visit to commercial greenhouses | • To acquired practical knowledge about various protected structures like greenhouse, shade net, polyhouse etc.<br>• To get knowledge through demonstration about design, layout and erection of different types of structures<br>• To impart knowledgethrouh practical exercise about preparatory operations, soil decontamination techniques, environmental control systems, drip and fertigation techniques<br>• To impart practical knowledge about different harvest and post harvest practices and their relevant application.. |
| FLA 506<br>(2+1) | • Practices in preparation of bouquets, button-holes, flower baskets, corsages, floral wreaths, garlands with fresh flowers<br>• Techniques in flower arrangement<br>• Techniques in floral decoration;<br>• Identification of plants for dry flower making<br>• Practices in dry flower making;<br>• Preparation of dry flower baskets, bouquets, pot-pourri, wall hangings, button holes, greeting cards, wreaths, etc.<br>• Visit to dry flower units, concrete and essential oil extraction units | • To learn by in hand practice about preparation of bouquets, button-holes, flower baskets, corsages, floral wreaths, garlands and flower arrangement<br>• To identify different ornamental plants suitable for dry flower making<br>• To get practical knowledge about various techniques in floral decoration and dry flower making-dry flower baskets, bouquets, pot-pourri, wall hangings, button holes, greeting cards, wreaths, etc.<br>• To get knowledge about concrete and essential oil extraction methods. |
| FLA 507<br>(2+1) | • Identification of turf grasses<br>• Preparatory operations in turf making<br>• Practices in turf establishment<br>• Layout of macro and micro irrigation systems, Water and nutrient Management.<br>• Special practices – mowing, raking, rolling, soil top dressing, weed Management.<br>• Biotic and abiotic stress management;<br>• Project preparation for turf establishment, visit to IT parks, model cricket and golf grounds, airports, corporates, Govt. | • To get practical knowledge about different species and varieties of turf grasses suitable for varied agro-climatic situations<br>• To learn by in hand practice about different practices of turf making, establishment, maintenance and rejuvenation like mowing, raking, rolling, soil topdressing, weeding<br>• To equip students with demonstration and practical skill about layout of macro and micro irrigation systems, water and nutrient management, biotic and abioticstress management<br>• To learn through exposyre visit about turfing of IT parks, model cricket and golf grounds, airports, c |
| FLA 508<br>(2+1) | • Practices in point picking methods, Using tool bars and icons, Using modifying tools and modifying comments, Isometric drawings, Using productivity tools, Drawing designs by | • To impart practical knowledge about drawing tools and their usage in garden designing by AUTOCAD, ARCHICAD, Photoshop etc. for home, institutional and special type of gardens. |

| | | |
|---|---|---|
| | AUTOCAD for home garden, institutional garden andspecial types of garden<br>• Using tools and info-box for 3D drawing, Creation of garden components with ARCHICAD, Organization, dimensioning, detailing and visualization tools with ARCHICAD | |

## Ph.D. (Horticulture) Fruit Science

| Course No. Credit Hours | Practical and Hands-on-training | How far students are getting desired practical and hands-on-training as per the curriculum (bullet form) |
|---|---|---|
| FSC 601 (2+1) | • Description and cataloguing of germplasm<br>• Pollen viability tests, pollengermination isozyme techniques- survey and clonal selection<br>• Observations on pest, disease and stress reactions in inbreds and hybrids<br>• Use of mutagenes and colchicine for inducing mutation and ploidy changes<br>• Practices in different methods of breeding fruit crops | • To acquire practical knowledge about cataloguing and description of germplasm of fruit crops.<br>• Estimation of pollen viability tests, pollen germination, isozyme techniques-survey and clonal selection to strengthen research activities.<br>• To understand the pest, disease and stress reactions in inbreds and hybrids grown in the orchard<br>• To get knowledge by practical skill about mutation and ploidy changes with physical and chemical mutagenes.<br>• To impart practical knowledge about various methods of breeding in fruit crops. |
| FSC 602 (2+1) | • Survey of existing fruit cropping systems and development of a model cropping system<br>• Estimating nutrient deficiency-estimation of water use efficiency<br>• Soil test-crop response correlations<br>• Practices in plant growth regulation<br>• Studying physiological and biochemical responses, quality analysis | • To conduct survey and prepare a plan for developing model cropping system<br>• Estimation of nutrients deficiency through visual symptoms and leaf tissue analysis in laboratory.<br>• Estimation of water use efficiency in different irrigation methods.<br>• To get practical knowledge of plant growth regulation by various physical and chemical means.<br>• Estimation of fruit quality. |
| FSC 603 (2+1) | • Root- shoot studies, quantifying the physiological and biochemical effects of physical and chemical growth regulation,<br>• Bioassay and isolation through chromatographic analysis for auxins and Gibberellins.<br>• Experiments on growth regulation during propagation, dormancy, flowering, fruitset and fruit development stages | • To get practical knowledge about root-shoot studies of fruit crop grown at farm<br>• To understand the effects of physical and chemical growth regulation in fruit crops.<br>• To acquire practical gain of Bioassay of auxins, gibberellins and their role in fruits<br>• To get practical knowledge of growth regulators on growth, propagation, dormancy, and fruit development stages. |

| | | |
|---|---|---|
| FSC 605 (2+1) | • Seed treatment /hardening practices, container seedling production<br>• Analysis of soil moisture estimates(FC, ASM, PWP)<br>• Analysis of plant stress factors,RWC<br>• Chlorophyll flurosence, chlorophyll stability index, | • To get knowledge by practical application of seed treatment with growth regulators and bio stimulants<br>• To understand the hardening practices for acclimatization to aerial and soil environment under protected conditions.<br>• To get practical knowledge by doing practices in containerized nursery over conventional system.<br>• Estimation of soil moisture stress factors (FC, ASM, PWP) through practical exercises.<br>• Estimation of plant stress indices like RWC, CSI, MSI, prolein, glycine betain, peroxidases, catalases etc.<br>• Estimation of Chlorophyll and CCI (chlorophyll stability index) |

**Ph.D. (Horticulture) Floriculture & Landscape Architecture**

**6.4.6 Supervision of Students in PG/Ph.D. Programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Details of M.Sc. programme offered by the Department**

| Year | Number of Students on roll | Number of PG faculty | Student-Teacher Ratio |
|---|---|---|---|
| 2018-19 | 37 | 13 | 2.84:1 |
| 2019-20 | 37 | 13 | 2.84:1 |
| 2020-21 | 34 | 12 | 2.83:1 |
| 2021-22 | 34 | 11 | 3.09:1 |
| 2022-23 | 31 | 12 | 2.58:1 |

**Details of Ph.D. programme offered by the Department**

| Year | Number of students On roll | Number of PG faculty | Student-Teacher Ratio |
|---|---|---|---|
| 2018-19 | 18 | 12 | 1.50:1 |
| 2019-20 | 20 | 13 | 1.53:1 |
| 2020-21 | 17 | 13 | 1.30:1 |
| 2021-22 | 22 | 13 | 1.69:1 |
| 2022-23 | 28 | 12 | 2.33:1 |

**Note:** Details of courses offered by the Department is given in ***Annexure HORT-IV***

***6.4.7.*** **Feedback of stake holders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism(duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five yearstoaddress the issues raised in the feedback?*

Generally very good feedback forms have been received from students, parents, industries, employers, farmers etc.

***6.4.8.*** **Student intake and attrition in the programme for last five years:** *Year wise informationon sanctioned strength, actual intake and attrition in the last five years of the Degree Programme,in the tabular form, shall be provided.*

| Name of the Degree Programme | No. of students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 17 | 19 | 198 | 17 | 14 | 88.23 | 5.26 | 11.11 | - | 28.57 |
| Ph.D. | 6 | 11 | 8 | 8 | 10 | - | 45.45 | - | - | - |

***6.4.9.*** **ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

**Use of ICT application in teaching and practical for curricula delivery**

| Courses/ Total courses | Theory | Type of ICT Application |
|---|---|---|
| M.Sc.-Fruit Science<br>6+1 Seminar | FSC 501, FSC 502, FSC 503, FSC 506, FSC 507, FSC 508 | PPT, Smart Board |
| M.Sc.-F.L.A.<br>8+1Seminar | FLA 501, FLA 502, FLA 503, FLA 504, FLA505, FLA 506, FLA 507, FLA 508 | PPT, Smart Board |
| Ph.D.-Fruit Science<br>4+2 Seminar | FSC 601, FSC 602, FSC 603, FSC 605, | PPT, Smart Board |
| Ph.D.-F.L.A<br>4+2Seminar | FLA 601, FLA 602, FLA 603, FLA 604 | PPT, projector |

The faculty members of Horticulture use ICT in teaching and practical. There is one seminar room and one lecture room with computer, LCD projector and internet connection. All faculty members have computer with printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, emails and CD ROM in teaching all courses at UG, PG and Ph.D. level. During COVID-19 pandemic, the department adopted online teaching platforms such as Google Meet and Teams for effective teaching. All the teaching materials were successfully uploaded on the ERP module and Microsoft teams to ensure the accessibility of teaching material to all the students.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and tobe presented College-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme)

I, the **Dean, Dr. Surender K. Pahuja** hereby certify that the information contained in the Section to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

*Annexure HORT- I*

## List of student's placement

| Sr. No. | Name of student | Degree | Post for which selected | Company/institute |
|---|---|---|---|---|
| **1.** | Dr. Sonu Kumari | Ph.D. | Assistant Fruit Breeder | CCSHAU, Hisar |
| **2.** | Mr. Manmohan Singh | M.Sc. | Agriculture Officer | Punjab National Bank |
| **3.** | Ms Priya Deep | M.Sc. | Jr. Engineer | Urban Local Body, Haryana Govt. |
| **4.** | Mr. Sukrampal | M.Sc. | H.D.O. | Dept. of Horticulture Govt. of Haryana |
| **5.** | Mr. Naveen Rana | M.Sc. | H.D.O. | -do- |
| **6.** | Mr. Sanjay Kumar | M.Sc. | H.D.O. | -do- |
| **7.** | Dr. Reetika | Ph.D. | H.D.O. | -do- |
| **8.** | Ms. Manpreet Kaur | Ph.D. | D.H.O. | -do- |
| **9.** | Mr. Ankit Gawri | M.Sc. | H.D.O. | -do- |
| **10.** | Jashanpreet | M.Sc. | H.D.O. | -do- |
| **11.** | Pragati | M.Sc. | H.D.O. | -do- |
| **12.** | Ms. Rinku Rani | Ph.D. | H.D.O. | -do- |
| **13.** | Dr. Sweety | Ph.D. | D.H.O. | -do- |
| **14.** | Dinesh Giroh | M.Sc. | D.H.O. | -do- |
| **15.** | Gaurav Kant | M.Sc. | D.H.O. | -do- |
| **16.** | Komal | M.Sc. | D.H.O. | -do- |
| **17.** | Poonam Saini | Ph.D. | D.H.O. | -do- |
| **18.** | Dr. Rupakshi | Ph.D. | H.D.O. | -do- |
| **19.** | Vikas Sheoran | M.Sc. | H.D.O. | -do- |
| **20.** | Hemant Saini | Ph.D. | D.H.O. | -do- |
| **21.** | Avesh | M.Sc. | H.D.O. | -do- |
| **22.** | Neeraj | M.Sc. | H.D.O. | -do- |
| **23.** | Jyoti Chahal | Ph.D. | H.D.O. | -do- |
| **24.** | Vivek Beniwal | Ph.D. | H.D.O | -do- |
| **25.** | Jaipal | M.Sc | H.D.O. | -do- |
| **26.** | Monika | M.Sc. | A.D.O. | DAFW Govt. of Haryana |
| **27.** | Ritu Yadav | M.Sc. | T.A. | CCSHAU, HISAR |
| **28.** | Dr. Sourabh Jakhar | Ph.D. | Sr. Tech. Officer | CAZRI, Jodhpur |
| **29.** | Dr. Anuradha | Ph.D. | Asst. Hort. Breeder | RRS, Bawal |
| **30.** | Dr. Vinita Rajput | Ph.D. | DES (Hort) | CCSHAU, Hisar |
| **31.** | Dr. Sonia | Ph.D. | Asstt. Scientist/HDO | MHU, Karnal |
| **32.** | Dr. Sehroon Khan | Ph.D. | Asstt. Scientist | MHU, Karnal |
| **33.** | Dr. Vijay Kumar | Ph.D. | Asstt. Scientist | MHU, Karnal |
| **34.** | Dr. Prince | Ph.D. | Asstt. Scientist | CCSHAU, Hisar |
| **35.** | Ms Jyoti Bai | M.Sc. | Asst. Area Manager | N.F.L., Bhatinda |
| **36.** | Sushila | M.Sc. | Agril. Field Officer | Bank |
| **37.** | Gulshan Yadav | M.Sc. | SO, DDA | DDA, Delhi |
| **38.** | Ashok Kumar | M.Sc. | SO, DDA | DDA |
| **39.** | Sheena Nain | Ph.D. | SMS | Horticulture, Dept, Haryana |
| **40.** | Sushil Kumar | M.Sc. | Technical Assistant | CCSHAU, Hisar |

| | | | | |
|---|---|---|---|---|
| **41.** | Neha | Ph.D. | Agriculture Extension officer | Canara Bank |
| **42.** | Gurpreet Singh | M.Sc. | ADO | Agriculture Department , Government of Punjab |
| **43.** | Satish Kumar | M.Sc. | Executive Trainee | Jindal Stainless Limited Hisar |
| **44.** | Diksha | M.Sc. | Executive Trainee | Jindal Stainless Limited Hisar |
| **45.** | Zehra Salma | M.Sc. | Assistant Professor | Horticulture University, Hyderabad |
| **46.** | Ashish Kumar Panda | M.Sc. | Assistant Professor | Central University, Bihar |
| **47.** | Anjali Tripathi | Ph.D. | KVK, Mukteshwar | SRF |
| **48.** | Gagan Mehta | Ph.D. | T.A | Horticulture, Dept, Haryana |
| **49.** | Riya Yadav | M.Sc. | AFO | Union Bank of Inida |
| **50.** | Sahil | M.Sc. | AFO | Central Bank of India |
| **51.** | Mr. Jai Kumar | M.Sc. | Senior Officer | Dharampat Satyapal Ltd., Noida |
| **52** | Kumatkar Raghunath | Ph.D. | Section Officer | Central Public Works Dept, Govt. of India |
| **53** | Ashod Dhakad | M.Sc. | Field Extension Officer, | JNKVV, Jabalpur |
| **54** | Mahesh Choudhary | Ph.D. | Assistant Professor | SKNAU, Jobner |
| **55** | Preeti | Ph.D. | Field Officer | Central Bank of India |
| **56** | Anop Kumari | Ph.D. | SMS | KVK, Nagaur, Agril.University, Jodhpur |

## COURSES OFFERED BY THE DEPARTMENT

| Cours e No. | Course title | Credit hrs |
|---|---|---|
| FSC 501 | Tropical and Dry land Fruit Production | 2+1 |
| FSC 502 | Subtropical and Temperate Fruit Production | 2+1 |
| FSC 503 | Biodiversity and Conservation of Fruit Crops | 2+1 |
| FSC 504 | Canopy Management in Fruit Crops | 2+1 |
| FSC 505 | Propagation & Nursery Management for Fruit Crops | 2+1 |
| FSC 506 | Breeding of Fruit Crops | 2+1 |
| FSC 507 | Post harvest Technology for Fruit Crops | 2+1 |
| FSC 508 | Growth and Development of Horticultural Crops | 2+1 |
| FSC 509 / MBB515 | Biotechnology of Horticultural Crops | 2+1 |
| FSC 510 | Organic Horticulture | 1+1 |
| FSC 511 | Protected Fruit Culture | 2+1 |
| FSC 512 | GAP for Horticultural Crops | 1+0 |
| FSC 513 / AGM 507 | Weather Modifications and Risk Management Strategies | 2+0 |
| FSC 591 | Master's Seminar | 1 |
| FSC 601 | Advances in Breeding of Fruit Crops | 2+1 |
| FSC 602 | Advances in Production of Fruit Crops | 2+1 |
| FSC 603 | Advances in Growth Regulation of Fruit Crops | 2+1 |
| FSC 604/BIF 501/MBB 555 | Information to Bioinformatics | 2+1 |
| FSC 605 | Biotic and Abiotic Stress Management in Horticultural Crops | |
| FLA 501 | Breeding of Flower Crops and Ornamental Plants | 2+1 |
| FLA 502 | Production Technology of Cut Flowers | 2+1 |

# Programme - 11

## M.Sc. Nematology

## and

## Ph.D. Nematology

## 6.4. About the Department

The Department of Nematology of College of Agriculture, Haryana Agricultural University, Hisar came into being in 1977. Prior to establishment of the separate department, the research work on phytonematology had been going on in the department of Plant Pathology, since 1966 in a scheme entitled "Co-ordinated scheme for work on nematodes of fruits, vegetables and other crops" with Dr. M.C. Mukhopadhayaya as its Principal Investigator. In 1971, Dr. D.S. Bhatti, who returned from U.S.A. after completing Ph.D. degree in the discipline of Nematology, was made the technical incharge of the said scheme and a separate section of Nematology was created in 1975 in the Department of Entomology which was subsequently raised to the status of sub department in the same year. The Sub-department in the Department of Entomology was elevated to the status of a full-fledged independent department in 1977 with Dr. D.S. Bhatti as founder Prof. & Head. Since then, the department has grown to new heights and it has developed its teaching, research, and extension units. The department has been playing a vital role in the development of Nematology at the national level. Till now 61 M. Sc. and 39 Ph. D. has passed out from the department. Total 10 PG students are pursuing M.Sc and Ph.D degree in the department. Presently 7 faculty members are working in the teaching and research schemes of the department. The major research schemes under department are as follows

1. Survey, identification, control of plant parasitic nematodes and use of Entomopathogenic nematodes in insect pest management.
2. State scheme C(a)-Dte-R-1-Agri. (A)-1207
3. ICAR scheme C(b)Nem-1-ICAR (All India Cordinated Research Project on nematode in agriculture)

Apart from the above schemes, external funding projects, adhoc and testing trails have also been conducted in the department.

### Major achievements during the period of report

1. One patent has been filed by Pushpa Kharb, Kanika Rani, Nisha Devi and Prakash Banakar, Improved method for synthesis of silver nanoparticles using glycyrrhiza glabra 19860/ DEL/2020, CBR No.14085 dt 28/04/2020
2. Based upon the research eight technologies were developed during the period of report for the management of plant parasitic nematodes in rice, wheat, polyhouse (Tomato, cucumber and capsicum). These are included in package and practices of the CCSHAU, Hisar and adopted by the farmers.
3. Using laboratory facilities in the department 50 research papers were published in national and international journals out of which 15 papers are having NAAS rating above 6.
4. One of the faculty member i.e., Dr. Saroj Yadav, Astt. Professor received Young Scientist Award during 2019.
5. Other activities undertaken/ Programmes organized are as under:

| S. No. | Titles | Dates |
|---|---|---|
| **1.** | Awareness day on nematode management in protected cultivation and horticultural crops at KVK Fatehabad | 21.09.2018 |
| **2.** | Molya Wheat Nematode field day at Kharakheri | 15.03.2019 |
| **3.** | Hands on training on "Basic Techniques in Nematology and Identification of Major Plant Parasitic Nematodes" | June 10-21, 2019 |
| **4.** | Nematode awareness day at KVK Rohtak | 09.08.2019 |

| | | |
|---|---|---|
| **5.** | Vegetable Nematode awareness day at KVK Fatehabad | 29.06.2020 |
| **6.** | Webinar on Nematode problems in horticultural crops | 09.08.2020 |
| **7.** | Webinar on Nematode problems in horticultural crops and their management | 04.09.2020 |
| **8.** | Molya Wheat Nematode field day at Kharakheri | 15.03.2021 |
| **9.** | Nematode awareness day at KVK Jind | 24.08.2021 |
| **10.** | Polyhouse nematode awareness day at KVK Fatehabad | 22.11.2021 |
| **11.** | Nematode awareness day at KVK Fatehabad | 29.12.2021 |
| **12.** | Hands on training on "Detection, Diagnosis and Management of Phytoparasitic Nematodes Associated with Agri-Horticultural Crops" | March 5-11, 2022 |
| **13.** | Nematode awareness day at KVK Fatehabad | 11.10.2022 |

Nematode awareness day at KVK Fatehabad

Hands on training for UG and PG students

## Objectives of the Department

- To generate human resource in Nematology
- To identify and generate management technology for nematode problems of Haryana
- To disseminate the nematode technology to farming community
- To impart training and update knowledge about nematodes to research and extension workers

### 6.4.1 Brief History of the Degree Programme:

M.Sc. & Ph.D. programmes were started in the year 1977 and 1980, respectively. A total of 61 and 39 students have passed their M.Sc. and Ph.D. degree since inception of the department. During the period under report, a total of 11 M.Sc. and 8 Ph. D. students have passed their degree. At present, four students in M.Sc. and six in Ph.D. are on roll.

| | |
|---|---|
| Objectives of initiating M.Sc. | To project the importance of nematodes in agriculture and impart basic knowledge on all aspects of plant nematology.<br><br>To sensitize the students on the theory and practice of classifying organisms and the rules governing the same.<br><br>Familiarization with structural organization of nematode body so as to enable the students to understand biology, physiology and classification of nematodes.<br><br>Development of skills in the identification of plant parasitic nematodes up to genera and species levels.<br><br>Understanding the principles, theoretical aspects and developing skills in nematological techniques.<br><br>To impart basic knowledge about the causal organism, nature of damage, symptoms and control of nematode diseases of agricultural and horticultural crops.<br><br>To develop understanding of life cycle patterns, feeding and metabolic processes in phytonematodes which have implications in their management.<br><br>To understand the life of plant parasitic nematodes in their environment; their survival strategies, and how to exploit these for their control.<br><br>To understand the role of nematodes in disease complexes involving fungal, bacterial, viral and other organisms.<br><br>To impart comprehensive knowledge about the principles and practices of nematode management.<br><br>To sensitize about the use of nematodes for the biological control of insect pests of crops, and application of some nematodes as biological models and as indicators of environmental pollution. |
| Accomplishments of M.Sc. programme | Department has guided 43 students having master degree in Nematology and they are serving in the various capacity in the department of Nematology or in State Agriculture Department.<br><br>Three students got SRF and sought admission to Ph.D in Division of Nematology, IARI New Delhi.<br><br>Six Students cleared NET examination during 2017-2022 |

| | |
|---|---|
| | One student (Vinod Kumar, Adm. No. 2013A98M) got selected as Assistant Scientist in CCS HAU, Hisar in 2018<br><br>One student (Ms. Promila, Adm. No. 2018A72M) got selected as HDO, in Horticulture department Haryana in 2021<br><br>One student (Lochan Sharma, Adm. No. 2017A132M) got selected as Assistant scientist in CCSHAU, Hisar, in 2022<br><br>Students participated in National/International Conferences and published thirty research papers in National and International journals above NAAS Rating 6. |
| Objectives of initiating Ph.D. programme | • Studies on the ultrastructure of plant parasitic nematodes based on TEM and SEM, and appraisal of recent developments in their classification.<br>• To update knowledge on the recent research trends in the field of plant nematode relationships at genetic and molecular level.<br>• To keep abreast with latest developments and trends in nematode management.<br>• To facilitate deeper understanding on plant biosecurity and biosafety issues in agriculture |
| Accomplishments of Ph.D. programme | • Department has guided 24 number of students having Ph.D degree in Nematology and they are serving in the various capacity in the discipline of Nematology or in State Agriculture Department<br>• One student (Jaydeep A. Patil, Adm. No. 2013A30D) got selected as Assistant Scientist in CCS HAU Hisar during 2018.<br>• One student (Saroj Yadav, Adm. No. 2014A29D) got selected as Assistant Professor in CCSHAU, Hisar during 2019.<br>• Mr. (Gurpeet Singh, Admn. No. 2016A23D) joined as Territory Manager at T Stanes and company limited, Haryana<br>• Mr. Madhu MR, Admn. No. 2015A25D joined as Senior research associate at Advanta Crop Science Pvt. Ltd<br>• One student Harjot Singh, Adm. No. 2015A27D got selected as Assistant Professor in MHU, Karnal during 2021.<br>• Students participated in National/International Conferences and published twenty-one research papers in national and international journals<br>(*Annexure NEMA- I*)<br>• Students got best paper presentation awards in symposium.<br>Note: The list of student's publication is presented in *Annexure-I* |

| **Degree Programme offered by the Deptt** | **Specialization** | **Year of start** | **No. of seats** | | | | | | **No. of students passed out** | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Y1 | Y2 | Y3 | Y4 | Y5 | Total | Y1 | Y2 | Y3 | Y4 | Y5 | Total |
| **M. Sc.** | Nematology | 1977 | 2 | 2 | 3 | 1 | 3 | **11** | 2 | 3 | 1 | 2 | 3 | **11** |
| **Ph. D.** | Nematology | 1980 | 1 | 3 | 1 | 2 | 2 | **9** | 1 | 2 | 1 | 0 | 4 | **8** |

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual*

*faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Sanctioned faculty | In place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| 1. | Professor and equivalent | - | - | - |
| 2. | Associate Professor and equivalent (2) | 1 | 1 | - |
| 3. | Assistant Professor and equivalent (13) | 9* | 4 | - |

**Note:** All the Faculty is assigned the responsibilities for the multiple programmes

*One faculty working in wheat and barley section of GPB

**6.4.3. Technical and Supporting staff:** *The position of the technical and supporting staff of the Degree programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Designation | Sanctioned | In place | vacant | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|---|
| 1 | Assistant | 1 | 1 | 0 | - |
| | Steno | 1 | 1 | 0 | - |
| | Messenger | 1 | 0 | 1 | - |
| 2. | Lab staff | | | | - |
| | Lab Assistant+SLA | 1 | 1 | 0 | - |
| | Any other | | | | - |
| 3. | Field staff | - | - | - | - |
| | Beldar | 1 | 1 | 0 | - |

**Note:** All the technical and supporting staff has been assigned the responsibilities for the multiple programmes.

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of classroom and functional laboratories**

| | |
|---|---|
| No. of lecture rooms with sitting capacity | • One (Lecture room no. 13) with seating capacity of 70 each with smart classroom facility |
| No. of labs with specialized purpose | • One Under -graduate laboratory for conducting practical of UG courses with sitting capacity 30 students with LED facility<br>• One Post-Graduate Laboratory for conducting research on biocontrol and for practical classes of PG courses<br>• One Nematode Management Laboratory for conducting experiments on management of plant parasitic nematodes<br>• One laboratory for nematode taxonomy with all the facilities of nematode identification slides and wet collections of nematode species of Haryana is maintained. Sufficient number of stereo zooms and compound microscopes are available for conducting practicals of the course i.e, nematode classification, morphology of nematodes and nematode biology and physiology |
| Farm facilities | • Yes. Research farm of 2.5 acre is available in the department. |

| | |
|---|---|
| | There is a dedicated field lab. For practical's processing of the samples and other research work pertaining to the field area. Farm area is divided into plots, micro plots polyhouse screen house. Pure nematode culture is maintained in micro plots Mushroom lab is available in the field area for carrying out the experiment |

## List of major equipments at present in the Department

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Gel doc imaging system | 57 |
| 2. | Elga 50 ltr. De-ionization based portable system | 57 |
| 3. | GT Horizontal Electrophoresis mini sub cell | 57 |
| 4. | PCR machine | 57 |
| 5. | NSW Refrigerated bath circulator | 57 |
| 6. | Horizontal Electrophoresis system | 57 |
| 7. | BOD Incubator | 57 |
| 8. | Autoclave (4) | 8, 56, 57 and Field Lab |
| 9. | Laminar Air Flow (2) | 38 and 57 |
| 10. | Deep Freezer (-20 ºC) | 57 |
| 11. | Nikon Camera | 38 |
| 12. | Spectrophotometer (1) | 38 |
| 13. | BOD Incubator (7) | 8, 38, 56, 57 and Field Lab |
| 14. | Weighing balance (5) | 8, 38, 56, 57 and Field Lab |
| 15. | Stereoscopic Microscope (9) | 8, 38, 56, 57 and Field Lab |
| 16. | Trinocular Research Microscope | 08 |
| 17. | Centrifuge (spin win micro centrifuge) | 57 |
| 18. | Electronic precision balance | 57 |
| 19. | LED | 56 |
| 20. | pH Meter | 58 |
| 21. | Refrigerator (6) | 8, 38, 56, 57 and Field Lab |
| 22. | Hot Plate (3) | 38 and 56 |
| 23. | Distilation Unit | 56 |
| 24. | Cooling Centrifuge | 56 |
| 25. | Inverted microscope | 56 |
| 26. | Compound microscope (6) | 8, 38, 56 and 57 |

## Theory and practical batches

- At UG level, the department of Nematology offers 1 compulsary and 1 professional elective courses (up to 2019), of which all the courses had practical components. Since, 2019 onwards module is being taught to students during final year of B.Sc. (Hons.) Agri.
- At M.Sc level, the department of Nematology offers 20 courses and 18 courses have practical components. There are limited 3 seats in M.Sc. programme with an average of <15 students.
- There is only one batch for theory classes and one batch for practical classes in all the courses.

| Year | Theory | | Practical | |
|---|---|---|---|---|
| | M.Sc. | Ph.D. | M.Sc. | Ph.D. |
| 2018-19 | one | one | one | one |
| 2019-20 | one | one | one | one |
| 2020-21 | one | one | one | one |
| 2021-22 | one | one | one | one |
| 2022-23 | one | one | one | one |

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

| Degree Programme | Total Courses | Practical courses | Course No | How far students are getting desired practical and hands on training as per the curriculum |
|---|---|---|---|---|
| M.Sc. | 16 | 12 | NEMA 501 | • Students are getting knowledge of principles of the nematode extraction from soil and plant samples.<br>• Standing of sedentary endoparasites.<br>• Nematode diseases symptoms and histopathology. |
| | | | NEMA 503 | • Students are getting knowledge of different shapes and size of nematodes.<br>• Morphological details of cuticle, cuticular markings and ornamentation, variations in stoma, oesophagus, rectum.<br>• types and parts of female and male reproductive systems, sense organs, and excretory systems. |
| | | | NEMA 504 | • Identification of common plant parasitic nematodes belonging to Orders Tylenchida, Dorylaimida, Aphelenchida and Triplonchida up to generic level; and up to species level for major nematode pests (root-knot, cyst nematodes etc.) of crops.<br>• Identification of EPNs belonging to Order Rhabditida. Drawing of nematodes, measurement of nematodes using traditional as well as image analyzing software.<br>• Procedures for PCR and molecular markers |
| | | | NEMA 505 | • Students are doing practicals on extraction of nematodes cyst from different methods.<br>• killing and fixing nematodes and preparation of temporary and permanent mounts.<br>• Identification of root knot and cyst nematodes by preparation of perineal pattrerns and vulval cones.<br>• Hands on training on collection of root exudates and nematode disease exhibits.<br>• Culturing of nematodes by different methods. |
| | | | NEMA 506 | • Identification of different nematode diseases by symptoms and Diagnosis of causal organisms.<br>• Field visit of students for diagnosis of nematode diseases in agricultural and horticultural crops. |

| | | | | |
|---|---|---|---|---|
| | | | NEMA 507 | • Students are getting knowledge on embryogenesis and post-embryogenesis, hatching, moulting, life cycle development, feeding.<br>• Enzymatic assay by electrophoresis. |
| | | | NEMA 508 | • Hands on training by students on nematode fauna in varied agro-ecological systems, community analysis of nematode populations.<br>• Laboratory exercises on influence of abiotic factors on movement and hatching.<br>• Green-house experiments on effect of abiotic factors on nematode populations and plant growth. |
| | | | NEMA 509 | • Green-house experiments to study the role of plant parasitic nematodes in wilt/rot causing fungal and bacterial pathogens. |
| | | | NEMA 510 | • Students are conducting experiments on *In vitro* screening of synthetic chemicals and plant products for nematicidal activity, and their application methods; methods for screening of crop germplasm for resistance against nematodes.<br>• Laboratory exercises on biocontrol potential of fungal, bacterial parasites, and predacious fungi and nematodes. |
| | | | NEMA 511 | • Isolation, identification, mass rearing and application methods of entomopathogenic nematodes |
| | | | NEMA 512/ ENT 510 | • Crop loss assessment- direct losses, indirect losses, potential losses, avoidable losses, unavoidable losses.<br>• Computation of EIL and ETL.<br>• Crop modeling; designing and implementing IPM system. |
| | | | NEMA 515/ PATH 521/ ENT 524 | • Visit to familiarize with pest and disease situations developing in protected cultivation; symptomatology and damages; identification of the causes.<br>• Estimation of population densities; management tactics/ approaches and recommendations.<br>• Production and commercialization of biological agents. |
| **Ph.D.** | 7 | 4 | NEMA 601 | • Students are learning of morphological structures and identification of plant parasitic nematodes up to species level.<br>• Preparation of compendia and keys.<br>• Drawing and measurements using camera lucida and computer software.<br>• Isozyme analysis for identification of common species of root knot nematodes. rDNA- RFLP for diagnosis of nematode species; Sequence analysis, alignment, phylogenetic analysis, preparation of phylogenetic tree and interpretation. |
| | | | NEMA 602 | • Microtomy for study of histopathological changes induced by important nematodes.<br>• Screening techniques for assessment of resistance in crop germplasm against nematodes. |
| | | | NEMA 603 | • Green-house experiments on the efficacy of fungal and bacterial bio-control agents, botanicals. |
| | | | NEMA 604 | • Isolation and quantification of proteins from nematode juveniles and eggs.<br>• Buffer preparation for molecular techniques, PCR, β-esterase polymorphism in root-knot nematode.<br>• Nematode DNA isolation from juveniles and eggs; RFLP of nematode DNA; nematode DNA amplification using PCR for nematode identification, RNAi technology. |

Nematode extraction from soil by UG students

Microscopic analysis of nematodes in stained root by UG students

Hands on training by PG students

**6.4.6 Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Details of M.Sc. programmes offered by the Department:**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| **2018-19** | 4 | 8 | 0.5:1 |
| **2019-20** | 4 | 9 | 0.44:1 |
| **2020-21** | 5 | 9 | 0.55:1 |
| **2021-22** | 4 | 9 | 0.44:1 |
| **2022-23** | 4 | 9 | 0.44:1 |

**Details of Ph. D. programmes offered by the Department:**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| **2018-19** | 6 | 8 | 0.75:1 |
| **2019-20** | 6 | 9 | 0.66:1 |
| **2020-21** | 6 | 9 | 0.66:1 |
| **2021-22** | 8 | 9 | 0.88:1 |
| **2022-23** | 8 | 9 | 0.88:1 |

**Note:** Details of courses offered by the Department is given in *Annexure Nema-II*

**6.4.7. Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

There is a system of annual self - appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice-Chancellor. The performance of the faculty is also reviewed on the basis their results, feedback from the students. The stakeholders' feedback on the overall performance and quality of the teaching is obtained through general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are conveyed to the HODs and controlling officers.

**6.4.8 Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the Degree Programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 2 | 3 | 3 | 2 | 3 | 9.09 | 8.33 | 0.0 | 9.09 | 8.33 |
| Ph.D. | 1 | 3 | 1 | 2 | 2 | 0.0 | 0.0 | 16.66 | 0.0 | 0.0 |

**6.4.9 ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention*

*whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of Department of Nematology use ICT in teaching and practical. There is one lecture room with smart classroom facilities along with recording system. One seminar room has LCD projector and Internet connection. All faculty members have computer with all the accessories printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching and research. Faculty members use power point presentations, YouTube, emails and CD ROM in teaching all courses at UG, PG and Ph.D. level. For PG and Ph.D. students emails are also used. Duirng Covid 19 pandemic teaching was done through google mee, Microsoft team and Zoom platform etc.

**6.5.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.5.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.5.12.** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean, Surender K. Pahuja hereby certify that the information contained in the

Section 6.4.1 to 6.4.9 is furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

# Programme - 12

## M.Sc. Plant Pathology

## and

## Ph.D. Plant Pathology

## 6.4 About the Department

The Department of Plant Pathology came into existence as Department of Botany and Plant Pathology in 1962 in erstwhile Punjab Agricultural University with headquarter at Hisar. Professor Dr. Suryanaryana was the founder Professor & Head. After bifurcation, a fullfledge Department of Plant Pathology was established in College of Agriculture, HAU Hisar in 1970. The department has units of fungal pathology, virology, bacteriology, molecular plant pathology and mushroom production technology where the students are trained and specialized in these areas. Similarly there are pathologists for each major crop / section and to give a fillip to advancement of agriculture in the state, there is a strong unit of extension pathology as well. Each PG student allotted a research problem forming a portion of the ongoing research programme of the department and is thus directly related to one of the national or state level problems. The students are trained to develop aptitude for independent original research. Qualified scientists, technicians and supporting staff are there to train the students in areas of plant bacteriology, plant virology, fungal pathology, fungitoxicants, mycorrihiza, biological control, seed pathology, post harvest deterioration, crop pathology, fruit pathology, vegetable pathology, host resistance, molecular plant pathology and mushroom production technology. Students of this department are occupying important position in universities, research institutes, administrative services, banks and multinational companies. The faculty members of this department also shouldered the responsibility of Dean's, Director of Research, Director of Extension Education, Director of Project cum Planning Formulation (now with the nomenclature of DHRM) and also Vice Chancellor of the University with the major scientific achievements in the field of Plant pathology.

### Major achievements during the period of report

1. First report of *Klebsiella* leaf streak on sorghum caused by *Klebsiella variicola* in Haryana, India during 2019-22.

2. First report of *Klebsiella aerogenes* inciting stem rot of pearl millet in Haryana, India during 2021

3. A team of scientists from of Plant Pathology department detected the cause of dwarfing in rice i.e., Southern rice black streaked dwarf virus (SRB SDV) and Rice gall dwarf virus (RGDV) through molecular methods. The date of nursery sowing and transplanting of rice, transplanting method, regular monitoring and management of nurseries and main field for insect vector (WBPH) has been recommended to deal with the SRB SDV for the upcoming rice season.

4. Published seventy seven research papers were published in national and international journals (*Annexure Pl.PATH –VI*).

5. Other activities undertaken/ Programmes organized (*Annexure PL. PATH I and II*)**.**

| Sr. No. | Titles | Dates |
|---|---|---|
| **1.** | One day training on Mushroom Production Technology to farmers | 23.12.2018 |
| **2.** | 10 days training on Mushroom Production Technology for UG/PG students of CCSHAU Hisar | 22.04.2019 to 01.05.2019 |
| **3.** | Ten days training on Mushroom Production Technology to UG/PG students | 23.01. 2020 to 01.02.2020 |

| | | |
|---|---|---|
| **4.** | Vocational trainings on Mushroom Production Technology | 29.02.2020 to 01.03.2020 |
| **5.** | National Symposium On "Crop Protection Through Bio-Rational Approaches - Current Trends And Future Perspective" & Annual Meeting Of Indian Phytopathological Society organised by the Department in coordination with Indian Phytopathological society. | March 10, 2022 |
| **6.** | Training programme on "Mushroom Production Technology" for SC/ST students; sponsored by ICAR under SC/ST development sub-plan | 22-28, March, 2022. |
| **7.** | A lecture on "Mushroom cultivation and rural development" by Dr. Balwan Singh Mandal, Director Extension Education, CCSHAU Hisar | 22.03.2022 |
| **8.** | A lecture on "Role of business communication in mushroom enterprise" by Dr. A.K. Dhingra, OSD to Vice Chancellor, CCSHAU Hisar | 28.03.2022 |

## Objectives of the Department

i. Identification and characterization of fungal, bacterial and viral diseases.
ii. Epidemiology and assessment of losses in host-pathogen interactions.
iii. Management of crop diseases through cultural, chemical biological and host resistance.
iv. Improvement in spawn production technology and integerated management of mushroom diseases.

### 6.4.1 Brief History of the Degree Programme:

M.Sc. & Ph.D. programmes were started in the year 1970. During the period under report, a total of 28 M.Sc. and 12 Ph. D. students have completed their degree.

| | |
|---|---|
| **Objectives of initiating M.Sc. programme** | i. To project the importance of plant diaseases and impart basic knowledge on all aspects of plant pathology.<br>ii. Development of skills in the identification and characterization of fungal, bacterial and viral pathogens.<br>iii. To sensitize the students on the theory and practical of classifying organisms and the rules governing the same.<br>iv. Understanding the principles, theoretical aspects and developing skills in phytopathological techniques<br>v. To impart basic knowledge about the causal organism, nature of damage, symptoms and control of fungal, bacterial and viral diseases of agricultural and horticultural crops.<br>vi. To develop understanding of life cycle and disease cycle of fingal and bacterial plant pathogens.<br>vii. To understand the epidemiology of the plant diseases caused by fungi, bacteria and viruses *etc*.<br>viii. To develop management stategies of crop diseases through cultural, chemical, biological and host resistance<br>ix. To develop management strategies of mushroom diseases. |
| **Accomplishments of M.Sc. programmes** | *a)* Department has guided 28 students for master degree in Plant Pathology and they are serving in the various capacity in the Department of Plant Pathology or in State Agriculture Department *etc*. *(Annexure PL.PATH –III)*<br>b) Mrs. Pavitra Kumari (2017A34D) got selected as Assistant Professor in Department of Plant Pathology, CCSHAU, Hisar during 2019. Ms. Namitha (2016A77M) got selected as STA in RRS, Kaul during 2019.<br>*c)* One student (Sonakshi, 2019A64D) selected as Assistant Plant Protection Officer, Faridabad during 2021.<br>*d)* One student (Munish Leharwan, 2017A35D) selected as Technical Assistant at NDRI, Karnal during 2019. |

| | |
|---|---|
| | e) Studies carried out on management of important diseases of field crops, veg. crops and horticulture crops by seed treatment & foliar application of fungicides.<br>f) The pathogenic variability in different plant pathogens were studied which helped the plant breeders in developing disease resistance varieties.<br>g) Disease resistant calli have been developed against *Alternaria* blight, *Sclerotinia* blight of rapeseed-mustard as well as for *Ascochyta* blight of Chickpea. |

| | |
|---|---|
| Objectives of initiating Ph.D. programme | i. To update knowledge on the recent research trends in the field of plant pathology at genetic and molecular level.<br>ii. To keep abreast with latest developments and trends in crop disease management.<br>iii. To facilitate deeper understanding on plant biosecurity and biosafety issues in agriculture<br>iv. To develop integrated disease management (IDM) module for major diseases of field, horticulture and vegetable crops.<br>v. To study epidemiological parameters for prediction of important diseases of field, horticulture and vegetable crops for guidance of need based spray . |
| Accomplishments of Ph.D. programme | a) Department has guided 12 students for successful completion of Ph.D. in Plant Pathology and they are serving in the various capacity in the Department of Plant apthology or in State Agriculture Department *etc*. (*Annexure PL.PATH –III*).<br>b) Dr. Pooja Sangwan (2015A337D), Dr. Mamta (2015A39D), Dr. Manoj Kumar (2014A44D) got selected as Assistant Professor in Department of Plant Pathology, CCSHAU, Hisar during 2018.<br>c) Dr. Manjeet Singh, Dr. Pooja Kumari and Dr. Mamta got selected as Assistant Professor in Department of Plant Pathology, CCSHAU, Hisar during 2019.<br>d) One student (Dr. Annu, 2016A34D) got selected as DES at KVK Fatehabad during 2022.<br>e) Discovery of multiple resistant sources of different field crops, vegetable crops and fruit crops against important diseases are being used for breeding programmes.<br>f) Basic parameters on biochemical and genetical resistance utilized by the breeders for developing resistant varieties.<br>g) Explored possibilities of potential endophytic microrganissms for management of crop diseases.<br>h) Different resistant varieties of field crops were screened in sick plot conditions. |

| **Degree Programme offered by the Department** | **Specialization** | **Year of start** | **No. of students admitted** | | | | | | **No. of students passed out** | | | | | |

**6.4.2 Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree*

*Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report*.

| S. No. | Sanctioned faculty | In place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| **1.** | Professor and equivalent (1) | - | 1 | - |
| **2.** | Associate Professor and equivalent (6) | 1 | 5 | - |
| **3.** | Assistant Professor and equivalent (16) | 9 | 7 | - |

*The Faculty assigned the responsibilities for the multiple programmes

**6.4.3. Technical and Supporting staff :** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| Sr. No. | Technical and supporting staff | Sanctioned | In place | Vacant | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|---|
| 1. | Assistant | 1 | 1 | Nil | Nil |
| 2. | Clerk | 1 | 1 | Nil | Nil |
| 3. | JSS/Stenographer | 1 | 1 | Nil | Nil |
| 4. | Senior Lab assistant | 1 | 1 | Nil | Nil |
| 5. | Lab Assistant | 6 | 5 | 01 | Nil |
| 6. | Lab Attendant | - | - | - | Nil |
| 7. | Messenger | 1 | - | 01 | Nil |
| 8. | Beldar | 4 | - | 04 | Nil |
| 9. | Any other (specify) | - | - | - | Nil |

**6.4.4..Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of classroom and functional laboratories**

| Name of College/Department | Plant Pathology |
|---|---|
| No. of lecture rooms with sitting capacity | One with seating capacity of 70 each with smart classroom facility smart screen facility |
| No. of smart class-rooms | - |
| No. of labs under Dean's office with specialized purpose | •Two Under -Graduate laboratory for conducting practical of UG courses with sitting capacity 50, LED facility<br>•Five Post-Graduate and Reasearch Laboratory for conducting research work and practical classes of PG courses. |
| Farm facilities | Yes with approx. area of 5 acre is available in the department. Farm area is divided into plots, micro plots, screen house to carry out the research experiments. Mushroom lab is available in the field area for carrying out the experiment and also for mushroom production. |
| Workshops | - |
| Any other instructional units being utilized for the award of the Degree Programme | Soft copy of lectures in PPT has been generated by different faculty members for teaching (UG/PG courses). Also Google Meet, Microsoft Team and Zoom Meet were used for teaching during *Covid-19* pandemic. |

## List of Major equipments (Equipments costing more than Rs. 50,000)

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Balance Aczet | Lab no. 172 |
| 2. | Refrigerator | Lab no. 172 |
| 3. | Autoclave | Lab no. 172 |
| 4. | Hot air oven | Lab no. 172 |
| 5. | Incubator shaker | Lab no. 172 |
| 6. | BOD shaker incubator | Lab no. 173 |
| 7. | Analytic Weighing machine | Lab no. 173 |
| 8. | Nano Drop spectrophotometer | Lab no. 173 |
| 9. | Tissue Culture Rack | Lab no. 173 |
| 10. | Flow Cytometer | Lab no. 173 |
| 11. | ELISA reader | Lab no. 173 |
| 12. | Automated autoclave | Lab no. 173 |
| 13. | Microtome Rotary | Lab no. 173 |
| 14. | Phase contrast microscope with computer | Lab no. 173 |
| 15. | Stereo binocular microscope | Lab no. 173 |
| 16. | Transmitted light equipment S base stand for transmitted light for stereo microscope | Lab no. 173 |
| 17. | Ultra-centrifuge | Lab no. 173 |
| 18. | Deep freeze F570 -80$^0$C with backup system | Lab no. 173 |
| 19. | Real time PCR System with laptop and fluorometer | Lab no. 173 |
| 20. | Western Blotting system | Lab no. 173 |
| 21. | Air Conditioner | Lab no. 177 |
| 22. | Incubator shaker | Lab no. 177 |
| 23. | Benchtop centrifuge (5804) | Lab no. 177 |
| 24. | Mini vertical electrophoresis with power supply | Lab no. 178 |
| 25. | Vertical autoclave | Lab no. 276 |
| 26. | Laminar flow | Lab no. 276 |
| 27. | Hot air oven | Lab no. 276 |
| 28. | BOD incubator | Lab no. 276 |
| 29. | Freezer up to -20℃ | MTL |
| 30. | Autoclave Horizontal | MTL |
| 31. | BOD Incubator | MTL |

## Mention theory and practical batches for PG Programmes

| Year | Theory | | Practical | |
|---|---|---|---|---|
| | M.Sc. | Ph.D. | M.Sc. | Ph.D. |
| 2018-19 | One | One | One | One |
| 2019-20 | One | One | One | One |
| 2020-21 | One | One | One | One |
| 2021-22 | One | One | One | One |
| 2022-23 | One | One | One | One |

**6.4.5. Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements?*

**Information to be supplied by the Departments.**

| Degree Programme | Total Courses | Practical courses | Course No | How far students are getting desired practical and hands on training as per the curriculum |
|---|---|---|---|---|
| M.Sc. | 21 | 17 | PP501 | • To impart practical knowledge on collection, identification and preservation of specimens, isolation and identification of plant pathogenic fungi |
| | | | PP502 | • Transmission, assay of viruses, purification, method of raising antisera, serological tests |
| | | | PP503 | • To impart knowledge on isolation, purification, identification and host inoculation of phytopathogenic bacteria, staining methods. |
| | | | PP505 | • To study the methods to prove Koch's postulates with biotroph and necrotroph pathogens, pure culture techniques , use of haemocytometer, stage and ocular micrometer, centrifuge, pH meter,.<br>• Microscopic techniques and staining methods, phase contrast system, spectrophotometer, serological and molecular techniques for detection of plant pathogens.<br>• To conduct practical's on evaluation of fungicides, bactericides etc., |
| | | | PP506 | • *In-vitro* and *in-vivo* evaluation of chemicals against plant pathogens, study of structural details of sprayers and dusters. |
| | | | PP507 | • Detailed study of symptoms and host parasite relationship of important diseases of major crops.<br>• Collection and dry preservation of diseased specimens of important crops. |
| | | | PP508 | • Detailed study of symptoms and host parasite relationship of representative diseases of plantation crops, collection and dry preservation of diseased specimens of important crops. |
| | | | PP509 | • Detailed study of symptoms and host pathogen interaction of important diseases of vegetable and spice crops |
| | | | PP510 | • To study conventional and advanced techniques in the detection and identification of seed borne bacteria, fungi and viruses. |

| | | | | |
|---|---|---|---|---|
| | | | | • To study the relationship between seed-borne infection and expression of the disease in the field. |
| | | | PP511 | • To impart knowledge on *in- vitro* evaluation techniques, preparation of different concentrations of chemicals, methods of application of chemicals |
| | | | PP512 | • Pathogenicity test by soil and root inoculation techniques, correlation between inoculums density of test pathogens and disease incidence, demonstration of fungistasis in natural soils; suppression of test soil-borne pathogens. |
| | | | PP514 | • Identification of common vectors of plant pathogens- aphids, leafhoppers, whiteflies, thrips, beetles, nematodes; culturing and handling of vectors; demonstration of virus transmission through vectors- aphids, leafhoppers and whiteflies. |
| | | | PP515 | • Isolation, characterization and maintenance of antagonists, methods of study of antagonism and antibiosis, application of antagonists against pathogen in vitro and in vivo conditions, study of cfu/g. |
| | | | PP516 | • Application of biological, cultural, chemical and biocontrol agents, their compatibility and integration in IDM; demonstration of IDM in certain crops as project work |
| | | | PP517 | • Preparation of spawn, compost, spawning, casing, harvesting and postharvest handling of edible mushroom; identification of various pathogens, competitors of various mushroom<br>• The emphasis given on the methods, demonstrations and practical aspects of mushroom production.<br>• Exposure visits to mushroom enterprises to impart knowledge about mushroom production technologies and marketing. |
| | | | PP518 | • To impart knowledge on measuring diseases, spore dispersal and trapping, weather recording, survey, multiplication of inoculum. |
| | | | PP519 | • Isolation characterization and maintenance of pathogens, role of different storage conditions on disease development, application of antagonists against pathogens *in vivo* and *in vitro* conditions, comparative efficacy of different chemicals, fungicides, phytoextracts and bioagents. |
| Ph.D. | 7 | 4 | PP601 | • Study of conidiogenesis- phialides, porospores, arthospores, study of fruiting bodies in Ascomycotina, identification of |

| | | | | |
|---|---|---|---|---|
| | | | | fungi up to species level, study of hyphal anastomosis, morphology of representative plant pathogenic genera from different groups of fungi. |
| | | | PP602 | • To impart knowledge on purification of viruses, SDS-PAGE for molecular weight determination, production of polyclonal antiserum, purification of IgG and conjugate preparation, serological techniques (i) DAC-ELISA (ii) DAS - ELISA (iii) DIBA (iv) Western blots (v) (ab) 2- ELISA,<br>• To study vector transmission (one each with aphid, leaf hopper and whitefly), methods for collecting vectors and their maintenance.<br>• To conduct nucleic acid isolation, DOT-blot, southern hybridization, probe preparation and autoradiography, PCR application and viral genome cloning, sequencing annotation of genes. |
| | | | PP603 | • Pathogenic studies and race identification; plasmid profiling of bacteria;fatty acid profiling of bacteria; RAPD prolfiling of bacteria and variability status;<br>• To study endospore, flagellarstaining; test for secondary metabolite production, cyanides, EPS, siderophore.<br>• Specific detection of phytopathogenic bacteria using species/pathovar specific primers.<br>• To study basic techniques in diagnostic kit development, molecular tools to identify phytoendosymbionts. |
| | | | PP604 | • Protein, DNA and RNA isolation, plasmids extraction,PCR analysis, DNA and Protein electrophoresis, bacterial transformation. |

**6.4.6. Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme( as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Details of M.Sc. programmes offered by the Department**

| Name of Department | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 14 | 16 | 0.87:1 |
| 2019-20 | 16 | 18 | 0.88:1 |
| 2020-21 | 16 | 18 | 0.88:1 |
| 2021-22 | 19 | 18 | 1.05:1 |
| 2022-23 | 25 | 19 | 1.32:1 |

**Details of Ph.D. programmes offered by the Department**

| Name of Department | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 10 | 16 | 0.62:1 |
| 2019-20 | 13 | 18 | 0.72:1 |
| 2020-21 | 14 | 18 | 0.77:1 |
| 2021-22 | 20 | 18 | 01:1.1 |
| 2022-23 | 18 | 19 | 0.94:1 |

Note : Details of the courses offered by the department are given in *annexure-PL. PATH-IV*

**6.4.7 Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

There is a system of annual self - appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice-Chancellor. The performance of the faculty is also reviewed on the basis their results, feedback from the students. The stakeholders' feedback on the overall performance and quality of the teaching is obtained through general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are considered by the HODs and Controlling Officers.

**The duly filled proforma from the students, parents, industries, employers and farmers have been maintained in the department file**

**6.4.8. Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the Degree Programme | No. of students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 07 | 10 | 9 | 11 | 10 | 0 | 0 | 0 | 0 | 0 |
| Ph.D. | 04 | 07 | 04 | 05 | 6 | 0 | 0 | 0 | 0 | 0 |

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

**Use of ICT application in teaching and practical for curricula delivery**

| Courses | Total courses | Theory | Practical | Type of ICT Application |
|---|---|---|---|---|
| **B.Sc.** | 4 | 4 | 4 | • Departmental Seminar room facilitated with smart LED and Internet connection.<br>• All faculty members have computer printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. |
| **M.Sc.** | 21 | 20 | 17 | |
| **Ph.D.** | 7 | 7 | 4 | |

| | | | | |
|---|---|---|---|---|
| | | | | • Faculty members use PPT, Google Meet, Microsoft Team and Zoom Meet for teaching. |

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme) I, the Dean **Dr.Surender K. Pahuja,** hereby certify that the information contained in the Section 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

*Annexure PL. PATH - I*

**National Symposium On "Crop Protection Through Bio-Rational Approaches - Current Trends And Future Perspective" & Annual Meeting of Indian Phytopathological Society (March 10, 2022)**

Organized by

Indian Phytopathological Society & Department of Plant Pathology,
College of Agriculture, CCS HAU, HISAR – 125 004

*Annexure PL. PATH - II*

**The following training programmes were organized during 2018-19 to 2022-23 at Department of Plant Pathology, COA, CCSHAU, Hisar**

| Sr. No. | Activities | Photographs |
|---|---|---|
| 1 | One day training on Mushroom Production Technology on 23.12.2018 |  |
| 2 | Ten days training for UG/PG students of CCSHAU Hisar on Mushroom Production Technology from 22.04.2019 to 01.05.2019 |  |
| 3 | Ten days training on Mushroom Production Technology to UG/PG students during 23.01.2020 To 01.02.2020. |  |
| 4 | Vocational trainings on Mushroom Production Technology from 29.02.2020 to 01.03.2020 |  |
| 5 | Training programme on "Mushroom Production Technology" for SC/ST students; sponsored by ICAR under SCSP development sub-plan conducted from 22-28, March, 2022. |  |

| | | |
|---|---|---|
| 6 | Dr. Balwan Singh Mandal, Director Extension Education delivered lecture on the topic "Mushroom cultivation and rural development" on 22.03.2022 |  |
| 7 | Dr. A.K. Dhingra, OSD to Vice Chancellor, CCSHAU Hisar delivered lecture on the theme "Role of business communication in mushroom enterprise" on 28.03.2022 |  |

*Annexure PL. PATH - III*

## LIST OF STUDENTS PLACEMENT

| Sr. No. | Year | Name of Student | Post for which selected | Institute |
|---|---|---|---|---|
| **1.** | 2018 | Prashant Kumar, 2012A44D | Asstt. Scientist | CCSHAU, Hisar |
| **2.** | | Mrs. Pooja Sangwan, 2015A37D | Asstt. Scientist | CCSHAU, Hisar |
| **3.** | | Ms. Mamta, 2015A39D | Asstt. Prof. | CCSHAU, Hisar |
| **4.** | | Manoj Kumar, 2014A44D | Asstt. Prof. | CCSHAU, Hisar |
| **5.** | | Kumar Saurabh, 2015A93M | A.O. | Govt. of Bihar |
| **6.** | | Gurav Narayan Pandit, 2013A48D | Asstt. Prof. | Agri. College, Goa |
| **7.** | 2019 | Pankaj, 2015A38D | Asstt. Scientist | PAU, Ludhiana |
| **8.** | | PavitraKumari, 2017A34D | Asstt. Professor | CCSHAU, Hisar |
| **9.** | | Manjeet Singh, 2013A45D | Asstt. Professor | CCSHAU, Hisar |
| **10.** | | Anil Saini, 2013A47D | Asstt. Professor | CCSHAU, Hisar |
| **11.** | | Jagdeep Singh, 2014A41D | Asstt. Professor | CCSHAU, Hisar |
| **12.** | | Namita, 2016A77M | STA | RRS, Uchani |
| **13.** | | Munish Leharwan, 2017A35D | TA | NDRI, Karnal |
| **14.** | | Rishika Dangi, 2018A46D | Asstt. Area Manager | NFL |
| **15.** | | Kashish, 2018A76M | Nationalized Bank | HP |
| **16.** | 2021 | Jawala Singh, 2018A75M | HDO | State Govt. |
| **17.** | | Sonakshi, 2019A64D | APPO, Faridabad | State Govt. |
| **18.** | 2022 | Annu, 2016A34D | DES | KVK Fetehabad |
| **19.** | 2022 | Amoghavarsha Chittaragi, 2015A94M | Asstt. Scientist | CCSHAU, Hisar |

# COURSES OFFERED BY THE DEPARTMENT

## I Semester

| S.No. | Course No. | Title | C.H. |
|---|---|---|---|
| **1** | Pl. Path. 301 | Diseases of kharif field crops and Horticultural crops and their management | 2+1 |
| **2.** | Pl.Path. 401 | Mushroom Cultivation Technology | 0+2 |
| **3.** | Ent 401 | Integrated pest and disease management (Ent + Path.) | 2+2 |
| **4.** | Ent. 404 | Biocontrol agents and biopesticides (Ent.+Path.+ Nem.) | 1+2 |
| **5.** | Ent. 405 | Pesticide and plant protection equipment (Ent+Path.) | 1+1 |
| **6.** | Pl.Path. 501 | Mycology | 2+1 |
| **7.** | Pl.Path. 504 | Principles of Plant Pathology | 3+0 |
| **8.** | Pl.Path. 505 | Detection and diagnosis of plant diseases | 0+2 |
| **9.** | Pl.Path. 506 | Principles of plant disease management | 2+1 |
| **10.** | Pl.Path. 507 | Diseases of field and medicinal crops | 2+1 |
| **11.** | Pl.Path. 508 | Diseases of fruits, plantation and ornamental crops | 2+1 |
| **12.** | Pl.Path. 510/ SST 510 | Seed Pathology | 2+1 |
| **13.** | Pl.Path. 512 | Ecology of soil-borne plant pathogens | 2+1 |
| **14.** | Pl.Path. 515 | Biological control of plant diseases | 2+1 |
| **15.** | Pl.Path. 519 | Post-harvest diseases | 2+1 |
| **16.** | Pl.Path. 591 | Master's seminar | 1 |
| **17.** | Pl.Path. 602 | Advanced virology | 2+1 |
| **18.** | Pl.Path., 605/ Ento 613/ Nema 605 | Plant biosecurity and biosafety | 2+0 |
| **19.** | Pl.Path. 691 | Doctoral seminar | 1 |
| **20.** | Pl.Path. 692 | Doctoral seminar | 1 |
| **21.** | AMB 520 | Management of agro-chemical industry | 2+1 |

## II Semester

| S.No. | Course No. | Title | C.H. |
|---|---|---|---|
| 1. | Pl. Path. 102 | Fundamentals of Plant Pathology | 3+1 |
| 2. | Pl.Path. 203/ Ent. 202 / Nem 201 | Plant Protection (for home science students) | 0+2 |
| 3. | Pl.Path. 302 | Diseases of Rabi Field Crops and Horticultural Crops and their Management | 2+1 |
| 4. | Module 4 | Mushroom Cultivation | 0+10 |
| 5. | Pl.Path. 502 | Plant Virology | 2+1 |
| 6. | Pl.Path.503 | Plant Bacteriology | 2+1 |
| 7. | Pl.Path. 509 | Diseases of Vegetable and Spice Crops | 2+1 |
| 8. | Pl.Path.511 | Chemicals in Plant Disease Management | 2+1 |
| 9. | Pl.Path. 513/ Nema 513 | Disease Resistance in Plants | 2+0 |
| 10. | Pl.Path. 514/ Ento 514 | Insect Vectors of Plant Viruses & other Pathogens | 1+1 |
| 11. | Pl.Path. 516 | Integrated Plant Disease Management | 2+1 |
| 12. | Pl.Path. 517 | Mushroom Production Technology | 2+1 |
| 13. | Pl.Path. 518 | Epidemiology & Forecasting of Plant Diseases | 2+1 |
| 14. | Pl.Path. 520/ Ent 520/ Nem 514 | Plant Quarantine | 2+0 |
| 15. | Pl.Path. 591 | Master's Seminar | 1+0 |

| | | | |
|---|---|---|---|
| 16. | Pl.Path. 601 | Advanced Mycology | 2+1 |
| 17. | Pl.Path. 603 | Advanced Bacteriology | 2+1 |
| 18. | Pl.Path. 604 | Molecular Basis of Host-Pathogen Interactions | 2+1 |
| 19. | Pl.Path. 691 | Doctoral Seminar-I | 1+0 |
| 20. | Pl.Path. 692 | Doctoral Seminar-II | 1+0 |

***Annexure PL. PATH - V***

**Student Performance in National Examination:** *Students Performance in JRF/SRF/NET/ARS and other National Examinations. No. of Students receiving Fellowships be mentioned*

**Fellowships awarded to PG students (From 2018-19 to 2022-23)**

| S.No | Year | Fellowship (ICAR/ Rajiv Gandhi/UGC/etc) | Name of student | Admission No | College/Department |
|---|---|---|---|---|---|
| 1. | 2019 | ICAR JRF | Ms. Pavitra P. Yaranal | 2019A112M | Plant Pathology |
| 2. | 2021 | ICAR JRF | Mr. Manoj Kumar S. | 2021A94M | Plant Pathology |
| 3. | 2022 | ICAR JRF | Mrs. Chaitra | 2022A127M | Plant Pathology |

| Qualified in NET examination (ICAR, UGC, CSIR) | | | | |
|---|---|---|---|---|
| 1. | 2017-2018 | Mamta | 2015A39D | Plant Pathology |
| 2. | | Annu | 2016A34D | Plant Pathology |
| 3. | | Amoghavarsha Chittaragi | 2015A94M | Plant Pathology |
| 4. | | Pavitra | 2015A95M | Plant Pathology |
| 5. | | Vishal Gandhi | 2013A77M | Plant Pathology |
| 6. | | Ms. Annie Khanna | 2015A93M | Plant Pathology |
| 1. | 2018-2019 | Ms. Namita Soni | 2016A77M | Plant Pathology |

# Programme - 13

## M.Sc. Seed Science & Technology

## and

## Ph.D. Seed Science & Technology

## 6.4. About Department

Department of Seed Science & Technology at CCS Haryana Agricultural University, Hisar came in to existence in February, 2000. In 1977, Govt. of India (ICAR) selected this centre during the first phase of National Seed Project to strengthen the breeder seed production and seed technology research programme under the World Bank Project. A Centre of Excellence on Seed Technology entitled "Advanced centres on Post-Graduate Agricultural Education and Research in seed Technology" under FAO/UNDP project was sanctioned during 1987. The ICAR has started this centre as HRD in Seed Technology in the Team/Centre of Excellence (TOE) under the National Agriculture Technology Project (NATP) from 1999-2005 and has excellent back-up support in terms of well-equipped laboratories and well trained & experienced faculty. The department has produced and supplied breeder seed of 14-18 crops (43-49 varieties) to various Public (State Seeds producing agencies, NSC, IFFCO, HSDC, KRIBHCO, HAFED etc.) and Private Seed Producing Agencies of Haryana and neighbouring states like Punjab, Rajasthan, U.P., Himachal Pradesh during 2018-2023. This department has successfully completed one RKVY project entitled "Capacity Building of Haryana Farmers' in Quality Seed Production and Testing" from 2015-17. The department of Seed Science & Technology is also operating an international project in collaboration with Massey University, New Zealand entitled "Standardization of seed testing procedures and storability for medicinal plants (*Moringa* and Gokhru)" under Scheme for Promotion of Academic and Research Collaboration (SPARC). Under this project two faculty members and two Ph.D. students have visited Massey University, New Zealand. Two faculty members from Massey University have also visited CCS HAU, Hisar and they delivered lectures in 10 days training organized at CCS HAU, Hisar in which 33 faculty members and Ph.D. students participated.

### Objectives of the Department:

- To undertake challenges in the field of seed technology through research activities
- To impart theoretical and practical knowledge in many fields extending over the various aspects of seed technology
- To cater to the needs of seed industry, R&D organizations, government and educational institutions.

### 6.4.1 Brief History of the Degree Programme

The Department of Seed Science & Technology emerged out in 2000 from the Department of Plant Breeding. The Department has been entrusted to cater breeder seed production, research, extension and allied activities other than the teaching. The Department has fiscal support from the State Government and ICAR. In each academic year, 2 courses comprising 13 credit hours in different disciplines of Seed Science & Technology are offered at UG level. Similarly, 124 credit hours in different well-defined disciplines of seed science & technology are offered as per requirements at PG level.

| | |
|---|---|
| **Objectives of initiating M.Sc. programme** | ➢ To prepare students to enter their professions with a perspective and breadth of knowledge related to their respective fields of specialization through course work, seminars and project/thesis work, research experience and thus cater to the needs of seed Industry, R&D Organizations, government and the Educational institutions.<br>➢ To meet the needs of students and employers by offering relevant, quality career education programmes, training and research in field of seed science & technology so that the students could overcome their shortcoming and significantly commit to the expectations of the farming community & seed Industry |

| | |
|---|---|
| **Accomplishments of M.Sc. programme** | • During the period under report 17 students have completed their Master's degree. At present six students are on roll.<br>• Two students have qualified the NET examination (*Annexure SST-I*).<br>• One student has joined as Assistant Conservator of Forest (OT), Karnataka, two as Horticulture Development Officer, Haryana, One as Agriculture Officer in Banks.<br>• Students' research brought out approximately 19 research papers (*Annexure SST-II*). |
| **Objectives of initiating Ph.D. programme** | • To meet the needs of students and employers by offering relevant, quality career education programmes, training and research in field of seed technology.<br>• To undertake challenges in the field of seed technology through research activities<br>• To impart theoretical and practical knowledge in many fields extending over the various aspects of seed technology |
| **Accomplishments of programmes** | • During the period under report, 11 students have completed their Doctoral degree. At present, eight students are on roll.<br>• Ten students have qualified the NET examination (*Annexure SST-1*).<br>• Three students have joined as Assistant Professor, one as Gene Bank Officer, one as Horticulture Development Officer, and Two as Technical Assistants at CCS HAU Hisar.<br>• **Students' research brought out approximately 26 research papers** (*Annexure SST-II*). |

| Degree Programme offered by the Department | Specialization | Year of start | No. of seats | | | | | | No. of students passed out | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Y1 | Y2 | Y3 | Y4 | Y5 | Total | Y1 | Y2 | Y3 | Y4 | Y5 | Total |
| **M.Sc.** | SST | **2000** | 07 | 02 | 04 | 04 | 04 | 21 | 2 | 3 | 6 | 2 | 4 | 17 |
| **Ph.D.** | SST | 2000 | 02 | 02 | 04 | 02 | 01 | 11 | 3 | 2 | 4 | 1 | 1 | 11 |

**6.4.2 Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Sanctioned faculty | In place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| **1.** | Professor and equivalent (1) | - | 1 | - |
| **2.** | Associate Professor and equivalent (2) | 1 | 1 | 2 |
| **3.** | Assistant Professor and equivalent (11) | 4 | 7 | 3 |

***Note:*** All the faculty members are assigned the responsibilities for the multiple programme.

*No. of Assoc. Prof. also include personal promotees

**6.4.3. Technical and Supporting staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| Sr. No. | Designation | Sanctioned | In Place* | Vacant | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|---|
| 1. | **Office staff** | **4** | **2** | **2** | **-** |
| | Assistant | 1 | 1 | - | - |
| | Clerk | 1 | 1 | - | - |
| | Messenger | 1 | - | 1 | - |
| 2. | **Lab staff** | **5** | **2** | **3** | **4** |
| | Lab Assistant | 4 | 1 | 3 | 4 |
| | Any other(SLA &Lab. Tech.) | 1 | 1(SLA) | - | - |
| 3. | **Field staff** | **30** | **18** | **12** | **5** |
| | Beldar | 11 | 04 | 07 | - |
| | Any other (A.I)<br>T.A | 03<br>9 | 02<br>05 | 01<br>04 | -<br>5 |
| 4. | Driver | 04 | 04 | - | 2 |
| 5. | Technician (vehicle Attendant) | 02 | 01 | 01 | - |
| 6. | Any other (specify) | | | | |
| 7. | Mechanical Operator | 01 | - | 01 | - |
| 8. | Refrigerator Mechanic | 01 | 01 | - | 01 |

*All the technical and supporting staff is assigned the responsibilities for the multiple programmes.

**6.4.4 Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of classroom and functional laboratories**

| | |
|---|---|
| No. of lecture rooms with sitting capacity | 50 seating capacity |
| No. of lecture rooms with LCD | One Seminar Room With LCD |
| Farm facilities | Research Farm of 1 hectare for PG students |

**List of major equipments at present in the department**

| Sr. No. | Name of equipment | Location/Lab No. |
|---|---|---|
| **1.** | Moisture Analyzer | UG Lab |
| **2.** | Seed Counter | UG Lab |
| **3.** | Pico conductivity and pH meter | UG Lab |
| **4.** | Physical purity board | UG Lab |
| **5.** | Seed Blower | UG Lab |
| **6.** | Seed Dividers | UG Lab |
| **7.** | Spectrophotometer | UG Lab |
| **8.** | Triers | UG Lab |
| **9.** | Seed Scarifier | UG Lab |
| **10.** | Seed Grinder | UG Lab |
| **11.** | Seed Germinators | Seed Quality & Testing Lab |

| | | |
|---|---|---|
| **12.** | Hot air oven | Seed Quality & Testing Lab |
| **13.** | Digital moisture meter | Seed Quality & Testing Lab |
| **14.** | Horizontal Laminar flow | Seed Pathology Lab |
| **15.** | Autoclave | Seed Pathology Lab |
| **16.** | Accelerated Ageing Chamber | Seed Physiology Lab |
| **17.** | Seed X-rays Machine | Seed Physiology Lab |
| **18.** | Seed Respirometer | Seed Physiology Lab |
| **19.** | Electrophoresis Unit | Seed Biotechnology Lab |
| **20.** | Gel DOC Fz | Seed Biotechnology Lab |
| **21.** | Water Distillation Unit | Seed Biotechnology Lab |
| **22.** | PCR | Seed Biotechnology Lab |
| **23.** | Centrifuge | Seed Biotechnology Lab |
| **24.** | Specific Gravity separator | Seed Conditioning Lab |
| **25.** | Seed Colour sorter | Seed Conditioning Lab |
| **26.** | Mobile Seed Processing Plant | Stores & Implement Shed |
| **27.** | Aspee HTP tractor mounted Sprayer | Stores & Implement Shed |

**Mention theory and practical batches for PG Programmes**

| Year | Theory | | Practical | |
|---|---|---|---|---|
| | **M.Sc.** | **Ph.D.** | **M.Sc.** | **Ph.D.** |
| **2018-19** | **One** | **One** | **One** | **One** |
| **2019-20** | **One** | **One** | **One** | **One** |
| **2020-21** | **One** | **One** | **One** | **One** |
| **2021-22** | **One** | **One** | **One** | **One** |
| **2022-23** | **One** | **One** | **One** | **One** |

- Average number of students par batch in M.Sc. & Ph.D. are 10-15 & 2-7, respectively

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical courses | Hands-on-training courses | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|---|---|
| **M. Sc.** | 11 | 09 | SST 501;<br>SST 503; | • Learn floral biology & structure of monocots and dicots, microsporogenesis and megasporogenesis;<br>• Preparation of seed albums and identification.<br>• Learn Planning of Seed Production, requirements for different classes of seeds in field crops - unit area and rate<br>• Observation on Seed production in cross pollinated crops with special reference to land, isolation, planting ratio of male and female lines, synchronization of parental lines and methods to achieve synchrony; supplementary pollination, hand emasculation and pollination in Cotton, detasseling in Corn, identification of rogues and pollen shedders |

| | | | | |
|---|---|---|---|---|
| | | | SST 506<br>SST 508<br>SST 509;<br>SST 510;<br>SST 512 | • Pollen collection, storage, viability and stigma receptivity; gametocide application and visits to seed production plots etc.<br>• Learn general procedure of seed certification ; identification of weed and other crop seeds as per specific crops; field inspection at different stages of a crop and observations recorded on contaminants and reporting of results<br>• Inspection and sampling at harvesting/threshing, processing and after processing for seed law enforcement<br>• Testing physical purity, germination and moisture; specifications for tags and labels to be used for certification purpose<br>• Grow-out tests for pre and post-harvest quality control<br>• Visits to regulatory seed testing laboratory, including plant quarantine lab and seed certification agency.<br>• Identification and handling of instruments used in seed testing laboratory; identification of seeds of weeds and crops<br>• Physical purity analysis of samples of different crops; estimation of seed moisture content (oven method); seed dormancy breaking methods<br>• Requirements for conducting germination test, specifications and proper use of different substrata for germination; seed germination testing in different agri-horticultural crops; seedling evaluation;<br>• Viability testing by tetrazolium test in different crops; seed and seedling vigour tests applicable in various crops<br>• Species & cultivar identification; genetic purity testing by chemical, biochemical and molecular methods; seed health testing for designated diseases, blotter methods, agar method and embryo count methods;<br>• Testing coated/ pelleted seeds.<br>• Kinetics of seed imbibition and solute leakage;<br>• Seed germination and dormancy breaking methods<br>• Seed invigoration and priming treatments;<br>• Accelerated ageing and controlled deterioration tests<br>• Enzymatic activities and respiration during germination and effect of accelerated ageing<br>• Conventional and advanced techniques in the detection and identification of seed-borne fungi, bacteria and viruses.<br>• Relationship between seed-borne infection and expression of the disease in the field.<br>• Seed collection and identification, characteristics of forage, pastures and green manure crops; maturity indices for harvest<br>• Seed testing- sampling, purity, moisture, germination and dormancy, seed treatments in forage crops.<br>• Effect of storage environmental factors (RH, |

| | | | | |
|---|---|---|---|---|
| | | | SST 513;<br><br><br><br><br><br><br>SST 515 | SMC and temperature) on seed longevity<br>• Effect of packaging materials, seed treatment and fumigation on storability;<br>• Prediction of storability and longevity of seed-lots by using viability equations and nomographs;<br>• Standardization of accelerated ageing (AA) technique for assessing the seed storability of various crops; estimation of carbohydrates, proteins, fats, enzyme activities, respiration rate and nucleic acids in fresh and aged seeds<br>• Use of eco-friendly products and amelioration techniques to enhance quality of stored seeds, visit to seed stores.<br>• Seed treatments – methods and techniques, equipments required for seed treatment,<br>• Film coating; seed invigoration/priming - hydration and dehydration, PEG priming, solid matrix priming, bio priming, effects of priming; methods for hydrogel encapsulation of artificial endosperm, hydrophobic coating etc.; protocols for production of synthetic seeds,<br>• Visit to leading Seed Companies to study the seed treatment processes. |
| **Ph.D.** | 04 | 03 | SST 601<br>SST 605<br>SST 691<br>SST 692<br>SST 699<br><br><br><br><br><br><br><br><br><br><br><br><br>SST 603<br><br><br><br><br><br>SST 604 | • Methods of hybrid seed production in major agricultural and horticultural crops;<br>• Planting of rows/blocks of parental lines and manipulations for achieving flowering synchrony for production of hybrid seeds<br>• Maintenance of A, B and R lines and production of breeder seed; stable diagnostic characteristics of parental lines and their hybrids; genetic purity tests<br>• Determination of cost of hybrid seed production of various crops<br>• Visit to seed production plots<br>• Chemical and biochemical tests for species and cultivar purity: phenol test, seed and seedling tests,<br>• Electrophoretic analysis of seed protein and isozymes, DNA fingerprinting using PCR techniques,<br>• Use of chromatography for analysis of secondary compounds.<br>• Morphological description of plant parts and plant; character expression and states, recording observation and interpretation of data;<br>• Chemical tests and markers applicable for DUS tests |

Students attending Hands-on training in Lab

Students attending Hands-on training in field

**6.4.6 Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Details of M.Sc. programmes offered by the Department**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| **2018-19** | 8 | 5 | 1.6:1 |
| **2019-20** | 6 | 5 | 1.2:1 |
| **2020-21** | 4 | 5 | 0.80:1 |
| **2021-22** | 3 | 4 | 0.75:1 |
| **2022-23** | 4 | 5 | 0.80:1 |

**Details of Ph.D. programmes offered by the Department**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 9 | 5 | 1.8:1 |
| 2019-20 | 9 | 5 | 1.8:1 |
| 2020-21 | 7 | 5 | 1.4:1 |
| 2021-22 | 8 | 4 | 2:1 |
| 2022-23 | 4 | 5 | 0.80:1 |

*Detail of courses offered by the Department is given in *Annexure-III*

**6.4.7. Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

The duly filled proforma from the students, parents, industries, employers and farmers have been maintained in the department file. Once feedback performas are collected, data analyzed to identify specific areas where improvement is required. This evaluation helps in prioritizing issues and determining the most effective course of action.

**6.4.8. Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the Degree Programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Sc.** | 2 | 4 | 4 | 3 | 4 | 0.0 | 0.0 | 100.0 | 0.0 | 0.0 |
| **Ph.D.** | 2 | 4 | 2 | 1 | 0 | 0.0 | 25.0 | 50.0 | 0.0 | 100.0 |

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of Department of SST use ICT in teaching and practical. There is one Seminar Room with computer, LCD projector and internet connection. All faculty members have

computer, printer and internet connection in their offices. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, YouTube, emails and CD ROM in teaching all courses at UG, PG and Ph. D. level. For PG and Ph. D. students emails are also used.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean **Surender K. Pahuja** hereby certify that the information contained in the Section 6.4.1 to 6.4.9 is furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

## DETAILS OF COURSES OFFERED BY THE DEPARTMENT

| Course No. | Course Title | Credit hrs. | Sem. |
|---|---|---|---|
| **SST 501*** | FLORAL BIOLOGY, SEED DEVELOPMENT AND MATURATION | 1+1 | I |
| **SST 502*** | PRINCIPLES OF SEED PRODUCTION | 2+0 | I |
| **SST 503*** | SEED PRODUCTION OF FIELD CROPS | 2+1 | I |
| **SST 504/ [1] VSC 505** | SEED PRODUCTION IN VEGETABLES | 2+1 | II |
| **SST 505[3]** | SEED PRODUCTION IN FLOWER, MEDICINAL FRUITS AND PLANTATION CROPS | 2+1 | I |
| **SST 506*** | SEED LEGISLATION & CERTIFICATION | 2+1 | II |

| | | | |
|---|---|---|---|
| **SST 507*/ [3] PFE 514** | SEED DRYING, PROCESSING AND STORAGE | 2+1 | II |
| **SST 508*** | SEED QUALITY TESTING | 2+1 | II |
| **SST 509/ [4]PP 511** | SEED PHYSIOLOGY | 1+1 | I |
| **SST 510/ [5] Pl. PATH 510** | SEED PATHOLOGY | 2+1 | I |
| **SST 511[6]** | SEED ENTOMOLOGY | 2+1 | II |
| **SST 512** | SEED PRODUCTION IN PASTURE, FORAGE & GREEN MANURE CROPS | 2+1 | II |
| **SST 513** | SEED STORAGE AND DETERIORATION | 1+1 | II |
| **SST 514/ [7] AG. ECON 510** | SEED MARKETING AND MANAGEMENT | 2+1 | II |
| **SST 515** | EMERGING TRENDS IN SEED QUALITY ENHANCEMENT | 1+1 | I |
| **SST 516/ [8] GP 517** | DATA BASE MANAGEMENT, EVALUATION AND UTILIZATION OF PGR | 2+1 | II |
| **SST 591** | MASTER'S SEMINAR | 1 | I, II |
| **SST 599** | MASTER'S RESEARCH | | I, II |
| **SST 601**** | HYBRID SEED PRODUCTION | 1+1 | II |
| **SST 602/ [8] GP 610** | IN SITU AND EX SITUCONSERVATION OFGERMPLASM | 2+1 | II |
| **SST 603** | TESTING FOR GENUINENESS AND PURITY OF CULTIVARS | 1+1 | I |
| **SST 604**** | DUS TESTING FOR PLANT VARIETY PROTECTION | 2+1 | I |
| **SST 605**** | ADVANCES IN SEED SCIENCE RESEARCH | 1+0 | II |
| **SST 691** | DOCTORAL SEMINAR-I | 1 | I, II |
| **SST 692** | DOCTORAL SEMINAR-II | 1 | I, II |
| **SST 699** | DOCTORAL RESEARCH | | I, II |
| **SERVICE COURSE** | | | |
| **ABM 522** | SEED PRODUCTION TECHNOLOGY AND MANAGEMENT | 2+0 | I |

*Compulsory for Master's programme; ** Compulsory for Doctoral programme

To be taught by: [1]Vegetable Science; [2]Fruit Science. [3]Processing & Food Engineering; [4] Botany Plant Physiology; [5]Plant Pathology; .[6]Entomology; .[7]Agricultural Economics;[8]Genetics & Plant Breeding

# Programme - 14

## M.Sc. Soil Science

## and

## Ph.D. Soil Science

**Celebration of World Soil Day**

## 6.4 About the Department

The Department of Soil Science started with the establishment of Hisar Campus of the erstwhile Punjab Agricultural University. Dr. D.R. Bhumbla took over the charge as first Head of the department on 26th August 1963. The Department has attained the distinction of one of the biggest departments of the College of Agriculture with faculty strength of approximately 135 including 112 teachers/scientists/extension specialists of Soil Science discipline during 1982-83 when Dr. Mahendra Singh was the Head of the Department and presently with strength of about 14 faculty members including 3 agronomists. Changes in its nomenclature: Initially, the name of the department was 'Soils' which changed to 'Soil Science' in 1986. The Department is entrusted to cater research, extension, and allied activities other than the teaching. The Department has fiscal support from the State Government and ICAR. The overall goals of the PG programs in Soil Science are to achieve a national and international reputation for research excellence and to make important contributions to the educational mission of the University. The Department has well qualified faculty members. All faculty members have obtained Ph. D. degree. At present research in four AICRP's scheme, one state scheme and one extension scheme is being carried out and research is conducted in thrust areas of Soil Science particularly sustaining soil productivity through integrated nutrient management under different cropping systems and agro-climatic zones, soil conservation, preservation and management for sustainable agriculture, to develop targeted yield equations for newly developed high yielding varieties of crops, micronutrient management in soils for higher crop productivity, screening of crop varieties for their tolerance to Zn, Fe and Mn stress and their biofortification etc. The faculty of Department has been recipient of significant prestigious fellowships and awards since its inception.

### Mandate/Objectives of the Department:

- To impart teaching in the field of Soil Science to under graduate and post graduate students
- To conduct research in different disciplines of Soil Science including Pedology, Soil Survey, Remote Sensing, Soil Fertility, Soil Chemistry, Soil Physics, Water Management, Soil Salinity, Soil Pollution and in any new area depending on requirement of the state.
- Transfer of technology to the farmers through KVKs and government agencies.

### 6.4.1 Brief History of the Degree Programme

The M.Sc. and Ph. D. Programme were started in the year 1963 in the Department. Till date, 404 M. Sc. and 191 Ph.D. students have completed their degrees. Students enrolled in M.Sc. and Ph.D. programmes have been given research problems related to integrated nutrient management, soil conservation, soil fertility, micronutrient management, soil test-based fertilizer recommendation, characterization of ground water quality, long term application of FYM and fertilizer application etc.

### Objectives of initiating M.Sc. programme

- To prepare students to enter their professions with a perspective and breadth of knowledge related to their respective fields of specialization through course work, seminars and project/thesis work, research experience and thus cater to the needs of Industry, R&D Organizations, Govt., and the educational institutions.
- To meet the needs of students and employers by offering relevant, quality career education programmes, training, and research in field of Soil Science so that our personnel could overcome their shortcoming and significantly commit to the expectations of our farming community.

### Accomplishments of M.Sc. programme

- Till date the Department of Soil Science has conferred degree to 404 M.Sc. At present 30 M.Sc. students are on roll.
- Students passed National Eligibility Test (NET) conducted by the Agricultural Scientists Recruitment Board (ASRB) during the period under report is mentioned in *Annexure-II*.

### Objectives of initiating Ph.D.programme

- To meet the needs of students and employers by offering relevant, quality career education programmes, training, and research in field of Soil Science.
- To undertake challenges in the field of Soil Science through research activities.
- The objective of the Ph.D. degree is to accomplish original, valid, and important research. Since the degree is the training ground for a career in academic teaching and scholarly research, the Ph.D. candidate must demonstrate the ability to do independent research.
- To impart theoretical and practical value in many fields extending over the various aspects of Soil Science

### Accomplishments of Ph.D. programme

- Till date the Department of Soil Science has conferred degree to 191 Ph.D. students. At present 26 Ph.D. students are on roll.
- Students passed National Eligibility Test (NET) conducted by the Agricultural Scientists Recruitment Board (ASRB) during the period under report is mentioned in *Annexure*-II.

**Note: Students passed National Eligibility Test (NET) conducted by the Agricultural Scientists Recruitment Board (ASRB) during the period under report is mentioned in Annexure-I, students placed at various organizations are mentioned in Annexure-II and the list of publications from department is given in Annexure- III.**

| Degree Programme offered by the Department | Specialization | Year of start | No. of seats | | | | | | No. of students passed out | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Y1 | Y2 | Y3 | Y4 | Y5 | Total | Y1 | Y2 | Y3 | Y4 | Y5 | Total |

Y1= 2018-19……. Y5=2022-23 (till date)

### 6.4.2 Faculty Strength:

Present Faculty Strength in the department given as cadre-wise, both sanctioned and in-place in the table mentioned below:

| S. No. | Sanctioned faculty | In place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| **1.** | Professor and equivalent (5) | 1 | 4 | - |
| **2.** | Associate Professor and equivalent (2) | - | 2 | 1 |
| **3.** | Assistant Professor and equivalent (49) | 21 | 28 | 5 |

Note: All the Faculty members are assigned the responsibilities for the multiple programmes

*The number of Professors and Associate Professors also includes personal promotes

### 6.4.3 Technical and Supporting staff:

The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.

| S.No. | Sanctioned Technical and supporting staff | Technical and supporting staff in place | Vacant position | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|
| 1. | Office staff | | | |
| | AO/Superintendent | 1 | 0 | - |
| | Assistant | 02 | 0 | - |
| | Clerk | 03 | 1 | - |
| | PA/Steno | 01 | 0 | 01 |
| | Messenger | 01 | 0 | 01 |
| | Peon | 01 | 0 | - |
| 2. | Lab staff | | | |
| | ➢ Lab Assistant | 6 | 5 | 04 |
| | ➢ Lab Attendant | 0 | 0 | - |
| | ➢ Any other (SLA & Lab Tech., Store Keeper) | 4 | 0 | - |
| 3. | Field staff | | | |
| | ➢ Beldar | 3 | 0 | - |
| | ➢ Farm and field worker (specify)<br>➢ AI<br>➢ Tractor Driver | 05<br>01 | 0<br>01 | 06 |
| | ➢ Any other | | | - |
| 4. | Driver | 01 | - | - |
| 5. | Liftman | - | - | - |
| 6. | Computer operator | - | - | - |
| 7. | Technician | - | - | 01 |
| 8. | Any other (specify) | - | - | - |

### 6.4.4 Infrastructure:
### Classrooms and Laboratories:

Department has well equipped UG and PG laboratories which can cater the needs of UG and PG students for carrying out their Research work successfully. Moreover, the department is having two lecture rooms/ smart class-rooms with interactive panels along with one committee room for seminars/ conferences and meetings. The department has also got a Soil and water testing Laboratory for the analysis of soil and water samples brought by the farmers.

### List of classroom and functional laboratories:

| | |
|---|---|
| Name of College/Department | |
| No. of lecture rooms with sitting capacity | Two with seating capacity of 70 each |
| No. of lecture rooms with LCD | 2 |
| No. of smart class-rooms | 2 |
| No. of labs under Dean's office with specialized purpose | One (UG) and One (PG) |
| Farm facilities | Yes, Research Farm for PG students for laying out of experiments and practical demonstrations for UG students |

| | |
|---|---|
| Workshops | - |
| Any other instructional units being utilized for the award of the Degree Programme | - |

## List of Major equipment's at present in the Department

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| **1.** | Genesys 180 double beam spectrophotometer (P-79) | Lab No. 6,116,112,114 |
| **2.** | Eutech pH meter (P-84) | Lab No. 117 |
| **3.** | Digital EC pH meter (P-84) | Lab No. 117 |
| **4.** | Remi Research Centrifuge (P-101) | Lab No. 6<br>Lab No. 15<br>Lab No. 114 |
| **5.** | Conductivity Meter (P-120) | Lab No.114 |
| **6.** | Weighing Balance (P-121) | Lab No.113 |
| **7.** | Refrigerated Centrifuge (P-126) | Lab No.117 |
| **8.** | Rotatory shaker (P-127) | Lab No.117 |
| **9.** | Flame Photometer Elico (P-129) | Lab No.6,<br>Lab No.16 |
| **10.** | Deep Freezer Vertical (P-131) | Lab No.105 |
| **11.** | Vestfrost Deep Fridge (P-131) | Lab No.117 |
| **12.** | Remi RLR-400 Front Opening Fridge (P-132) | Lab No.112 |
| **13.** | BOD Incubator (P-138) | Lab No.117 |
| **14.** | Double Distillation Water Unit (P-141) | Lab No.116 |
| **15.** | Hot Air Oven (P-142) | Lab No. 117 |
| **16.** | NSW Incubator (P-143) | Lab No.117 |
| **17.** | Single Distillation Water Unit (P-145) | Lab No.15,<br>Lab No.10B |
| **18.** | Sartorius Balance (P-146) | Lab No.6,<br>Lab No.16 |
| **19.** | Steam Sterilized Autoclave (P-152) | Lab No.117 |
| **20.** | Biosafety Cabinet (P-153) | Lab No.117 |
| **21.** | Hot Air Oven (MAC) P-154 | Lab No.117 |
| **22.** | Laboratory Refrigerator (P-165) | Lab No.117 |
| **23.** | Electronics Weighing (P-166) | Lab No.117 |
| **24.** | Portable Water Purification (P-139) | Lab No-117 |
| **25.** | Double BEAM Spectrophotometer (P-140) | Lab No-117 |
| **26.** | Kjeldahl Distillation Unit (P-147) | Lab No-117<br>Lab No-113<br>Lab No-114<br>Lab No-10 B |
| **27.** | Rotary Evaporator (P-148) | Lab No-114 |
| **28.** | Microwave Distillation | Lab No-117 |
| **29.** | Pressure Plate Apparatus | Lab No-113 |
| **30.** | Penetrometer (P-156) | Lab No-113 |
| **31.** | Atomic Absorption Spectrophotometer (P-157) | Lab No-10 B |
| **32.** | Atomic Absorption Spectrophotometer PERKIN (P No. 159-163 | Lab No-105 |
| **33.** | FUME-HOOD (MAC) (P-168) | Lab No-111 |

**Mention theory and practical batches/courses for PG Programmes**

| Year | Theory | | Practical | |
|---|---|---|---|---|
| | M.Sc./M.Tech. * | Ph.D.* | M.Sc./M.Tech. | Ph.D. |
| 2018-19 | One | One | One | One |
| 2019-20 | One | One | One | One |
| 2020-21 | One | One | One | One |
| 2021-22 | One | One | One | One |
| 2022-23 | One | One | One | One |

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

The Department of Soil Science offers 3 core and 2 professional elective/experimental learning courses of which all the courses have practical components to provide practical skills and hands-on-training. The Department offers 15 courses at Masters Level. Out of 15 courses, 12 courses provide practical skills and hands-on-training as per the curriculum requirements. However, only advance courses (theory only) are being offered by the Department at Ph.D. Level.

| Degree programme | Total courses | Practical courses | Hands-on-training courses | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|---|---|
| M.Sc. | 15 | 12 | SOILS 501 | In this course students will learn about estimation of soil physical parameters such as Mechanical analysis of soil texture by pipette and international methods, Measurement of Atterberg limits, Aggregate analysis - dry and wet, Measurement of soil-water content by different methods, Measurement of soil-water potential by using tensiometer and gypsum blocks, Determination of soil-moisture characteristics curve and computation of pore-size distribution, Determination of hydraulic conductivity under saturated and unsaturated conditions, Determination of infiltration rate of soil, Determination of aeration porosity and oxygen diffusion rate, Soil temperature measurements by different methods, Estimation of water balance components in bare and cropped fields. |
| | | | SOILS 502 | In this course students will learn about soil parameters essential for soil fertility such asPrinciples of colorimetry, Flame-photometry and atomic absorption spectroscopy, Chemical analysis of soil for total and available nutrients and Analysis of plants for essential elements. |

| | | | | |
|---|---|---|---|---|
| | | | SOILS 503 | In this course students will learn about estimation of soil chemical parameters such as Determination of CEC and AEC of soils, Analysis of equilibrium soil solution for pH, EC, Eh by the use of Eh-pH meter and conductivity meter, Determination of point of zero-charge and associated surface charge characteristics by the serial potentiometric titration method, Potentiometric and conductometric titration of soil humic and fulvic acids, Adsorption-desorption of phosphate/sulphate by soil using simple adsorption isotherm, Determination of titratable acidity of an acid soil by $BaCl_2$-TEA method and Determination of lime requirement of an acid soil. |
| | | | SOILS 504 | In this course students will learn about estimation of soil pedological parameters such as Identification and quantification of minerals in soil fractions, Morphological properties of soil profile in different landforms, Classification of soils using soil taxonomy, Calculation of weathering indices and its application in soil formation, Grouping soils using available data base in terms of soil quality, Aerial photo and satellite data interpretation for soil and land use, Cartographic techniques for preparation of base maps and thematic maps, processing of field sheets, compilation and obstruction of maps in different scales and Land use planning exercises using conventional and RS tools. |
| | | | SOILS505 | In this course students will learn about estimation of soil parameters in relation to soil erosion such as Determination of different soil erodibility indices - suspension percentage, dispersion ratio, erosion ratio, clay ratio, clay/moisture equivalent ratio, percolation ratio, raindrop erodibility index. Computation of kinetic energy of falling rain drops, Computation of rainfall erosivity index (EI30) using rain gauge data and Visits to a watershed. |
| | | | SOILS 506 | In this course students will learn about estimation of soil microbiological parameters such as Determination of soil microbial population; Soil microbial biomass; Decomposition studies in soil, Soil enzymes; Measurement of important soil microbial processes such as ammonification, nitrification. N2 fixation, S oxidation, P solubilization and mineralization of other micro-nutrients; Study of rhizosphere effect. |
| | | | SOILS508 | In this course students will learn about estimation of soil pollution and contamination related parameters such as Storage and handling of radioactive materials, Determination of half-life and decay constant, Preparation of soil and plant samples for radioactive measurements, setting up of experiment on fertilizer use efficiency and cation exchange equilibria using |

| | | | | |
|---|---|---|---|---|
| | | | | radioisotopes. |
| | | | SOILS509 | In this course students will learn about estimation of soil and water pollution parameters such as Sampling of sewage waters, sewage sludge, solid/liquid industrial wastes, polluted soils, and plants. Estimation of dissolved and suspended solids, chemical oxygen demand (COD), biological demand (BOD), nitrate and ammoniacal nitrogen and phosphorus, heavy metal content in effluents. Heavy metals in contaminated soils and plants. Management of contaminants in soil and plants to safeguard food safety. |
| | | | SOILS 510 | In this course students will learn about parameters related to remote sensing and GIS such as Familiarization with different remote sensing equipment and data products. Interpretation of aerial photographs and satellite data for mapping of land resources. Analysis of variability of different soil properties with classical and geostatistical techniques. Creation of data files in a database programme. Use of GIS for soil spatial simulation and analysis. |
| | | | SOILS 511 | This is full practical course in which students will learn about principles of various instruments used in soil and plant analysis as well as they learn how to find out nutrients content in soil and plant samples. |
| | | | SOILS 512 | In this course students will learn about Soil models such as Use of flow chart or pseudo-code in the program writing, writing a small example simulation model program - declarative (in Vensim PLE, Stella or Simile) and procedural (in Java, Fortran, QBasic or V Basic), Conducting simulation experiments in DSSAT, WOFOST or EPIC with requirement of report and conclusion. |
| | | | SOILS 513 | In this course students will learn about estimation of soil parameters related to salt affected soils such as Characterization of acid, acid sulphate, salt-affected and calcareous soils. Determination of cations (Na+, K+, Ca++ and Mg++) in ground water and soil samples. Determination of anions (Cl-, SO4 --, CO3 -- and HCO3 -) in ground waters and soil samples. Lime and gypsum requirements of acid and sodic soils. |

*Details of courses offered by the Department at M.Sc. and Ph.D. level are given in *Annexure SS-II*

**6.4.6 Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**M.Sc. Programmes**

| Name of Department | Numberof students on roll | Numberof PG faculty | Student-teacher Ratio |
|---|---|---|---|
| **2018-19** | 11 | 11 | 1:1 |
| **2019-20** | 20 | 13 | 1.53:1 |
| **2020-21** | 28 | 17 | 1.64:1 |
| **2021-22** | 29 | 15 | 1.93:1 |
| **2022-23** | 30 | 22 | 1.36:1 |

**Ph.D. Programmes**

| Name of Department | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| **2018-19** | 0 | 11 | - |
| **2019-20** | 4 | 13 | 0.30:1 |
| **2020-21** | 13 | 17 | 0.76:1 |
| **2021-22** | 20 | 15 | 1.30:1 |
| **2022-23** | 25 | 22 | 1.13:1 |

**6.4.7 Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feedback?*

There is a framework for the yearly self-appraisal report (SAR) for all teaching staff. SARs are reviewed by the Deans and Executives for performance evaluation and ultimately approved by the Vice-Chancellor. The staff's performance is also assessed based on their results and feedback from students. For the Proficient Elective course, students are placed in various teaching environments for in-plant training. During the training period, instructors visit these environments and conduct meetings with experts from the organization. Any suggestions provided by these experts are incorporated into the curriculum. Feedback from stakeholders regarding the overall performance and quality of the teaching environments is obtained through regular meetings with parents and interactions with alumni. Additionally, instructors receive informal feedback from students based on their parents' observations and suggestions. These recommendations are then relayed to the Heads of Departments (HODs) and administrative officers.

**6.4.8 Student intake and attrition in the programme for last five years:**

Year wise information on sanctioned strength, actual intake, and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.

| Name of the degree programme | Actual students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Sc.** | 11 | 16 | 15 | 16 | 15 | 18.1 | 0 | 0 | 0 | 0 |
| **Ph. D** | 04 | 09 | 11 | 11 | 8 | 25.0 | 0 | 9.0 | 18.0 | 0 |

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

Yes, the faculty members of Department of Soil Science use ICT in teaching and practical. There is one Committee room, Seminar Room with interactive panel, computer, LCD projector and internet connection. All faculty members have computer, printer, and internet connection in their offices. There is Wi-Fi facility for faculty, staff, and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research, and extension. Faculty members use power point presentations, YouTube, emails, and CD ROM in teaching all courses at UG, PG and Ph. D. level. For PG and Ph. D. students' emails are also used.

**Use of ICT application in teaching and practical for curricula delivery**

| Courses | Total courses | Theory | Practical | Type of ICT Application |
|---|---|---|---|---|
| **M.Sc.** | 15 | 15 | 12 | PPT/ Use of interactive panel in teaching |
| **Ph.D.** | 06 | 06 | 0 | PPT/ Use of interactive panel in teaching |

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean **Surender K. Pahuja** hereby certify that the information contained in the Section 6.4.1 to 6.4.9 is furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

*Annexure SS-I*

## STUDENTS PLACEMENT

## Programmes/trainings organized/conducted by Department of Vegetable Science (2018-2023)

| Sr. No. | Name of the Event | Year | Date |
|---|---|---|---|
| **1.** | Two Training on soil and water testing for state government teachers and lecturers" | 2021 | March 4 to 6, 2021&March18 to 20, 2021 |
| **2.** | Two Training on soil and water testing for state government teachers and lecturers" | 2022 | February 14 to 18, 2022 & February 21 to 24, 2022 |
| **3.** | Training Programme on "Mission JRF (Soil Science)" for the UG students of CCS HAU, College of Agriculture, Hisar | 2022 | 13.06.2022 to 02.07.2022 |
| **4.** | Expert talk and exposure visit activity on "Cordyceps mushroom & Saffron Cultivation under Laboratory Conditions. | 2023 | 12.05.2023 |

# GLIMPSES OF VARIOUS ACTIVITIES CONDUCTED BY DEPARTMENT OF SOIL SCIENCE

Monitoring by Director of Research (Department of Soil Science Field Experiments)

Soil and water testing training to Teachers and Assistant Professors

Cordyceps mushroom & Saffron Cultivation training

Mission JRF (Soil Science) training for the UG students of CCS HAU

# Programme - 15

## M.Sc. Vegetable Science

## and

## Ph.D. Vegetable Science

## 6.4 About the Department

The department was establishment in 1972 as the Department of Vegetable Crops. Realizing the importance of vegetables in the improvement of health and economic standard of the rural people, majority of whom are vegetarian, Haryana Agricultural University took lead in starting the first separate department of vegetable crops in the university. However, along with advancements made in crop technologies and their utilization by the farmers, a change in nomenclature of the department was felt and since 2003, it is referred to as "Department of Vegetable Science". The mandate of the department is to strengthen the teaching, research and extension work of vegetable crops as the demand of vegetables is increasing day by day due to being more remunerative, high in nutritional value and higher in production per unit area. This department has developed more than sixty varieties including two hybrids in different vegetable crops, which are high yielding, resistant to important diseases of a particular crop. Besides this, agronomical practices for production of vegetables and seeds have also been standardised for enhancement of production per unit. Beside research farm at Hisar, two research centres have been established in various agro-climatic region of the state to work on the regional problems of vegetable crops. One regional research station was established under KVK, Jagdishpur, Sonipat and another one was established at RRS, Uchani, Karnal. Head of the department is the full-flagged in-charge and is overall responsible for teaching, research and extension activities, their management, and administration of the department. The department has highly qualified faculty, well experienced in their respective fields of specialization, *i.e*., vegetable breeding, vegetable production, vegetable production physiology, vegetable post-harvest technology and vegetable seed production technology.

### Objectives of the Department

- To impart graduate, post-graduate education and training for human resource development.
- To develop new technologies in crop management practices and plant protection measures for enhancing yield and quality in vegetable crops
- To conduct applied and strategic research for the improvement of vegetable crops
- To disseminate knowledge through information technology on recent advances in vegetable crops.
- To develop technologies in Vegetable Science, their assessment and refinement and their transfer
- To Standardize the technologies for quality seed production and storage techniques for vegetable seeds
- To produce breeder seeds and TFL seeds of various vegetable crops
- To provide farmers advisory services

### 6.4.1. Brief History of the Degree Programme

#### Objectives of initiating M. Sc. programme

- To impart knowledge of Vegetable Science through teaching and guided research
- To generate human resources in area of Vegetable Science
- To generate of vegetable technologies, their assessment and refinement
- To strengthen the research farm for practical teaching works in vegetable Science

### Accomplishments of M.Sc. programme

Since the establishment of this department, 249 students got admission in M.Sc. (Horticulture) in Vegetable Science programme and this department has awarded Master degrees to 224 students. During 2018-2022, 45 students got admission in M.Sc. programme and 42 students passed out. Most of them have got admissions in Ph.D. programme in different Universities.

**NET qualified during 2018-19 to March, 2023**

| Sr. No. | Year | No. of students |
|---|---|---|
| 1 | 2018-19 | 6 |
| 2 | 2019-20 | 6 |
| 3 | 2020-21 | 5 |
| 4 | 2021-22 | 5 |

**Objectives of initiating Ph.D. programme:**

- To impart knowledge of vegetable science through teaching and guided research
- To carry out research with emphasis in Vegetable Sciences
- To strengthen the research farm for practical teaching works in vegetable Science
- To develop technologies in Vegetable Science, transfer of vegetable technologies, their assessment and refinement

**Accomplishments of Ph.D. programme:**

Since the establishment of this department, 139 students got admission in Ph.D. programme and 91 students passed out. During 2018-2023, 23 students got admission in Ph.D. programme and 13 students passed out. Most of them got appointments in different organizations given in ***Annexure VEG – VIII***

**Note:** List of publications from students theses given in ***Annexure VEG – I.***

- List of awards achieved by M.Sc. and Ph.D. students in National and International conferences given in ***Annexure VEG – III***
- Honour and Award achieved by the students in sports activities is given in ***Annexure VEG – IX.***

| Degree Prog. offered by the Deptt. | Specialization | Year of start | No. of seats | | | | | | No. of students passed out | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Y1 | Y2 | Y3 | Y4 | Y5 | TOTAL | Y1 | Y2 | Y3 | Y4 | Y5 | TOTAL |
| **M.Sc.** | Vegetable | 1972 | 8 | 8 | 11 | 9 | 9 | 45 | 7 | 9 | 7 | 9 | 10 | 42 |
| **Ph.D.** | Vegetable | 1972 | 3 | 3 | 6 | 6 | 5 | 23 | 7 | 2 | 2 | - | 2 | 13 |

Y1= 2018-19……. Y5=2022-23 (till date)

***6.4.2. Faculty Strength:*** *The faculty strength of the Degree Programme needs to be given cadre wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Sanctioned faculty | In place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| **1.** | Professor and equivalent (1) | 3* | 1 | - |
| **2.** | Associate Professor and equivalent (0) | - | - | - |
| **3.** | Assistant Professor and equivalent (42) | 21 | 18 | - |
| **4.** | Contractual faculty (specify) | 2 | - | - |

***Note:*** All the Faculty is assigned the responsibilities for the multiple programmes.

*The number of Professors and Associate Professors also includes personal promote.

Faculty appointed in teaching also conducts the research and extension activities. Faculty of research also engaged in teaching and extension for vegetable science. Contribution from the department and faculty members are given in various annexures as listed below:

- List of publications from faculty is given in ***Annexure VEG – V.***
- Programs or training organized by the department is listed in *Annexure**VEG –IV.***
- Major research achievement by the department is given in *Annexure* ***VEG –VI.***
- Awards won by the Department of Vegetable Science in Kisan Mela is given in***AnnexureVEG –VII.***

**6.4.3. Technical and Supporting staff:** The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place

| S.no. | Designation | In Place | Vacant | Technical and supporting staff recommended by the ICAR/UGC norms |
|---|---|---|---|---|
| **1.** | **Office Staff** | | | |
| | Assistant | - | 2 | - |
| | Clerk | 1 | - | 1 |
| | PA/Steno | 1 | - | - |
| | Messenger | - | 1 | - |
| | Storekeeper | 2 | - | - |
| **2.** | **Lab staff** | | | - |
| | Lab Assistant | 2 | - | - |
| | Lab Attendant | - | 1 | - |
| **3.** | **Field staff** | | | - |
| | Beldar | 18 | 10 | 1 |
| | Head Mali | - | 1 | - |
| | Security goard | - | 2 | - |
| **4.** | Agriculture Inspector | 3 | 1 | - |
| **5.** | Technical Assistant | 1 | 1 | 2 |
| **6.** | Senior Technical Assistant | 1 | - | 1 |
| **7.** | Water Pump Operator | 1 | 1 | - |
| | | | | |

*The technical and supporting staff is assigned the responsibilities for the multiple programmes

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of classroom and functional laboratories:**

| | |
|---|---|
| No. of lecture rooms with seating capacity | 1 with seating capacity 70 and one seminar room of 20 seating capacity |
| No. of lecture rooms with LCD | 01 |
| No. of smart class-rooms | 01 |
| No. of labs with specialized purpose | 01 |
| Farm facilities | Sixty two acres land, about 2 acre area under protected cultivation, Vegetable seed production area of about 15 acre (1), Tractor (2), Trolley (1), Harrow (2), Cultivator (2), Drill Machine (2) Rotavator (1), Leveler (1), Thresher (2), Potato Digger (1), Potato Planter (1), Seed Processing Machine Unit (1), Screen |

| | |
|---|---|
| | House (2), Onion store (1) Seed Store Building (1), Seed processing store (3), Potato grading and sorting unit (1) Water tank (2), Water lifting pump with electric motor (2), Water hydrant unit (2), Rain Gun Unit (1), micro irrigation, sprinkler and drip facilities, Vegetable grafting unit (1) *etc*. |

**List of major equipments in the Department Laboratories**

| Name of equipment | Location/Lab. No. |
|---|---|
| Analytical balance, Digital Flame photometer, Conductivity meter, Seed counter digital, Centrifuge R-24, Specto Photometer, Thermo Hygrometer with clock, Genehis 20-D, Digital Temp. Indicator, 506 Pusa STFR Meter Kit, Electronic balance, Hygrometer, DLP data projector. Leaf area meter, Food Processor, L.C.D., microscope, Overhead projector, Oven, pH meter | Lab. No. 233 |
| LCD (1) | Seminar Hall 232 |
| Computers (17), Printer (14) UPS (5), Scan Jet (1) | Faculty & office rooms |

**Mention theory and practical batches for PG Programmes**

| Year | Theory | | Practical | |
|---|---|---|---|---|
| | M.Sc. | Ph.D. | M.Sc. | Ph.D. |
| 2018-19 | One | One | One | One |
| 2019-20 | One | One | One | One |
| 2020-21 | One | One | One | One |
| 2021-22 | One | One | One | One |
| 2022-23 | One | One | One | One |

- At M.Sc. level, the department of Vegetable Science offers 13 courses and 12 courses have the practical components. There is limited seat in M.Sc. Programme with average of 8-10 students. Some courses are offered as Minor courses and Supporting courses for the student of other departments. There is only one batch for theory classes and one batch for practical classes in all the courses with average of 10-15 students.
- At Ph.D. level, the department offers 8 courses and 5 courses have the practical components. For this programme also seats are limited with average of 4-6 students. Therefore, one batch for theory classes and one batch for practical classes in all the courses.

**6.4.5. Conduct of Practical and Hands-On Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

Knowledge of the theory is very important for professional degree. Skill is obtained by doing practical and hands on training. Therefore, it is essential to make available the learning material and opportunities that allows students to get implicated in activities which enhance their knowledge and skills. The department offers 2 courses and one professional module course at UG level. All the courses also provide practical training and hands on training as the curriculum requirements. The experiential learning programme for conduct of practical and hands-on training is offered for one semester in the final year of undergraduate or post-graduate students in the department of Vegetable Science as given in **Annexure VEG –X.**

| Course No./Credit Hrs. | Practical and Hands-on-training courses | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|
| VSC 501 (2+1) | • Cultural operations (fertilizer application, sowing, mulching, irrigation, weed control) of winter vegetable crops and their economics)<br>• Experiments to demonstrate the role of mineral elements, plant growth substances and herbicides<br>• Study of physiological disorders | • Demonstration of Cultural operations (fertilizer application, sowing, mulching, irrigation, weed control) of winter vegetable crops<br>• Preparation cropping scheme for commercial farms<br>• Visit commercial greenhouse/ polyhouse |
| VSC 502 (2+1) | • Cultural operations (fertilizer application, sowing, mulching, irrigation, weed control) of summer vegetable crops and their economics<br>• Study of physiological disorders and deficiency of mineral elements<br>• Preparation of cropping schemes for commercial farms<br>• Experiments to demonstrate the role of mineral elements, physiological disorders; plant growth substances and herbicides<br>• Seed extraction techniques<br>• Identification of important pests and diseases and their control<br>• Maturity standards<br>• Economics of warm season vegetable crops | • Demonstration of Cultural operations (fertilizer application, sowing, mulching, irrigation, weed control and Seed extraction techniques) of warm season vegetable crops<br>• To know about cropping schemes for commercial farms |
| VSC 503 (2+1) | • Selection of desirable plants from breeding population, observations and analysis of various traits in segregating generations<br>• Selfing and crossing techniques in vegetable crops<br>• Hybrid seed production of vegetable crops in bulk,<br>• Screening techniques for insect-pests, disease and environmental stress resistance | • Able to select the desirable plants from segregating population, recording observation analysis and interpretation of data<br>• Conduct the selfing and crossing technique in different vegetable crops<br>• Demonstration on pollination and emasculation<br>• Visit to breeding blocks |
| VSC 504 (2+1) | • Preparation of solutions of plant growth substances and their application<br>• Experiments on breaking and induction of dormancy by chemicals; induction of parthenocarpy and fruit ripening<br>• Application of plant growth substances for improving flower initiation, changing sex expression in cucurbits and checking flower and fruit drops and improving fruit set in Solanaceous vegetables | • Demonstration on PGR solution preparation and their application<br>• Study of various techniques for growth analysis in vegetable crop |
| VSC 505 (2+1) | • Selection of suitable areas/locations for high quality seed/planting material production<br>• Study of floral biology of vegetables | • Study of floral biology of different vegetable crops<br>• Demonstration on emasculation and pollination |

| | | |
|---|---|---|
| | • Determination of planting ratios for hybrid seed production vegetables, use and maintenance of monoecious line in hybrid seed production of cucumber<br>• Exercises on emasculation and pollination<br>• Seed extraction methods and their effect on quality of vegetables<br>• Seed production technology of varieties and hybrids in vegetables | • Demonstration of seed extraction methods and their effect on quality of vegetables |
| VSC 506 (1+1) | • Identification, description, classification and maintenance of vegetable species and varieties<br>• Survey, collection of allied species and genera locally available<br>• Preparation of keys to the species and varieties<br>• Methods of preparation of herbarium and specimens. | • Collection of allied species and genera in different vegetable crops after survey of local area<br>• Preparation of herbarium and descriptive study of various vegetables<br>• Preparation of keys of locally collected species |
| VSC 507 (2+1) | • Identification of seeds<br>• Botanical description of plants<br>• Layout and planting; cultural practices<br>• short-term experiments of under exploited vegetables | • Demonstration on layout, planting and cultural practices of underexploited vegetables |
| VSC 508 (1+1) | • Method of preparation of compost, vermi-composting, bio-fertilizers, soil solarisation, bio pesticides in horticulture, green manuring, mycorrhizae and organic crop production, waste management, organic soil amendment for root disease, weed management in organic horticulture<br>• Visit to organic fields and marketing centres | • Method of preparation of compost, vermi composting, bio-fertilizers, soil solarisation, bio pesticides in horticulture<br>• Visit to organic fields and marketing centres |
| VSC 509 (2+1) | • Study of machinery and equipment used in processing of horticultural produce<br>• Chemical analysis for nutritive value of processed vegetables<br>• Study of different types of spoilage in processed horticultural produce;<br>• Study of biochemical changes and enzymes associated with spoilage<br>• Laboratory examination of vegetable products; Sensory evaluation of processed vegetables; study of food standards – National, international, CODEX Alimentarius | • Visit to processing units to study the layout, equipment, hygiene, sanitation and residual / waste management |
| VSC 510 (2+1) | • Identification of seeds and plants<br>• Botanical description of plant; preparation of herbarium, propagation, nursery raising<br>• Field layout and method of planting, cultural practices, harvesting, drying, storage, packaging and processing, value addition; short term experiments on spice crops | • Demonstration of Cultural practices & harvesting, drying, storage, packaging and processing, value addition on spice crops |
| VSC 511 (2+1) | • Studies of stages and maturing indices<br>• Ripening of commercially important | • Identification of various maturity indices in vegetable |

| | | |
|---|---|---|
| | vegetable crops<br>• Studies of various harvesting methods<br>• Pre-cooling, pre-treatments, pre-packaging<br>• Physiological disorders-chilling injury, improved packing<br>• Use of chemicals for ripening and enhancing shelf life of vegetables<br>• Estimation of Physiological loss in weight of vegetables, transpiration, respiration rate, ethylene release<br>• Storage of important vegetables, cold chain management<br>• Visit to commercial packaging house, cold storage and CA storage. | crops<br>• To know about various practices like harvesting of vegetable crops *i.e.*, manually and mechanically, Various pre-harvest treatments from harvesting to marketing like pre cooling, pre-packaging, packaging methods, transportation, storage |
| VSC 599 (0+18) | • Master's research | • Students use practical knowledge to conduct researches in different field of specialization of Vegetable Science |
| VSC 591 (1+0) | • Master's seminar | • To develop the technical, writing and the communication skills |
| VSC 601 (2+1) | • Seed hardening treatments; practices in indeterminate and determinate<br>• Vegetable growing and organic gardening; portrays and ball culture | • To study the latest developments and trends in production technology of vegetable crops |
| VSC 602 (2+1) | • Designing of breeding experiments<br>• Screening techniques for abiotic stresses, screening and rating for pest, disease and nematode resistance<br>• Estimation of quality and processing characters<br>• Screening for-quality improvement<br>• Estimation of heterosis and combining ability<br>• Induction and identification of mutants and polyploids<br>• Distant hybridization and embryo rescue techniques | • Prepare the design of breeding experiments for conduct of the trial<br>• To get knowledge about floral biology of different crops<br>• Study of different breeding methods for improvement of vegetable crops<br>• Study on variability, heritability genetic advance *etc*. |
| VSC 603 (1+1) | • Study of various types of protected structures, methods to control temperature, CO2 light, media, training and pruning, maintenance of parental lines and hybrid seed production of vegetables<br>• Fertigation and nutrient management<br>• Control of insect-pests and disease in greenhouse<br>• Economics of protected cultivation | • Study of advanced protected stricture techniques like fertigation and nutrient management<br>• Visit to established green/poly house/net house/shade house in the region |
| VSC 604<br>MBB 604/ FLA 605 (3+0) | • Biotechnological approaches for improvement of vegetable crops<br>• Conventional versus non-conventional methods for crop improvement; Present status and recent developments on available tissue culture, transformation, molecular marker and genomic tools for crop improvement | • To discuss the specialized topics on the application of molecular tools in breeding of specific crops.<br>• To study the Various biotechnological approaches for improvement of vegetable crops |

| | | |
|---|---|---|
| | • Genetic engineering for resistance against abiotic (drought, salinity, flooding, temperature, etc.) and biotic (insect pests, fungal, viral and bacterial diseases, weeds, etc) stresses; Genetic Engineering for increasing crop productivity by manipulation of photosynthesis, nitrogen fixation and nutrient uptake efficiency; Genetic engineering for quality improvement (protein, essential amino acids, vitamins, mineral nutrients, etc); edible vaccines, *etc.* | |
| VSC 605 (2+1) | • Identification of susceptibility and tolerance symptoms to various types of stress in vegetable crops,<br>• Measurement of tolerance to various stresses in vegetable crops, short term experiments on growing vegetable under water deficit, water-logging, salinity Use of chemicals for alleviation of different stresses and sodicity, high and low temperature conditions<br>• Use of chemicals for alleviation of different stresses | • Understanding the susceptibility and tolerance symptoms to various types of stress in vegetable crops<br>• Study of various methods for understanding the measurement of tolerance to various stresses in vegetable crops. |
| VSC 691 (1+0) | • Doctoral seminar | • To develop the technical, writing and the communication skills |
| VSC 692 (1+0) | • Doctoral seminar | • To develop the technical, writing and the communication skills |
| VSC 699 (45+0) | • Doctoral research | • Students use practical knowledge to conduct researches in different field of specialization of Vegetable Science: |

**6.4.6. Supervision of students in PG/PhD programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Details of M.Sc. programme offered by the Department**

| Year | Number of students on roll | Number of PG faculty | Student- teacher Ratio |
|---|---|---|---|
| 2018-19 | 10 | 15 | 0.66:1 |
| 2019-20 | 22 | 17 | 1.29:1 |
| 2020-21 | 27 | 17 | 1.33:1 |
| 2021-22 | 26 | 20 | 1.30:1 |
| 2022-23 | 19 | 24 | 0.79:1 |

**Details of Ph.D. programme offered by the Department**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 12 | 15 | 0.80:1 |
| 2019-20 | 17 | 17 | 1:1 |

| | | | |
|---|---|---|---|
| 2020-21 | 19 | 17 | 1.12:1 |
| 2021-22 | 18 | 20 | 0.90:1 |
| 2022-23 | 18 | 24 | 0.75:1 |

**6.4.7. Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feedback?*

To know the opinion as well suggestions of the students about teaching techniques of the respective course instructor feedback proforma is distributed among all the students in the last theory class of respective course in each semester. All the suggestions or feedback given by the students were discussed within the departmental meeting and incorporated all the issues in proceedings of meeting and actions were taken accordingly.

**6.4.8. Student intake and attrition in the programme for last five years:** Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.

| Name of Degree Programme | No. of students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Sc.** | 8 | 8 | 11 | 9 | 9 | - | - | - | - | 22.2 |
| **Ph.D.** | 3 | 3 | 6 | 6 | 5 | - | - | - | - | - |

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

Yes, Information and communication technologies are currently being used to assist students to learn more effectively by a wide range of new technologies. ICT helps to update and enhance teacher's capacity and efficiency through projectors, PPT, smart class room, electronic study material in the form of audio-video lectures, google class room, Microsoft Teams, smartphone mobile app in agriculture, virtual class room, E-Library, sharing of E-content developed, video clips for demonstration of advanced agricultural practices etc.

**Use of ICT application in teaching and practical for curricula delivery**

| Courses | Total courses | Theory | Practical | Type of ICT Application |
|---|---|---|---|---|
| **M.Sc.** | 6 | 6 | 6 | PPT, Smart class room |
| **Ph.D.** | 4 | 4 | 4 | PPT, Smart class room |

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All-India Admission from ICAR and also having weightage for college accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate

I, the Dean, **Surender K. Pahuja** hereby certify that the information contained in the Section 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

*Annexure VEG – I*

## STUDENTS' PARTICIPATION IN SEMINARS/SYMPOSIUM/CONFERENCES

1. Mr. Tejinder Singh attended and presented poster in Golden Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario held on 6-8 Nov. 2019 at CCSHAU, Hisar.
2. Mr. Desh Raj Chaudhary attended and presented poster in Golden Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario held on 6-8 Nov. 2019 at CCSHAU, Hisar.
3. Mr. Hitesh Kumar attended and presented poster in Golden Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario held on 6-8 Nov. 2019 at CCSHAU, Hisar.
4. Ms. Nidhi Sehgal attended and presented poster in Golden Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario held on 6-8 Nov. 2019 at CCSHAU, Hisar.
5. Ms. Khyati Singh attended and presented poster in Golden Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario held on 6-8 Nov. 2019 at CCSHAU, Hisar.
6. Mr. Vikram attended and presented poster in International conference on Global Perspective in Agricultural and Applied Sciences for Food and Environmental Security (GAAFES-2019) held on 1-2 Dec., 2019, Nainital, UK.
7. Mr. Vikram attended and presented poster in International Conference on Climate Change and its Impact on Global Food Security and Sustainability of Agriculture held on 23-24 Nov., 2019, Banaras, UP.
8. Ms. Anita Choudhary has participated in the National webinar on "Research Methodology: Concepts & Applications" sponsored by National Agricultural Higher Education Project organized by Maharana Pratap University of Agriculture & Technology, Udaipur, Rajasthan during 26-27.06.2020.
9. Mr. Amit Verma has attended webinar on "Floriculture as Agri-Enterprise for start-ups" sponsored by National Agricultural Higher Education Project organized by MHU Regional Research Centre on Mushroom, Murthal from 23 to 26.06.2020.
10. Mr. Amit Verma has participated in webinar on "Self Sufficient Agriculture: New Approaches" organized by Growing Seed on 30 to 31.05.2020.
11. Mr. Amit Verma has attended the National webinar on "Awareness and use of CeRA resources through J-Gate discovery platform" organized by Nehru Library, CCS HAU, Hisar on 25.06.2020.
12. Mr. Amit Verma has participated in the International webinar on "Emerging Trends in Physics and its Applications in Agriculture" organized by Department of Physics, College of Basic Sciences and Humanities, CCS HAU, Hisar on 29.06.2020.
13. Ms. Kalpana Yadav has participated in the International webinar on "Emerging Trends in Physics and its Applications in Agriculture" organized by Department of Physics, College of Basic Sciences and Humanities, CCS HAU, Hisar on 29.06.2020.
14. Ms. Kalpana Yadav has attended the National webinar on "Awareness and use of CeRA resources through J-Gate discovery platform" organized by Nehru Library, CCS HAU, Hisar on 25.06.2020.
15. Sonia Lohia (MSc. Student) presented poster (abstract) in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February 2023.
16. Ms. Yogita (PhD 2$^{nd}$ year) presented posted in the Fifth International Conference on Innovative and Current Advances in Agriculture and Allied Sciences organized by Society for Scientific Development in Agriculture and Technology at Meerut, India from 12-14 June, 2022 in online mode.
17. Ms. Yogita (PhD 2$^{nd}$ year) presented poster in the International conference on Advances in Agriculture and Food System towards Sustainable Development Goals in online mode during 22-24th Aug 2022 organized by University of Agricultural Sciences, Bangalore.
18. Ms. Yogita (PhD 2$^{nd}$ year) presented poster in the VII International Conference on Global Research Initiatives for Sustainable Agriculture and Allied Sciences in online mode during 21-23 November 2022 organized by Astha Foundation, Meerut (UP), India.

19. Ms.Yogita (PhD 2nd year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February, 2023.
20. Ms. Sudesh Phogat presented poster in Progressive Horticulture Conclave organized by G.B. Pant University of Agriculture & Technology Pantnagar, Uttrakhand from 3-5 February, 2023.
21. Mr. Naveen Kumar presented poster in the IVth International Conference on Innovative and Current Advances in Agriculture and Allied Sciences organized by Society for Scientific Development in Agriculture and Technology at Meerut, India from 12-14, June 2022 in online mode.
22. Mr. Naveen Kumar presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February, 2023.
23. Mr. Chaman presented poster (abstract) in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February, 2023.
24. Mr. Swagat Ranjan Behera (M. Sc. Vegetable Science) presented poster in the AICRP (Vegetable Crops) Golden Jubilee National Symposium on New Opportunities in Vegetable Production for Sustainable Development held at Indian Institute of Vegetable Research, Varanasi from AICRP (Vegetable Crops) Golden Jubilee National Symposium on New Opportunities in Vegetable Production for Sustainable Development from 20-22 December, 2022.
25. Mr. Swagat Ranjan Behera (M. Sc. Vegetable Science)Presented poster in the OHS International Conference (online mode) held at Odisha University of Agriculture & Technology, Bhubaneswar from 20-21 January, 2023.
26. Mr. Swagat Ranjan Behera (M. Sc. Vegetable Science) poster in the Progressive Horticulture Conclave 2023 (offline mode) held at GBPUA&T, Pantnagar from 3-5 February, 2023.
27. Mr. Swagat Ranjan Behera (M. Sc. Vegetable Science) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February, 2023.
28. Mr. Sudesh (Ph.D. Ist year) presented poster in the OHS International Conference (online mode) held at Odisha University of Agriculture & Technology, Bhubaneswar from 20-21 January, 2023.
29. Ms. Sudesh (Ph.D. Ist year) presented poster in the OHS International Conference (online mode) held at Odisha University of Agriculture & Technology, Bhubaneswar from 20-21 January, 2023.
30. Ms. Sudesh (Ph.D. Ist year) presented poster in the Progressive Horticulture Conclave 2023 (offline mode) held at GBPUA&T, Pantnagar from 3-5 February, 2023.
31. Ms. Sudesh (Ph.D. Ist year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February 2023.Presented poster in the Progressive Horticulture Conclave 2023 (offline mode) held at GBPUA&T, Pantnagar from 3-5 February, 2023.
32. Ms. Sudesh (Ph.D. Ist year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February, 2023.
33. Ms. Shubham (M.Sc. final year) presented poster (abstract) in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February 2023.
34. Ms. Renu (Ph.D. Ist year) presented poster in the OHS International Conference (online mode) held at Odisha University of Agriculture & Technology, Bhubaneswar from 20-21 January 2023.
35. Ms. Renu (Ph.D. Ist year) presented poster in the Progressive Horticulture Conclave 2023 (offline mode) held at GBPUA&T, Pantnagar from 3-5 February, 2023.
36. Ms. Renu (Ph.D. Ist year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February, 2023.

37. Mr. Nilesh Sagwal (2021A124M, M.Sc. final year) presented poster (abstract) in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February, 2023.
38. Mr. Sumit Kumar (M.Sc.) 2021A131M presented poster in the OHS International Conference (online mode) held at Odisha University of Agriculture & Technology, Bhubaneswar from 20-21 January, 2023.
39. Mr. Sumit Kumar (M.Sc.) 2021A131M Presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February, 2023.
40. Mr. Amit Kumar (M.SC. 2nd year) presented poster in the Progressive Horticulture Conclave 2023 (offline mode) held at GBPUA&T, Pantnagar from 3-5 February, 2023.
41. Mr. Amit Kumar (M.SC. 2nd year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February, 2023.
42. Mr. Rupit (M.Sc. final year-2021A128M) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February, 2023.
43. Ms. Pooja Pahal (Ph.D. Ist year) presented poster in International conference on vegetable research and innovations for nutrition, entrepreneurship and environment (ICVEG-21) in online mode organized by IIVR, Varanasi from Dec. 14-16, 2021
44. Ms. Pooja Pahal (Ph.D. Ist year) presented poster in National Symposium on Crop protection through bio-rational approaches- Current trends and future perspective (online mode )held at CCS Haryana Agricultural University, Hisar on 10 March, 2022.
45. Ms. Pooja Pahal (Ph.D. Ist year) presented poster in the OHS International Conference (online mode) held at Odisha University of Agriculture & Technology, Bhubaneswar from 20-21 January 2023.
46. Ms. Pooja Pahal (Ph.D. Ist year) presented poster in the Progressive Horticulture Conclave 2023 (offline mode) held at GBPUA&T, Pantnagar from 3-5 February, 2023.
47. Ms. Pooja Pahal (Ph.D. Ist year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February, 2023.
48. Ms. Richa (PhD Ist year) presented paper in the Second International Conference on "Emerging Trends in Basic and Applied Sciences (ETBAS-2023)" held on January 17, 2023 in online mode.
49. Ms. Richa (PhD Ist ) presented paper in International conference on India 2.0, Vision for India 2047: Challenges and Prospects from 14-15 Feb, 2023 in online mode.
50. Ms. Richa (PhD Ist year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability in offline mode organized by CCSHAU, Hisar from 17-19 February, 2023.
51. Ms. Monika, 2021A83D (Ph.D. 2nd year) presented poster in the International Web Conference on Innovative and Current Advances in Agriculture & Allied Sciences (online mode) organized by Society for Scientific Development in Agriculture & Technology (SSDAT), Meerut from 19-21 July, 2021.
52. Ms. Monika, 2021A83D (Ph.D. 2nd year) presented poster in international e-Conference on Postharvest Disease Management and Value Addition of Horticultural Crops (offline mode) held at IARI, New Delhi from 18-20 August, 2021.
53. Ms. Monika, 2021A83D (Ph.D. 2nd year) Oral Presentation in International Potato e-Conference on New Paradigms in Food Security and Industrial Applications* (online mode) held at CPRI Shimla from Nov. 23-26, 2021.
54. Ms. Monika, 2021A83D (Ph.D. 2nd year)presented poster in 4th International Conference on Innovative and Current Advances in Agriculture and allied sciences in online mode held at Shimla, HP from June 12-14, 2022.
55. Ms. Monika, 2021A83D (Ph.D. 2nd year) presented poster in the National Symposium on New Opportunities in Vegetable Production for Sustainable Development (offline mode) held at IIVR, Varanasi from 20-22 December, 2022.

56. Ms. Monika, 2021A83D (Ph.D. 2nd year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar from 17-19 February, 2023.
57. Mr. Abhishek (Ph.D. I st year) presented poster in the Progressive Horticulture Conclave 2023 (offline mode) held at GBPUA&T, Pantnagar from 3-5 February, 2023.
58. Mr. Abhishek (Ph.D. I st year) presented poster in the International Conference on Climate Resilient Agriculture for Food Security and Sustainability (offline mode) held at CCS Haryana Agricultural University, Hisar, 17-19 February, 2023.
59. Behera, S.R., Duhan D.S., Hans Raj and Singh, D. (2023). Apical rooted cuttings (ARC) technology for high quality, rapid and low-cost potato seed production in India. In book of abst: *INTCLIMATE 2023–International conference on climate resilient agriculture for food security and sustainability*,held at CCS Haryana Agricultural University, Hisar, February 17-19, 2023, pp: 131.
60. Behera, S.R., Duhan D.S., Hans Raj and Singh, D. (2023). Nano urea (liquid): An innovation to sustain future vegetable production. In book of abst: *INTCLIMATE 2023–International conference on climate resilient agriculture for food security and sustainability*, held at CCS Haryana Agricultural University, Hisar, 17-19 February, 2023, pp: 296.
61. Karande, P.J., Majoka, M., Duhan D.S. and Kumar, K. (2023). Morphological characterization studies in different ridge gourd genotypes.In book of abst: *INTCLIMATE 2023–International conference on climate resilient agriculture for food security and sustainability*, held at CCS Haryana Agricultural University, Hisar, 17-19 February, 2023, pp: 397.

## LIST OF STUDENT WHO QUALIFIED NET EXAM

| Sr. no. | Name of Students | Admission No. |
|---|---|---|
| **1.** | Hitesh Kumar | 2015A48D |
| **2.** | Mukesh Kumar | 2016A48D |
| **3.** | Harshita Singh | 2016A46D |
| **4.** | Vikram | 2016A47D |
| **5.** | Deshraj Chaudhary | 2016A45D |
| **6.** | Ajay Chauhan | 2017A48D |
| **7.** | Sangeet Kumar | 2017A 47D |
| **8.** | Nidhi Sehgal | 2017A46D |
| **9.** | BichhinaMaitri Rout | 2017A68D |
| **10.** | Tanvi Mehta | 2017A70M |
| **11.** | Vidya R. | 2017A67M |
| **12.** | Vivek | 2018A55D |
| **13.** | Renu Yadav | 2018A53D |
| **14.** | Vikas Gill | 2018A99M |
| **15.** | Sapna Gurupad Hegde | 2020A78D |
| **16.** | Aishwarya K.R. | 2019A80D |
| **17.** | Monika Yadav | 2020A77D |
| **18.** | Priyanka J.K. | 2020A78D |
| **19.** | Yugvinder | 2020A81D |
| **20.** | Amit Verma | 2021A81D |
| **21.** | Kalpana | 2021A82D |
| **22.** | Monika | 2021A83D |

*Annexure VEG – III*

## AWARDS TO STUDENTS IN NATIONAL OR INTERNATIONAL CONFERENCES

| Name of student | Award | College/Department | Year |
|---|---|---|---|
| Amit Kumar | Best Poster Presentation award in the International Conference on Climate resilient Agriculture for food security and sustainability organized by CCSHAU, Hisar from 17-19 Fabreuary, 2023 | Veg. Science, COA | 2023 |
| Pooja Pahal | Best Poster Presentationaward in the Progressive Horticulture Conclave held at GBPUA&T, Pantnagar from 3-5 February, 2023 | Veg. Science, COA | 2023 |
| Vikas Raa | Best Poster Presentation award in the Progressive Horticulture Conclave held at GBPUA&T, Pantnagar from 3-5 February, 2023 | Veg. Science, COA | 2023 |
| Amit Verma | Best Poster Presentation award in the National symposium on New Opportunities in Vegetable Production for sustainable Development held at IIVR, Varanasi from 20-22 December, 2022 | Veg. Science, COA | 2022 |
| Kalpana Yadav | Best Poster Presentation award in the National symposium on New Opportunities in Vegetable Production for sustainable Development held at IIVR, Varanasi from 20-22 December, 2022 | Veg. Science, COA | 2022 |
| Monika Yadav | Best Poster Presentation award in the 4th International Conference on Innovative and Current advances in Agriculture and Allied Sciences in Online mode held at Shimla, H.P. from June 12-14, 2022 | Veg. Science, COA | 2022 |
| Vikas Gill | Best 3rdPoster Presentationaward Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario held on 6-8 November, 2019, CCSHAU, Hisar | Veg. Science, COA | 2019 |

***Annexure VEG – IV***

# PROGRAMMES/TRAININGS ORGANIZED/CONDUCTED BY DEPARTMENT OF VEGETABLE SCIENCE

| Sr. no. | Titles | Date |
|---|---|---|
| 1. | Training programme on "*Production Technology of Spice crops*" on Feb., 27, 2019 at SNIATTE, CCS HAU, Hisar. | 27.02. 2019 |
| 2. | Training programme on "*Production Technology of Spice crops*" on March 06, 2019 at SNIATTE, CCS HAU, Hisar. | 06.03. 2019 |
| 3. | Training programme on "*Scientific production technology of Potato*" on 14.02.2020 at SNIATTE, CCSHAU, Hisar. | 14.02.2020 |
| 4. | Training programme on "*Production technology of spice crops*" by Department of Vegetable Science for farmers on 19.02.2020 at SNIATTE, CCSHAU, Hisar. | 19.02.2020 |
| 5. | Training programme on "*Scientific production technology of Potato*" on 20.02.2020 at SNIATTE, CCSHAU, Hisar. | 20.02.2020 |
| 6. | Training programme on "*Production technology of spice crops*" for farmers on 26.02.2020 at SNIATTE, CCSHAU, Hisar. | 26.02.2020 |
| 7. | Training programmes on "Production technology of spice crops" for farmers of Haryana on February 24, 2021 at SNIATTE, CCSHAU, Hisar. | 24.02.2021 |
| 8. | Training programmes on "*Production technology of spice crops*" for farmers of Haryana on March 03, 2021 at SNIATTE, CCSHAU, Hisar. | 03.03.2021 |
| 9. | Trainings on "*Scientific Production Technology of Potato*" held on 17/03/21 at SNIATTE, CCSHAU, Hisar. | 17.03.2021 |
| 10. | Trainings on "*Scientific Production Technology of Potato*" held on 18/03/21 at SNIATTE, CCSHAU, Hisar. | 18.03.2021 |
| 11. | Trainings on "*Scientific Production Technology of Potato*" held on 19/03/2021 at SNIATTE, CCSHAU, Hisar. | 19.03.2021 |
| 12. | Trainings on "*Scientific Production Technology of Potato*" held on 20/03/2021 at SNIATTE, CCSHAU, Hisar. | 20.03.2021 |
| 13. | One Day Farmers training on "*Spices production technology for farmers*" held on 11/03/2022 at SNIATTE, CCSHAU, Hisar. | 11.03.2022 |
| 14. | Training programmes on "*Production technology of potato for farmers"* held on 17/03/2022 at SNIATTE, CCSHAU, Hisar. | 17.03.2022 |
| 15. | Training programmes on "*Production technology of potato for farmers*" held on 19/03/2022 at SNIATTE, CCSHAU, Hisar. | 19.03.2022 |
| 16.. | Training programmes on "*Production technology of potato for farmers*" held on 21/03/2022 at SNIATTE, CCSHAU, Hisar. | 21.03.2022 |
| 17. | One Day Farmers training on "*Spices production technology for SCSP farmers*" held on 30/03/2022 at SNIATTE, CCSHAU, Hisar. | 30.03.2022 |
| 18. | Seven days online training programme on "*Protected cultivation of Vegetable Crops*" from 16.03.2022 to 25.03.2022 for SC Students of College of Agriculture, CCSHAU, Hisar. | 16.03.2022 to 25.03.2022 |
| 19. | Organized One Day Farmers training on "*Production technology of Spice crops*" on March 28, 2023 at SNIATTE, CCSHAU, Hisar. | 28.03.2023 |
| 20 | One Day Farmers training on "*Production technology of Spice crops*" on March 29, 2023, SNIATTE at CCSHAU, Hisar. | 29.03.2023 |

Field visit of farmers during training programme

Addressing farmers during one-day training programme on Spices production technology

Skill development of farmers by providing training certificate and seed spices kit

*Annexure VEG –V*

# PUBLICATION BY FACULTY OF THE DEPARTMENT OF VEGETABLE SCIENCE

| S. No. | Research papers | NAAS rating |
|---|---|---|
| **1.** | Chikkeri, S.S., Duhan, D.S., Panghal, V.P.S. and Arya, R.K. (2018). Genetic variability, heritability and genetic advance analysis for quantitative traits in bottle gourd [*Lagenaria siceraria* (molina) Standl.] genotypes. *Vegetable Science*, 45(2): 173-179. | 4.98 |
| **2.** | Duhan, D.S. and Sharma, N.K. (2018).GH-22 A new bottle gourd variety. *Vegetable Science*, 45(2): 284-286. | 4.98 |
| 3. | Kiran, Duhan, D.S., Rana, M.K., Singh, Harshita and Mazoka, M. (2018). Effect of phosphorus and zinc on plant growth and yield of vegetable cowpea. *Vegetable Science*, 45(1): 55-60. | 4.98 |
| **4.** | Kumar, M. and Kumar, K. (2018). Economic analysis of hybrid and conventional varieties of bottle gourd as affected by different levels of nitrogen and plant spacing. *International Journal of Current Microbiology and Applied Sciences*, 7. | 5.38 |
| **5.** | Kumar, M. and Kumar, K. (2018). Scope of organic vegetable production and marketing in Haryana: A review. *Journal of Pharmacognosy and Phytochemistry*. 7(6): 604-610. | 5.21 |
| **6.** | Kumar, P., Bora, L., Batra, V.K. and Sheena, N.K. (2018). Genetic variability, heritability and genetic advance studies for yield and quality traits among diverse genotypes of Tomato (*Lycopersicon esculentum* Mill). *International Journal of Current Microbiology and Applied Sciences*.7 (9): 1391-1397. | 5.38 |
| **7.** | Kumar, P., Phor, S.K., Tehlan, S.K. and Mathur, A.K. (2018). Effect of seed rate and row spacing on growth and yield of fenugreek (*Trigonella foenum-graecum*). *Journal of Pharmacognosy and Photochemistry* **7** *(4): 93-96.* | 5.21 |
| **8.** | Kumar, S., Bhatiya, V.J. and Kumar, S. (2018). Combining ability analysis in Sponge gourd [*Luffacylindrical* (Roem.) L.]. *International Journal of Current Microbiology and Applied Sciences*, 7(5): 3577-3581. | 5.38 |
| **9.** | Kumar, S., Bhatiya, V.J., Kumar, S., Bhati, V. and Parihar, D. (2018). Analysis of variance fruit yield and its components in Sponge gourd [*Luffacylindrical* (Roem.) L.]. *International Journal of Current Microbiology and Applied Sciences*, 7(6): 383-386. | 5.38 |
| **10.** | Kumar, S., Malik, T.P. and Tehlan, S.K. (2018). Effect of gibberellic acid on growth and seed yield of coriander (*Coriandrum sativum* L.). *International Journal of Current Microbiology and Applied Sciences,7 (9): 2558-2566.* | 5.38 |
| **11.** | Kumhar, K.C., Malik V.K. and Punia, R. (2018). *Trichoderma*: A natural biofungicide for managing diseases of agricultural crops. *Haryana Journal of Agricultural research*. | - |
| **12.** | Maan, D., Bhatia, A.K., Vikram and Anshul (2018). Impact of irrigation methods and nitrogen levels on growth and yield of potato in Haryana. *Journal of Phramacognsy and Phytochemistry*, 7(6):2267-2271. | 5.21 |
| **13.** | Maan, D., Bhatia, A.K., Vikram and Duhan, A. (2018). Response of Nitrogen Rates and Irritation Methods on Nutrients Uptake, Nitrogen and Water Use Efficiency on Potato. *International Journal of Current Microbiology and Applied Sciences*, 7(11): 1969-1976. | 5.38 |
| **14.** | Panigrahi, I., Duhan, D.S., Panghal, V. P.S., Tehlan, S.K. and Yadav, A.C. (2018). Correlation coefficient analysis between yield defining traits of cultivated genotypes of bottle gourd {*Lagenaria siceraria* (Mol.) Stdl}. *Journal of Pharmacognosy and Photochemistry, 7 (2): 1378-1380.* | 5.21 |

## Major Research achievements during 2018-2023 by the Department of Vegetable Science

### Research achievement during 2018-19:

- A promising tomato advance line HT-4 (Sel-1) was developed by the Department of Vegetable Science at Regional Research centre, Karnal, which gave 13 % higher fruit yield over check variety DVRT-1.

HT-4 (Sel-1)

Hisar Methi- 425 (HM- 425)

- Fenugreek variety HM-425 having high yield potential (2052 kg/ha), tolerant to powdery mildew, resistant to downy mildew was recommended for release by the XXIX workshop of AICRP on spices held at Dr. Y.S. Parmar University of Horticulture & Forestry during October 4-6, 2018.

- Three potato varieties Kufri Ganga, Kufri Lima and Kufri Neelkanth, which were notified by Central Sub Committee on Crop Standards, Notification and Release of Varieties for Horticultural Crops, New Delhi.

### Salient research findings of the department (2019-20):

- Bitter gourd variety HK-127 having oblong shape, green colour fruit, high yielding (122.9 q/ha) and suitable for stuffing purpose was released and notified by Central variety release committee meeting held on 10/10/2019 at Shashtri Bhawan, New Delhi.

**HK-127**

- Bitter gourd hybrid HKH-56 having long shaped, green colour fruit, high yielding (140.7 q/ha) and suitable for chopping purpose was recommended for State release by HAU variety identification /release committee.

**HKH- 56**

- The Department has registered the following bitter gourd germplasm at NBPGR New Delhi vide letter no. DGC/RV/July 2019/1799/1 dated 30.07.2019.

| Crop | Hybrid/Parental lines | National Identity No. |
|---|---|---|
| **Bitter gourd** | HKH-56 | IC 631299 |
| | Female parent: BL 237 | IC 631300 |
| | Male parents: Jaunpuri | IC 631301 |

## Salient research findings of the department (2020-21):

- A promising Garlic advance line HG-27 having compact white bulb with thin neck, good keeping quality, high yielding (144.0 q/ha) and tolerant to Stemphylium blight and purple blotch diseases have been developed by the Department of Vegetable Science and submitted proposalfor identification in the HAU variety identification/Release committeemeeting.
- A project entitled "Vegetable Grafting for Mitigation of Biotic and Abiotic Stresses in Greenhouse Vegetable Production System" was sanctioned for amount Rs 175 lakhs under RKVY in 2018-19 and Commissioning and Installation of Vegetable Grafting Unit was initiated at Vegetable Research Farm, Hisar with foundation stone laid on 31.03.2021.

## Varieties/strains/species of seeds/planting material released during 2020-21:

- Potato varieties Kufri Thar- 2,Kufri Thar- 3 and Kufri Kiran**were** notified for Haryana state by Central Sub Committee for Horticultural Crops.

**Salient research findings of the department during year 2021-22:**

- Different rice straw management practices have significant effect on potato tuber yield. Application of urea (50 kg/ha) + Waste Decomposer (500 L/ha) mixed well in soil along with chopped rice straw by using disc harrow/ rotavator was a viable option for management of rice crop residues for growing potato in sequence with improved yields by 22.6% over control.
- In garden pea variety, Azad Pea-3 application of vermicompost @ 3.0 tonnes + waste decomposer @ 500 litre $ha^{-1}$ + Two spray of 10% waste decomposer solution, produced 61.8% higher green pod yield.
- In Potato applicationof225kg N, 50kg$P_2O_5$ and 100 kg $K_2O$/ha wasrecommended for cultivars KufriSuryaand KufriSadabaharunder Haryana conditions.
- Incorporation of crop residue of previous crop@ 4t/ha along with application of FYM @25 t/ha+ bio-fertilizers (*Azatobacter andphosphobacteria)* was recommended for organic potato cultivation in Haryana region.
- The potato cultivar Kufri Surya can be planted 15 days earlier (30th September) with micro-sprinkler irrigation under Haryana conditions.

*Annexure VEG – VII*

## AWARD WON BY DEPARTMENT OF VEGETABLE SCIENCE IN KISAN MELA DURING YEAR 2018-19 TO MARCH, 2023

- Department of Vegetable Science Stall was awarded by **First prize during the Krishi Mela (Kharif)** 2019 held on March 12-13, 2019.
- Department of Vegetable Science Stall was awarded by **Third prize in Krishi Mela (Rabi)** duringheld on Sept. 11-12, 2019.
- Department of Vegetable Science Stall was awarded by **Second prize in Krishi Mela (Kharif)** during held on 15-16, March, 2022.
- Department of Vegetable Science stall won **First prize in Haryana Krishi Vikas Mela held on 10-12 March, 2023,**organized by Department of Agriculture and Farmer Welfare, Haryana & CCSHAU, HISAR.

सब्जी विज्ञान विभाग
चौधरी चरण सिंह हरियाणा कृषि विश्वविद्यालय, हिसार

चौधरी चरण सिंह हरियाणा कृषि विश्वविद्यालय, हिसार
द्वारा आयोजित
कृषि मेला (खरीफ)

Head of the Department, Vegetable Science, Dr. T.P. Malik along with their faculty members received the Honour by our agriculture minister of Haryana, Shri Jai Prakash Dalal and Our Vice-Chancellor, CCSHAU, Hisar, Dr. B.R. Kamboj during the valedictory function of Kisan Mela

***Annexure VEG – VIII***

## STUDENT PLACEMENT PROFILE

| S. No. | Name of student | Admission No. | Placement | Year |
|---|---|---|---|---|
| **1** | Dr. Sumit Deswal | 2014A57D | Assistant Scientist, Department of Vegetable Science, CCSHAU, Hisar | 2018 |
| **2** | Dr. Amit Kumar | 2014A58D | Assistant Scientist, Department of Vegetable Science, CCSHAU, Hisar | 2018 |
| **3.** | Dr. Sanjay Kumar | 2012A52D | Assistant Professor, Department of Vegetable Science, CCSHAU, Hisar | 2018 |
| **4.** | Dr. Naval Kishor | 2012A56D | SMS, KVK, Lunkaransar, SKRAU, Bikaner | 2018 |

## EXPERIENTIAL LEARNING PROGRAMME (ELP) ON PERI-URBAN AGRICULTURE AND COMMERCIAL CULTIVATION OF VEGETABLES, DEPARTMENT OF VEGETABLE SCIENCE

This ELP programme has provided a very good platform for students with an approach of "*Learning by Doing*" and "*Seeing by Believing*" and gives a new direction to the undergraduate and post-graduate programme which will develop thinking, skilful, expert, manager, human resource in the area of Vegetable science. The experiential learning programme is offered for one semester in the final year of undergraduate or post-graduate students in the department of Vegetable Science.

**The main objectives of ELP are:**

- To promote professional skills and knowledge through hands on experience.
- To build confidence and ability to work
- To train the students to become "Job givers rather than Job seekers"

Experimental learning programme

## Chaudhary Charan Singh Haryana Agricultural University
## Hisar, Haryana-125004

# FOREWORD

Agriculture is the world's largest industry employing more than one billion people world wide. Today agriculture has been transformed from conventional to modern technology driven enterprise and is no longer only an ancestral activity but is a profit-oriented business entity. The modern concepts like protected cultivation including poly house, green house, tunnel farming, post harvest technology, ware housing, organic farming, apiculture, floriculture, mushroom cultivation etc. are playing an important role. The government's focus and policies are aimed at high value, export oriented and more profitable enterprises. In order to realize full potential of agriculture more and more skilled human resource/ agricultural professional/graduates are required.

Study of Agricultural Science offers a plethora of career options from government organizations to agribusiness and food processing etc. To fill the gap between demand and supply of skilled human resources in agriculture, the number of Agricultural Universities has gone up from one to 64 apart from 4 deemed and three central universities, imparting agricultural education. The establishment of College of Agriculture, Bawal (Rewari) is continuation of the series. Considering the dire need of agricultural education in the southern part of Haryana adjacent to the national capital and millennium city, Gurugram, the college was started in2015 with programme of B.Sc. (Hons.) Agriculture. Efforts have been made to develop ahigh-class infrastructure with all modern amenities and competent faculty. Subsequently, all programmes including M.Sc., Ph.D. and Diploma courses have been started. I hope this college will meet the aspirations of its founders as well as all stake holders including farmers and youth of region and will find a name in the list of premium agricultural institutes of the country.

The college ensures all-round development of the students through participation in co-curricular activities including Games &Sports, NSS, Debates, Quiz, Poetry Contests, etc. to enhance students' creativity and inculcate leadership quality in them. It is indeed gratifying to see that the faculty of the College has been able to find solutions for many problems from time to time. The application of latest technologies in the class room and field is the best example of state of the art of modern infrastructure available in the College.

I am delighted that the College of Agriculture, Bawal has documented the progress accomplished since its inception in the form of Self Study Report for accreditation of the College as per guidelines of the ICAR.

**Prof. B. R. Kamboj**
Vice Chancellor
CCSHAU, Hisar

# PREFACE

The College of Agriculture, Bawal was established in 2015 as one of the constituent colleges of Chaudhary Charan Singh Haryana Agricultural University, Hisar vide Memo No. Acad. /2015/No. 15/A-2/5350-5498 dated 21.08.2015. The college has been established in the rural area of resource poor districts of Haryana state to provide agricultural education especially to the rural students. Since establishment it has envisioned a wide range of improvement and development in academic, research and extension needs of the Southern Zone of Haryana. At present there are 389 undergraduate, 42 post-graduate and 21 Ph.D. students in the College.

Bawal is a municipality in Rewari district of the state and lies in the National Capital Region (NCR) of India. It is located on national highway NH 48 (formerly known as NH 8), about 14 km from Rewari city, about 100 km from National Capital Delhi and 185 km from the university campus, Hisar. Bawal is located at latitude of 28.09° N, longitude of 76.59° E and altitude of 266 m above mean sea level.

The college has been spread over an area of 248 acres under research, buildings, roads, playgrounds and students' farm etc. It has magnificent infrastructure with multimedia class rooms (smart class rooms), well equipped laboratories, seminar room, library and the students' farm to cater the academic needs of the students as well as faculty. There are well maintained play grounds, separate hostels for boys and girls, NSS unit and various co-curricular activities are conducted for all round development of the students. Registration for at least one game/cultural activity and NSS/NCC is mandatory for all the students. Quality education is imparted by the dedicated and competent faculty in different disciplines of agriculture and allied fields. For acquiring academic and professional excellence, apart from class room teaching, laboratory and field practical, students are exposed to one year practical crop production. In addition to this, six months Rural Agricultural Work Experience (RAWE) including Agricultural Industry Exposure is also been provided. Further, agro-based skill oriented modules *viz*. organic production technology, bee keeping, mushroom cultivation, seed production and technology, soil-plant-water and fertilizer testing services, commercial vegetable production, bioagents and biofertilizers production, food processing etc. for six months are also a part of curriculum. Study tours and exposure visits to different institutes, progressive and innovative farmers' field/orchard are also an integral part of curriculum. PG students enrolled at College of Agriculture, Hisar also carry out their research under the guidance of highly trained faculty of this college.

Teacher taught relation in the college is unique on the lines of our ancient Gurukul pattern which is very important in inculcating moral values in the students. Residing and studying in the rural environment also prepare the students to serve farming community in a better way. Till now, 86 students have completed B.Sc. (Hons.) Ag. from this college and are serving in universities, banks, armed forces, input industries, line departments, co-operative sector, other public and private sectors.

# SELF STUDY REPORT OF
# COLLEGE OF AGRICULTURE, BAWAL (REWARI)

The College of Agriculture, Bawal was established in 2015 as one of the constituent colleges of Chaudhary Charan Singh Haryana Agricultural University, Hisar vide Memo No. Acad. /2015/No. 15/A-2/5350-5498 dated 21.08.2015. The foundation stone of the college building was laid down on February 25, 2017 by Shri Manohar Lal, Hon'ble Chief Minister of Haryana.

Bawal is a municipality in Rewari district of Haryana state and lies in the National Capital Region (NCR) of India. It is located on national highway NH 48, about 14 km from Rewari city, 100 km from Delhi and 200 km from the main campus of the University at Hisar. Bawal is located at 28.09°N 76.59°E at an elevation of 266 m above mean sea level.

The mandate of the college is nurturing scholarly education in agriculture and allied fields to make students professionally competent and socially sensitive and to provide specialized trainings to the students to promote entrepreneurial and other skills among them.

The college has all facilities for students including smart classrooms, fully equipped laboratories, library, computer section, cafeteria, examination hall, seminar hall etc.

## Objectives of the College

- To impart education and training to youth for developing professional skills in agriculture and allied fields
- To collaborate with other academic institutes at national and international level
- To generate production and protection technology for various cropping/ farming/ horticultural/agro-forestry systems and its dissemination to the farmers and other end users
- To assist stakeholders through value-added endeavours, bio-based products, bio-processing, crop diversification etc.
- To monitor climate change impacts on agricultural systems and develop mitigation strategies adopting inter-disciplinary approaches

## 6.5.1. College Administration

**6.5.1.1. College Principal's Office Establishment:** *Whether the Dean's post sanctioned by the appropriate authority as per ICAR Model Act/UGC guidelines? Date of selection of present dean, mode of selection, tenure etc. shall be mentioned. Clearly mention the staff and infrastructure/facilities available in the Dean's Secretariat.*

The controlling officer of the College of Agriculture, Bawal is the Dean, College of Agriculture, CCSHAU Hisar. All the activities and financial matters are being monitored by the Dean. The matters requiring approval/ sanction of higher authorities are routed through the Dean. All kind of support and guidance is also provided by the Dean, COA, Hisar.

For the purpose of administration in the college, competent authority has sanctioned the post of Principal. Staff and infrastructure facilities available in the principal's office are mentioned below:

| | | |
|---|---|---|
| **Name of Principal** | | |
| | **Dr.Naresh Kaushik** | 24-07-2018 to till date |
| | **Dr. S.S. Yadav** | 01.04.2018 to 23.07.2018 |
| **Mode of selection** | Internal interview | |
| **Tenure** | For a period of four years and can be reduced or extended on the basis of performance | |

Dr. Naresh Kaushik, Principal, College of Agriculture, Bawal

## Staff available in the Principal's Secretariat

| Name of the post | Sanctioned | In position | Vacant |
|---|---|---|---|
| **Manpower requirement of Principal's office** | | | |

Soil Science<br>26. Statistics<br>27. Vegetable Science<br>28. Zoology |
| **Name of College** | CCS HAU College of Agriculture, Bawal (Rewari) |
| **Faculty position** | See section 6.5.2. |
| **Lecture Halls (No.)** | 06 |
| **Facilities in the lecture hall like seating capacity, LCD Projector, Computer, CCTV Camera, Blackboard, screens etc.** | All the lecture halls are equipped with smart class room facilities (LED screen, computer with internet/Wi-Fi, whiteboard, visualizer, camera etc.), CCTV camera, curtains, power back up, lecture stand, teaching aids, markers etc. with seating capacity of 70 students in every lecture hall |
| **Smart Class Rooms (No.)** | 06 |
| **Seminar Rooms (No.)** | 01 |
| **Committee Room (No.)** | 01 |
| **Exhibition Hall / Wings** | 01 |
| **Departmental Library** | Yes |
| **Departmental Computer facility** | Sufficient number of computers are available. |
| **Washrooms/Toilets (No.)** | He – 06, She -06 |
| **Stores (No.)** | 02 |
| **UG Labs (No.)** | 18 |
| **Any other information which is not covered in the infrastructure may be added preferably in** | **Canteen:** The college has spacious canteen facility in its premises. A variety of high-quality hygienic food items and snacks are provided to the students and staff at reasonable rates. |

| | |
|---|---|
| **tabular form** | **Health clinic:** A health clinic facility under an MBBS doctor is working for students, staff and family. |

**6.5.1.2. Monitoring Mechanism for Quality Education (on-line):** *Whether the College is having an internal quality assurance system, with appropriate structure and processes, and with enough flexibility to meet the diverse needs of the stakeholders which is required for planning, guiding and monitoring quality assurance and quality enhancement activities of the Colleges. Mention the impact of monitoring on the outcome of the College with reference to students' excelling in academics, research and extracurricular activities.*

- Self-appraisal report of individual teacher is evaluated by Principal, Dean, DR, DEE, Dean PGS and VC.
- All the teaching activities in the lecture rooms are monitored online through CCTV cameras as well as sudden physical checking by the competent authority.
- Attendance of the students is maintained on ERP system of the university website as well as physically.
- To provide quality education to the students, all the *e*-content in form of text, video, images, presentations etc. are uploaded online on university website and same is monitored by the principal himself.
- All the class in-charges are responsible to report all the academic activities periodically to the Principal.
- To ensure quality education, feedback is collected from students about the performance of faculty in the academic activities.
- Programme of work, synopsis and thesis work of PG students is approved in Students' Advisory Committee. PG students deliver synopsis seminar in their departments to get feedback/ guidance for improvement from the departmental faculty. The synopsis is evaluated internally before submission to the Dean, PGS for final approval.
- Tour programmes and tour diaries of faculty members are approved by the competent authority.

| 5) Three senior faculty members | Dr. Bikram Singh, Dr. R.P.S. Deswal and Dr. J.S. Yadav |
| 6) One male student and one female student | Mr. Ravi and Ms. Kiran |

### c) Anti Ragging squad of the college

1) Security Incharge
2) Hostel Wardens
3) Security Officials

## B. Activities of the Committee

The college has constituted different committees to prohibit the ragging in the college campus including RRS/ KVK, residential area, hostels, play grounds and canteen. All freshers are made aware about ragging and its ill effects through interactive sessions in the college and hostels. During late

hours, the wardens and faculty members are deputed in the hostels to avoid any incidence of ragging specially during the first month of the new session.

The different committees visit regularly at the vulnerable places of the campus and also interact with the senior students regarding disadvantages of the ragging. At the entries of academic block of college and hostels, the posters/ banners with messages depicting “Ragging Free Campus”, “No Ragging”, “Ragging is punishable act” etc. are displayed.

The committees have their role in monitoring incidence of ragging, enquiring into and reporting the matter to the competent authority in maintaining a safe and healthy environment of the campus. The committee also works out modalities of functioning, frequency of visits, meetings, etc., to ensure that they are efficient in their role. The orientation programme for fresher's is an excellent initiative that helps them to understand the college's culture, policies, and expectations. It also provides them with information on how to seek help if they face any issues including ragging.

Overall, it is ensured to create a zero-tolerance policy towards ragging and take strict action against offenders. The committees and orientation programmes areenable to achieve this goal and creating a safe and inclusive environment for all students.

Due to these measures, no case of ragging has been reported in the College of Agriculture, Bawal (Rewari) till date.

**6.5.1.5. Biological Waste Disposal Facility:** *Whether wastes (chemical, biological, radioactive, universal, and recyclable) are generated by a variety of research, clinical, service, maintenance, and cleaning operations at the College level? If yes, then mention the disposal mechanism being adopted as per the government guidelines.*

Research/ work has not been planned/conducted on biological waste, therefore, no biological waste disposal facility is available. In future, if any such research work will be planned, then the University committees at main campus will takecare of this.

**6.5.1.6. Institutional Ethics Committee for Experiment on Animals:** *Whether the institute/College is following CPCSEA guidelines and constituted an Institutional Animal Ethics Committee (IAEC), get their animals house facilities inspected and get their project cleared by CPCSEA and IAEC before commencing them? If Yes, the college should make statement that it is adhering all guidelines in the matter.*

The experiment on animals and humans are not conducted, however, if required the case may sent to Institutional Ethics Committee constituted at CCS HAU, Hisar.

**6.5.1.7. Committee for Prevention of Sexual Harassment of Women at Work Places:** *Does the institution is adhering the sexual harassment of women at workplace (Prevention, Prohibition and Redressal Act, 2013) in letter and spirit. If yes, mention the constitution of sexual harassment committees and date of proceedings conducted in last five years in tabular form:*

Yes, the local committee for Sexual Harassment exist at Bawal campus for immediate redressal of such incidence and the committee constituted at university level also exist. The Internal Complaints Committee under the Sexual Harassment of Women at Work Place Act 2013 works at university level. No such complaints have been received till date.

### 6.5.2 Faculty

**6.5.2.1. Faculty Strength:** *Mention the Faculty position (both in sanctioned and in-position) at the College.*

| Designation | Sanctioned | In position | Vacant | As per ICAR Norms |
|---|---|---|---|---|
| Principal | 01 | 01 | 00 | 01 |
| Professor and equivalent | 03 | 00 | 03 | 03 |
| Assoc. Professor and equivalent | 08 | 01 | 07 | 08 |
| Asstt. Professor and equivalent | 36 | 04+06* | 32 | 34 |
| Total | 48 | 12 | 42 | 46 |

*outsourced up to 05.06.2023

***Note :*** In addition to above 26 new faculty joined during the academic session 2022-23.

Faculty in place under Professor and Associate Professor include Personal Promotion (PP). All the faculty of this programme is assigned the responsibilities for the multiple programme.

**Note 1:** In addition to the above-mentioned faculties, the faculties from Regional Research Station and KVK, Bawal have also been assigned the duties of teaching at COA, Bawal by the Vice Chancellor vide Registrar office Endst. No. Admn. F. 3/2018/34268-95 dated 18.10.2018.

**Note 2:** Twenty-six new faculty joined the College during the session 2022-23.

**6.5.2.2. Faculty Profile (Department Wise):** *Mention department wise faculty profile in tabular form and mention whether present profile is sufficient to meet the academic requirement of the College*

| Name of the faculty | Designation | Department/ Specialization | Honours/awards | No. of Publications (Books, Chapters, Papers, Manuals, Reports etc.) (No. only) |
|---|---|---|---|---|
| **Dr. Naresh Kaushik** | Professor | Forestry | 01 | Research paper (75), Book (04), Book chapter (07), Conference/ Seminar attended (15), Manual (01), Souvenir (01), Popular article (26), Training organized (05), Annual report (05), Bulletin/ Booklet/Folder/Leaflet (03) |
| **Dr. Devender Chahal** | Associate Professor | Horticulture | - | Research paper (20), Book chapter/ Bulletin (06), Manual (04), Workshop/ Seminar/ Training attended (27), Popular article (06), Abstract (09), Report (24), Training organized (16), Pamphlet (14), Leaflet (13), Folder (03), Radio talk (08) |
| **Dr. Mukesh Kumar** | Assistant Professor | Horticulture | 02 | Research paper (49), Book chapter (05), Conference attended (16), Abstract (20), Article (40), Bulletin/ Booklet/ Folder/ Leaflet (05), Radio talk (02), Recommendation (03), Annual report (10), Patent (01), Gold Medal (02) |

| | | | | |
|---|---|---|---|---|
| **Dr. Remeshwar Singh** | Assistant Professor | Soil Science | 02 | Research paper (45), Abstract (10), Workshop/ Seminar/ Training attended (13), Annual report (15), Popular article (17) Chapter (03), Young scientist award/ Best oral presentation (01) |
| **Dr. Prashant Chauhan** | Assistant Professor | Plant Pathology | - | Research paper (07), Abstract (23), Conference attended (10), Booklet/ Pamphlet (01), Chapter (02), Popular Article (05), Training (03), Best oral presentation award (01), Training/ Workshop/ Conference organized (02) |
| **Dr. Sunita Sheoran** | Assistant Professor | Soil Science | 07 | Research paper (14), Book (01), Book chapter (01), Conference/ Workshop attended (10), Abstract (27), Popular article (22), Gold medal (03), Best thesis award (01), Best oral presentation award (01), Best all-round student B.Sc. (Hons.) Ag. (01), 1st position in M.Sc. Agri. Programme (01), Training attended (07) |
| **Dr. Dharam Bir Yadav** | Principal Scientist | Agronomy | 06 | Research paper (38), Book (01), Book chapter (03), Conference paper (26), Training/ Workshop/ Conference attended (15), Popular article (60), Annual report (12), Bulletin/ Booklet/ Folder/ Leaflet (02) |
| **Dr. Bikram Singh** | Principal Scientist | Agronomy | 01 | Research paper (54), Book chapter (01), Conference/ Seminar/ Training attended (38), Popular article (21), Radio talk (2), Booklet/ Pamphlet/ Leaflet (17), Report (30), Manual (01) |
| **Dr. R.P.S. Deswal** | Principal Scientist | Forestry | - | Research paper (31), Workshop/ Seminar/ Training attended (32), Popular article (23), Annual report (02) |
| **Dr. Satyajeet** | Assistant Scientist | Agronomy | 02 | Research Paper (17), Book chapter (3), Conference (13), Training/ Refresher course (16), Booklet/ Pamphlet (24), Report (11), Radio Talk (16), Popular article (72) |
| **Dr. Balbir Singh** | District Extension Specialist | Entomology | - | Research paper (30), Book chapter (03), Conference (03), Pamphlet (08), Teaching |

| | | | | |
|---|---|---|---|---|

**Note 1 :** In addition to above six faculty members transferred were also posted/associated during the period of accreditation.

**Note 2 :** List of faculty publications is given in Annexure-I

**List of retired faculties (2018-2023)**

| Sr. No. | Name of the teacher | Retired on |
|---|---|---|
| 1. | Dr. Ashok Yadav, Principal, COA, Bawal | 30.04.2018 |
| 2. | Dr. Satyavir Singh Yadav, Principal, COA Bawal | 31.10.2018 |
| 3. | Dr. Naresh Verma, Principal Scientist (G&PB) | 31.03.2019 |
| 4. | Dr. (Mrs.) AbhaTikkoo, Senior Scientist (Soil Science) | 31.08.2019 |
| 5. | Dr. Yash Pal Yadav, Principal Scientist (G&PB) | 30.11.2019 |
| 6. | Dr. Veena Jain, Coordinator KVK, Bawal-cum-Hostel Warden | 31.01.2020 |
| 7. | Dr. Satyapal Yadav, Assistant Scientist (Entomology) | 02.05.2020 |
| 8. | Dr. Shashi Vashishth, Principal Scientist (Home Science) | 31.07.2021 |
| 9. | Dr. J.S. Yadav, Principal Scientist (Agronomy) and ADSW | 31.10.2021 |

**6.5.2.4. Technical and Supporting Staff:** *Whether the College has appointed (in place) sufficient technical/laboratory/farm staff to cater the need of practical and field experiments. Mention department wise distribution of technical, supporting and field staff in the tabular form*

| Name of the post | Sanctioned | In position | Vacant |
|---|---|---|---|
| Administrative cum Accounts Officer | 01 | 01 | 00 |
| Personal Assistant | 01 | 01 | 00 |
| Assistant | 03 | 02+01* | 00 |

| | | | |
|---|---|---|---|
| Jeep/Car Driver | 01 | 00 | 01 |
| Computer Operator | 01 | 00 | 01 |
| Store Keeper | 01 | 01 | 00 |
| Steno Typist | 02 | 01 | 01 |
| Assistant (one for each Deptt.: Agronomy, Agricultural Economics, G & PB, Horticulture, Soil Science and Plant Pathology) | 06 | 00 | 06 |
| Clerk (One for each Deptt.: Extension Education, Entomology, Agricultural Engineering, Biochemistry, Animal Science including Fisheries) | 05 | 00 | 05 |
| Tractor Driver | 01 | 00 | 01 |
| Lab Assistant | 11 | 02* | 05 |
| Library Assistant | 01 | 01 | 00 |
| Library Attendant | - | 01+01* | 00 |

| Pump Operator | - | 01* | 00 |
| Mali/ Beldar (Landscaping) | - | 03* | 00 |
| Hostel Attendant | - | 03* | 00 |
| Peon cum messenger | - | 01* | 00 |
| Sweeper | - | 07* | 00 |
| Total | **34** | **59** | **20** |

* Contractual/ outsourced ** Contractual/ outsourced for whole Bawal campus

### 6.5.3. Learning Resources

**6.5.3.1 College Library (digital):** *Location of the library, Present staff position (in place), Availability of the following in library, Wi-Fi, No. of books and other reading materials, No. of periodicals and research journals, No. of internet points with number of computers, Seating capacity in library, Employing the latest technology in library sciences, Stocking arrangements of books, Collection of volumes on different subjects, Latest publications in the fields of relevant subjects, Automation and user services through computer, Opening hours, Subscription of journals of national and international repute, national dailies, magazines etc.*

All the computers at College of Agriculture, Bawal are connected with CeRa, IndiaStat and other online facility through Nehru Library, CCSHAU, Hisar. The Gateway is connected with internet facility. There are about 5500 books and journals in the library.

| **Location of the library** | **COA, Bawal** | **Remarks** |
|---|---|---|
| **Present staff position (in place)** | 1+2 | In-charge (Faculty member) + library assistant and library attendant |
| **Facilities available in library** | | |
| **a) Wi-Fi** | Yes | Whole campus |
| **b) No. of books and other reading materials** | Sufficient | 5500 |
| **c) No. of periodicals and research journals** | Yes | 25 |
| **d) No. of internet points with number of computers** | Four | 30 |

| | | |
|---|---|---|
| **e) Seating capacity in library** | Sufficient | 200 students |
| **f) Employing the latest technology in library sciences** | Yes | Gateway of lease line connection is licensed for online study material search |
| **g) Stocking arrangements of books** | Proper | Book racks/ Almirah |
| **h) Collection of volumes on different subjects** | Sufficient | Book racks/ Almirah |
| **i) Latest publications in the fields of relevant subjects** | Yes | Published by respective faculties |
| **j) Automation and user services through computer** | Sufficient | Computer lab and desktop provided to faculty members and office supporting staff |
| **k) Opening hours** | 9:00 AM to 4.30 PM & 9:00 AM to 10.30 PM (during examinations) | Summer timings 7:00 AM to 2:00 PM & 7:00 AM to 10.30 PM (during examinations) |
| **l) Subscription of journals of national and international repute, national dailies, magazines etc. (mention number)** | 30 | Online as well as offline |
| **m) Online access to various sources of *e*-knowledge platforms such as *Krishi Prabha*, CeRa, video conferencing, IndiaStat and multimedia** | Yes | Lease line gateway is licensed through Nehru Library, CCS HAU, Hisar |
| **n) Night reading hall** | Yes | 50 seating capacity |
| **o) Emergency power supply backup** | Yes | Uninterrupted power supply through automatic generators |

**6.5.3.2. Laboratories, Instructional farm, Workshops, Dairy Plant, Veterinary Clinic, Hatchery, Ponds etc.:** *Clearly mention about laboratories, instructional farm, workshop, dairy plant, veterinary clinic, hatchery, ponds etc facilities available in the college with its numbers, space, speciality to conduct practical/ hands on training.*

The laboratories of different subjects/ disciplines are equipped with all instruments and facilities for practical. Instructional farm, workshop (agricultural engineering), meteorological observatory, seed production farm, seed processing unit and one livestock farm with 50 cattle for practical exposure to the students are also available.

Learning through practical in lab at COA, Bawal

Computer lab at COA, Bawal

Practical exposure of students to natural farming at COA, Bawal

## Specific information about Labs

All the laboratories are equipped with basic and advanced instruments facility

Information pertaining to laboratory facilities in various discipline of College of Agriculture, Bawal (Rewari) is given in the following table:

| Details | Number | Dimensions (ft) | Remarks |
|---|---|---|---|
| **Total Area** | 82 acres (total area at station is 248 acres) | - | • College building has three floors with offices and laboratories<br>• Playground and hostels (8 acres)<br>• Students' farm (12 acres) |
| **College Building** | Administrative block and all offices | - | Academic block with ramps, lift facility, lawn (3 acres) and sufficient parking space |
| **Meteorological Observatory** | 01 | 2000 $m^2$ | All meteorological instruments |
| **Workshop Agril. Engineering** | 01 | 1000 $m^2$ | Tractor and agricultural implements |
| **Seed Production Farm** | 01 | 30 acres | Seed of various field crops is produced |
| **Seed Processing Unit** | 01 | 500 $m^2$ | For processing and packaging of seeds produced at seed production farm |
| **Dairy Farm** | 01 | 12 acres | Fifty cattle with shed, drinking water and pasture land |
| **Laboratories** | **Agril. Economics** | 36 x 24 | All basic learning displays are exhibited for UG students |
| | **Agronomy** | 36 x 24 | Electronic balance, conductivity meter, hot air oven, pressure plate apparatus, tensiometer, plant canopy analyser |
| | **Botany** | 32 x 24 | Microscope (simple and compound), samples and display included all basic aids for teaching of UG students |

| | | | |
|---|---|---|---|
| | **Chemistry** | 32 x 24 | Glassware, required chemicals, electronic balance, distillation apparatus, calorimeter, galvanic cell, leclenche cell, pH scale, required charts and model |
| | **English/ Computer** | 36 x 30 | Thirty computers having language lab software with active internet connection. In addition, necessary aids are also being used for teaching of UG students |
| | **Entomology** | 36 x 24 | Microscope, light trap, insect rearing cage, bee hive, insect collection box |
| | **Extension Education** | 36 x 30 | Projection of different media, multimedia recording, mixing and broadcasting, image capturing, video recording, audio visual effect creation, development of digital e-content, Computer, LCD projector, digital camera, handicam, audio mixture, digital sound recorder, tripod, portable PA systems and multimedia speakers etc. |
| | **Forestry** | 36 x 24 | Have all basic aids, instruments and displayed information for UG students |
| | **Genetics & Plant Breeding** | 36 x 30 | Seed germinator, autoclave, electronic balance, microscope |
| | **Horticulture** | 36 x 24 | Tray dryer, deep fridge, refrigerator, electronic balance, refractometer, cork cap sealer and all post-harvest/ processing facilities |
| | **Mathematics** | 36 x 24 | Seating capacity for 40 students |
| | **Microbiology** | 36 x 24 | Laminar flow, autoclave, microscopes, oven, BOD, refrigerator, digital balance, gas connection, desiccators, vortex shaker, magnetic stirrer, etc. All glassware and required chemicals are available in the lab |
| | **Music** | 36 x 24 | Included various types of musical instruments |
| | **Physics** | 32 x 24 | Included all basic machines/instruments |
| | **Plant Pathology** | 36 x 24 | Laminar flow, autoclave, microscopes, oven, BOD, refrigerator, digital balance, gas connection, desiccators, vortex shaker, magnetic stirrer, glassware and required chemicals. |
| | **Seed Science and Technology** | 36 x 24 | Incubator, electronic balance, seed germinator, seed display unit etc. |
| | **Soil Science** | 36 x 24 | pH meter, conductivity meter, electronic balance, hot oven, spectro photometer, flame photometer, hot plate, magnetic stirrer, electronic shaker, nitrogen analyzer, GPS, sample rotar, kjeldahl assembly with digestion system, water bath, soxhlet apparatus, water distillation unit, furnace, grinder, homogenizer etc. |
| | **Zoology** | 24 x 24 | Simple microscope, compound microscope, skelton, models, balance and slides. |

### 6.5.3.3. Student READY/ In-Plant Training/ Internship/ Experiential Learning Programmes:

*Clearly mention about the implementation of Student READY/ In-plant training/ Internship/ Experiential Learning programmes and learning outcomes as per the guidelines of ICAR. Profit sharing mechanism (amount) shall be mentioned for each ELP unit sanctioned by the ICAR for the college.*

**Student READY (Rural Entrepreneurship Awareness Development Yojna)**

The final year students of degree programme are given practical exposure of living in villages for interaction with farmers. During this stay period students select host farmer, study cost of cultivation, guide farmers and exchange the practical experiences with farmers. Students also conduct training on the emerging topic for awareness among farmers. The students are being monitored by concerned KVK, RRS or college and at the university level.

Students' exposure to Hi-Tech Agriculture Unit

**In-plant training**

The interns are attached with different agro-industries for 5 weeks training on working of agro based industries such as post-harvest technology, agro-processing, quality control, current problems of agro based industries, self-employment training (SET) for 2 weeks: crop production, seed production and testing, soil and water testing, fruit and vegetable production technology and nursery management, commercial beekeeping, repair and maintenance of plant protection equipment, mushroom production technology, plant clinic, operation, repair and service of farm machinery, dairy and poultry farming, farm forestry and agricultural meteorology etc.

Students learning through industrial experience during In-plant Training

## Internship Programme (Rural Agriculture Work Experience)

This programme focuses on strengthening capacity of individual student so that they can respond to the farmers' need and promote issues related to such needs in their service career. It includes: orientation and basic training (1 week) – introduction, objectives, and activities; rural experience through village placement (9 weeks): group dynamics in coordination and cooperation among interns and farmers crop production technology training including watershed management, high-tech agriculture, natural resource management in different cropping systems and agro-climatic zones of the state; techno-economic survey, documentation of information through survey and discussion with farmers, preparation of farm plans and family budget, information on bank loans for agro-projects, implications of WTO, extension education programmes: study of programmes and activities of various agricultural developments, extension agencies and institutes; interactions with the farmers and communication skills for effective extension methods.

This year, the university in collaboration with CIMMYT and IRRI has initiated a monitoring, evaluation and learning system by generating database on how technologies are being adopted by farmers through open data kit (ODK). The capacity building of students also includes the development of an instrument like Landscape Diagnostic Surveys (LDS) which holds the promise of making the research and extension management more evidence based, accountable and transformative.

Students – Farmers interaction on various agricultural issues

## Preparation of report

During the last 2 weeks of RAWE programme, students learn to prepare report on rural experience, agro-industrial training attained, self-employment training received, programmes and activities of various institutions visited, major constraints in crop production and suggestions for improving income of farmers; presentation. The interns are evaluated through presentation and submission of report, viva- voce, punctuality, enthusiasm, conduct, leadership qualities, sincerity and devotion displayed by the interns.

On farm knowledge and mutual learning at farmers field

Hands on learning and farmers' meeting during RAWE

**Experiential Learning Programme: "Processing of fruit and vegetables for value addition"**

Pre-final year students are allowed to opt ELP based on their interest. The ELP unit was started during 2021-22. In this ELP unit, 22 students were trained for preparation of different products. Initially only two products *viz.*bael squash, bael RTS were prepared. Now, students are preparing aonla candy and murabba. These products are being sold locally. Some more products are to be prepared in the ensuing season on the basis of availability of fruit and rates of material. The rate for sale of the products are decided at university level.

Prof. B.R. Kamboj and other delegates discussing with ELP students
about preparation of different products and their economics on May 16, 2022

Preparation of various products under ELP (May 20, 2022)

**Modules for Skill Development and Entrepreneurship**

The final year students of degree programme are given hands on training in various skill-oriented modules. During the training, students "learn by doing" various aspects of techniques and their management strategies.

Students have to register 20 credits opting for two modules of 10 credits each from the nine modules in last semester of degree programme. The modules include Agro Advisory Services, Organic Production Technology, Bee Keeping, Mushroom Cultivation, Seed Production and Technology, Soil, Plant, Water and Fertilizer Testing Services, Commercial Vegetable Production, Bio-agents and Biofertilizers Production and Food Processing.

Students learn entrepreneurship skills in the field of agriculture through practical learning under various skill-oriented modules. The students are exposed to deep practical learning by involving themselves to agri entrepreneurship environment through exposure visits and personal learning.

Students' practical exposure under the Module
(Commercial Vegetable Production) during 2022-23

**6.5.3.4. Curricula Delivery Through IT (Smart Class Rooms/ Interactive Board etc.):** *Whether the college is using smart class room/ interactive board etc. for teaching and practicals. Number of classrooms upgraded as smart classrooms should be mentioned.*

The power point (PPT) presentation is used to teach the courses by the respective teacher. Additionally, during COVID-19 pandemic period online classes were taken using Microsoft team, Google meet and Zoom meeting. Doubt clearing sessions were also conducted through WhatsApp/ video call/ voice calls etc.

| Curricula's | | |
|---|---|---|
| **Smart class rooms for teaching and practical** | **Interactive board for teaching and practical** | **Class rooms upgraded as smart class rooms** |
| Yes (06) | Yes (06) | 06 |

**The course curriculum as per recommendation of 5th Dean's committee semester wise courses are given below:**

| Course No. | Course Title | Credits |
|---|---|---|
| **Semester I/V** | | |
| **AGM 101** | Introductory Agro-meteorology and Climate Change | 3 (2+1) |
| **AGRON 101** | Fundamentals of Agronomy | 4 (3+1) |
| **AGRON 103** | Agriculture Heritage | 1 (1+0) |
| **BIOCHEM 101/MBB 101** | Fundamentals of Plant Biochemistry and Biotechnology (To be taught jointly by Chemistry and Biochemistry and Molecular Biology, Biotechnology and Bioinformatics) | 3 (2+1) |
| **BOT 101/ZOO 101** | Introductory Biology (to be taught jointly by Botany and Zoology: For students from Math stream) | 2(1+1)* |
| **ENG 101** | Comprehension and Communication Skills in English | 2 (1+1) |
| **FOR 101** | Introduction to Forestry | 3 (2+1) |
| **MATH 101** | Elementary Mathematics (For students from Bio stream) | 2 (1+1)* |
| **SOC 101** | Rural Sociology and Educational Psychology | 2 (2+0) |
| **SOILS 101** | Fundamentals of Soil Science | 3 (2+1) |
| **TUT 101** | Tutorial (Human Values and Ethics) | 1 (1+0) NC |
| **NCC/NSS** | National Cadet Crops/National Service Scheme | 2 (0+2) |
| **CCA** | Co-curricular Activity | 1 (0+1) |
| **Total Credits** | | **27 (17+10)** |
| ***Students will take either MATH 101 or BOT 101/ZOO 101 as per requirement** | | |
| **Semester II/VI** | | |
| **AG ECON 102** | Fundamentals of Agricultural Economics | 2 (2+0) |
| **ENT 102** | Fundamentals of Entomology | 4 (3+1) |
| **EXT 102** | Fundamentals of Agricultural Extension Education | 3 (2+1) |
| **GP 102** | Fundamentals of Genetics | 3 (2+1) |
| **MICRO 102** | Agricultural Microbiology | 2 (1+1) |
| **PL PHY 102** | Fundamentals of Crop Physiology | 2 (1+1) |
| **PL PATH 102** | Fundamentals of Plant Pathology | 4 (3+1) |
| **STAT 102** | Statistical Methods | 2 (1+1) |
| **SWE 102** | Introductory Soil and Water Conservation Engineering | 2 (1+1) |
| **TUT** | Tutorial | 1 (1+0) NC |
| **CCA** | Co-curricular Activity | 1 (0+1) |
| **Total Credits** | | **26 (17+9)** |
| **Semester III/VII** | | |
| **AG ECON 201** | Agricultural Finance and Cooperation | 3 (2+1) |
| **AGRON 201** | Crop Production Technology – I (*Kharif* Crops) | 3 (2+1) |
| **FMPE 202** | Farm Machinery and Power | 2 (1+1) |
| **FOR 201/AGM 201/SOILS/201 AG ECON 203/ CHEM 201** | Environmental Studies and Disaster Management (To be taught jointly by Forestry, Agricultural Meteorology, Soil Science, Agricultural Economics and Chemistry) | 3 (3+0) |
| **GP 201** | Fundamentals of Plant Breeding | 3 (2+1) |
| **HORT 201** | Fundamentals of Horticulture | 2 (1+1) |
| **LPM 201** | Livestock and Poultry Management | 4 93+1) |

| | | |
|---|---|---|
| **VSC 201** | Production Technology of Vegetables and Spices | 3 (2+1) |
| **TUT** | Tutorial | 1 (1+0) NC |
| **NCC/NSS** | National Cadet Corps/National Service Scheme | 2 (0+2) |
| **CCA** | Co-curricular Activity | 1 (0+1) |
| **Total Credits** | | **27 (17+10)** |
| **Semester IV/VIII** | | |
| **AG ECON 202** | Agricultural Marketing Trade and Prices | 3 (2+1) |
| **AGRON 202** | Crop Production Technology – II (*Rabi* Crops) | 3 (2+1) |
| **AGRON 204** | Farming System and Sustainable Agriculture | 1 (1+0) |
| **EXT 202** | Communication Skill and Personality Development | 2 (1+1) |
| **HORT 202** | Production Technology for Ornamental Crops, MAP and Landscaping | 3 (2+1) |
| **HORT 204** | Production Technology for Fruit and Plantation Crops | 2 (1+1) |
| **RBEE 202** | Renewable Energy and Green Technology | 2 (1+1) |
| **SOILS 202** | Manures, Fertilizers and Soil Fertility Management | 3 (2+1) |
| **SOILS 204/ AGRON 206/ MICRO 204** | Agricultural Waste Management (To be taught jointly by Soils Science, Agronomy and Microbiology | 2 (1+1) |
| **SST 202** | Principles of Seed Technology | 3 (2+1) |
| **TUT** | Tutorial | 1 (1+0) NC |
| **CCA** | Co-curricular Activity | 1 (0+1) |
| **Total Credits** | | **26 (16+10)** |
| **Semester V/IX** | | |
| **AGRON 301** | Practical Crop Production – I (*Kharif Crops*) | 1 (0+1) |
| **AGRON 303** | Geoinformatics and Nanotechnology for Precision Farming | 2 (1+1) |
| **AGRON 305** | Weed Management | 3 (2+1) |
| **COMP 301/ AGRON 307/ AGM 301** | Agricultural Informatics (To be Taught jointly by Computer Section, Agronomy and Agricultural Meteorology) | 2 (1+1) |
| **ENT 301** | Pest of Crops and Stored Grain and their Management | 3 (2+1) |
| **EXT 301** | Entrepreneurship Development and Business Communication | 2 (1+1) |
| **GP 301** | Crop Improvement – I (*Kharif* Crops) | 3 (2+1) |
| **NEMA 301** | Introductory Nematology | 2 (1+1) |
| **PL PATH 301** | Diseases of *Kharif* Field Crops and Horticultural Crops and their Management – I | 3 (2+1) |
| **SOILS 301** | Problematic Soils and their Management | 2 (2+0) |
| **TUT** | Tutorial | 1 (1+0) NC |
| **CCA** | Co-curricular Activity | 1 (0+1) |
| | **Total Credits** | **25 (15+10)** |
| **Semester VI/X** | | |
| **AG ECON 302** | Farm Management Production and Resource Economics | 2 (1+1) |
| **AGRON 302** | Practical Crop Production – II (*Rabi* Crops) | 1 (0+1) |
| **AGRON 304** | Principles of Organic Farming | 2 (1+1) |
| **AGRON 306** | Rainfed Agriculture and Watershed Management | 2 (1+1) |
| **ENT 302** | Management of Beneficial Insects | 2 (1+1) |
| **FST 302** | Basics of Food Science, Safety and Nutrition | 4 (3+1) |
| **GP 302** | Crop Improvement-II (*Rabi* Crops) | 3 (2+1) |
| **HORT 302/ VSC 302** | Post-harvest Management and Value Addition of Fruits and Vegetables (To be taught jointly by Horticulture and Vegetable Science) | 2 (1+1) |
| **PFE 305** | Protected Cultivation and Secondary Agriculture | 2 (1+1) |
| **PL PATH 302** | Diseases of *Rabi* Field Crops and Horticultural Crops and their Management –II | 3 (2+1) |
| **TUT** | Tutorial | 1 (1+0) NC |

| | | |
|---|---|---|
| **CCA** | Co-curricular Activity | 1 (0+1) |
| **Total Credits** | | **25 (14+11)** |
| **Semester VII/XI** | | |
| **AGRON 491/ AG ECON 491/ EXT 491** | Rural Agricultural Work Experience (RAWE) and Agro-Industrial Attachment (AIA) (To be taught jointly by Agronomy, Agricultural Economics and Extension Education) | 20+(0+20) |
| **Total Credits** | | **20 (0+20)** |
| **Semester VIII/XII** | | |
| Experiential Learning Programme/Hands on Training- A student has to get registered 20 credits opting for two modules of 10 (0+10) credits each from the list of nine modules | | 10 (0+10)<br>10 (0+10) |
| **Total Credits** | | **20 (0+20)** |

Hands on training on CeRa and other digital database for faculty (April 04, 2022)

**6.5.4 Student Development:** *Student Development at the College directs its educational efforts at fostering the intellect and character of students by integrating in-class and co-curricular experiences. To accomplish this, the college provides a wide range of educational experiences through programs and activities that complement and support the academic experience in the classroom.*

**6.5.4.1. Student Intake and Attrition:** *The information about student intake and attrition, for the college as a whole but separated in UG, PG and Ph.D. categories shall be provided in tabular form for last five year.*

| Name of the degree programme | Students admitted | | | | | |
|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total |
| **B.Sc. (Hons.) Ag.** | 67 | 61 | 64 | 82 | 76 | 350 |
| **M.Sc. (Ag.) Programme** | | 12 | 10 | 10 | 10 | 42 |
| **Ph.D. Programme** | | 06 | 05 | 05 | 05 | 21 |

| Name of the degree programme | Students' attrition (%) | | | | |
|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| B.Sc. (Hons.) Ag. | 2.68 | 1.83 | 3.2 | 7.38 | 0.76 |
| M.Sc. (Ag.) Programme | | 0 | 0 | 0 | 0 |
| Ph.D. Programme | | 0 | 0 | 0 | 0 |

**6.5.4.2. Average Number of Students in Theory and Practical Classes:** *Mention the degree programme-wise number of students seating in a class for theory and practical, separately in tabular form. Mention theory and practical batches for UG Programmes*

There is single batch for theory classes averaging 60 students per batch and two batches per class for practical averaging 30 students per batch. For PG and Ph.D., the class strength averaging less than 10 students per batch.

| Name of the Degree programme | Batch of students in Theory Class | Batch of students in Practical class |
|---|---|---|
| B.Sc. (Hons.) Ag. | 6 batches (60 students) | 12 batches (30 students) |
| M.Sc. (Ag.) | Two batches per discipline (2-4 students) | Two batches per discipline (2-4 students) |
| Ph.D. | Two batches per discipline (1-3 students) | Two batches per discipline (1-3 students) |

## Activities on important days and events

College is conducting different kind of activities such as games/sports, exposure visits, trainings, international exposure of students under NAHEP-IDP and other need based or mandatory activities initiated by the University/ Government of Haryana/ Government of India (*swachh bharat* campaign, *tiranga* rally, *Parthenium* awareness and other awareness campaigns). The activities like debate, declamation, essay writing, speech, extempore, poster making, slogan writing on topics related to social/ national issues and agriculture on the occasion of important festivals, national days and birth anniversaries of national heroes are being conducted regularly.

### NATIONAL INTEGRATION CAMP

Inauguration of NI NSS camp by the Vice Chancellor on March 23, 2022

Valedictory session of NI NSS camp addressed by
Dr. B. Lal, Cabinet Minister, Haryana on March 27, 2022

Folk cultural activities performed by volunteers of different states during
NI NSS camp on March 25, 2022

Padma Shri awardee Ms. Santosh Yadav addressing volunteers of
NI NSS camp on March 24, 2022

## ANNUAL CAMPS

Cleanliness drive by NSS volunteers on August 25, 2021

Motivational lecture to NSS volunteers during the camp on August 24, 2021

Cleanliness drive by NSS volunteers on August 26, 2021

Group activities of volunteers during Annual NSS camp – 2023

Motivational lecture during annual NSS camp on January 2, 2023

Flag off to rally by SDM Bawal for awareness about single use plastic eradication on January 2, 2023

Cleanliness, collection and proper disposal of organic waste during annual NSS camp on January 4, 2023

## BLOOD DONATION CAMPS

Blood donation camp during annual NSS camp (34 units) on August 27, 2021

Blood donation camp during NI NSS camp (85 units) on March 26, 2022

Health check-up camp organized by NSS Unit COA, Bawal on July 22, 2022

Blood donation camp organized by NSS Unit COA Bawal - 2023 (59 units)

## IMPORTANT INTERNATIONAL AND NATIONAL DAYS

Awareness on agriculture by DSW, CCS HAU, Hisar on
Agricultural Education Day on December 3, 2018

Pledge for honesty during vigilance awareness week on October 29, 2018

Awareness campaign for casting vote – 2018

Sharing knowledge about soil health on World Soil Day at COA, Bawal on December 5, 2018

*Parthenium* eradication drive - 2020

Awareness programme on road safety to save life in collaboration with social workers and Haryana Police at COA, Bawal on February 11, 2019

Environment Awareness Camp on March 28, 2019

National Science Day debate at COA, Bawal on February 28, 2019

Run for Unity on birth anniversary of Sardar Vallabh Bhai Patel on October 30, 2019

Fit India Movement organised at COA, Bawal on August 29, 2019

Cleanliness rally– 2021

Plantation by Dr. Banwari Lal (Minister of Co-operation and Welfare of Scheduled Castes & Backward Classes) on Environment Day (June 5, 2021)

*Van Mahotsva* in collaboration with Forest Department, Rewari at COA, Bawal on July 25, 2021

Plantation Drive by students, staff and farmers at Bawal campus on July 25, 2021

Plantation by staff and students around boundary of college campus – 2022

Plantation Drive by students and staff at COA, Bawal on August 05, 2022

Yoga camp organised at COA, Bawal during June 17-19, 2022

Yoga camp for healthy body and mind at COA, Bawal – 2022

Unfurling of national flag by Principal and Regional Director on January 26, 2023

Folk dance performance by students on eve of Republic Day – 2023

Plantation on the occasion of International Forest Day March 21, 2023

**Students developmental activities organised at COA, Bawal**

## STUDENTS' DEVELOPMENT FOSTERING THROUGH VARIOUS ACTIVITIES

Declamation competition during Hindi *Pakhwada* celebration on September 14, 2019

Slogan writing competition on the eve of Science Day on February 28, 2021

*Parthenium* eradication day in campus of Bawal on August 19, 2021

COVID-19 awareness rally by NSS Unit, COA Bawal on August 28, 2021

Exposure visit on water conservation and natural resource management on July 16, 2022

Single use plastic eradication awareness rally on October 2, 2022

Declamation competition on Agricultural Education Day on December 3, 2022

Exposure visit at Sultanpur National Park on January 28, 2023

**6.5.4.3. Admission Process:** *Clearly give complete mechanism of admission for UG, PG and Ph.D. programmes, fee payment mechanism, registration procedure, and academic schedule publication at the start of the semester etc. Write information in one page only.*

| Name of degree programme | Mechanism of Admission | Fee payment mechanism (Cash/Online) | Registration procedure (On-site/Online) | Academic schedule at the start of session (attach calendar) |
|---|---|---|---|---|
| **UG Programme** | On the basis of merit in written entrance exam | Online through CCS HAU admission portal | On-line registration | 1st Semester (August to December)<br><br>2nd Semester (January to May) |
| **PG Programme** | On the basis of merit in written entranceexam | Online through CCS HAU admission portal | On-line registration | 1st Semester (August to December)<br><br>2nd Semester (January to May) |
| **Ph.D. Programme** | On the basis of merit in written entrance exam | Online through CCS HAU admission portal | On-line registration | 1st Semester (August to December)<br><br>2nd Semester (January to May) |

**6.5.4.4. Conduct of Practical and Hands on Training:** *Mention brief report of one page on practical and hand on training in different courses to meet the student satisfaction.*

**Practical Crop Production I & II**

During the courses of Practical Crop Production I & II the students undergo hands on training on crop planning, raising field crops in multiple cropping systems; field preparation, seed treatment, nursery raising, sowing, nutrient management, water management, weed management and management of insect pest and diseases of crops; harvesting, threshing, drying, winnowing, storage and marketing of produce; preparation of balance sheet including cost of cultivation, net returns per student as well as per team for a group of students.

Students formulating package of practices for *Kharif* and *Rabi* crops - 2022-23 during PCP

The students are provided hands-ontraining as per details given below:

| Name of degree programme | Training/ workshop name | Duration | Mode of training |
|---|---|---|---|
| **UG Programme** | Eat right during COVID-19 crises (2 days workshop) | May 15-16, 2020 | Online |

| | | | |
|---|---|---|---|
| **UG Programme** | Nursery Technology (under NAHEP-IDP) | January 18-24, 2023 | Offline |
| **UG Programme** | Processing Technology of fruit and vegetables (under NAHEP-IDP) | January 27-31, 2023 | Offline |
| **UG Programme** | Organic Farming (under NAHEP-IDP) | February 07-13, 2023 | Offline |

**6.5.4.5. Examination and Evaluation Process:** *The evaluation of students' performance is a central task of College administration. A brief report on examination and evaluation process for UG, PG and PhD be given separately mentioning external/internal components. System of evaluation should clearly be mentioned for UG, PG and Ph.D.*

| **Name of degree programme** | **Examination pattern** | | | **Evaluation process** | | | |
|---|---|---|---|---|---|---|---|
| | **Theory (External/ Internal)** | **Practical (External/ Internal)** | **Viva-voce** | **Theory (External/ Internal)** | **Practical (External/ Internal)** | **Comprehensive written** | **Viva-voce (Thesis and comprehensive)** |
| **B.Sc. (Hons.) Ag.** | External as well as internal | Internal | Internal | External as well as internal | Internal | NA | NA |
| **M.Sc. (Ag.)** | Internal | Internal | Internal | Internal | Internal | NA | External |
| **Ph.D.** | Internal | Internal | Internal | Internal | Internal | Internal | External |

I. Examination and Evaluation system: Examination and Evaluation system of Under Graduate programmes of college has been given below:
   a) External Theory: 50%
   b) Internal Theory + Practical: 50%

II. Courses with Theory and Practical: Mid-term Exam (30%) + Assignment (5%) + Practical (15%).
The assignment may be included with practical.

III. Courses with only Theory: Mid-term Exam (40%) + Assignment (10%)

IV. Courses with only Practical: 100% Internal

The mid-term examinations are being conducted during mid-term examination week prescribed in the academic calendar in the college through fixing the dates by concerned course teacher after consultation with Principal. The practical examinations (internal) are conducted during the practical examination week as prescribed in the academic calendar. For final examination (External), date sheet is provided by the Dean of the respective colleges during final examination schedule as prescribed in the academic calendar of the university circulated by the Assistant Registrar Academics (ARA), CCS HAU, Hisar.

Allotment of marks for various examination of each course is as per given below.

| **Name of Examination** | **Nature of course** | | |
|---|---|---|---|
| | **Courses with Theory and Practical** | **Courses with only Theory** | **Courses with only Practical** |
| Mid-term (Theory) | 60 | 80 | NA |
| Mid-term (Practical) | NA | NA | 60 |
| Assignment | 10 | 20 | 20 |
| Final (Practical) | 30 | NA | 120 |

| | | | |
|---|---|---|---|
| Final (Theory) | 100 | 100 | NA |
| **Total** | **200** | **200** | **200** |

After adding marks of all the examinations, the total marks divided by two for converting total marks out of 100 and combined (Theory+Practical) grade of each course is awarded.

1. The Course Catalogue, Examination and Evaluation system is being followed as per the recommendation of 5th Deans' Committee implemented with effect from academic year 2017-18.
2. Examination system is external for 50 % (Theory of final examination), whereas, remaining 50% (Theory of midterm + Practical) is internal. The following guidelines are to be followed for this internal examination. The weightage of mid-term, final and practical examination are followed as per table given below:

| **Credit Hours** | **Weightage/Marks** | | |
|---|---|---|---|
| **(Theory & Practical)** | **Mid-term** | **Final** | **Practical** |
| **1+0** | 40 | 60 | - |
| **1+1** | 20 | 30 | 50 |
| **2+1** | 25 | 45 | 30 |
| **2+2** | 20 | 30 | 50 |
| **3+1** | 30 | 45 | 25 |
| **3+2** | 25 | 35 | 40 |
| **2+0** | 40 | 60 | - |
| **3+0** | 40 | 60 | - |
| **1+2** | 10 | 20 | 70 |

- For a course only with practical: Practical examinations are conducted twice, mid-term and final.
- Distributions of marks are in the ratio of 40:60.
- There is one examination date-sheet each for mid-term and final examinations within the examination schedule.
-

Examination conducted under proper supervision

CCTV monitoring during examinations

**6.5.4.6. NCC/NSS/RVC units:** *Clearly mention the existence and functioning of these units and how it is benefiting the student development. A brief report should be given (without photographs).*

The college is having NSS unit since its inception and it is mandatory for all the students at least for two semesters. The unit operates under the supervision of NSS programme officer with overall control of Director, Students' Welfare, CCS HAU, Hisar. The students of NSS are involved in various social welfare activities and campaigns like cleanliness, pulse polio, voting, discourage single use plastic, *Beti Bachao-Beti Padhao*, plantations and environmental issues etc. So, they may contribute in different social activities. Blood donation camps are also organized by the NSS volunteers to save the lives.

**Activities organized by NSS unit- COA, Bawal**

| Year | Activities undertaken/ Salient achievements |
|---|---|
| **2018-19** | • Organized cleanliness programme on September 01, 2018<br>• Organized cleanliness programme on October 02, 2018<br>• Organized environmental awareness camp on March 28, 2019 |
| **2019-20** | • Voting awareness rally on October 22, 2019<br>• *Parthenium* awareness camp during August 16-21, 2019<br>• Cleanliness drive on October 2, 2019<br>• Anti-plastic use awareness during September 11-27, 2019 |
| **2020-21** | • Observed anti-terrisom day and took pledge on May 21, 2020<br>• Cleanliness drive on October 2, 2020<br>• *Parthenium* awareness camp during August 16-21, 2020<br>• National Youth Day on January 12, 2020 |
| **2021-22** | • Organized cleanliness drive during August 24-26, 2021<br>• Annual NSS camp organised during August 24-30, 2021<br>• *Parthtenium* eradication drive during August 24-25, 2021<br>• Plantation at village Khatiwas on August 26, 2021<br>• Organized blood donation camp on August 27, 2021<br>• Organized awareness rally of Covid – 19 on August 28, 2021<br>• First aid training on August 29, 2021 |
| **2022-23** | • Organized awareness rally on *Plastic hatao jeevan bachao* from COA, Bawal to Bawal market, rural area and back to commemorate the birth anniversary of Father of Nation Sh. Mahatma Gandhi on October 02, 2022<br>• Organized heart check-up camp on July 22, 2022<br>• Organized *Tringa* Rally from COA, Bawal to village Khatiwas and back on August 7, 2022<br>• Organised Tringa abhiyan in Hostels (Girls and boys) on August 10, 2022<br>• Organized plantation day and *Tringa* motorcycle Rally on August 12, 2022<br>• Conducted *Parthenium* awareness and eradication on August 20, 2022 |

| | |
|---|---|
| | • Organized awareness programme on cyber-crime on October 10, 2022<br>• Conducted *Swatchh* Bharat campaign – 2.0 on October 30, 2022<br>• Celebrated Run for Unity campaign on the birth anniversary of Sardar Patel – The Architect of Unification on October 31, 2022<br>• Organized Annual NSS camp at GSSS Banipur during January 01-07, 2023 |

**6.5.4.7. Language Laboratory**: *Student has a good command of the language for communication purposes with clarity and accuracy being vital for effective and efficient communication. What help one to acquire such proficiency in a language is the process and the method of learning that language. In this regard mention the type of methods:*

The college have Words Worth English Language Lab with 30 computers and other facilities like voice input and output devices to compare the pronunciation and to listen the video/ audio for improvement in language.

| | |
|---|---|
| **Conventional** | **Yes** |
| **Computer assisted language laboratory** | Yes |
| **Multimedia high tech language laboratory** | Yes |

**6.5.4.8. Cultural Centre:** *Does the college have cultural centre to empower student leaders to explore, celebrate, and educate the campus community about the diversity among them? Does the college offers and inclusive and reflective space, multicultural programming and support services that encourage positive interaction, academic, persistence, and growth among students, faculty, and staff.*

This college is organising cultural activities for students during celebration of different important days, hostel functions, NSS camp, freshers' day, farewell party etc. Students are being motivated for participation in different cultural events. The students of this college are also participating in the events organised at university level as well as in inter university programmes. One of the faculty members has been assigned the duties of coordinator cultural activities for organising such activities.

Annual hostel function - 2020

Folk dance performance on Freshers' Day 2019

Cultural activities during National Integration NSS camp 2022

Cultural activities on National Days

Comedic performance by freshers on the eve of Freshers' day – 2021 and 2022

Empowering the students' knowledge through various folk activities at COA, Bawal

| | | |
|---|---|---|
| ***Does the college have cultural center to empower student leaders to explore, celebrate and educate the campus community about the diversity among them?*** | Yes | The college has a cultural center that empowers student leaders to explore, celebrate and educate the campus community about the diversity among them.<br>It serves as a hub for cultural events, discussions and educational programs that highlight diverse backgrounds and experiences. Additionally, it offers support to students in promoting cultural awareness and understanding the diversity among them. As a result, the center fosters a more inclusive and equitable campus environment. |

| | | |
|---|---|---|
| ***Does the college offers inclusive and reflective space, multi-cultural programming and support services that encourage positive interaction, academic persistence and growth among students, faculty and staff?*** | Yes | The college provides inclusive and reflective spaces, multi-cultural programming and support services to promote positive interaction, academic persistence, and growth among students, faculty and staff. It acknowledges the diversity of its community and offers time to time and need based counseling, academic advising and career services to help students in achieving their goals. The college celebrates Freshers' Day, Teachers' Day, Farewell Party and Festival celebrations that encourage positive interaction among everyone. Overall, the college prioritizes a supportive and inclusive environment that fosters growth for all members of the campus. |

**6.5.4.9. Personality Development:** *Personality development programme is aimed at increasing employability of the students. Whether the college has provisions for inclusion of functional grammar in Standard English, speaking skills, reasoning, group discussions interview skills, personal interviews, quantitative ability, verbal ability, mock tests and some special sessions to promote the personality development in the students?*

| ***Whether the college has provisions for inclusion of the following*** | **Yes** | **The college faculty keeps on inspiring the students for improvement in their speaking and writing skills for fostering effective communication skills as well as understanding of subjects.** |
|---|---|---|
| ***Functional Grammar in standard English*** | Yes | The college faculty provides high-quality instruction in functional grammar and standard English. They use effective teaching techniques and encourage interactive sessions to improve students' proficiency and confidence in the language. Words Worth English language lab also help in improvement in English grammar. |
| ***Speaking skills*** | Yes | To develop their communication skills, students are regularly assigned topics to speak during class sessions. This exercise helps them to practise expressing their ideas effectively and articulately, while also receiving feedback and guidance from their instructors. Words Worth English language lab has input and output voice devices for improvement in pronunciation. |
| ***Reasoning*** | Yes | The college provides guidance and support to students in developing their reasoning skills for competitive exams. Various initiatives such as workshops and trainings sessions are taken up to prepare them for various competitive exams to achieve their academic and professional goals. On the eve of special days debate programme are also conducted to envisage the thinking. |
| ***Group Discussion*** | Yes | The college places a strong emphasis on involving students in group discussions focused on current national and international issues of significance, promoting their active engagement and critical thinking skills. Group discussions are also conducted on in classrooms to remove the hesitation among students and improve their logical thinking. |
| ***Interview skills*** | Yes | The students are made acquainted with the interview skills so that they may face the interviews for placement after completing their study. The sessions on interview skills are conducted on trainings on personality development. |
| ***Personal Interviews*** | Yes | The college provide students training and guidance in interview skills, enabling them to prepare confidently for jobs upon completion of their studies. |

| | | |
|---|---|---|
| ***Quantitative ability*** | Yes | The college encourages and supports students in their efforts to enhance their quantitative aptitude by providing access to competitive books and resources. This helps them to excel in their studies and future endeavours in careers, improving their overall academic and professional success. |
| ***Verbal Ability*** | Yes | The college fosters a strong sense of association between students and faculty, with regular mutual interactions between them. There is a visible and positive bond between students and faculty members that generates a supportive and collaborative learning environment. |
| ***Mock Test*** | Yes | Mock tests are regularly conducted at the college to prepare students for upcoming exams. These tests provide an opportunity for students to practise their skills and knowledge in a simulated exam environment. The faculty also provides feedback and guidance to help students to improve their performance. |
| ***Some special sessions for personality development*** | Yes | The college conducts 10-days Personality Development Training sessions for 2-3 times during the year to help students to develop their personality and improve their soft skills to prepare them for their professional career. |

**Trainings conducted**

| Sr No | Title of Training | Duration |
|---|---|---|
| **1** | Personality Development Training Programme (under C&P Cell) | November 15-29, 2018 |
| **2** | Personality Development Training Programme (under C&P Cell) | February 12-26, 2019 |
| **3** | Agricultural education fare for awareness about agriculture (under NAHEP-IDP) | February 27-28, 2020 |
| **4** | Personality development (under C&P Cell) | February 17 -29, 2020 |
| **5** | Effective communication and interpersonal skills (under NAHEP-IDP) | May 18-21, 2020 |
| **6** | Communication skills and personality development (under C&P Cell) – Virtual mode | March 15-25, 2021 |
| **7** | Personality development (under SCSP scheme) | February 25 to March 06, 2022 |
| **8** | Foundation training course for ICAR-JRF (PGS) exam (under C&P Cell) | November 25 to December 04, 2022 |
| **9** | One day workshop on career avenues & scholarship/ fellowship (under C&P Cell) | February 4, 2023 |

Personality development course and training for students to enhance their perspectives to the learning and to perform better in their professional career

### 6.5.5. Physical Facilities

**6.5.5.1. Hostels:** *Clearly mention the number of hostels available for the College students for boys and girls, separately with its total capacity, students per room accommodated in each hostel, mess facility, drinking water, indoor games specially for girls, cleaning of hostel premises, transport facility, emergency medical facility etc.*

There are separate hostels for Boys and Girls with accommodation capacity of 150 and 95 students, respectively.

Prakriti Hostel (Boys)

Alaknanda Hostel (Girls)

**Hostels**

| No of Hostels* | Boys– 01 | Girls -01 |
|---|---|---|
| **Total capacity** | 150 | 95 |
| **Students per room** | 03 | 03 |
| **Mess facility** | Available | Available |
| **Drinking water** | Available with R.O. (03) | Available with R.O. (02) |
| **Indoor games** | Table Tennis, Chess, Carrom board etc. | Table Tennis, Chess, Carrom board etc. |
| **Transport facility** | Available (Jeep) | Available (Jeep) |
| **Emergency medical facility** | Dispensary and first aid kit | Dispensary and first aid kit |
| **Cleaning of hostel premises** | Yes | Yes |
| **Rooms and toilet facilities for differently abled students** | Yes | Yes |
| **Ramps for differently abled students** | Yes | Yes |

*Two more hostels, one each for girls and boys are under construction

**6.5.5.2 Examination Hall:** *Mention the availability of number of examination halls, its capacity etc. for the college.*

One examination hall to conduct the examinations with the seating capacity of 250 students is under construction and at present examinations are being conducted in 06 lecture rooms.

| Examination Hall | Numbers | Total capacity |
|---|---|---|
| **Examination Hall** | 01 | 250 students |

**6.5.5.3. Sports and Recreation Facilities:** *Clearly mention the number of indoor and outdoor sports facilities available for the College students. A brief note on day to day management and use of these facilities shall be provided in the report.*

There are well developed playgrounds and different game courts mentioned as under for sports and recreational activities. Indoor recreation facilities for boys and girls are also available at hostels.

| Number and Name of Indoor Sports Facilities | Number and Name of Outdoor Sports Facilities |
|---|---|
| **Table Tennis – 02** | Athletic ground – 01 |
| **Gym -02** | Basketball court – 01 |
| **Yoga - 02** | Cricket ground – 01 |
| **Carrom board - 02** | Badminton court -01 |
| | Volley ball court- 02 |
| | Kabaddi ground – 01 |
| | Football ground-01 |

Indoor game recreational facilities at Alaknanda Hostel (Girls)

Indoor gym facility for resident students at Alaknanda Hostel (Girls)

Night reading hall at Alaknanda Hostel (Girls)

Students run co-operative mess in Prakriti Hostel (Boys)

Formal inauguration of Boys' Hostel by Sh. Manohar Lal Hon'ble Chief Minister of Haryana

## Medical Facilities

There is one dispensary, however, as per agreement with hired doctor/hospital, ambulance facilities provided in case of emergency. Jeep is also available for emergency services.

## Brief report for day to day use and management

The college has appointed a sports coordinator, a game organiser/ coach, and a game attendant to manage and coordinate these activities. The sportscoordinator takes care of the overall functioning of the co-curricular programs and ensures that all activities are conducted smoothly. The game organiser/ coach provides guidance and support to students to help them in improving their skills and excel in their chosen activity. The game attendant is responsible for maintaining the playgrounds and courts. Sports houses are formed for boys and girls, separately. Boys houses have been named as Shaheed Bhagat Singh, Shaheed Udham Singh, Major Dhyan Chand and Youth Icon Neeraj Chopra. Whereas, girls houses have been named as Saina Newal and Sakshi Malik. For indoor games, common room secretary and wing perfects are responsible and extend help to the wardens for day to day management and maintenance of the equipments.

Separate teams for boys and girls are formed based on the number and strength of the students and the college offers several team and individual events, including volleyball, kabaddi, basketball and cricket. Students attend practice sessions in the evenings from 5.00 P.M. to 6.30 P.M. on all working days except during the examination week. The attendance of the students is marked by the coach/ in-charge at the playground.

Overall, the co-curricular activities programme at the college provides students with a platform to explore and showcase their talents, develop team spirit, and enhance their physical and mental well-being.

## Collaboration with MNCs for investment under Corporate Social Responsibility (CSR):

MoU and Interaction with Japanese company for CSR investment

Under CSR following infrastructures/ facilities have been installed/ constructed/ created:

1. Basketball Court
2. Badminton Court boundary cover work
3. Modular furniture (tables and chairs) in library/reading hall
4. Installation of 23KW solar system in Girls Hostel
5. Hundred solar power street lights for college campus

## International Year of Millets (IYoM) 2023:

United Nations declared 2023 as International Year of Millets. The year is being celebrated through organising regular activities about awareness on nutritive value of the millets. The college is organising events in villages and campus through delivering awareness lectures and serving the millet-based meals in hostel messes and camps. Residents, students, visitors and other staff members are also being motivated for integration of millets in their daily diets.

Millets supplemented meal served in Alaknanda hostel mess (girls)

Millets supplemented meal served in Prakriti hostel mess (boys)

The International Year of Millets was celebrated through serving millets based meal to students, staff of GSS School, Banipur and COA, Bawal during annual NSS camp at village Banipur (Rewari)

Millets based products exhibited by contact farmers and being relished by chief guest and dignitaries during Kisan Mela at Bawal – 2023

**6.5.5.4. Auditorium:** *Does the college has auditorium? Mention its year of construction, sitting capacity and how frequently being used for the College functions.*

Yes, under construction.

The auditorium at COA, Bawal will be used to organize academic, cultural and other co-curricular activities of the College. Presently these activities are being organized in lecture halls or tentage.

| Year of construction | Under construction |
|---|---|
| **Seating capacity** | 450 |

**6.5.5.5. Exhibition Hall/Museum (description of events):** *Does the college have the Exhibition Hall/Museum? Mention about its use and special events being conducted in these units.*

There is one Exhibition Hall/Museum in which various samples/ charts related to differentdisciplines and agricultural activities are displayed to impart information to the visitors as well as students.

| Exhibition Hall | One (under process) |
|---|---|
| **Museum** | 01 (At main campus, CCSHAU, Hisar) |

### 6.5.6. Research Facilities

**6.5.6.1. Postgraduate Laboratories and Equipments**: *Clearly mention the department wise PG laboratories and equipment housed in individual laboratory in the Colleges along with any other research unit.*

The college is having well-equipped laboratories for UG and PG students. The PG students of various departments are also admitted in the college. The faculty of this college is also guiding the students of the main campus. Research facilities of main campus as well as of RRS, Bawal are also utilized. Laboratories of the college are well equipped as per norms/guidelines of ICAR and the list of major equipments is as under

**List of major equipments at present in the college**

| S. No. | Name of equipment | Laboratory/ Department |
|---|---|---|
| 1. | Spinix vortex shaker | Plant Pathology |
| 2. | Shaker | Soil Science |
| 3. | Advance binocular microscope | Entomology and Botany |
| 4. | Ahuja digital PA mixer | Extension Education |
| 5. | Ahuja mixer 9 channel | Extension Education |
| 6. | Mega phone /bhopu | Extension Education |
| 7. | Analytical electronic balance | Soil Science |
| 8. | Bee hive | Entomology |
| 9. | BOD incubator 340 L | Plant Pathology and G&PB |
| 10. | Chlorophyll meter | Agronomy |
| 11. | Conductivity meter | Agronomy |
| 12. | Conductivity meter table digital | Soil Science |
| 13. | Deep fridge | Horticulture |
| 14. | Dissecting microscope | Botany |

INTERNATIONAL SEMINAR
ON
ENVIRONMENTAL ISSUES AND CHALLENGES IN THE 21ST CENTURY (EICC-2019)
JANUARY 20, 21 & 22, 2019
SPONSORED BY
DEPARTMENT OF SCIENCE AND TECHNOLOGY, NEW DELHI, INDIA
ORGANIZED BY
DEPARTMENT OF ENVIRONMENTAL SCIENCE,
BAREILLY COLLEGE, BAREILLY, U.P., INDIA
Certificate of Participation
This is to certify that
Mr. NARENDRA SINGH
M.Sc. (Fruit Science), C.C.S. Haryana Agricultural University, Hisar, Haryana
has been awarded BEST M.SC. THESIS AWARD
Title : Evolution of Aonla (Phyllanthus emblica Linn) Germplasm for Semi-arid region of Haryana
Dr. Ajay Kumar Sharma
President (EICC-2019)
Principal
Bareilly College, Bareilly
Dr. A.P. Singh
Organizing Secretary (EICC-2019)
Head, Dept. of Env. Science
Bareilly College, Bareilly

Best thesis award (M.Sc.) to Mr. Narendra Singh

**6.5.7.3. Awards/ Recognitions/ Certificates:** *Provide information on awards/recognitions/ certificates in tabular form for last five years separately for students and faculty.*

**Students**

The certificates of Merit, Patent and Gold Medals received by the faculty members of College of Agriculture, Bawal

Distinguished Teacher Award bagged by Dr. Dharam Bir Yadav presented by Sh. Manohar Lal, Hon'ble Chief Minister, Haryana

Prof. B.R. Kamboj presenting patent certificate to Dr. Mukesh Kumar

**6.5.7.4. Employability:** *What are the set of achievements such as skills, understandings and personal attributes that make College students more likely to gain employment and be successful in their chosen occupations, which benefits themselves, the workforce, the community and the economy? Provide one page note on the subject.*

The college is committed to the all-round development of its students, with the aim of empowering them to make informed choices about their future career paths. From the outset, the orientation programme is designed to instil a sense of professionalism in the students. They are provided with regular updates about the scope of their chosen agricultural course during weekly tutorial classes as well through organizing regular subject events. Additionally, all students are required to register for co-curricular activities, such as the National Service Scheme (NSS). The NSS participants are engaged in various social welfare campaigns, such as promoting cleanliness, COVID-19 management, electoral awareness programme, plastic menace awareness and planting trees etc. This exposure to community service activities helps the students to develop a sense of social responsibility and character building for nation development.

Practical knowledge of crop cultivation is imparted through the Practical Crop Production courses, which are offered for a year. These courses aim to prepare students to become professional crop advisors to the farming community and promote low external input agriculture in a sustainable manner. The visits to agriculture-based subsidiary income and employment-generating entrepreneurs, such as mushroom and vermicomposting units, beekeeping facilities, dairy farms, and seed production units. These visits give students a better understanding of the practical aspects of agriculture-related business. These visits and interaction with industry creates a sense of self employment.

As part of the degree programme, all students must undergo a 35-day industrial training in the final semester. This training provides students with practical experience and helps them to excel through establishing agro-based entrepreneurs. In addition, students also participate in Rural Agriculture Work Experience for a minimum of two months, where they work with farmers in various villages and learn all package of practices followed by the farmers. This experience provides them with the opportunity to understand the practical problems of agriculture at farmers' fields.

Furthermore, the college offers specialised short (10-days) programmes and trainings on Personality Development and Entrepreneurship to create the interest of students in self-employment. To inspire and motivate students, the college invites alumni who hold apex positions in the private

and government sector to guide and advise them regarding the opportunities available for agriculture professionals. Various interactions and group discussions are organized to inspire and prepare the students for different competitive examinations, fostering the overall knowledge of the subject and become proficient in securing employment.

**6.5.8.** SSR of the College must have the SSR of all its Degree Programme (following section 6.4), then the report of the Colleges shall be considered.

**6.5.9.** Certificate (Applicable when SSR is submitted for Programme& College).

I, the Principal, **Dr. Naresh Kaushik** hereby certify that the information contained in Sections 6.4 and Section 6.5.1 to 6.5.7.4 are furnished as per the records available in the college and degree awarding university.

**Signature of Principal of the College with Date & Seal**

**6.5.10.** Each college shall submit SSR as mentioned in 6.5.8. It shall be prerequisite for the SSR of the Agricultural University.

## M.Sc. (Ag.)
## Ph.D.

## 6.4 Self Study Report for the Programme

CCSHAU College of Agriculture, Bawal Academic Building

The College of Agriculture, Bawal was established in 2015 as one of the constituent colleges of Chaudhary Charan Singh Haryana Agricultural University, Hisar vide Memo No. Acad. /2015/No. 15/A-2/5350-5498 dated 21.08.2015. The foundation stone of the college building was laid down on February 25, 2017 by Shri Manohar Lal, Hon'ble Chief Minister of Haryana.

Bawal is a municipality in Rewari district of Haryana state and lies in the National Capital Region (NCR) of India. It is located on national highway NH 48, about 14 km from Rewari city, 100 km from Delhi and 200km from the main campus of the University at Hisar. Bawal is located at 28.09°N 76.59°E at an elevation of 266 m above mean sea level.

The mandate of the college is nurturing scholarly education in agriculture and allied fields to make students professionally competent and socially sensitive and to provide specialized trainings to the students to promote entrepreneurial and other skills among them.

The college has all facilities for students including smart classrooms, fully equipped laboratories, library, computer section, cafeteria, examination hall, seminar hall etc.

**6.4.1. Brief History of the Degree Programme:** *Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

The College of Agriculture, Bawal came into existence in 2015 and the classes were started in college in the same year.

### Objectives of the College

- To impart education and training to youth for developing professional skills in agriculture and allied fields
- To collaborate with other academic institutes at national and international level
- To generate production and protection technology for various cropping/ farming/ horticultural /agro-forestry systems and its dissemination to the farmers and other end users
- To assist stakeholders through value-added endeavours, bio-based products, bio-processing, crop diversification etc.

- To monitor climate change impacts on agricultural systems and develop mitigation strategies adopting inter-disciplinary approaches

## Academic programmes

The college offers the following programmes

- B.Sc. (Hons.) Agriculture
- M.Sc. (Ag.) in Agronomy, Soil Science, Plant Pathology, Entomology, Horticulture and Forestry
- Ph.D. in Agronomy, Soil Science, Plant Pathology, Entomology, Horticulture and Forestry

## Admission policy

Admission to the college is based on the merit list of entrance examination conducted by the university. The details of admission and procedure are available on university website, www.hau.ac.in.

## Intake capacity

The intake capacity of college for UG programme is 55. College is also admitting 12 students in M.Sc. (Ag.), 6 in Ph.D. in different disciplines.

## Future planning

- Framing of new courses and revision of existing course curricula of UG and PG programmes with aim to make the students job creators rather than job seekers. Follow the ICAR guidelines in framing in the national level course work.

- Development of the facilities to improve the teaching and learning processes in the college through use of modern technologies.

- Implementation and execution of programmes for students' advisement, counselling and extra-curricular activities for all-round personality development of students and provision of placement services.

Inauguration of Academic Block of COA, Bawal Virtually by
Sh. Manohar Lal, Hon'ble Chief Minister Haryana, on August 31, 2019

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| Designation | Sanctioned | In position | Vacant |
|---|---|---|---|
| **Principal** | 01 | 01 | 00 |
| **Professor and equivalent** | 03 | 00 | 03 |
| **Assoc. Professor and equivalent** | 08 | 01 | 07 |
| **Asstt. Professor and equivalent** | 36 | 04+06* | 32 |
| **Total** | **48** | **12** | **42** |

*Outsourced up to 05.06.2023

Faculty in place under Professor and Associate Professor include Personal Promotion (PP). All the faculty of this programme is assigned the responsibilities for the multiple programmes.

**Note 1:** In addition to the above-mentioned faculties, the faculties from Regional Research Station and KVK, Bawal have also been assigned the duties of teaching at COA, Bawal by the Vice Chancellor vide Registrar office Endst. No. Admn. F. 3/2018/34268-95 dated 18.10.2018.

**Note 2:** Twenty-six new faculty joined during the academic session 2022-23.

**6.4.3. Technical and Supporting Staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place*

| Name of the post | Sanctioned | In position | Vacant |
|---|---|---|---|
| **Administrative-cum-Accounts Officer** | 01 | 01 | 00 |
| **Personal Assistant** | 01 | 01 | 00 |
| **Assistant** | 03 | 02+01* | 00 |
| **Jeep/Car Driver** | 01 | 00 | 01 |
| **Computer Operator** | 01 | 00 | 01 |
| **Store Keeper** | 01 | 01 | 00 |
| **Steno Typist** | 02 | 01 | 01 |
| **Assistant (one for each Deptt.: Agronomy, Agricultural Economics, G & PB, Horticulture, Soil Science and Plant Pathology)** | 06 | 00 | 06 |
| **Clerk (One for each Deptt.: Extension Education, Entomology, Agricultural Engineering, Biochemistry, Animal Science including Fisheries)** | 05 | 00 | 05 |
| **Tractor Driver** | 01 | 00 | 01 |
| **Lab Assistant** | 11 | 02* | 05 |
| **Library Assistant** | 01 | 01 | 00 |
| **Library Attendant** | - | 01+01* | 00 |
| **MBBS Doctor** | - | 01* | 00 |
| **Nursing Staff/ Pharmacist** | - | 01* | 00 |
| **Security Supervisor and Guard** | - | 30** | 00 |
| **Pump Operator** | - | 01* | 00 |

| | | | |
|---|---|---|---|
| **Mali/ Beldar (Landscaping)** | - | 03* | 00 |
| **Hostel Attendant** | - | 03* | 00 |
| **Peon cum messenger** | - | 01* | 00 |
| **Sweeper** | - | 07* | 00 |
| **Total** | 34 | 59 | 20 |

*Contractual/ outsourced staff; **Contractual/ outsourced for whole Bawal campus

**6.4.4 Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipment, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme*

| Facilities | Numbers | Space Length (ft) x Width (ft) | Speciality to conduct practical hands on training |
|---|---|---|---|
| **Smart lecture halls with Wi-Fi facility** | 06 | 36 x 24 (70 capacity) | The students are taught through advanced teaching tools equipped in lecture halls |
| **Laboratories** | 18 | 36x30, 36x24 and 30x24 | Practical on different subjects |
| **Language lab (English)** | 01 | 36x30 | Communication skills |
| **Computer lab** | 01 | 36x30 | Twenty computers with internet connectivity for practical |
| **Met. Observatory** | 01 | 2000 $m^2$ | Practical exposure on weather observations |
| **Instructional farm** | 01 | 12 acres | Practical crop production |
| **Workshops** | 01 | 20 m x 40 m | Agricultural engineering |
| **Farm area** | - | 166 acres | Research experiments, orchard, nursery and seed production |
| **Any other** | - | 08 acres | ▪ Sports ground for Athletics, Badminton, Basketball, Cricket, Football, Handball, Volleyball (2) and Kho-Kho<br>▪ **Indoor games:** Table Tennis, Gym and Yoga<br>▪ Seed Processing Unit |

**6.4.5. Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on –practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirement*

**The students are provided handsontraining in different courses as per details given below:**

| Name of degree programme | Training/ workshop name | Duration | Mode of training |
|---|---|---|---|
| **UG Programme** | Pest diagnosis | November 20, 2018 | Offline |
| **UG Programme** | Raring of earth worm | February 19, 2019 | Offline |
| **UG Programme** | Training on plant multiplication | December 21, 2021 | Offline |

| | | | |
|---|---|---|---|
| **UG Programme** | Preparation of pickle | January 25, 2022 | Offline |
| **UG Programme** | Nursery technology (under NAHEP-IDP) | January 18-24, 2023 | Offline |
| **UG Programme** | Processing technology of fruit and vegetables (under NAHEP-IDP) | January 27-31, 2023 | Offline |
| **UG Programme** | Demonstration of jam and jelly | January 30, 2023 | Offline |
| **UG Programme** | Organic farming (under NAHEP-IDP) | February 07-13, 2023 | Offline |
| **UG Programme** | Integrated farming system | February 9, 2023 | Offline |
| **UG Programme** | Exposure visit and interaction on organic farming | February 13, 2023 | Offline |

Problem diagnosis in field by the students on November 20, 2018

Exposure and learning about earthworm rearing February 19, 2019

Interaction of students with expert during training on May 19, 2019

Practical demonstration (lemon pickle) during training on fruits and vegetable preservation on January 25, 2022

Exposure and learning about plant multiplication on December 21, 2021

Exposure visit at Richa Food Ind., Dhankot (Gurugram) on January 28, 2023

Valedictory and evaluation by Dr. R.K. Malik (Consultant, CIMMYT) after completion of training on January 31, 2023

Method demonstration (guava jelly) during training on January 30, 2023

Learning about Integrated Farming System on February 9, 2023

Field visit at Organic Farm on February 13, 2023

Interaction with President Awardee Ms. Pooja Sharma at Chandu (Gurugram) on January 28, 2023

Arranged live telecast of International Potato Conclave addressed by Hon'ble Prime Minister on January 28, 2020

**Agron. 301 & 302 (Practical Crop Production I & II)**

Crop planning, raising *Kharif* and *Rabi* crops in multiple cropping system, field preparation, seed treatment, nursery raising, sowing, nutrient management, water management, weed management and management of insect pest and diseases of crops, harvesting, threshing, drying, winnowing, storage and marketing of produce, preparation of balance sheet including cost of cultivation, net returns per student as well as per team of a group of students.

Application of fertilizer during PCP on October 15, 2021

Wheat harvesting in PCP on April 15, 2022

**Agron. 491/ Ag. Econ. 491/ Ext 491: Rural Agricultural Work Experience (RAWE) and Agro Industrial Attachment (AIA)**

This course is designed for hands on training and practical for interaction among interns and farmers when the students are placed in village. The students are asked to interact with farmers on water shed management, high-tech agriculture and natural resource management, documentation of information through survey and discussion with farmers, preparation of farm plan and family budget, information on bank loans for agro-projects, working of agro-based industries (post-harvest technology and agro-processing), preparation of reports, presentation and learning leadership quality, sincerity and devotion.

**Note:** In addition to these practical courses, practical are also carried out by the students in other courses under the supervision of course instructors which includes; preparation of slides (mitosis & meiosis), emasculation and pollination, preparation of culture media, soil sampling and testing, raising of nursery of fruits, flowers and vegetable crops preparation of jam, jelly, candy, squash, RTS, chutney, pickle etc.

**6.4.6. Supervision of Students in PG/Ph.D. Programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

The total student intake from 2019-20 to 2022-23 are given as under:

| Discipline/ Department | Number of Qualified faculty | PG | Ph.D. |
|---|---|---|---|
| **Horticulture** | 3 | 2 | 1 |
| **Forestry** | 2 | 7 | 3 |
| **Soil Science** | 5 | 8 | 3 |
| **Agronomy** | 5 | 8 | 3 |
| **Entomology** | 2 | 8 | 3 |
| **Plant Pathology** | 4 | 8 | 3 |
| **Total** | **21** | **41** | **16** |

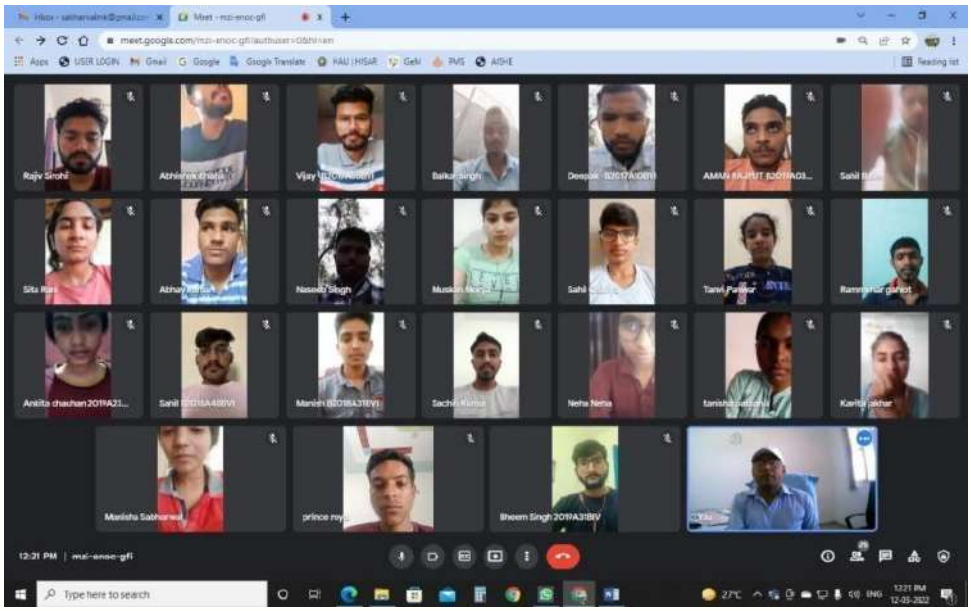
**6.4.7. Feedback of Stakeholders (Students, Parents, Industries, Employers, Farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

The college has devised a feedback proforma specifically for UG students, with the added responsibility of each class teacher to obtain feedback from both students and their parents prior to the final examination. The proforma covers all aspects required for the assessmentof quality education in the college.

**6.4.8 Student Intake and Attrition in the Programme for Last Five Years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the degree programme | Students admitted | | | | | |
|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total |
| B.Sc. (Hons.) Ag. | 67 | 61 | 64 | 82 | 76 | 350 |
| M.Sc. (Ag.) Programme | | 12 | 10 | 10 | 10 | 42 |
| Ph.D. Programme | | 06 | 05 | 05 | 05 | 21 |

| Name of the degree programme | Students' attrition (%) | | | | |
|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| B.Sc. (Hons.) Ag. | 2.68 | 1.83 | 3.2 | 7.38 | 0.76 |
| M.Sc. (Ag.) Programme | | 0 | 0 | 0 | 0 |
| Ph.D. Programme | | 0 | 0 | 0 | 0 |



**6.4.9. ICT Application in Teaching and Practical for Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The detail of course curriculum given at 6.5.3.4 under sub head Courses Semester wise are being taught using power point presentation in smart classrooms.

- There are six smart classrooms equipped with audio-visual aids like multimedia, computers and white boards for effective teaching.
- Computer lab for Hands on Training with seating capacity of 30 students.
- Teachers have also been provided internet connected PCs for preparation and updation of lectures.

Celebrated Youth Day on January 12, 2022 in virtual mode

Virtual training on effective communication skills for SC students under SC-SP scheme during COVID-19 pandemic from March 11-20, 2022

Examinations conducted during COVID-19 following proper guidelines

## ICT Application in Curricula Delivery

The application of ICT used along with classroom study and during COVID-19 pandemic for different programmes/ trainings for sharing knowledge of resource persons from different reputed institutes.

| Programme offered | Total courses Theory/ Practical | Type of ICT Application |
|---|---|---|
| B.Sc. (Hons.) Ag. | All courses for UG, PG, and Ph.D. | ▪ The lectures of all the courses were taught digitally through power point presentations using smart classroom<br>▪ Digital *e*-content for the courses has been developed and shared on ERP system of the university to provide free and round the clock access to the students<br>▪ For online classes digital classroom platform like MS Team, Google Classroom, Google meet, WebEx meet etc. were used frequently by the faculty as well as students<br>▪ Curricula content also made available in the form of Digital flipbook for some courses<br>▪ All the classrooms are smart classroom, equipped with smart boards with scanner to deliver the content effectively to the students<br>▪ Online assignments through MS team, Google form, Google Docs and sheets are being conducted and evaluated to encourage the use of ICT among the students |
| Faculty | | ▪ Language lab training for faculty on 29-30.07.2021<br>▪ Smart classroom training on 03.08.2021 |
| Online/ Virtual Training | | • Organised live telecast on International Potato Conclave addressed by Hon'ble Prime Minister on January 28, 2020<br>• Personality developmentworkshop (under NAHEP-IDP) during May 5-7, 2020<br>• Eat right during COVID-19 crises (2 days workshop) on May 15-16, 2020<br>• COA, Bawal conducted online training on ICT for Agriculture Extension: New Concept for 200 participants from twenty states in collaboration with MANAGE Hyderabad during August 23-27, 2021<br>• Personality development and communication skills from March 15-26, 2021 |

| | | |
|---|---|---|
| | | • Organised live telecast of conclave on natural farming, Amul, Anand, Gujarat addressed by Hon'ble Prime Minister on December 16, 2021<br>• Training on Effective communication skills (under SCSP scheme) during March 11-20, 2022<br>• Personality development training under SC-SP scheme from February 25 to March 06, 2022<br>• One day training on CeRa for faculty on April 18, 2022 |

Inauguration of smart classroom and interaction with students by Prof. B.R. Kamboj, Vice Chancellor

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D Degree Programmes, separately, and to be presented college-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme) I, the Principal, **Dr. Naresh Kaushik** hereby certify that the information contained in the Section 6.4.1 to 6.4.9 is furnished as per the records available in the college, and degree awarding university.

**Signature of Principal of the College with Date & Seal**

*Annexure-I*

## SUMMARY OF PUBLICATIONS

**Research Papers:**

| Year | NAAS Rating < 6.0 | NAAS Rating 6.0-8.0 | NAAS Rating > 8.0 | Without NAAS rating | Total |
|---|---|---|---|---|---|
| 2018 | 13 | 4 | 2 | 9 | 28 |
| 2019 | 11 | - | 3 | 8 | 22 |
| 2020 | 17 | 3 | 1 | 11 | 32 |
| 2021 | 17 | 5 | 1 | - | 23 |
| 2022 | 6 | 4 | 6 | 2 | 18 |
| Total | 64 | 16 | 13 | 30 | 123 |

**Other publications:**

1. Books: 03
2. Book chapters: 11
3. Technical bulletins: 13
4. Popular articles: 81
5. Seminar and conferences: 123

## LIST OF FACULTY PUBLICATIONS

| RESEARCH PAPERS<br>**2018** | **NAAS Rating** |
|---|---|
| Dahiya R, Satyajeet and Yadav S. (2018). Impact of front-line demonstration on cotton production technology. *Journal of Cotton Research and Development*, 32(2): 300-305. | 4.78 |
| Dhram Prakash, Benbi DK and Saroa GS. (2018). Land-use effects on phosphorus fractions in Indo-Gangetic alluvial soils. *Agroforestry Systems*, 92: 437-448. | 8.55 |
| Haldhar SM, Kumar R, Samadia DK, Singh B and Singh H. (2018). Role of insect pollinators and pollinizers in arid and semi arid horticultural crops. *Journal of Agriculture and Ecology*, 8(5): 1-25. | 4.36 |
| Jat MK, Purohit HS, Choudhary SK, Singh B and Dadarwal RS. (2018). Influence of INM on yield and nutrient uptake in sorghum-barley sequence. *International Journal of Chemical Studies*, 6(3): 634-638. | - |
| Kakraliya SK, Singh I, Dadarwal RS, Singh LK, Jat RD, Jat HL and Jat ML. (2018). Impact of climate smart-agricultural practices on growth and crop yields of rice (*Oryza sativa*)-wheat (*Triticum aestivum*) system in nourth-western Indo-Gangetic plains. *Indian Journal of Agricultural Sciences*, 88(10): 1543-155. | 6.37 |
| Khedwal RS, Yadav DB and Hooda VS. (2018). Crop residue management in no-till maize: Influence the growth, yield and economics of *Kharif* maize (*Zea mays* L.). *Forage Research*, 44(2): 90-95. | 4.84 |
| Khare N, Pathak DV and Kumar M. (2018). Microbially enriched vermicompost affecting seedling and plant growth in aonlaand Bael. *International Journal of Current Microbiology and Applied Sciences*, 7(4): 2664-72. | - |
| Kumar M, Kumar A, Singh JK, Kumar S and Niwas R. (2018). Influence of soil temperature, moisture and planting depth on black scurf development in potato (*Solanum tuberosum* L.). *Journal of Agrometeorology*, 20(4): 342-344. | 6.55 |
| Kumar P, Yadav SP, Rolania K and Yadav S. (2018). Population dynamics of *Amrascabiguttulabiguttula* on Bt and non Bt cotton and its correlation with abiotic factors. *International Journal of Current Microbiology and Applied Sciences*, 7(9): 2927-2934. | - |
| Moharana PC, Singh RS, Singh SK, Jena RK, Naitam RK, Verma TP, Nogiya M, Meena RL, Gupta DK, Kumar S, Tailor BL and Singh R. (2018). Assessment of quality monitoring indicators under long term rice cultivation in hot arid Ghaggar-flood plains of India. *Archives of Agronomy and Soil Science*, 64(14): 2030–2044. | 9.09 |
| Mohsin M, Yadav JS, Kapoor A, Dhayal BC and Arif M. (2018). Comparative studies on castor based intercropping systems. *Environment and Ecology*, 36(1): 19-22. | 5.25 |
| Nagar S, Kumar M, Sharma JR, Baloda S and Godara RK. (2018). Bael germplasm evaluation for leaf and fruits pulp variability under south Haryana conditions. *International Journal of Current Microbiology and Applied Sciences*, 6(1): 959-964. | - |
| Rolania K, Yadav SS and Singh B. (2018). Efficacy of different insecticides against leafhopper and white fly in Bt Cotton. *Indian Journal of Applied Entomology*, 33(1): 35-37. | - |
| Satyajeet, Yadav SP and Dhanda SK. (2018). Effect of conservation agriculture-based technology on yield and economics of paddy. *International Journal of Current Microbiology and Applied Science*, 7(7): 67-69. | - |
| Satyajeet, Yadav SP, Dhanda SK and Dahiya R. (2018). Response of soluble fertilizer on productivity and profitability of Bt cotton based cropping system in semiarid | 4.78 |

| | |

# SELF STUDY REPORT

2023

## Chaudhary Charan Singh Haryana Agricultural University
## Hisar, Haryana-125004

# FOREWORD

India's enormous population relies primarily on agriculture, which began to become more commercialised in the 20th century. In order to match the skills and technologies required to meet the rising demand for agricultural produce, it became imperative to update agricultural education. In fact, India has made great strides in agricultural education. With more than sixty agricultural universities today, agricultural education in India has come a long way. Haryana with 1.4% of India's land, contributes 14.1% of the national GDP that has grown 7times since the formation of Haryana in 1966 riding on the research, extension and teaching contribution of the Haryana Agricultural University, Hisar- the largest agricultural University of Asia. Haryana state contributed significantly to the green revolution in India in 1970 that made the country self sufficient in food production.

CCS Haryana Agricultural University, established the College of Agriculture, Kaul in 1974 in the rural area of Kaithal district to provide quality agriculture education in the North-eastern districts of Haryana- referred to as the rice-wheat bowl of the country. The college has magnificent infrastructure with all modern facilities to cater to the academic needs of the students. The college offers four-year B.Sc. (Hons.) Agri. degree programme to impart knowledge in the field agriculture, and hands on training programmes to the students through the latest practical crop production and protection techniques. During the later part of their degree programme, the students get acquainted with the socio-economic factors of the farming and rural economy through a unique field training -Rural Agricultural Work Experience (RAWE)- encompassing multiple gametes of agriculture. Till 2022, a total of 1513 students have graduated from this college. Presently, 211 students are on roll pursuing their graduation in agriculture at COA, Kaul. Recently, Post Graduate programmes in three disciplines viz. Agronomy, Soil Science, and Genetics & Plant Breeding were started in order to impart higher education in agriculture to the students of the state. Riding on these multiple cushions, till now, students of COA, Kaul have bagged a total 28 Gold medals during its journey and 5 numbers of these gold medals were won between years 2017-18 to 2021-22 in UG and 01 in PG programme.

The Self Study Report (SSR) pertaining to the period under report (2017-18 to 2021-22) has been prepared by the SSR Committee for Accreditation of the College of Agriculture, Kaul by the Indian Council of Agricultural Research. The SSR committee has taken due care to include all the necessary inputs regarding the existing status of the college in terms of infrastructure including offices, laboratories, class rooms, hostels, library, sports, residences, farm, co-curricular activities etc. It also includes the status of faculty, office and supporting staff, students etc. I believe, the present document prepared by the SSR committee fulfils the requirement of the accreditation of the College of Agriculture, Kaul.

I appreciate the efforts undertaken by all the faculty and staff members involved in the preparation of this Self Study Report of the College of Agriculture, Kaul.

**Prof. B. R. Kamboj**
Vice Chancellor
CCSHAU, Hisar

# PREFACE

In order to meet the peculiar agriculture education and research needs of the rice bowl of Haryana, Chaudhary Charan Singh Haryana Agricultural University established College of Agriculture at village Kaul in Kaithal district of the state in the year 1974. Initially, the college provided agriculture education for 1st year for B.Sc. (Hons.) Agri. 4-year programme, and initial two years for B.Sc. (Hons.) Agri. 5-year programme. The students of both the streams were later shifted to the main campus at Hisar for completion of their degree. In the year 1983, the College of Agriculture, Kaul was upgraded to a full-fledged college to provide full component of the degree programme.

College of Agriculture, Kaul bodes of an upgraded infrastructure that include state of the art smart class rooms, well-equipped laboratories, seminar hall, well-stacked library, sprawling sports arena with multiple game facilities, and student's farm. Highly qualified and experienced faculty nurture the students in the theoretical as well as practical aspects of agriculture to produce brilliant future-ready graduates and postgraduates in the field of modern agriculture. The infrastructure in the form of well-equipped hostels for boys and girls, Students Activity Centre (SAC), and co-curricular activities including NCC and NSS etc. help develop the students into better human beings. Multiple sports facilities, NCC and NSS activities also inculcate patriotism and overall development of the students. Highly educated faculty and sports staff help impart the best practical education to the students. Unique exposure to practical and classroom teaching followed by one-year practical crop production (PCP) and six months Rural Agriculture Work Experience (RAWE) programme help develop future ready agriculture graduates in various agriculture disciplines. Special orientation is given to the agro-based skill-oriented activities viz. organic farming, sustainable agriculture, bee keeping, mushroom cultivation, vermi-composting, dairying and horticulture, etc. to hone the entrepreneurial skills of the students to venture into production and marketing avenues.

Buoyed by the success of present model education of College of Agriculture, Kaul, the CCSHAU authorities initiated post-graduate programmes in three disciplines viz. Agronomy, Soil Science, and Genetics & Plant Breeding, both for M.Sc. and Ph.D. programmes from the year 2019-20. College's success is attributed to its unique peculiarities particularly its location in rural background in highly productive paddy-wheat region of Haryana, where education on the ancient pattern of "Gurukul" is envisaged to inculcate moral values in the students. Such congenial conditions not only prepare future-ready students to serve farming community in a far better way but also help them scale greater heights of academic excellence, as demonstrated by maximum gold medals won by students of this college amongst the three constituent colleges of the University. College of Agriculture, Kaul has till now, produced 1513 B.Sc. (Hons.) Agri. graduates who are now serving this college and University besides banks, armed forces, cooperative sector and other public and private sectors, successfully.

**Dr. O. P. Chaudhary**
Principal, COA, Kaul

# SELF STUDY REPORT OF COLLEGE OF AGRICULTURE KAUL (KAITHAL)

## About College of Agriculture, Kaul

College of Agriculture, Kaul situated on the outskirts of village Kaul, district Kaithal, Haryana (29.8498$^{o}$ N latitude, 76.6615$^{o}$ E longitude) is an important constituent college of Chaudhary Charan Singh Haryana Agricultural University (CCS HAU), Hisar. College of Agriculture, Kaul has its beginning as a constituent college of Kurukshetra University, Kurukshetra in the erstwhile state of joint Punjab. After creation of the state of Haryana in 1966, Haryana Agricultural University came into being at Hisar in the year 1970. The College of Agriculture, Kaul was integrated into the Haryana Agricultural University in 1974 with the motto to impart quality and scientific education to students in the field of agriculture.

Initially, the academic session was started for B.Sc. (Hons.) Agri. having both *i.e.* 4 year and 5 year programmes at Kaul campus. The classes for 1$^{st}$ year under 4-year programme, and 1$^{st}$ and 2$^{nd}$ year under 5-year programme were initiated at Kaul campus and the rest of classes were conducted at the main campus of HAU, Hisar. Dr. M.S. Chaudhary was the founder Principal who served the college from 28-7-1974 to 11-5-1977 and thereafter, eighteen eminent Professors headed the post of Principal till date, under whose leadership the college has made significant achievements in the field of academics, sports, NCC/NSS and other co-curricular activities. College of Agriculture, Kaul was upgraded to a full-fledged college in 1983 and the first batch completed their graduation in 1986. It is a matter of pride that during the period under consideration (April 2018 to March 2023), from a total of 15 University Gold Medals awarded to the students of B.Sc. (Hons.) Agriculture stream in the University, 07 medals have been won by the students of College of Agriculture, Kaul. Many students won laurels in national level competitions in sports and other co-curricular activities like NCC/NSS *etc.*

During this long journey of 49 years, a total of 1513 students have completed their B.Sc. (Hons.) Agri. degree from this esteemed college. Presently, 211 students including 107 girls are enrolled for B.Sc. (Hons.) Agri. 4-year programe. Later, postgraduate programme of M.Sc. (Agriculture) and Ph.D. was initiated in three disciplines of Agronomy, Soil Science and Genetics & Plant Breeding in the year 2019-20. Presently, 12 M.Sc. students and 9 Ph.D. students are enrolled in this college.

## Objectives

- To cater to the needs of agricultural education for the North-East part of Haryana.
- To have better interaction between College of Agriculture, Hisar and this part of Haryana
- To produce competent agricultural graduates having knowledge of location specific problems with complete rural environment
- Such other purposes asUniversity authorities may direct from time to time

## Academic programmes:

The college is offering the following programmes:

- B.Sc. (Hons.) Agriculture 4-year programme after 10+2 with science
- M.Sc. (Ag.) in Agronomy, Soil Science, and Genetics & Plant Breeding
- Ph.D. in Agronomy, Soil Science, and Genetics & Plant Breeding

**Admission Policy:**

Admission to the college is based on the merit list of the entrance examination conducted by the CCSHAU, Hisar. The details of the admission procedure are available on University website, www.hau.ac.in

**Intake Capacity:**

Current intake capacity of the College is 60 comprising of 32 students (27 Haryana residents + 5 ICAR) of COA, Kaul and 28 students admitted in COA, Bawal are also studying in this college. In addition, this college also admits 6 students in M.Sc. and 3 in Ph.D. in three aforementioned disciplines.

**Future Planning:**

- Framing of new courses and revision of existing course curricula of UG and PG programmes with aim to make the students job creators rather than job seekers.
- Development of facilities to improve the teaching and learning processes in the college through use of modern technologies.
- Implementation and execution of programmes for students' advisement, counselling and extra-curricular activities for all-round personality development of students, and provision of placement services.

## SELF STUDY REPORT OF COLLEGE OF AGRICULTURE, KAUL (KAITHAL)

### 6.5.1. College Administration

**6.5.1.1. College Principal's office establishment:** *Whether the Dean's post sanctioned by the appropriate authority as per ICAR Model Act/UGC guidelines? Date of selection of present dean, mode of selection, tenure etc. shall be mentioned. Clearly mention the staff and infrastructure/facilities available in the Dean's Secretariat.*

College of Agriculture, Kaul works under the Dean, College of Agriculture, CCS HAU, Hisar, who is the controlling officer of thecollege. Principal is the adminiustative head of the college of Agricultre- a post sanctioned by the competent authority of the University.

| **Name of Principal:** | **Dr. O.P. Chaudhary** |
|---|---|
| Date of selection of present Principal | Additional Charge *w.e.f.* 13-10-2022 |

Dr. O. P. Chaudhary, Principal, College of Agriculture, Kaul

**Tenure of Principals during 2017-18 to 2021-22:** Details of Principals during the period under report is given below:

| Sr. No. | Name | Period | |
|---|---|---|---|
| | | From | To |
| 1. | Dr. Devi Singh | 06.05.2015 | 31.01.2018 |
| 2. | Dr. Satya Pal Goyal | 01.02.2018 | 30.04.2018 |
| 3. | Dr. K.S. Grewal | 01.05.2018 | 08.05.2018 |
| 4. | Dr. C.P. Mehla | 09.05.2018 | 23.07.2018 |
| 5. | Dr. R.C. Verma | 24.07.2018 | 10.08.2020 |
| 6. | Dr. C.P. Mehla | 11.08.2020 | 31.05.2021 |
| 7. | Dr. P.S.Panwar | 01.06.2021 | 30.09.2022 |

| Mode of Selection | Duty assigned by Worthy Vice-Chancellor of the University |
|---|---|
| Tenure | No fixed tenure |

## Staff of the Principal's office:

| Name of the post | Sanctioned | In position | Vacant |

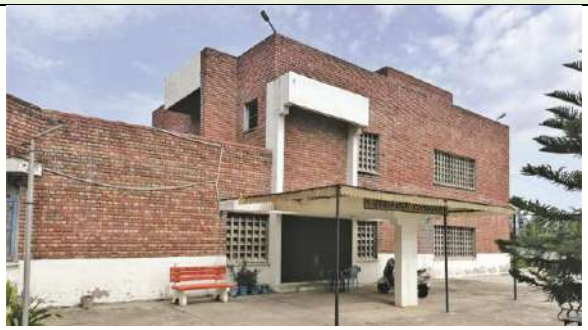
Sociology<br>21. English<br>22. Livestock Production Management | Being the constituent college of CCS HAU, Hisar, separate departments do not exist. However, faculty of all the disciplines is in position. |
| **Name of College** | College of Agriculture, Kaul (Kaithal) | |
| **Faculty position** | See section 6.5.2. | |
| **Lecture Halls (No.)** | 04 | |
| **Facilities in the lecture hall like seating capacity, LCD Projector, Computer, CC** | The ultra-modern air conditioned smart classrooms with false ceiling and have a seating capacity of 60 students. These are well equipped with "interactive flat panel" along with mini PC, CCTV cameras, curtains, | |

| | |
|---|---|
| **Camera, Blackboard, screens *etc.*** | power back up (UPS), podium, teaching aids, magnetic pen for writing on to the white board of interactive flat panel,*etc.* |
| **Smart Class rooms (No.)** | 03 |
| **Class/Seminar Rooms (No.)** | 01 |
| **Committee Room (No.)** | 02 |
| **Exhibition Hall** | 01 |
| **College Library** | 01 |
| **Departmental Computer facility** | Each teacher along with office staff have advanced computer, printer and internet facility. |
| **Washrooms/Toilets (No.)** | He – 04, She -04 |
| **Stores (No.)** | one main store; 08 stores in the laboratories and two office stores. |
| **UG Labs (No.)** | 11 |



**Specific Labs (Name of each lab, one 1-2 lines description of its functioning):**
The college is completly renovated with provision of air-conditioning of the offices and laboratories.

All laboratories are spacious, well ventilated, air conditioned and provision with facilities of white-board, comfortable sufficient seating, stores, inbuilt office for Lab Attendants/Assistants, *etc.*

1. **Agronomy Lab:** Seed and fertilizer samples; models of farm equipments; glazed photographs of weeds; white board *etc.* are available for practical classes.
2. **Soil Science:** The laboratory is equipped with instruments including EC meter, pH meter, Oganic carbon assembly, Kjeldahl distillation assembly, Spectrophotometer, Flame photometer, Oven, electric stirrer, weighing balance *etc*.
3. **Entomology:** Lab is equipped for teaching insect classification, life stages of pests and beneficial insects, crop damage/material, honey bee boxes, insect collection kits, light traps, pesticide application equipments, *etc*. The laboratory has the largest collection of insect pests of crops. This lab was declared as the Best Entomolgy Lab in India by the last Accreditation Committee. Provision of honey bee apiary is the unique feature of this college.
4. **Plant Pathology:** All essential equipments like compound and simple microscopes, Laminar flow chamber, BOD incubator, autoclaves, specimen samples of crop diseases, glazed pictures, facilities for raising mushroom *etc.* are available.
5. **Horticulture:** Processing and packaging equipments *viz* .screw juice extractor, digital refractometer, hydraulic juice press, fruit mill juicer, pickle mixer, fruit pulper, and models of nursery raising of fruits and vegetable are available.
6. **Experiential learning Programme lab. (Horticulture)**: An ELP module of Horticulture is being run under this lab with cold storage, processing and packaging facilities including shrink wrapping machine, bottle washing assembly, vertical deep freezer for fruits and vegetables, double distillation water apparatus, *etc*.
7. **Extension Education Lab:** A well equipped extension Lab with audio-visual aids like LCD projector, audio mixers, digital camera, tripod, portable PA system, audio recording devices, *etc.* are available.
8. **Chemistry and Biochemistry Lab**.: All the required chemicals, glassware and apparatus are available for conducing organic and inorganic chemistry experiments.
9. **Zoology and Botany Lab**.: Preserved specimens of different organisms, charts, models *etc.* are available.
10. **Genetics and Plant Breeding:** Intruments like microscope, BOD incubators and oven; permanent slides for demonstration of cell division for carrying out the practical facilities for Genetics and Plant Breeding.

11. **Agri. Engineering Lab:** Machinery related to agricultural operations like primary (MB plough, disc plow, chisel plow) and secondary (harrow, cultivator rotavator, leveler) tillage operation, seeding (seed drill), harvesting (sickle, mower, reaper), threshing (thresher) and transportation (tractor and trolley) are available.
12. **Language Lab:** The lab consist of 4k interactive display, thirty desktops and internet connections with language software which help students in listening, speaking, reading and writing skills.

| | |
|---|---|
| Farm area/nethouses/green houses | A total of 32 acres (22 acres of Students' Farm and 10 acres of orchard with different fruits trees) exist for practical studies of the studentsalong with social forest, disease screen house. Additionally, 82 acres of land under Rice Research Station farm is also available at COA Kaul Campus. |
| Any other information which is not covered in the infrastructure may be added preferably in tabular form | |
|  | **Canteen:** Mini shopping complex comprising grossery, stationary and canteen caters to the daily needs of students and employees of the campus. The food items sold are kept disesase following proper hygienic standards. |
|  | **Rest House**: A well-maintained rest house with AC and non-AC rooms caters to the stay needs of officials, and parents of the students. A Farmers' Hostel is available for the stay of visiting farmers. |
|  | **Dispensary:** A dispensary headed by MD Doctor and a Pharmacist is running in the campus to resolve health related issues of students and staff of the college and their families. |
|  | **Library**: The well stocked library posses more than 18000 text and reference books, 36 journals, monographs, manuals *etc*. Additional provision of air-conditioned halls, night reading halls and a Book Bank exist. |

| | |
|---|---|
|  | **Computer Lab**: The well-equipped Computer Lab offers service facilities like internet access, data analysis, documentation, computer typing, scanning, printing, *etc.* |
|  | **Sports complex:** It comprises of international standard 400m athletic track, play grounds for cricket, hand ball, foot ball, basket ball, volley ball, table tennis, badminton *etc.* for the students, staff and their family members. |
|   | **Campus school**: The well furnished primary standard campus school provide KG and elemaentary education to the kids of staff and from nearby villages. |
|   | **Student's activity centre (Auditorium)**: The 275 seating capacity auditorium caters to the various entertainment and cultural activites of the college and residents. Various clubs like Fine arts and Graphic club, Music and Dramatics Club, Literary *etc.* are also housed in multiple halls of auditorium. |
|    | **Girls and Boys Hostel**: Separate hostel facilities for boys and girls are provided in the college with lodging capacity for 204 boys and 65 girls. Hostels are provisioned with dining hall, common room with LCD TV, indoor game hall, Gym *etc.* Solar water heating system is also available for students. Girls hostel is adequately protected and under CCTV coverage. |

| | |
|---|---|
|  | **Dairy unit:** An integrated dairy unit with 16 animals serve as field lab for LPM. It consists of well laid out animal sheds, feed stores, and water facility. It also provides milk facilities to the students and staff of the college. |
|  | **Indoor multipurpose hall**: The foundation stone of an indoor multipurpose hall was laid with state of provision of badminton, table tennis, squash, wrestling, *etc.* for students and staff of the college. |
| In addition to this, the campus of the college is equipped with solar street light; beautifully laid out parks and parking facilities, *etc*. | |

**6.5.1.2. Monitoring Mechanism for Quality Education (on-line):** *Whether the College is having an internal quality assurance system, with appropriate structure and processes, and with enough flexibility to meet the diverse needs of the stakeholders which is required for planning, guiding and monitoring quality assurance and quality enhancement activities of the Colleges.*

- Allotment of courses to competent teachers in position, and aslo from the main compus.
- Attendance of the students of respective courses is regularly monitored through updation on Enterprise Resource Planning (ERP) system through University website as well as manual reports.
- Attendance and quality of education (theory and practical, CCA *etc*.) is further ensured through CCTV surveillance as well as physical visits by the Principal.
- Random and planned visits of higher authorities of the University further firm up quality education, management and delivery.
- To provide quality education to the students, all the e-content in the form of text, e-manuals, video, images, presentations *etc*. are uploaded online on University website and same is monitored by the Principal himself.
- The academic activities of the classes and other activities are periodically reported by the respective class incharges to the competent authority. Monthly review through fixed staff meeting helps make course corrections.
- To ensure quality education, feedback proformas are regularly got filled from the students and parents that are analysed by teachers and management for improving the teaching quality.
- Skill upgradation of teachers is ensured through periodiuc training organized by respcective Departments, DHRM and other institution including ICAR, SAU's *etc.*

**Monitoring of teaching:**

- Online Self Assessment Report (SAR) filled up by each teacher are primarily evaluated by Principal/HOD on various academic parameters of teaching, research, extension, co-curricular activities *etc.* followed by Dean COA, Hisar and finally by Worthy Vice-chancellor of the university. The report is then converyed to the concerned teacher through online mode of ERP module.
- Advisors are allotted to each student who monitor their performance by holding weekly advisory group meeting in the tutorial class scheduled on every Monday. They not only monitor their academic progress, but also their personal problems in college and hostels *etc*.
- The evlauation of PG students are done by their major advisor and advisory committee allotted to each students along with one member nominated by Dean PGS. Dean PGS' nominee look after the maintenance of proper standards and rules as per University norms in conducting the research.
- Beside these, CCTV camera installed also helps in monitoring by the authority.

**Monitoring of research:**

- Monitoring of research work is carried out through evaluation of SAR of the faculty members by competent authority.
- Research activities are monitored through frequent discussions among the teachers and organizing in-house discussion for finalizing the research work which is planned to be executed in the coming years.
- Visits of the higher authority of the University along with the Principal to laboratories, field area, sports grounds *etc.* are regularly carried out.
- Annual reports are also submitted to the Director of Research office and get its approval before being submitted to the Programme Coordinator of the respective schemes.

**Monitoring of extension:**

- Extension activities are monitored through evaluation of SAR of the faculty membersby Principal of the college.
- Farm visit and tour are arranged as and when the problem arises at the farmers' field and it is to be done through Principal's office.

Chaudhary Charan Singh Haryana Agricultural University,
HISAR
SELF-ASSESSMENT REPORT
Self-Assessment Report for the period 2021 -22

Name : Vishal Goyal
Designation: Assistant Soil Chemist
Year of SAR : 2021 - 22

1. (a) Name (in Block Letters) Vishal Goyal
(b) Designation: Assistant Soil Chemist
(c) Department: College Of Agriculture, Kaul
(d) Joining date:
i) In HAU 27 Aug 2014
ii) On the present post:

(e) Period of absence from duty during the year in case the absence is more than a month (details to be specified):

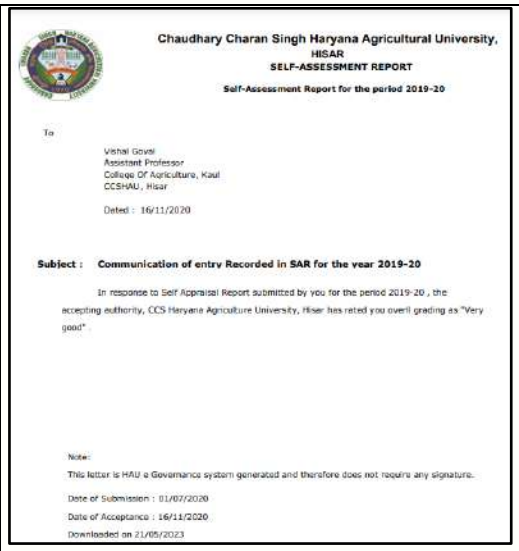
i) On leave of the kind due for personal work:

| S.No. | From Date | To Date | Total Days |
|---|---|---|---|
| 1 | | | |

ii) On leave of the kind due for study purpose:

| S.No. | From Date | To Date | Total Days |
|---|---|---|---|
| 1 | | | |

iii) Study leave for doing Ph.D.:



| S.No. | From Date | To Date | Total Days |
|---|---|---|---|
| 1 | | | |

iv) On leave for undergoing training etc:

| S.No | From Date | To Date | Total Days |
|---|---|---|---|
| 1 | | | |

Note1: The purpose of this Self-Assessment report and review is to summarize and evaluate the faculty member's achievements over the past 12 months and to assist him/her in making further improvement.

Note2: The Self-Assessment Reports are written for the period from 1st July to 30th June. The teachers shall initiate their own SARs on time and ensure that these reach the reviewing authority by the end of July. The onus for not initiating the report on time will lie on the teacher himself/. In the cases of failure to initiate SAR, disciplinary action shall be initiated by the competent authority. However, if the teacher concerned repeatedly fails to do so then his annual increment(s) may be withheld by the competent authority.

Chaudhary Charan Singh Haryana Agricultural University,
HISAR
SELF-ASSESSMENT REPORT
Self-Assessment Report for the period 2019-20

To
Vishal Goyal
Assistant Professor
College Of Agriculture, Kaul
CCSHAU, Hisar

Dated : 16/11/2020

**Subject : Communication of entry Recorded in SAR for the year 2019-20**

In response to Self Appraisal Report submitted by you for the period 2019-20 , the accepting authority, CCS Haryana Agriculture University, Hisar has rated you overll grading as "Very good"

Note:
This letter is HAU e-Governance system generated and therefore does not require any signature.

Date of Submission : 01/07/2020
Date of Acceptance : 16/11/2020
Downloaded on 21/05/2023

SAR Proforma and assessement conveyed format

*Mention the impact of monitoring on the outcome of the College with reference to students' excelling in academics, research and extracurricular activities.*

**6.5.1.3. CC/Board of Studies:** *Whether the CC in the Department level and Board of Studies at the College is in place? The composition of the BoS and date of conduct of meetings for last five years and major recommendations made by the BoS should be given in tabular form.*

Yes. Dean, College of Agriculture, CCSHAU, Hisar is the Controlling Officer of College of Agriculture, Kaul.Departmental Advisory Committees (DAC) exists in each department of the respective Colleges at the main campus. For major academic issues, College of Agriculture, Kaul is governed by the decisions of Board of Studies of the University at the main campus.

**6.5.1.4 Anti-Ragging Cell:***In pursuance to the Judgment of the Hon'ble Supreme Court of India dated 08.05.2009 in Civil Appeal No. 887/2009, the University Grants Commission has framed "UGC Regulations on curbing the menace of ragging in higher educational institutions, 2009" which have been notified on 4th July, 2009 in the Gazette of India. Does the College follow this regulation and subsequent guidelines issued in the matter in letter and spirit? Give details*

Yes, the college follows the regulation and subsequent guidelines issued in the matter. There is an Anti-ragging committee as detailed below:

**A. Composition of committee**

**a) District level committee**

1) Principal
2) SSP, Kaithal/Representative
3) SHO, Kaul
4) Municipal Counsellor, Municipal Committee, Kaul

**b) College level committee**

1) Principal
2) Associate Director Students Welfare
3) Hostel Wardens
4) Security Incharge of the College
5) One Assistant Professor
6) One male student and one female student

**c) Anti Ragging squad of the college:**

1) Security Incharge
2) Hostel Wardens
3) Security Officials

**B. Activities**

The committee is constituted for anti-ragging activity by the institution.The prospectus, the forms for admission and all other literature issued to aspirants for admission must clearly mention that ragging is banned in the institution and any one indulging in ragging is likely to be punished appropriately with punishment which may include expulsion or suspension from

the institution or class for a limited period or fine with a public apology. The punishment also include:

(i) Withholding scholarships or other benefits

(ii) Debarring from representation in events

(iii) Withholding results

(iv) Suspension or expulsion from hostel or mess, and the like

Moreover, the application for admission / enrolment have a printed undertaking that is filled up and signed by the applicant to the effect that he/she is aware of the institution's approach towards ragging and the punishment to which he or she shall be liable if found guilty of ragging. A similar undertaking is also obtained from the parent/guardian of the applicant.

Different committees monitor the events involving ragging, enquire into and report the matter to the competent authority. The committee works out modalities of functioning, frequency of visits, meetings, *etc.* and also check the ragging menace in the College and Hostels**.** Every year one orientation programme is conducted for fresher student, where they are made aware of any mishappening occurring in the college or hostel because of ragging.

**None of the case of ragging has been reported in the College of Agricultural, Kaul (Kaithal) during the period of this report**

**6.5.1.5. Biological waste disposal facility:** *Whether wastes (chemical, biological, radioactive, universal, and recyclable) are generated by a variety of research, clinical, service, maintenance, and cleaning operations at the College level? If yes, then mention the disposal mechanism being adopted as per the government guidelines.*

Research/ work has not been planned/conducted on biological waste, therefore, no biological waste disposal facility is available. In future, if any such research work will be planned, then the University committees at main campus will takecare of this.

**6.5.1.6. Institutional Ethics Committee for Experiment on Animals:** *Whether the institute/College is following CPCSEA guidelines and constituted an Institutional Animal Ethics Committee (IAEC), get their animals house facilities inspected and get their project cleared by CPCSEA and IAEC before commencing them? If Yes, the college should make statement that it is adhering all guidelines in the matter.*

The experiment on animals and humans are not conducted, however, if required the case may sent to Institutional Ethics Committee constituted at CCS HAU, Hisar

**6.5.1.7. Committee for Prevention of Sexual Harassment of Women at Work Places:** *Does the institution is adhering the sexual harassment of women at workplace (Prevention, Prohibition and Redressal Act, 2013) in letter and spirit. If yes, mention the constitution of sexual harassment committees and date of proceedings conducted in last five years in tabular form:*

The committee for sexual harassment of women under Act 2013 has been constituted at University level. No such complaints have been received till date in COA Kaul. The University has clearcut policy framework for dealing the cases pertaining to sexual harassment of the women. Such cases at college level are dealt strictly in compliance to the above said policy in consultation with central committee constituted at University level.

## 6.5.2 FACULTY

*****All the staff is assigned the responsibilities for the multiple programmes

### 6.5.3. LEARNING RESOURCES

**6.5.3.1 College Library (digital):** *Location of the library, Present staff position (in place), Availability of the following in library, Wi-Fi, No. of books and other reading materials, No. of periodicals and research journals, No. of internet points with number of computers, Seating capacity in library, Employing the latest technology in library sciences, Stocking arrangements of books, Collection of volumes on different subjects, Latest publications in the fields of relevant subjects, Automation and user services through computer, Opening hours, Subscription of journals of national and international repute, national dailies, magazines etc.*

Library at College of Agriculture, Kaul, the hub of academic and a research activity of the University is housed in a centrally located elegant building besides the building of COA, Kaul. It provides information support to its teachers; scientific staff of RRS, Kaul, extension specialists from different KVKs', students and other members drawn from non-teaching staff and general public. Library has large print collection of about 17845 volumes of books and other reading materials which are also available online and can be accessed through *CCSHAU e-library* mobile app. In addition, it has 30 Indian and foreign journals in printed as well as Online form on current subscription. Besides it

subscribes many e-resources *i.e.* indiastat.com; Britannica On-Line Academic Edition (BOLAE); DELNET resources, Scopus Citation Database, NIPA e-Resource Solution for Students for Preparation of Competitive Examinations, NIPA English Writing Improvement Tool, and NIPA Online English Language Development and Improvement Resources which can be accessed through Nehru libraray, CCS HAU, Hisar. Millions of books, journals, technical reports, audio lectures, video lectures, proceedings, institutional repositories, question papers, datasets, reports, thesis, *etc.* are accessible to the University users through National Digital Repository (NDLI).

The Nehru Library of CCS HAU, Hisar is updating an important digital repository in the field of agricultural sciences *i.e.* Krishikosh consisting of full text Ph.D. and M.Sc. dissertations. Full text access to Krishikosh database is accessible to all the SAUs/DAUs/ICAR Institutes the access of which is also given to the students of COA, Kaul.

| Location of the library | COA, Kaul | Remarks |
|---|---|---|
| **Present staff position (in place)** | 03 | |
| **Availability of the following in library** | | |
| **a)** Wi-Fi | Yes | |
| **b)** No. of books and other reading materials | 17845 | |
| **c)** No. of periodicals and research journals | 30 | |
| **d)** No. of internet points with number of computers | 04 | |
| **e)** Seating capacity in library | 200 | |
| **f)** Employing the latest technology in library sciences | Yes, like e-libraray app | |
| **g)** Stocking arrangements of books | As per International code | |
| **h)** Collection of volumes on different subjects | Sufficient | |
| **i)** Latest publications in the fields of relevant subjects | Yes | |
| **j)** Automation and user services through computer | Sufficient | |
| **k)** Opening hours | 9.00 AM to 4:30 PM (on all working days) & 9.30 AM to 10.30 PM (during examinations) | Summer timings 7.00 AM to 2.00 PM |
| **l)** Subscription of journals of national and international repute, national dailies, magazines etc. (mention number) | 30 | |

**6.5.3.2. Laboratories, Instructional farm, Workshops, Dairy Plant, Veterinary Clinic, Hatchery, Ponds etc.:** *Cleary mention about laboratories, instructional farm, workshop, dairy plant, veterinary clinic, hatchery, ponds etc facilities available in the college with its numbers, space, speciality to conduct practical/hands on training.*

Information pertaining to laboratory facilities in various discipline of College of Agricultural, Kaul is given in thefollowing table:

| Facilities | Numbers | Space Length (m) x Width (m) | Speciality to conduct practical hands on training |
|---|---|---|---|
| Laboratories | 11 | 15m x 25m | Practicals on different subjects |

| | | | |
|---|---|---|---|
| Instructional farm | 01 | 22 acres | Practical Crop Production (PCP) |
| Workshops | 01 | 20m x 40m | Agricultural Engineering |
| Farm area (acres) | 22 | 22 | Practical Crop Production and fodder prodution |
| Horticulture farm (acres) | 10 | 10 | Practical hands on training to students on grafting and budding techniques, Identification of fruit trees, Training and pruning *etc*. |
| Any other: Dairy Unit | 01 | 1/2 acre | For practicals on Live-stock management (LPM) |

## Specific information about Labs:

| Name of the Laboratory | Brief description about lab | Purpose of establishing the lab | Area of the lab and student seating capacity | Facilities available in the lab | Instrument / equipments available in the lab | Any other information about the lab |
|---|---|---|---|---|---|---|
| **Plant Pathology** | All the facilities for plant pathological UG teaching are available and the Lab is well ventilated, well furnished and has sufficient natural light. | For teaching and research. | 15x15 $m^2$ and 30 students. | All the facilities required for practical classes of UG *i.e.* Isolation, culture and identification of pathogens *etc*. is available in this Lab. | Laminar flow, autoclave, Microscopes, oven, BOD, Refrigerator, digital balance, gas connection,hot plate, distillation unit etc. All glasswares and required chemicals are available in the Lab. |   |
| **Soil Science** | Lab established for UG and PG students. All the facilities for analysis of soil and plant are available. | To carry out the soil and plant analysis for practicals of UG and PG students. | 15x15 m and 30 students. | All the facilities required for UG and PG practicals. | pH meter, conductivity meter, electronic balance, hot oven, nitrogen kjeldahl distillation unit, spectro photometer, flame photometer, distilled water assembly, hot plate, electronic |   |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | | | shaker, water wath, sample rotater *etc.* | |
| **Agricultural Extension** | A well-equipped Extension Lab with seating capacity of 30 students in one batch is available in the college. | To provide practical experience to the students about handling and use of different audio-visual aids for extension purpose. | 27x25 m and 30 students. | Projection of different media, Multimedia recording, mixing and broadcasting, image capturing, video recording, audio visual effect creation, development of digital e-content. Developing of farm publications etc. | Audio-visual aids, like LCD projector, audio mixers, digital camera, Handicam and speakers tripod; portable PA system, audio recording devices, *etc.* |   - |
| **Horticulture and Post-harvest technology** | All the facilities with modern equipments for conducting practicals on fruits and vegetable preservation, models of nursery raising of fruits and vegetable are available. | For training the students regarding post harvest technology and production of value added products like Juices, Jam, Jelly. | 27x25 m and 40 Students. | All the facilities required for UG students. | Grinder, mixer, juicer, drier, washer, deep freezer, hand refractrometer, cold storage with processing and cold storage facilities, shrink wrapping machinefor conducting practical on fruits and vegetable preservation, bottle washing machine, deep freezer vertical for fruits and |   - |

| | | | | | | |
|---|---|---|---|---|---|---|
| | | | | | vegetables, double distillation water apparatus | |
| **Agronomy** | Samples of seeds, fertilizers, models of some farm equipments, glazed photographs of weeds, benches for sitting students, black boards etc. are available for practical classes. | For training the students for practical | 27x25 m and 30 students. | All the facilities required for UG and PG students. | Oven, leaf area meter, models of implements, moisture boxes, weighing balance. |  - |
| **Entomology** | A large collection of insects arranged in boxes for identification, honey bee boxes, insect collection kits, light traps and other necessary items are available for practical work. | Conducting practicals for UG students. | 15x15 m and 30 students. | Insect collection kit, microscopes, light traps etc | Oven, microscope, bee keeping boxes, weighing balance. |   - |
| **Zoology and Botony** | Preserved specimens of different organisms, charts, models etc. are available for practical purpose. | For conducting UG students practicals. | 15x15 m and 30 students. | All the facilities required for UG and PG students | Microscpoe, oven, seed counter, incubator. |   - |

| | | | | | | |
|---|---|---|---|---|---|---|
| **LPM** | Different models of live stocks and various equipments for rearing animals and poultry are nicely displayed for showing to the students | Practical purpose for students | 15x15 m and 30 students. | Display models for Murrah buffalo (male and female) and Sahiwal cow. | Lactometer, spinner, brdijo castrator, separator for cream, water bath, balance, refrigerator. |  |
| **Computer Lab.** | Computer Lab is well equipped with computers of latest specification along with internet access, printers scanner *etc*. | This lab is established for providing basic computer education to the students viz. handling, configuration, software uploadingetc. | 24x40 m and 40 students. | Computers with active internet connection. | Computers, Scanner, printers. |  |

### 6.5.3.3. Student READY/ In-Plant Training / Internship / Experiential Learning Programmes:

*Clearly mention about the implementation of Student READY/In-plant training/ Internship/Experiential Learning programmes and learning outcomes as per the guidelines of ICAR. Profit sharing mechanism (amount) shall be mentioned for each ELP unit sanctioned by the ICAR for the college.*

The Student READY (Rural Entrepreneurship Awareness Development Yojana) programme aims to provide rural entrepreneurship awareness, practical experience in real-life situation in rural agriculture and creating awareness to undergraduate students about practical agriculture and allied sciences. The programme helps in building confidence, skill and acquire Indigenous Technical Knowledge (ITK) of the locality and thereby, preparing the pass-out for self-employment. It also aims to provide opportunities to acquire hands-on-experience and entrepreneurial skills.

During the last year of graduation, students are also given hand-on training in Apiculture and Mushroom Production. During the training, the students learn by doing various aspects/techniques/ management of Apiculture and Mushroom cultivation.

### Experiential Learning programmes (ELP)

The Experiential Learning Programme aims for promoting professional skills and knowledge through hands on experience, building confidence and ability to work in project mode and acquire enterprise management capabilities. The programme has provided a very good platform for students with an approach of "*Learning by Doing*" and "*Seeing by Believing*" and gives a new direction to the

Undergraduate students which develop thinking, skillful, expert, manager, human resource in the area of agriculture, horticulture, forestry and other allied disciplines.

During the courses of **Practical Crop Production I & II,** the students do hand-on training on crop planning, raising field crops in multiple cropping systems; field preparation, seed treatment, nursery raising, sowing, nutrient management, water management, weed management and management of insect pest and diseases of crops; harvesting, threshing, drying, winnowing, storage and marketing of produce, preparation of balance sheet including cost of cultivation, net returns per student as well as per team of a group of students.

Students of II$^{nd}$ Year learning to make Ber candy under Experiential Learning Programme

Dignitaries of the University visiting the laboratories and the students activity under ELP

## Internship Programme (Rural Agriculture Work Experience)

Rural Agricultural Work Experience (RAWE) enable the students to gain rural experience, give them confidence and enhance on-farm problem solving abilities in real life situations, especially in contact with farmers, and growers and ultimately help in buildingand strengthening capacity of individual student. This course includes multiple componenets *viz.*

a) Orientation and basic training for 1 week (introduction, objectives, and activities).

b) Rural experience through village placement for 9 weeks (group dynamics in coordination and cooperation among interns and farmers).

c) Crop production technology training including watershed management; high-tech agriculture; natural resource management in different cropping systems and agro-climatic zones of the state; techno-economic survey, documentation of information through survey and discussion with farmers, preparation of farm plans and family budget, information on bank loans for agro-projects.

d) Implications of WTO.

e) Extension Education Programmes: study of programmes and activities of various agricultural developments, extension agencies and institutes.

f) Interactions with the farmers and communication skills for effective extension methods.

Farmers' were also made aware of the University publications like Haryana Khetito aquaintain them with latest agricultural technologies for raising successful field crops. Farmers are also registered with the e-mausam website which is run through the Department of Agrometerology of CCS HAU, Hisar to provide them advance weather prediction in order to plan various agricultural activities in advance.

## Preparation of report

During the last 2 weeks of RAWE programme, the students also learn to prepare reports on their rural experience under RAWE, agro-industrial trainings attained, self employment training received, programmes and activities of various institutions visited, major constraints in crop production and suggestions to improve income of farmers, *etc.* Finally, students present their report that is submitted for evaluation of university level committee. Students are evaluated on multiple criteria including programme, report, presentation, *viva-voce* and other inputs likepunctuality, enthusiasm, conduct, leadership qualities, sincerity and devotion displayed by them.

RAWE students demonstrating the technology to the farmers of the district Sirsa

## In-plant training

In-plant training not only provides industrial exposure to the students but also develop their career in the high-tech industrial requirements. Students are enrolled to reputed companies dealing with agro-inputs, work and produce. Here, students initially get counselled as per their specific intersts in various streams,on the basic concepts and procedures of the selected domain. Students are thus, trained as future-ready graduates to face this competitive world with their acquired knowledge, problem solving attitude in the minimum period. Such trainings being provided in entirely different practical environment, prepare them as future entrepreneurs.

interns go for 5 weeks training with different agro-industries as wide as post harvest technology; agro processing; quality control, evaluation and problem solving in agro based industries;crop production, seed production and testing; soil and water testing, fruit and vegetable technology and nursery management, commercial bee keeping; repair and maintenance of plant protection equipments; mushroom production technology; plant clinic; operation, repair and service of farm machinery, diesel engines, pumping sets and electric motors; dairy and poultry farming; farm forestry and agricultural meteorology,*etc*.

The Interns receiving certificate after successfully completing the In-plant training

**6.5.3.4 Curricula Delivery through IT (smart class rooms/interactive board etc.):** *Whether the College is using smart class rooms/interactive board etc. for teaching and practical's. Number of class rooms upgraded as smart class rooms should be mentioned.*

There are well furnished lecture halls equipped with modern audio-visual aids like Interactice flat panel, multimedia, computers and white boards for effective teaching. Out of the five, four lecture halls are smart classrooms.

| | Curricula's | | | | |
|---|---|---|---|---|---|

### 6.5.4.5. Examination and evaluation process

| Sr. No. | Name of degree programme | Examination pattern | | | Evaluation process | | | |
|---|---|---|---|---|---|---|---|---|
| | | Theory (External/ Internal) | Practical (External/ Internal) | Viva-voce | Theory (External /Internal) | Practical (External/Internal) | Comprehensive written | Viva-voce (Thesis and comprehensive) |
| 1 | UG B.Sc. (Hons.) Agri. 4 year programme | External | Internal | Internal | External | Internal | - | - |
| 2 | M.Sc. (Soil Science, Agronomy and Genetics &Plant Breeding) | Internal | Internal | External | External | Internal | - | External |
| 3 | Ph.D.(Soil Science, Agronomy and Genetics &Plant Breeding) | Internal | Internal | External | External | Internal | External | External |

External pattern of examination is followed only for theory portion at the end of the semester for regular courses but for non-credit courses evaluation is done through internal process and the papers for non-credit courses are set at the level of respective course teacher. Grade point in the paper is the total marks obtained by a student out of 100 divided by 10. However, if a student got at least 50 % marks in aggregate in a paper and is failing by 0.5 marks either in theory or practical (not both) of that paper, the awards were rounded off to the next higher number just to pass the student in that paper. The rounding off advantage is not to be counted towards calculating the grade point. This provision is applicable only if the student is failing in not more than two papers.

### 6.5.4.6. NCC/NSS units

**1. NCC Unit**

**Existence and Functioning of NCC Unit and how it is benifiting the student development (A brief report)**

The College of Agriculture, Kaul is functioning under 10 HAR NCC Bn, Kurukshetra with an authorized total strength of one ANO (Lieutenant Dr. R.S. Garhwal) and 53 cadets including Senior Division and Senior Wing cadets. The unit has an enrolled strength of 53 cadets ofwhich 18 are girls. Cadets enrolled were given institutional training and have option to participate in adventurous activities, community development programmes, various camps at national level and annual training camps; youth exchange programmes, sports and cultural activities. The NCC Company of the college comes under the Ambala Group of Haryana and Chandigarh NCC Directorate. Associate NCC Officer (ANO) and various other Permanent Instructor staffs took classes on various common and specialized subjects.Parades are arranged on every Wednesday and Thursday. The cadet sare detailed timely to attend several types of camps conducted at the All India level, state and unit levels *etc*. Cadets actively participated in social service activities like blood donation, tree planting, campus cleaning, pulse polio immunization project, community works, AIDS awareness programmes, cancer awareness programmes, waste cleaning programmes, *etc*. The students opting for NCC keep themselves inclined towards military services and for this purpose majority of the students usually passes vigorous tests/examinations for securing B and C certificates which in turn help in their selection to commission ranks.

COA, Kaul NCC Cadets conducted various activities during NCC Annual Training Camp-147 at Kurukshetra University, Kurukshetra from 18-24.10.2021

UO Ajay Kumar conducted various activities at All India Thal Sainik Camp 2022 at Delhi Cantt. from 14.09.2022 to 25.09.2022

NCC Cadets of COA Kaul conducted *Har Ghar Tiranga-Ghar Ghar Tiranga* Rally in Kaul village

**Year wise Strength of NCC Cadets**

| Year | 1st Year | 2nd Year | 3rd Year | B Certificate Passed | 'C' Certificate passout | |

## 2. NSS Unit

### Existence and Functioning of NSS Unit and how it is benifiting the student development (A brief report)

National Service Scheme (NSS) came into existence in colleges and universities of India on 24th September, 1969 on the birth centenary of Mahatma Gandhi. He believed that the students should do something positive to raise the life of the villagers to higher material and moral levels. In CCSHAU the NSS unit was established in 1970. The overall objective of NSS is to serve the community by the students by following the instructions of college. It aims at improvement in personality through service to the community. NSS volunteers from NSS Unit of College of

Agriculture, Kaul are actively participating in various activities under Annual NSS Camps, University Level NSS Camps, State Level NSS Camps, National Integration Camps, National Youth Festivals and training under Red Cross Society *etc*.

College of Agriculture, Kaul, organized a seven days NSS Camp at Village Dherdu (Kaithal) from 13.04.2019 to 19.04.2019

NSS volunteer from COA, Kaul attended National Integration Camp held at Chaudhary Bansi Lal **University,** Bhiwani BRCM College, Bahal and Kurukshetra University during November, 2021 and 2022

State Level NSS Camp held at Chaudhary Ranbir Singh University, Jind during 19-25 October, 2021

National Youth Camp held at Hubballi, Dharwad, Karnataka during 12-16 January, 2023

**NSS volunteers participated in various NSS Events**

| Session | Annual Camp | University Level Camp | State NSS Camp | National Integration Camp | National Youth Festival | Youth Red Cross Training | Total volunteers participated |
|---|---|---|---|---|---|---|---|
| 2017-18 | 36 | 00 | 02 | 00 | 00 | 00 | 38 |

| Total | 209 | 47 | 06 | 18 | 01 | 01 | **282** |

**The major activities of NSS and NCC unit is summarised below:**

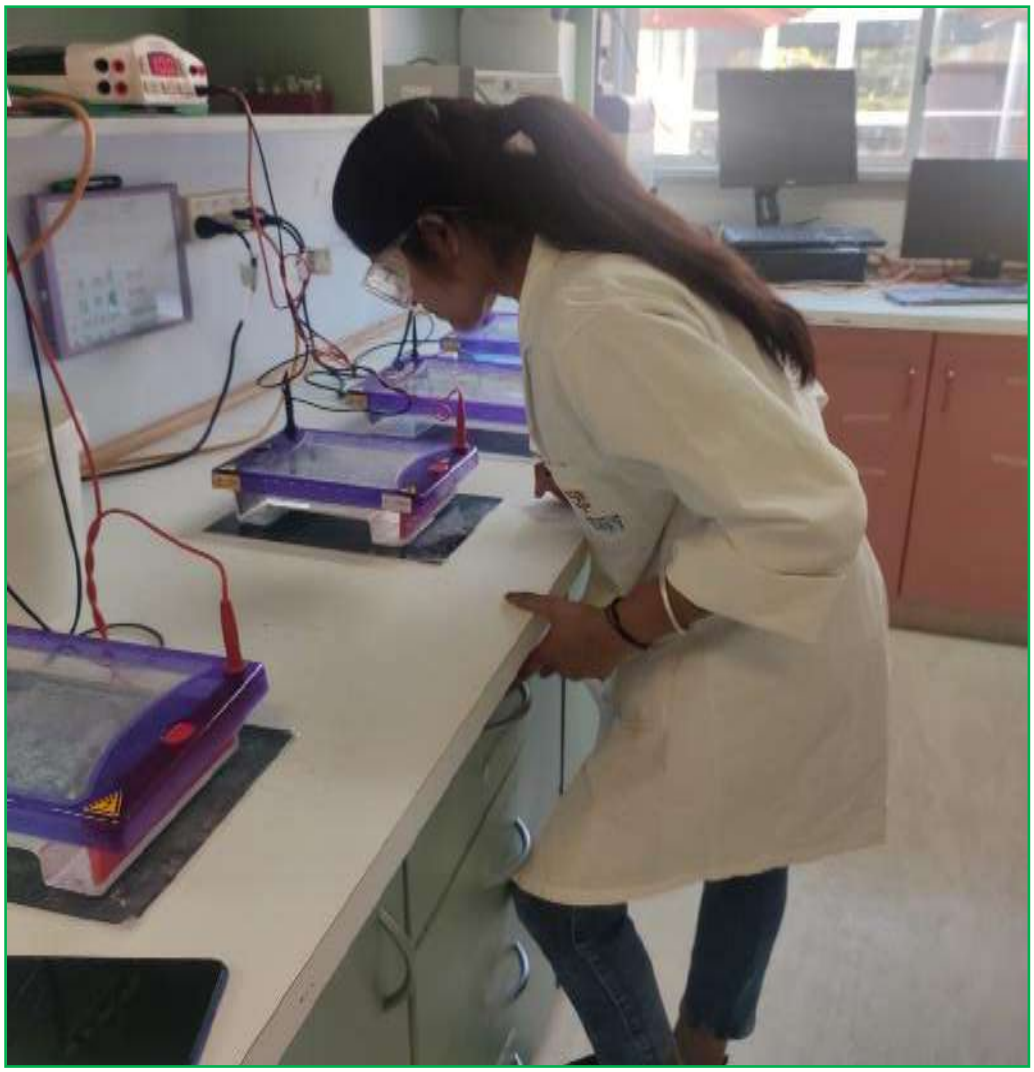
| Year | Activities undertaken/ Salient Achievements |
|---|---|
| **2017-18** | • Celebration of World Environment Day on 05.06.2017<br>• Celebration of International Yoga Day on 21.06.2017 |
| **2018-19** | • NCC cadets organized cleanness drive in the campus under *Swachhta Hi Seva* compaign on 20.09.2018<br>• Celebrated Surgical Strike Day on 29.09.2018 |
| **2019-20** | • A rally to aware the people to cast their votes held on 22.10. 2019<br>• *Parthenium* awareness camp celebrated from16-22.08.2019<br>• Cleanliness drive on 02.10.2019<br>• Anti-plastic use awareness on the occasion Gandhi Jayanti 02.10. 2019<br>• Celebration of International Yoga Day on 21.06.2019<br>• Organized a rally under "*Beti Bachao Beti Padao Abhiyan*" on 18.10.2019 |
| **2020-21** | • Annual NSS camp organised from 13-19.03.2021<br>• Cleanliness drive on 02.10.2020<br>• *Parthenium* awareness camp from 16-22.08.2020<br>• National Youth Day on 12.01.2020<br>• Celebration of International Yoga Day on 21.06.2021 |
| **2021-22** | • *Parthtenium* eradication drive from16-22.08.2021<br>• Annual NSS camp organised from 08-14.03.2022<br>• Covid – 19 awareness rally on 28.08.2021 |

Activities organized during Annual Athletic Meet during 15-16.02.2019

3. **Mountaineering Club:** Mountaineering club organised traking and river rafting tour to Rishikesh, Uttarakhand on 03.07.2018

Agricultural Education day celebrated on 03.12.2018

Prize Distribution Function organized on 23.04.2018



Activities during Mountaneering Tour on 03.07.06.2018

Annual Athletic Meet 27-28 Feb, 2020

COA, Kaul student visited Czech University of LifeSciences, Pragueunder NAHEP-IDP from 25 March, 2019 – 25 May, 2019

COA Kaul student visited University of Sydney, Plant Breeding Institute under NAHEP-IDP from 12.03.2020 to 12.06.2020

International Yoga Day 21 June 2022

Cleanliness drive by students of COA, Kaul during 02.09.2022

Governor of Haryana, Sh. Bandaru Dattatreya visited the ELP Stall
organised on occasion of Kisan Diwas at CCS HAU, Hisar on 23.12.2021)

Vice Chancellor along with other dignitories of the University visiting the stall of COA, Kaul during *rabi* krishi mela held from 13-14.09.2021

Agriculture Minister of the State Sh. Jai Parkash Dalal visited the stall of COA, Kaul during Krishi Mela held on 09-10.03.2021

Cleaning activity preformed by NSS Volunteers during Annual NSS Camp at village Dherdu (Kaithal) during 8-14 March, 2022

Rally on social issues during Annual NSS Camp at village Dherdu (Kaithal) during 8-14 March, 2022

**6.5.4.7.Language laboratory**:*Student has a good command of the language for communication purposes with clarity and accuracy being vital for effective and efficient communication. What help one to acquire such proficiency in a language is the process and the method of learning that language. In this regard mention the type of methods:*

Multimedia and high-tech language laboratory was established in the college in the year 2023 with an outlay of Rs. 50.00 lakhs. The language Lab has the facility of thirty (30) computers with interactive flat panel and fast internet connection. It's a furnished air conditioned lab with computer tables and chairs for the students. The Language Lab is used to facilitate class room engagement and interaction *via* computer-based exercises and activities to maximize proficiency in language components (vocabulary and pronunciation) and in language skills (listening, speaking, reading and writing). The English Language Lab provides a diverse experience from the conventional system of teaching and learning English language communication skills and offers advanced features such as authentic recorded materials spoken by different native speakers that expose the students to the near – ideal pronunciation of native speakers. Students are trained on developing their listening and speaking skills with special sessions that focused on pronunciation and communication competence. A blended methodology of language teaching is adopted in the language lab with the teacher explaining the language concepts, guiding the students through the different modules and then the students proceeding to practice them individually at their own computer systems in the lab. The learning is teacher assisted at the outset with the teacher introducing the course materials and then it proceeds to self-guided independent learning where the students individually focus and practice on language skills

that they are less proficient in. Also, teachers monitor student's lab activities and receive instant reports on their performance in tasks/exercises which is utilized to customize the teaching and learning activities to maximize language competence in the lab and in the classroom.

**6.5.4.8. Cultural centre:** *Does the college have cultural centre to empower student leaders to explore, celebrate, and educate the campus community about the diversity among them? Does the college offer and inclusive and reflective space, multicultural programming and support services that encourage positive interaction, academic, persistence, and growth among students, faculty, and staff?*

| | | |
|---|---|---|
| *Does the college have cultural center to empower students, leaders to explore, celebrate and educate the campus community about the diversity among them.* | Yes | The Auditorium/Students activity centre was established on Aug, 27 2001,with a seating capacity of 275 and a full fledged stage. It is regularly used by the students to perform educational, recreatioinal activities for the college staff, students and campus residents. Few important aspects include celebrtation of Freshers day, dance and dramatics club activities, NSS events, *etc.* Where students work in unison, imbibe leadership and cooperational abilities, *etc.* Multi cultural linguistic events inculcate in students the comeraderie sharing and learning habits. Multiple halls allow running the offices of various clubs that are run by the students under the guidance of teachers<br>**Music and DramaticsClub**<br>The Music and Dramatics club takes the responsibility of organizing various cultural activities such as dance, drama, skit and help in building confidence among the students and also refresh the students from the loads of studies. The cultural activities like quiz, rangoli, mehandi competition are organised in the students activity centre (Auditorium) regularly by the students of the college. |
| *Does the college offer inclusive and reflective space, multi cultural programming and support services that encourage positive interaction, academic persistence and growth among students, faculty and staff?* | Yes | The college has sufficient facility to organize multi-dimensional cultural activities for encouraging positive interaction among teachers, students and all the campus residents. Quiz and competitions are organized for academic persistence and growth of the students, faculty and staff of the college. Every year three major cultural programmes *viz.* Freshers' Day, Teachers Day and Farewell function are organized in which all the stakeholders (students, staff and residents) actively participate.<br>**Art and Graphics Club**<br>College of Agriculture, Kaul has Art and Graphics Club in which 40 students are selected and involved in various activities organised like poster making, designing of templates for PowerPoint presentation, assignment making, developing educational material, farm publication, designing, painting, drawing, photography, calligraphy, paint making, lithography, visual art, rangoli making, world cloud *etc*. This club organise above activities and competition for the purpose of developing creativity among the students. On the basis of performance, the students are rewarded and awarded. Our students take part in various competitions at college, university and national level and for that trainings are specially organized.<br>**Literary Club:**<br>This club aims at overall personality development of students by training them in speech activity in front of public and increasing their knowledge of general affairs. Declamation and debate contests were held among the |

| | | |
|---|---|---|
| | | students to develop leadershipship quality and overall personality development.<br>**Young Journalism Cell**<br>Young Journalism Cell works for the coverage of college events and preparing reports about activities organised by college including academic activities, sports events,NSS & NCC events, cultural, arts/graphics activities, extension/research activities *etc*.The students of Young Journalism Cell have been trained in the photography, videography, news writing and publishing in the print, electronic and social media. |

Declamation contest (Literary club)

Cultural programme organised by Music and Dramatic club

Poster making competition organised by Art and Graphics club during 15.02.2023

**6.5.4.9. Personality Development:** *Personality development programme is aimed at increasing employability of the students. Whether the college has provisions for inclusion of functional grammar in Standard English, speaking skills, reasoning, group discussions interview skills, personal interviews, quantitative ability, verbal ability, mock tests and some special sessions to promote the personality development in the students?*

| *Whether the college has provisions for inclusion of the following* | | |
|---|---|---|
| *Functional Grammar in standard English* | Yes | The faculty of the college takes care of the English speaking and writing skills of the studentsby conducting declamation, debate contests *etc*. Gramatical errors by the students are regularly pointed out and improved through English course and by faculties of the college. The course curriculum of on English takes care of the needs of students related to English language and grammer. |
| *Speaking skills* | Yes | Students are encouraged to speak English as the language of communication in the premises of college. |
| *Reasoning* | Yes | At some of the occasions, the students are apprised and got involved in enhancing the reasoning skills for competitive exams. |
| *Group Discussion* | Yes | Emphasis is always given on involvement of the students for group discussions on latest issues of the national and international |

| | | |
|---|---|---|
| | | importance |
| *Interview skills* | Yes | The students are made acquainted with the interview skills so that they may face the interviews for placement after completing their study with confidence. They are guided and trained about the mannerism, question-answer skill and other behavioural issues to perform in the interviews. |
| *Personal Interviews* | Yes | At several occasions the students are interviewed personally for improvements in their personal interactions. |
| *Quantitative ability* | Yes | Quantitative ability of the students are improved by conducting tests during the tutorial classes individually by the teachers of the college. The students remain engaged in studying the competitive books for enhancing their quantitative aptitude. |
| *Verbal Ability* | Yes | There is strong bonding of students with the faculty and both the partners can be seen interacting at any point of time in the college. |
| *Mock Test* | Yes | The students are prepared for their exams by conducting regular mock tests by the faculty during the tutorial classes in every semester. |
| *Some special sessions for personality development* | Yes | Trainings on Personality Development for the students are organised at the college regularly. Recently, 10 days training programme was organised for the same. |

### 6.5.5. Physical Facilities

**6.5.5.1. Hostels:** *Clearly mention the number of hostels available for the College students for boys and girls, separately with its total capacity, students per room accommodated in each hostel, mess facility, drinking water, indoor games specially for girls, cleaning of hostel premises, transport facility, emergency medical facility etc.*

There are separate hostels for boys and girls having accommodation capacity of 204 and 100, respectively. There is one dispensary and one jeep is available for transport to the nearby hospitals during emergency.

**Hostels**

| **No of Hostels** | **Boys - 01** | **Girls -01** |
|---|---|---|
| **Total capacity** | 204 | 100 + two 10-type quarters are converted for accommodation to 16 students (additional capacity of 65 students is being added) |
| **Students per room** | 36 rooms are singlebedded and 56 dormerties are triple-bedded | 22 rooms are single bedded and 12 dormerties are triple bedded |
| **Mess facility** | Available | Available |
| **Drinking water** | Available with R.O. | Available with R.O. |
| **Indoor games** | Table tennis, chess, gym, ludo, carom, *etc.* | Table tennis, chess, gym, ludo, carom, *etc.* |
| **Transport facility** | Available (jeep & minibus) | Yes |
| **Emergency medical facility** | Dispensary | Yes |
| **Cleaning of hostel premises** | Twice a day | Twice a day |

**Game facilities in the Hostels:**

| Games | Indoor | | | Outdoor |
|---|---|---|---|---|
| **S**tudents | Gym | TT | Carrom/chess/ludo | Volly ball |
| Boys | Yes | Yes | Yes | Yes |
| Girls | Yes | Yes | Yes | Yes |

**6.5.5.2 Examination Hall:***Mention the availability of number of examination halls, its capacity etc. for the college.*

Examinations (midterm and final) are conducted during prescribed period in five (05) lecture/ smart class rooms and one examination hall. Practical exams are conducted in the 11 respective leboratories and emamination/ lecture halls as per need.

| Examination Hall | Numbers | Total capacity |
|---|---|---|
| **Examination Hall** | 01 | A separate hall exists for examinations with the seating capacity of 50 students in the college. |
| **Lecture/smart class rooms** | 05 | 280 |
| **Total** | 06 | 330 |

**6.5.5.3. Sports and recreation facilities:** *Clearly mention the number of indoor and outdoor sports facilities available for the College students. A brief note on day to day management and use of these facilities shall be provided in the report.*

There are well laid-out playgrounds and different play courts for sports and recreational activities. Additionally, hostels also consist of separate indoor games facilities for boys and girls as mentioned earlier (6.5.5.1).

| No. and name of Indoor sports facilities | No. and name of Outdoor sports facilities |

**Brief note for day to day use and management:**

**a) Sports facilities:**

Students are deived into four houses. Inter house competition are conducted during Annual Athletic Meet where winners are suitably awarded good sports persons also take part in inter college and inter university competition. The students of 1$^{st}$, 2$^{nd}$ and 3$^{rd}$ year in each semester have to mendatorly opt forco-curricular activities (CCA). The students have to optany of the sport/music/drama activity etc. as per his/her choice. There is a provision of Sports Coordinator (faculty member), game organizer/coach and a game attendant who conducts/coordinates these activities. Separate boys and girls team are formed for volleyball, kabaddi, basketball, cricket *etc,* depending on the number and strength of the students. Students practice in the evening hours (6:00 to

7:30 PM in summers and 5.00 to 6.30 PM in winters) in the college playgrounds on all working days except the examination week under the guidance of the sports organizer/coach. The attendance of the students is recorded by the coach in the playground and accordingly the grades in CCA are given based on student's attendance and performance. The maintenance of the playgrounds/courts is done with the help of game attendants, maintenance unit and other supporting staff of the college.

Glimpses of Sports activities

**6.5.5.4. Auditorium:** *Does the college have auditorium? Mention its year of construction, sitting capacity and how frequently being used for the College functions.*

| | |
|---|---|
| **Year of construction** | **August 2001** |
| **Seating capacity** | 275 |
| **Frequency being used for College Functions** | Fortnightly or as per need |

**6.5.5.5. Exhibition Hall/Museum (description of events):** *Does the college have the Exhibition Hall/Museum? Mention about its use and special events being conducted in these units.*

There is one exhibition hall depicting information about the university & college of Agriculture, Kaul. Various samples related to different disciplines are displayed to impart information to the visitors as well as students.

| | |
|---|---|
| **Exhibition Hall** | **01** |

## 6.5.6. RESEARCH FACILITIES

**6.5.6.1. Postgraduate laboratories and Equipments**: *Clearly mention the department wise PG laboratories and equipment housed in individual laboratory in the Colleges along with any other research unit.*

College is having PG degree programme in three disciplines (Agronomy, Soil Science, and Genetics &Plant Breeding) and the UG laboratories are being used for conducting/analysing experiments of PG students. A separate well equipped PG Lab has been established in the discipline of Soil Science. UG laboratories of the college are well equipped as per norms/guidelines of ICAR and the major equipments are listed under:

**List of major equipments at present in the college**

| S. No. | Name of equipment | Cost (in Rupees) | Location/Lab |
|---|---|---|---|
| **1.** | Kelplus Automatic Macro Block and Digestion system | 267216 | Soil Lab |
| **2.** | Hot air Oven | 75900 | Soil Lab |
| **3.** | Rotary shaker Horizontal | 57000 | Soil Lab |
| **4.** | Wiley Grinder | 54000 | Soil Lab |
| **5.** | Spectrophotometer | 274312 | Soil Lab |
| **6.** | Conductivity meter | 59800 | Soil Lab |
| **7.** | BOD Incubator | 60000 | Soil Lab |
| **8.** | Electronic balance | 76518 | Soil Lab |
| **9.** | Multimedia projector | 66607 | Soil Lab |
| **10.** | Flame photometer | 50873 | Soil Lab |
| **11.** | Spectrophotometer | 397000 | Soil Lab |
| **12.** | Seed germination Chamber | 79600 | Botony Lab |
| **13.** | Digital research triangular microscope | 269859 | Botony Lab |
| **14.** | Trinocular sterozoom microscope | 87984 | Ento Lab |
| **15.** | Heavy duty universal wood working machine | 56100 | Ag. Engn Lab |
| **16.** | Amar Plot thersher | 52000 | Ag. Engn Lab |
| **17.** | Agriculture thresher | 12500 | Ag. Engn Lab |
| **18.** | Rotavator- Field King | 96000 | Ag. Engn Lab |
| **19.** | Tractor Massey | 571920 | Ag. Engn Lab |
| **20.** | Deep freezer | 56410 | Hort. Lab |
| **21.** | Cold storage | 498375 | Hort. Lab |
| **22.** | Fruit pulper (capacity 400-500 kg/hr) | 76500 | Hort. Lab |
| **23.** | Screw juice extractor | 74000 | Hort. Lab |
| **24.** | Hydraulic juice press | 173600 | Hort. Lab |
| **25.** | PP cap sealing machine | 86800 | Hort. Lab |
| **26.** | Shrink Wrapping machine | 93600 | Hort. Lab |
| **27.** | Mechanical dehydrator | 18990 | Hort. Lab |
| **28.** | Pickle mixer (Capacity 100 kgs) | 12500 | Hort. Lab |

**6.5.6.2. Research Contingency:** *A note on amount of research contingency for each department shall be provided. Whether it meets the students' demand?*

The PG degree programme and its research contingency for student's demand are met through state Scheme (1012 A-9 Agri (A) state) of the college.

| S.No. | Years | Allotment Rs. | Balance amount Rs. | Spent in the year Rs. |
|---|---|---|---|---|
| 1 | 2019-20 | 742654 | 742654 | - |
| 2 | 2020-21 | 1387348 | 913667 | 371681 |
| 3 | 2021-22 | 2396861 | 361639 | 586288 |
| 4 | 2022-23 | 1684683 | 610641 | 544949 |

### 6.5.7. Outcome/Output

**6.5.7.1. Student Performance in National Examination:** *Provide detailed information in tabular form about student Performance in JRF/SRF/NET/ARS and other National Examinations for last five years. Only those students receiving fellowships should be mentioned here.*

| Sr. No. | Name of Examination | 2017-18 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | **Total** |
|---|---|---|---|---|---|---|---|---|
| **1.** | JRF | 6 | NA | 3 | NA | NA | - | **09** |
| **2** | NET | NA | NA | NA | 3 | 1 | - | **04** |
| **3.** | Other National Examinations IIM, IRMA, NAARM, NIAM, MANAGE, ISRO, SIIB, VAMNICOM, DMI. Etc. | 6 | 03 | 04 | 06 | 06 | 06 | **31** |

**6.5.7.2. Students Placement Profile:** *Provide detailed information in tabular form about student performance in ARS/and other national examinations/State level examinations or equivalent. Year wise placement profile shall be provided.*

| S.No | Years | No. of students | Placement organisation |
|---|---|---|---|
| 1. | 2017-18 | 08 | State govt. (07), Bank (01) |
| 2. | 2018-19 | 08 | DDA (01), Bank (04), IFFCO (01), SAU (01), State govt. (01), |
| 3. | 2019-20 | 07 | Bank (04), NABARD (01), FCI (02) |
| 4. | 2020-21 | 04 | Bank (03), FCI (01) |
| 5. | 2021-22 | 03 | Sate govt. (01), FCI (01), Bank (01) |

**6.5.7.3. Awards/Recognitions/Certificates:** *Provide information on awards/recognitions/certificates in tabular form for last five years separately for students and faculty.*

**Students:**

| **Sr. No.** | **Awards/Recognitions/ Certificates** | | **Year-wise Gold Medal Winners** | | | | |
|---|---|---|---|---|---|---|---|
| | | | 2017-18 | 2018-19 | 2019-20 | 2020-21 | 2021-22 |
| | **Name of the Awards** | **By No. of Students** | | | | | |
| **1.** | University Merit Gold Medal | 05 | - | 01 | 01 | 02 | 01 |
| **2.** | P.S. Lamba Gold Medal | 02 | - | - | 01 | 01 | - |

**Faculty:**

| Year | Name of faculty | Name of Awards/ Recognitions/Certificates | Remarks if any |
|---|---|---|---|
| **2017-18** | Dr. O.P. Chaudhary | • **Best research paper award 2018,** 9th Indian Science Congress Association HW Chapter Conference, GB Pant Univ. Agri.& Technology, Pantnagar, along withmy students PK Dalal and M Rathee<br>• **Best research paper** award 2018, Sam Higginbottom University of Agriculture Technology & Science, Allahabad during "International Conference on emerging issues in agriculture, environment and applied science" along with my students M. Rathee and P.K. Dalal<br>• **Best research paper award 2018,** Prayagraj | |
| | Dr. Manender Singh | • **Young Scientist Award-2017** awarded by (AIASA) in 2nd National Agricultural Convention on Agricultural Skill Development for Doubling Farmers Income held on 7.10.2017 at Bikaner, Rajasthan.<br>• **Young Scientist Associate Award-2017** awarded by Hi-tech horticultural society in Global Meet on Science & Technology for Ensuring Quality Life held during 26-30, November, 2017 at Kuala Lampur, Malaysia<br>• **Poster Presentation Award-2017** awarded by Hi-tech horticultural society in Global Meet on Science & Technology for Ensuring Quality Life held during 26-30, November, 2017 at Kuala Lampur, Malaysia<br>• **Young Scientist Award-2018** awarded by ICFA in the "International Conference on Food & Agriculture" held during 29-31March, 2018 at Dhanbad, Jharkhand, India | |
| **2018-19** | Dr Mehar Chand | • **Best poster award** for research paper entitled "Heterotic effects of maize hybrids of different maturity groups for grain yield" in International Symposium on Innerpreneurship: A need of Sustainable Agriculture" at CCSHAU, Hisar, Haryana during 2-3February, 2019 | |
| | Dr. Manender Singh | • **Scientist of the Year Award-2019** awarded in National Conference on Smart Agriculture & Food Security, SAFS-2019, held during 18-20January, 2019 at Jaipur National University, Jaipur | |
| | Dr. Ashish Jain | • **Best poster presentation award** 2018 on "Screening of cotton genotypes for resistance to sucking pest organized by CRDA & ICAR, R.C. NEHR, Umian | |
| **2019-20** | Dr. O.P. Chaudhary | • **Patent** for Portable honeybee colony manipulation cum anti robbing enclosure (PHMARE), 16.04.2019<br>• **Patent** for Multipurpose dispenser for honey bees, Application No. 320896-001, 21.8.2019<br>• **Young Fellow Award 2019,** For outstanding contribution and recognition in the field of Entomology, during 3rd Global Meet on Science and Technology at National Research Centre on Seed Spices, Ajmer, | |

| | | | |
|---|---|---|---|
| | | Rajasthan<br>• **Best research paper award** 2019, CCS Haryana Agricultural University, Hisar during "International Symposium on Innopreneurship: A Need of Sustainable Agriculture" along with my student M Rathee | |
| | Dr. Ashwani Kumar | • **Best Poster presentation award-2020** on "Integrated disease management of banded leaf and sheath blight in maize using different biorational products in National Symposium on Plant Disease Management for Food Security under Climate Scenario organized by IPS, New Delhifrom 9-10, January, 2020 | |
| | Dr. Vishal Goyal | • **Best Poster presentation award (Second) -2019-20** on "Impact of integrated nutrient management of STCR on soil physical properties under pearl millet-wheat cropping system organised by *Indian Society of Soil Salinity and Water Quality* from 7-9 Feb, 2019 under ICAR-CSSRI golden jubilee International conference on soil salinity | |
| | Dr Subhash Chander | • **Dr. A.P.J. Abdul Kalam Scientist Award** - 2019 in 9th International Conference on Agriculture, Horticulture and Plant Science organized by "The Society of Tropical Society, New Delhi" on June 27-28, 2019 held at Dharamshala (H.P.) India. | |
| **2020-21** | Dr. O.P. Chaudhary | • **Patent** for Universal strip hanger cum spacer, Application No. 201911010657 A, 25.9.2020<br>• **Patent** for Hands free honey bee observation grid frame, Application No. 201811048894 A, 21.8.2020<br>• **Best research paper award 2020,** Central Agricultural University, Imphal, Manipur | |
| | Dr. Manender Singh | • **Excellence in Teaching Award-2020** awarded in International web Conference on Global Research Initiatives for Sustainable Agriculture & Allied Sciences (GRISAAS- 2020) organized by Astha Foundation, Meerut, during 28-30 December 2020 | |
| | Dr. Vishal Goyal | • **Appreciation award** by worthy Vice-Chancellor o, CCS HAU, Hisar for best worker in the year 2020-21 | |
| | Dr. Sonika | • **Young women scientist award** by Agro-Environmental Development Society (AEDS) on the occasion of International web conference on new trend in agriculture, environmental and biological sciences for inclusive development during June 21-22, 2020 | |
| | Dr. Rinku Poonia | • **Best oral presentation award (Second)** on " Diversity and abundance of floral visitors in bitter guard cultivar, *PUSA Do Mausami* presented in National conference on agricultural resource management for Atam Nirbhar Bharat held on 17-19 July 2020 | |
| | Dr. Ashish Jain | • **Best poster presentation award** 2020 on "DUS Characterization in upland cotton organized by CRDA and OUAT, Odisha | |
| **2021-22** | Dr. O.P. Chaudhary | • **Patent** for Double entrance honey bee hive (DEHBH), 04.9.2021 | |

| | | | |
|---|---|---|---|
| | Dr. Vishal Goyal | • **Best poster presentation award** 2022 in I[st] International symposium on "Cereals for Food Security and Climate Resilience" on the Topic "Influence of different nutrient management practices on crop productivity and soil microbial properties in wheat under raised bed and flat bed planting system" organized by Society for Advancement of Wheat and Barley Research, Karnal and Indian Institute of Wheat and Barley Research, Karnal held online between January 18- 20, 2022 | |
| | Dr. Manender Singh | • **Young Scientist Award-2021** by Society for Scientific development in Agriculture &Technology on the occasion of International Web Conference On Global Research Initiatives for Sustainable Agriculture & Allied Sciences (GRISAAS-2021) organized by Astha Foundation, Meerut (U.P.) during 13-15 December, 2021 | |
| | Dr. Ashwani Kumar | • **Best Poster Presentation Award 2022** "Beta-tubulin gene in the differentiation among different isolates of (*Fusarium moniliforme* Sheld.) incitant of bakanae disease of rice by PCR analysis". IV[th] International Conference in Hybrid Mode on Innovative and Current Advances in Agriculture & Allied Sciences (ICAAAS-2022) at Himachal Pradesh University, Summer Hill, Shimla (H.P.) India during 12-14 June, 2022 | |
| | Dr. Darshana | • **Best oral presentation award**on "Use ofLandsat 8 Data to monitor vegetation health, water stress andtemperature over Northern region of India" at 30[th] National web conferencesoil and water management technologies for climateresilience, Agricultural and EnvironmentalSustainability,organizedbysoil conservation society of India, New Delhi from 14-16 December, 2021 | |
| Total | | **29** | |

**6.5.7.4. Employability:** *What are the set of achievements such as skills, understandings and personal attributes that make College students more likely to gain employment and be successful in their chosen occupations, which benefits themselves, the workforce, the community and the economy? Provide one-page note on the subject.*

The College of Agriculture, Kaul is entrusted for professional education in the domain of Agriculture. The course curriculum for the degree programme is pro-employment and entrepreneurship development. The students of this college are made capable so that after doing their degree from here, they can get employment in any government or non-government organization. Along with the technical education in agriculture science, we also provide life skills to the students & shape themto face any challenge in their life. This college ensure all round development of the students so that they can choose their own future streams in career planning. Right from the beginning, the orientation programme is undertaken to develop the spirit of professionalism among them. We provide need based and customised support to the students during the degree programme. The students are imparted human values and ethics at weekly interval in their tutorial classes along

with the scope of agriculture course which they have opted in their career. It is mandatory for all the students to get themselves register for co-curricular activities *i.e.* NSS, NCC. The students of NSS/NCC streams are involved in various social welfare campaigns like cleanliness, Pulse Polio, plantations *etc*. so that they can contribute in different social activities.

To ensure employability of the students, sufficient number of exposure visits are arranged to agriculture based subsidiary endeavours as well as employment generating entrepreneurs like mushroom, vermi- composting, bee keeping, dairy farming, seed production units *etc*. All the students undergo a special industrial training for 35 days in the last semester of the degree programme which help them to establish their own agro-based small scale enterprises. Practical knowledge of cultivation of crops is rendered to the students through the Practical Crop Production (PCP) course offered for one year so that they can get skills in production and management; and may become the professional crop advisors to the farming community for practising low external input agriculture in a sustainable manner.

To provide work experience to the graduates, Rural Agriculture Work Experience (RAWE) programme is organized as a part of curriculum to allow students to gain vitalexperience while working with the farmers for a duration of two months in different villages.It provides them an opportunity to understand the practical problems of agriculture in real time situations. After attaining practical knowledge of agriculture and allied fields like animal husbandry and horticulture, they may adapt scientific farming while conserving the precious resources simultaneously.

Apart from the technical knowledge in the field of agriculture and allied sectors, the college endeavor to provide knowledge and skills to the students in the field of behavioural science along with soft skills like communication, decision making, active listening, problem solving, team building, leadership, public speaking *etc.* Some specialised short duration trainings onpersonality and entrepreneurship development are organized to create student'sinterest in self-employment. In order to motivate and inspire the students at special occasions, the passed out alumni of the college working at apex positions in private and government sectors are invited to guide and advise our students regarding the opportunities of agriculture professionals in respective sectoral organisations. Such numerous interactions and group discussions motivate students to preparefor different competitive examinations and employment opportunity.

**6.5.8.** SSR of the College must have the SSR of all its Degree Programmes (following section 6.4), then the report of the Colleges shall be considered.

**6.5.9.** Certificate (Applicable when SSR is submitted for Programmes & College).

I, the Principal hereby certify that the information contained inSections 6.4 and Section 6.5.1 to 6.5.7.4 are furnished as per the records available in the college and degree awarding university.

**Signature of the Principal of the college with Date & Seal**

**6.5.10.** Each college shall submit SSR as mentioned in 6.5.8. It shall be prerequisite for the SSR of theAgricultural University.

Note: M.Sc and Ph.D. programmes started w.e.f 2019-20

**6.4.1. Brief History of the Degree Programme:** Clearly mention in which year the degree program was initiated along with its objective and accomplishments.

| | |
|---|---|
| Objectives of initiating UG programme (Principal office)- in bullet form | The college adopts the following goals and objectives which permeate in offering of various curricula and undertake research and extension activities by its departments to:<br>• To impart knowledge on agriculture and allied sciences.<br>• To impart hands on and practical knowledge in agriculture<br>• To disseminate technologies developed by the university through various extension activities.<br>• To identify the problems faced by the farmers reading agriculture and to solve them.<br>• To impart skills and knowledge on commercial agricultural production practices |
| Accomplishments of UG programme ( Principal office) in bullet form | B.Sc. (Hons.) Agri 4-Year Programme<br>In College of Agriculture, admissions in under graduate programme *i.e.* B.Sc. (Hons.) Agriculture 4 year are made every year. Based on the overall performance over 4 years, Gold Medal is awarded to a student having highest OGPA in the degree programme every year. |
| Objectives of initiating M.Sc /M.Tech. programme (Department) in bullet form | • To impart higher education to the students of this area<br>• To strengthen the College of Agriculture<br>• To promote research activities in the college |
| Accomplishments of programmes (Department) in bullet form | **M.Sc. (Soil Science, Agronomy and Genetics &Plant breeding)**<br>In College of Agriculture, Kaul admissions in post graduate programme *i.e.* M.Sc. Agriculture are made every year. Based on the overall performance over 4 years, Gold Medal is awarded to a student having highest OGPA in the degree programme every year. |
| Objectives of initiating Ph.D. programme (Department) in bullet form | • To impart higher education to the students of this area<br>• To strengthen the College of Agriculture<br>• To promote research activities in the college |
| Accomplishments of programmes (Department) in bullet form | **Ph. D. (Soil Science, Agronomy, and Genetics & Plant breeding)**<br><br>In College of Agriculture, Kaul admissions in post graduate programme *i.e.* Ph. D. Agriculture are made every year. Based on the overall performance over 4 years, Gold Medal is awarded to a student having highest OGPA in the degree programme every year. Departmental gold medal for the best thesis award is also adjudged every year. |

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Sanctioned Faculty | Faculty sanctioned | | | Faculty in place | | | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|---|---|---|---|
| | | Teaching | Research | Extension | Teaching | Research | Extension | |
| 1. | Principal | 01 | - | - | 01 | - | - | No |
| 2. | Professor and equivalent | 0 | - | - | - | - | - | No |
| 3. | Associate Professor and equivalent | 01 | - | - | 01 | - | - | No |
| 4. | Assistant Professor and equivalent | 18 | - | - | 17 | - | - | No |
| 5. | Guest faculty (specify) | 00 | - | - | 00 | - | - | No |
| 6. | Contractual faculty (specify) | 00 | - | - | 00 | - | - | No |
| 7. | Adjunct faculty (specify) - Emeritus Scientist | 00 | - | - | 00 | - | - | No |
| 8. | Placement officer | 00 | - | - | 00 | - | - | No |
| 9. | Any other (specify) - Emeritus Scientist | 00 | - | - | 00 | - | - | No |

**6.4.3. Technical and Supporting staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Sanctioned Technical and supporting staff | Technical and supporting staff in place | Vacant position | Technical and supporting staff recommended by the ICAR/UGC |
|---|---|---|---|---|
| 1. | **Office staff** | | | |
| | Assistant | 2 | 0 | 0 |

| | | | | |
|---|---|---|---|---|
| | Clerk | 3 | 0 | 0 |
| | PA/Steno | 01 | 0 | 0 |
| | Messenger | 04 | 02 | 0 |
| 2. | **Lab staff** | | | |
| | Lab Assistant | 06 | 03 | 0 |
| | Any other (Store Keeper) | 01 | 01 | 0 |
| 3. | **Field staff** | | | |
| | Beldar | 02 | 01 | 0 |
| 4. | **Driver** | 02 | 01 | |
| 5. | Any other (specify) | - | - | - |

***6.4.4.*** **Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of classroom and functional laboratories**

| | |
|---|---|
| Name of College/Department | College of Agriculture, Kaul |
| No. of lecture rooms with sitting capacity | 5 (capcity of 60 each) |
| No. of lecture rooms with Smart Board | 01 |
| No. of smart class-rooms | 03 |
| No. of labs under Principal's office with specialized purpose | 11 |
| Farm facilities | Yes, 32 acres (22 acres of Students' farm and 10 acres of orchard with different fruits trees)<br>Additionally, 82 acres of land under Rice Research farm is also available at COA Kaul, Campus. |
| Workshops | 01 |
| Any other instructional units being utilized for the award of the Degree Programme | 01 (Dairy Unit) |

**List of Major Equipments (Equipments costing more than Rs. 50,000)**

| S. No. | Name of equipment | Date of purchase | Cost (in Rupees) | Location/Lab |
|---|---|---|---|---|
| 1 | Kelplus Automatic Macro Block and Digestion system | 08-06-2017 | 267216 | Soil Lab |
| 2 | Hot air Oven | 25-04-2017 | 75900 | Soil Lab |

*Includes Ph. D. students from other departments. and Ph.D. (GPB) students who completed M. Sc. (PB) from outside

***6.4.5.* Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

**Information to be supplied by the Departments.**

| Degree programme | Total courses | Practicalcourses | Hands-on-trainingcourses | How far students are getting desired practical and hands-on-training as per the curriculum (bullet form) |
|---|---|---|---|---|
| **B.Sc. (Hons.) Agri.** | 07 | Module 1: Agro-advisory services | NA | NA |
| | | Module: 2 Organic production Technology | Organic production Technology | • Identification and nursery raising of important agro-forestry tress and tress for shelter belts<br>• Quality analysis of organic inputs and products.<br>• Computation of relative economics of organic production programmes.<br>• Socio-economic impacts; marketing and export potential of organic products<br>• Visit to an organic farm<br>• Quality standards, inspection, certification and labeling and |

| | | | | |
|---|---|---|---|---|
| | | | | accreditation procedures for<br>• Farm produce from organic farms |
| | | Module 3: Bee keeping | Bee Keeping | • Identification of important species of honey bees<br>• Handling of colonies<br>• Rearing techniques for queen bee, queen introduction, clipping and marking<br>• Management of bacterial, viral and fungal diseases of honey bees<br>• Identification and management of parasitic mites, wax moths, ants and wasps, and predatory birds<br>• Honey extraction, pollen, propolis and bee venom collection<br>• Processing of bee wax, royal jelly, production and collection<br>• Honey processing, packaging and honey testing |
| | | Module 4: Mushroom cultivation | Mushroom cultivation | • Identification of different edible species of mushroom<br>• Sterilization techniques for culture media<br>• Isolation and purification of cultures<br>• Mother spawn production, multiplication of spawn<br>• Cultivation techniques, harvesting, packing and storage;<br>• Disease and weed management<br>• Post-harvest technologies (preservation and storage) |
| | | Module 5: Seed production and technology | Seed production and technology | • Selection of suitable area/ locations for high quality seed/ planting material production<br>• Determination of land requirement and isolation distance in field crops & vegetable crops<br>• Seed production techniques of self pollinated crops<br>• Seed production techniques of cross-pollinated crops<br>• Hybrid seed production in field crops;<br>• Hybrid seed production in vegetable crops<br>Roguing in seed production plots |
| | | Module 6: Soil, plant, fertilizer test | Soil, plant, fertilizer test | • Collection and preparation of soil samples; Determination of texture, bulk density; Estimation of soil pH, EC, organic carbon, available NPKS, micronutrients (Zn, Cu, Mn, Fe).<br>• Quantitative rating of plant analysis data andin interpretation of results, critical |

| | | | | |
|---|---|---|---|---|
| | | | | nutrient concentration, critical nutrient ranges<br>• Collection of water samples; Quality criteria, classification and suitability of irrigation water, and water quality index; Determination of pH, EC, cations (Ca++, Mg++, Na+,K+) |
| | | Module 7: Commercial vegetable production | Commercial vegetable production | • Identification of vegetable seeds and plants<br>• Planning and layout of a kitchen garden<br>• Preparation of nursery beds<br>• Preparation of seedbeds<br>• Seed treatment before sowing with raising of vegetable seedlings in field and portrays in different seasons; Hardening of seedlings and treatments for hardening |

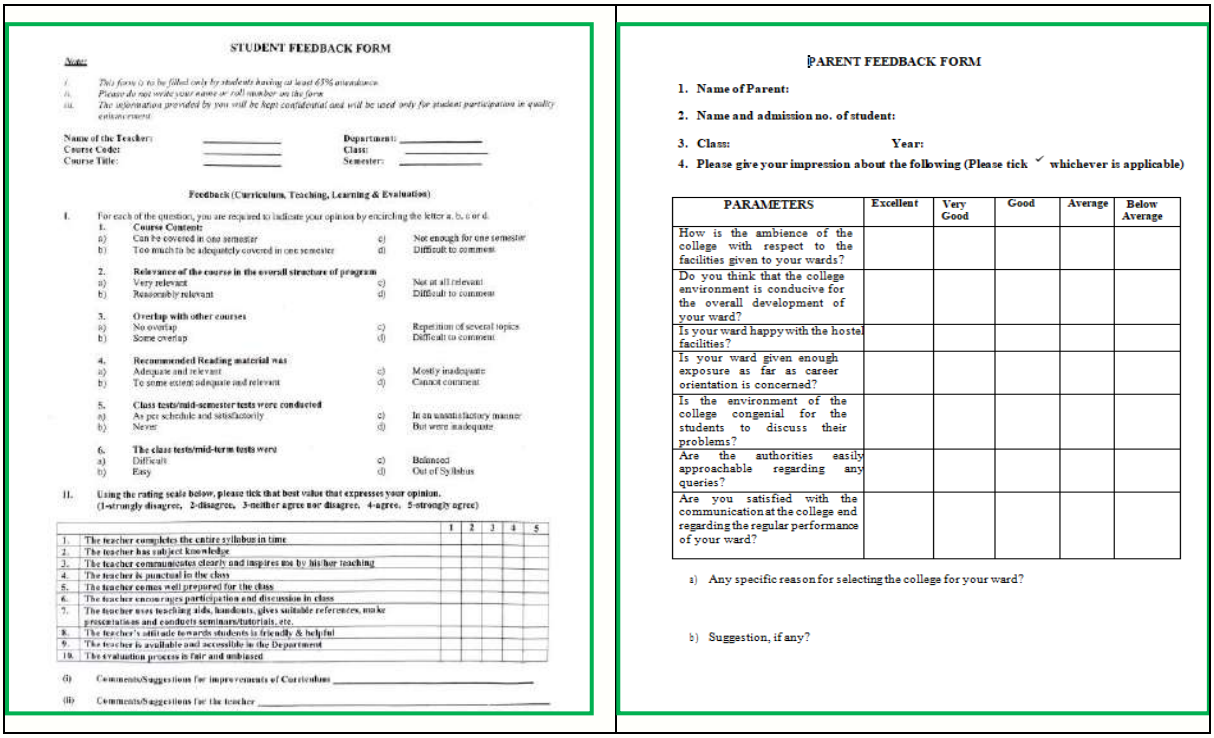
| **Degree programme** | Total courses | Practical courses | Hands-on-training courses | How far students are getting desired practical and hands-on-training as per the curriculum (bullet form) |
|---|---|---|---|---|
| B.Sc. (Hons.) Agri. | 74 | 07 | 06 | • The students are getting sufficient theory and hands on trainings as per curriculum.<br>• They additionally get enterprenourship training and hand holding. |
| M.Sc. | Courses are taught at main campus of CCS HAU, Hisar | | | |
| Ph.D. | | | | |

**6.4.6. Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Detailsof M.Sc. programmes offered by the Department:**

| **Name of Department** | **Numberof students on roll** | **Numberof PG faculty** | **Student-teacher Ratio** |
|---|---|---|---|
| **COA, Kaul** | 06 | 02 | 3:1 |

**Detailsof Ph.D.programmes offered by the Department:**



| **Name of Department** | **Numberof students on roll** | **Numberof PG faculty** | **Student-teacher Ratio** |
|---|---|---|---|
| **COA, Kaul** | 3 | 2 | 1.5:1 |

***6.4.7.* Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues*

*raised in the feedback?*

The feedback for each courses is duly filled in the proforma by students of the college at the end of semester. Suggestions related to live rock samples for identification purpose, bee keeping unit, mushroom unit, food processing instruments and machinery procurement *etc*. were received. College of Agriculture authorities immediately followed and acted upon the suggestions and samples of rocks and minerals were procured and bee keeping unit was established. Machinery and equipments for food processing were also procured.

Feedback proforma by parents of the students are also got filled in every year. Suggestions are asked to improve academic activities of the college in relation to their wards, in addition to cultural sports activities library opening during exam time *etc*. The demands are kept to the Principal of the college and were acted accordingly.

STUDENT FEEDBACK FORM

Note:

i. *This form is to be filled only by students having at least 65% attendance.*
ii. *Please do not write your name or roll number on the form.*
iii. *The information provided by you will be kept confidential and will be used only for student participation in quality enhancement.*

Name of the Teacher: _____ Department: _____
Course Code: _____ Class: _____
Course Title: _____ Semester: _____

Feedback (Curriculum, Teaching, Learning & Evaluation)

I. For each of the question, you are required to indicate your opinion by encircling the letter a, b, c or d.

1. **Course Content:**
a) Can be covered in one semester c) Not enough for one semester
b) Too much to be adequately covered in one semester d) Difficult to comment

2. **Relevance of the course in the overall structure of program**
a) Very relevant c) Not at all relevant
b) Reasonably relevant d) Difficult to comment

3. **Overlap with other courses**
a) No overlap c) Repetition of several topics
b) Some overlap d) Difficult to comment

4. **Recommended Reading material was**
a) Adequate and relevant c) Mostly inadequate
b) To some extent adequate and relevant d) Cannot comment

5. **Class tests/mid-semester tests were conducted**
a) As per schedule and satisfactorily c) In an unsatisfactory manner
b) Never d) But were inadequate

6. **The class tests/mid-term tests were**
a) Difficult c) Balanced
b) Easy d) Out of Syllabus

II. **Using the rating scale below, please tick that best value that expresses your opinion.**
**(1-strongly disagree, 2-disagree, 3-neither agree nor disagree, 4-agree, 5-strongly agree)**

| | | 1 | 2 | 3 | 4 | 5 |
|---|---|---|---|---|---|---|
| 1. | The teacher completes the entire syllabus in time | | | | | |
| 2. | The teacher has subject knowledge | | | | | |
| 3. | The teacher communicates clearly and inspires me by his/her teaching | | | | | |
| 4. | The teacher is punctual in the class | | | | | |
| 5. | The teacher comes well prepared for the class | | | | | |
| 6. | The teacher encourages participation and discussion in class | | | | | |
| 7. | The teacher uses teaching aids, handouts, gives suitable references, make presentations and conducts seminars/tutorials, etc. | | | | | |
| 8. | The teacher's attitude towards students is friendly & helpful | | | | | |
| 9. | The teacher is available and accessible in the Department | | | | | |
| 10. | The evaluation process is fair and unbiased | | | | | |

(i) Comments/Suggestions for improvements of Curriculum _____

(ii) Comments/Suggestions for the teacher _____

PARENT FEEDBACK FORM

1. **Name of Parent:**
2. **Name and admission no. of student:**
3. **Class:** **Year:**
4. **Please give your impression about the following (Please tick ✓ whichever is applicable)**

| PARAMETERS | Excellent | Very Good | Good | Average | Below Average |
|---|---|---|---|---|---|
| How is the ambience of the college with respect to the facilities given to your wards? | | | | | |
| Do you think that the college environment is conducive for the overall development of your ward? | | | | | |
| Is your ward happy with the hostel facilities? | | | | | |
| Is your ward given enough exposure as far as career orientation is concerned? | | | | | |
| Is the environment of the college congenial for the students to discuss their problems? | | | | | |
| Are the authorities easily approachable regarding any queries? | | | | | |
| Are you satisfied with the communication at the college end regarding the regular performance of your ward? | | | | | |

a) Any specific reason for selecting the college for your ward?

b) Suggestion, if any?

6.4.8. **Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, inthe tabular form, shall be provided.*

| Name of the Degree Programme | | B.Sc (to be supplied by Dean's office) | M.Sc (to be supplied by Department) | PhD (to be supplied by Department) |
|---|---|---|---|---|
| **Actual student admitted in last five years** | 2017-18 | 61 | 0 | 0 |
| | 2018-19 | 62 | 0 | 0 |
| | 2019-20 | 56 | 7 | 3 |
| | 2020-21 | 63 | 6 | 3 |
| | 2021-22 | 66 | 6 | 3 |
| | 2022-23 | 73 | 6 | 3 |
| **Attrition (%)** | 2017-18 | 16.4 | 0 | 0 |
| | 2018-19 | 22.6 | 0 | 0 |

| | | | | |
|---|---|---|---|---|
| | 2019-20 | 26.8 | 0 | 0 |
| | 2020-21 | 31.7 | 0 | 0 |
| | 2021-22 | 13.6 | 0 | 0 |
| | 2022-23 | 8.2 | 0 | 0 |

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now integral part of the teachingprogramme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

**Use of ICT application in teaching and practical for curricula delivery**

| Courses | Total courses | Theory | Practical | Type of ICT Application |
|---|---|---|---|---|
| B.Sc. (Hons.) Agri. | 74 | 51 | 23 | All the lectures in all the courses are taught digitally through Power Point Presentations using smart classroom. Online lecture notes are also supplied to the students. Information through goggle forms are also seeked. |

The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph. D. Degree Programmes, separately, and to be presented College-wise.

**6.4.10.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.11.** Certificate (Applicable when SSR is submitted for Programme)

I, the Principal, College of Agriculture, Kaul hereby certify that the information contained in the Section 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of the Principal of the College with Date & Seal**

## RESEARCH PAPERS PRESENTED IN SEMINARS/CONFERENCES/WORKSHOP ETC.

1. Chaudhary, O.P. (2017). Innovations in organic management of *Varroa destructor*. *Proc*. National seminar of awareness, motivation and technology transfer in beekeeping held at CSSRI, Karnal from 7-8 July, 2017: 35-44.
2. Chaudhary, O.P. (2017). Integrated *Varroa* management of IVM. *Proc*. National seminar of awareness, motivation and technology transfer in beekeeping held at CSSRI, Karnal from 7-8 July, 2017: 7-13.
3. Lathwal, O.P. and Singh, I. (2017). Skill development of spray professionals for enhancing the bioefficacy of herbicides. In extended summaries: Biennial conference of the Indian Society of Weed science on "Doubling farmer'sincome by 2022: The Role of Weed Science", MPUAT, Udaipur, India during 1-3 March, 2017.
4. Rinku and Chaudhary. O.P. (2017). Determination of preference of modern day sunflower hybrids bythe honey bees over old day population. *Proc*. International conference Technological advancement for sustainable agriculture and rural development (TASARD), held at RAU, Samastipur from February 20-22, 2017: 280.
5. Kumar, A., Singh, N., Kushal R., Yadav, N.K. and Kumar, A. (2017). Evaluation of plant extracts and fungicides on anthracnose disease of bottle gourd under screen conditions. In: National symposium on "Biorational approaches in plant disease management" and annual meeting of INSOPP, dated Oct. 27-28, held at Dr. Y.S. Parmar University of Horticulture and Forestry Nauni, Solan, Abs.No. P-028:59.
6. Jaglan, M.S., Mehra, R., Kumar, A. and Taya, A.S. (2017). Evaluation of sugarcane genotypes for their reaction against major insect-pests in subtropical India. In: International symposium on sugarcane research since CO 205: 100 years and beyond. Sept. 18-21. Coimbtore, Abs.No IV-P45:398-401.
7. Yadav, L., Kumar, A., Singh, H., Punia, R. and Singh, N. (2020). Integrated disease management of banded leaf and sheath blight in maize using different biorational products. In: National symposium on plant disease management for food security under climate scenario organized by IPS, New Delhi from January, 9-10, held at ICAR- Indian Institute of Wheat and Barley Research, Karnal. Abs. No. PP-5:101.
8. Mohan, M., Singh, S., Yadav, A.S., Kumar, A., Mehra, J. and Mamta (2020). Molecular genetics, pathogenic and symptomatological diversity in population of *Mycogone perniciosa* on the cultivable button mushroom *Agaricus bisporus*. In: 7$^{th}$ International conference of Phytopathology in achieving UN Sustainable development goals, Jan. 16-20, New Delhi. Abs. No. P (S 03):101.
9. Singh, V., Kapoor, P. and Kumar, A. (2022). Variability among different isolates of (*Fusarium moniliforme* Sheld.) incitant of bakanae disease of rice in Haryana during. In: 1$^{st}$ International symposium on Cereals for food security and climate resilience. Jan. 18-20. online mode. Abs. No. 4PPB-40:147.
10. Deswal, S.and Singh, M. (2019). Smart Agricultural Practices: Through mobile Applications. In: National conference on smart agriculture & food security, SAFS-2019, by Jaipur National University, Jaipur from January 18-20, 2019.
11. Singh, M., and Deswal, S. (2019). Climate Smart Agriculture: Sustainability of agriculture through technology & its implementation to enhance recent scenario. In: National conference on smart agriculture & food security, SAFS-2019, by Jaipur National University, Jaipur from January 18-20, 2019.

12. Deswal, S. and Singh, M. (2019). Evaluation of fennel germplasm under stress conditions for sustainable germination. In: International Symposium on "Innopreneurship: A need of Sustainable Agriculture at CCS HAU Hisar from 02-03, February 2019.
13. Bhat, N. V. Baloda, S., Sharma, J.R., Kumar M., Singh, S. and Singh, M. (2019). Effect of pre harvest application of ethephon and potassium sulphate on ripening and quality of winter season guava. In: International conference on "Climate change towards health and Agricultural sustainability" (CCHAS-2019) from 18-20th February, 2019 at Guru Jambeshwar University of Science and Technology, Hisar: 229-30.
14. Singh, M. and Deswal, S. (2019). Sustainable agriculture and the management of naturalresources. In: Golden jubilee international conference on new millennia agriculture-novel trends and future scenario on dated 6-8, November, 2019 held at CCS HAU Hisar.
15. Deswal, S. and Singh, M. (2019). Effect of different lemon grass oil emulsion on self-life of brinjal.In: Golden jubilee international conference on new millennia agriculture-novel trends and future scenario on dated 6-8, November, 2019 held at CCS HAU Hisar.
16. Singh, M. and Deswal, S. (2020). Effect of pollinizer in kinnow mandrain in agro climatic zone of Haryana.In: National Conference on "Agricultural Resource management for atmanirbhar bharat. Organized by COA, Central Agriculture University, Imphal on dated 17-19 July 2020.
17. Singh, M., Garhwal, R.S. and Kumar, A. (2020). Effect of different levels of pruning on growth, yield and quality of guava (*Psidium guajava* L.) Var. Hisar safeda.In: International web conference on global research initiatives for sustainable agriculture & allied sciences (GRISAAS-2020) organized by Astha Foundation, Meerut (UP) India during 28-30 December, 2020.
18. Singh, M. and Deswal, S. (2020). Agro meteorological indices of fenugreek as influenced by different sowing times.In: International web conference on global research initiatives for sustainable agriculture & allied sciences (GRISAAS- 2020) organized by Astha Foundation, Meerut (UP) India during 28-30 December, 2020.
19. Deswal, S., Kumar, K., Singh, M. and Sharma, S. (2020). Post-harvest treatment on storage behavior of tomato fruits published. In: International web conference on global research initiatives for sustainable agriculture & allied sciences (GRISAAS- 2020) organized by Astha Foundation, Meerut (UP) India during 28-30 December 2020.
20. Kumar, S., Singh, M., Kumar, U. and Mor, R. (2021). Evaluation of different Guava (*Psidium guajava* L.) varieties for growth and morphological traits under semi-arid region of Haryana. In: International conference on global research initiatives for sustainable agriculture & allied sciences (GRISAAS-2021) organized by Astha Foundation Headquarter, Meerut (U.P.) during 13-15 December, 2021
21. Duhan, D. Singh, D., Singh, M. and Arya, S. (2021). Change in temperature over northern region of India during last six decades. Published in International Conference. In: Hybrid mode on global research initiatives for sustainable agriculture & allied sciences (GRISAAS-2021) organized by astha foundation headquarter, Meerut (U.P.) during 13-15 December, 2021. Pp.19
22. Singh, M., Garhwal, R.S., Poonia, R. and Duhan, D. (2021). Effect of shoot pruning on growth and yield of Guava (*Psidium guajava* L.) Var Hisar safeda. In: International Conference. In: Hybrid mode on global research initiatives for sustainable agriculture & allied sciences (GRISAAS-2021) organized by Astha Foundation Headquarter, Meerut (U.P.) during 13-15 December, 2021. pp.21

23. Savita and Singh, M. (2022). Impact, adaptability and vulnerability of floricultural crops to climate change. In: 5th International conference on Advances in smart agriculture and biodiversity conservation for sustainable development (SABCD-2022) during March, 4-6, 2022. Pp. 174-175
24. Duhan, D., Singh, D., Singh, M., Kumar, M. and Arya, S. (2022). Impact of vegetation cover on temperature under changing climate in the agriculture dominated state of India. In: 6th International conference on current issues in agricultural, biological & applied sciences for sustainable development (CIABASSD-2022). Kalimpong Science Centre, Deolo, Kalimpong, W.B. 11-13 June, 2022. pp.16
25. Rinku and Chaudhary, O. P. (2017). Determination of preference of modern day sunflower hybrids by the honey bees over old day populations. *Proc*. of technological advancement for sustainable agriculture and rural development (TASARD-2017).
26. Rinku and Chaudhary, O. P. (2017). Temporal abundance of honey bees on different sunflower cultivars, *Proc*. of golden jubilee international conference on gender issues and socio-economic perspectives for sustainable rural development (GIRD-2017).
27. Rinku and Chaudhary, O. P. (2017). Nectar secretion rhythms in sunflower populations and hybrids, *Proc*. of 3rd International conference on bioresource and stress management (ICBSM-2017).
28. Rinku, Chaudhary, O. P. and Kaushik, H.D. (2017). Variations in morphological and phenological traits of selected sunflower populations and hybrids reveal their relative preference to four honey bees. *Proc*. of climate change and agricultural production (CCAP-2017).
29. Purti, Rinku and Jaglan, R.S. (2018). Host plant resistance based integrated pests management, *Proc*. Vision 2022: A New India.
30. Rinku, Purti and Jaglan, R.S. (2018). Biological control for pest management, *Proc*.Vision 2022: A New India.
31. Rinku and Chaudhary, O. P. (2018). Honey bees as effective pollination alternative under protected cultivation, *Proc*. of International conference on sustainable agriculture, energy, environment and technology (ICSAEET-2018).
32. Rinku, Purti and Yadav, S. (2018). Effect of climate change in insect pest scenario, *Proc*. of Conference on sustainable agriculture, food and nutritional security (SAFNS).
33. Rinku and Chaudhary, O. P. (2019). Honey bees as an effective alternative to bumble bee pollination in enclosures, *Proc*. of International symposium on innopreneurship: A need of Sustainable Agriculture, CCHAU, Hisar.
34. Rinku and Chaudhary, O. P. (2019). Effect of honey bee colony placement modes on yield of biiter gourd cultivar Pusa Do Mausami in Net House, *Proc*. of climate change towards health and environment sustainability (CCHAS-2019), GJU, Hisar.
35. Rinku, Chaudhary, O.P. and Yadav, S. (2020). Diversity and abundance of floral visitors in bitter gourd cultivar Pusa Do Mausami, *Proc*. of Conference on "Agricultural Resource Managament for Atmanirbhar Bharat, CAU, Imphal.
36. Singh, M., Garhwal, R.S., Poonia, R. and Duhan, D. (2021): Effect of shoot pruning on growth and yield of Guava (Psidium guajava L.) var Hisar safeda. In: International conference on global research initiatives for sustainable agriculture & allied sciences (GRISAAS-2021) organized by Astha Foundation Headquarter, Meerut (U.P.) during 13-15 December, 2021. pp.21
37. Jaglan, M.S. and Poonia, R. (2021). Field screening of rice genotypes against different insect-pests of rice in Indo Gangetic Plain. *Proc*. Vol-1 of International conference on global perspectives in crop protection for food security (GPCP -2021) December 8-10, 2021.

38. Jaglan, M.S. and Poonia, R. (2021). Influence of crop establishment methods on the incidence of major insect pests of rice in semi-arid regions of India. *Proc*. Vol-1 of International conference on global perspectives in crop protection for food security (GPCP -2021) December 8-10, 2021.

**Workshop/Conference/Seminar/Training attended by the Faculty**

1. *Dr. Mehar Chand* attended and made two oral presentations in *Annual Convention (2018) and Asian Conclave of Sugar Millers Vision- 2022.* Organised by North India Sugarcane and Sugar Technologists Association from May 7-8, 2018 at Chandigarh.
2. *Dr. Mehar Chand* attended and presented progress of Crop production of AICRP on Sugarcane during Group Meeting of AICRP on Sugarcane held from September 22-23, 2017 at TNAU, Coimbatore.
3. *Dr. Mehar Chand* attended "3rd Agri leadership summit - 2018" organized by Department of Agriculture and Farmers Welfare, Govt of Haryana from March 24-26, 2018 at Rohtak.
4. *Dr. Mehar Chand* attended National Seminar on Honey bee from July 7-8, 2017 at CSSRI, Karnal organized by CCSHAU, Hisar and MHU, Karnal.
5. *Dr. Mehar Chand* attended and presented one oral and one poster in International Symposium on Sugarcane Research Since Co 205: 100 years and beyond, Organised by ICAR-SBI, TNAU, SISMA and Society for Sugarcane Research and Development at Coimbatore from September 18-21, 2017.
6. *Dr. Mehar Chand* attended National Symposium on Plant Disease Management for Food Security under Climate Change Scenario during January 9-10, 2020 held at ICAR-IIWBR, Karnal.

7. *Dr. Mehar Chand* participated and presented progress of Sugarcane Crop Production section in 33rd Biennial Workshop of All India Coordinated Research Project on Sugarcane through online mode during October 19-20, 2020 organized by IISR, Lucknow.
8. *Dr. Vishal Goyal* attended the International conference and presented the research paper in Golden Jubilee Salinity Conference-2019 on "Resilient Agriculture in saline environments under changing environment: Challenges & Opportunities" held at CSSRI, Karnal from 7-9 February 2019.
9. *Dr. Vishal Goyal, Dr. S.R. Verma, Dr. Rinku Poonia, Dr. R.S. Garhwal* and *Dr. Parvinder Balyan*attended the International conference on "Climate resilient agriculture for food security and sustainability CCS, Haryana Agricultural University, Hisar from 17-19 February 2023.
10. *Dr. Vishal Goyal* attended the 86th Annual Convention of Indian Society of Soil Science held at Mahatma Phule Krishi Vidyapeeth, Rahuri, Maharastra, from November 15-18, 2022.
11. *Dr. Manender Singh* attended Global Meet on Science & Technology for Ensuring Quality Life held during 26-30, November, 2017 at Kuala Lampur, Malaysia.
12. *Dr. Manender Singh* attended the International Conference on Advances in Agricultural and Biodiversity Conservation for Sustainable development (ABCD-2017) during 27-28 October, 2017 at Brahaspati Bhawan, C.C.S. University, Meerut (U.P.) India.
13. *Dr. Manender Singh* attended the International Conference on Food & Agriculture" (ICFA-2018) held during March 29-31, 2018 in Dhanbad, Jharkhand, India.
14. *Dr. Manender Singh* attended National Conference on Smart Agriculture & Food Security, SAFS-2019, held during January 18-20, 2019 at Jaipur National University, Jaipur.
15. *Dr. Manender Singh* attended attended and presented the paper at International Symposium on "Innopreneurship: A need of Sustainable Agriculture at CCS HAU Hisar from 02-03, February 2019.
16. *Dr. Manender Singh and Dr. Parvinder Balyan* participated and attended Golden Jubilee International Conference on New Millennia Agriculture-Novel Trends and Future Scenario held during 6-8, November, 2019 at CCS HAU Hisar.
17. *Dr. Manender Singh* attended XIII National Symposium of IAUA-2019 (Vice-Chancellor Conference) on Low Budget Natural Farming at Gurukul, Kurukshetra on dated 20.09.2019.
18. *Dr. Manender Singh* attended and participated in a two-day workshop on National Incubators Colloquium at CCS HAU, Hisar on dated 15-16 Jan, 2020.
19. *Dr. R.S. Garhwal and Dr. Manender Singh* attended online National Conference on "Agricultural Resource Management for Atmanirbhar Bharat" organized by COA, Central Agriculture University, Imphal during 17-19 July 2020.
20. *Dr. Manender Singh* attended online International Web Conference on Global Research Initiatives for Sustainable Agriculture & Allied Sciences (GRISAAS- 2020) organized by Astha Foundation, Meerut in Collaboration with CSAUAT, Kanpur; IGKV, Raipur; BAU, Sabour; UAHS, Shivamogga; BAU Ranchi; SKRAU, Bikaner & SSDAT, Meerut (UP) India during 28-30 December 2020.
21. *Dr. Manender Singh* participated and Poster Presentation in International Web Conference on Global Research Initiatives for Sustainable Agriculture & Allied Sciences (GRISAAS-2021) organized by Astha Foundation Headquarter, Meerut (U.P.) during 13-15 December, 2021.
22. *Dr. Manender Singh* attended and Oral presentation in 5th International Conference on Advances in smart agriculture and biodiversity conservation for sustainable development, SABCD-2022, by Jaipur National University, Jaipur from March 4-6, 2022.

23. *Dr. Subhash Panwar* attended the International Conference on "Economic toEarthonomics: shifting Paradigms, Policy Paralysis, and Worsening Sustainability" BPS Mahila Vishwa-vidyalya, Sonepat on March 9-11,2022.
24. *Dr. Subhash Panwar* attended International Conference on Vision 2047: Sustainable Developments towards Atma Nirbhar Bharat (VSANB-2022) Organized by Society for Science and Nature incollaboration with Indian Council of Forestry Research & Education hosted by Footwear Design & Development Institute (FDDI), Chandigarh (Ministry of Commerce & Industry, Govt. of India) Chandigarh on December 23-24, 2022.
25. *Dr. Veer Sain* attended the National seminar on Agrometeorological Interventions for Enhancing Farmers' Income (AGMET-2020) on "Studies on the price analysis and forecasting of Mustard crop in Mahendergarh district of Haryana" on 20-22 January 2020.
26. *Dr. Veer Sain* attended the Webinar on "Studies on the Price Analysis and Forecasting of Gram Crop in Bhiwani District of Haryana". Indian Journal of Economics and Development Volume 16 No. SS, 2020, 000-000 DOI: 10.35716/tsoed2020/NS20-055 on 22 June 2020.
27. *Dr. Veer Sain* attended the Webinar on International web conference on food security through sustainable agriculture (FSSA) VAKSANA "Application of market information system of cotton crop in Sirsa district of Haryana"on 21-22 sept.2021, pp:128.
28. *Dr. Veer Sain* attended the National Seminar on mathematical science: Repositories of logical thoughts and analytical tools "Role of market information system (MIS) by traders in cotton crop in Sirsa district of Haryana" on 22 Dec. 2020, UIN: 1602.

| Sr. No. | Name of Training/ Workshop/ Conference | Organization where training was received | Year | Duration |
|---|---|---|---|---|
| Dr. Manender Singh | | | | |
| **1.** | 'Climate resilient agro-technologies for enhanced crop and water productivity under water–deficit agro-ecologies' | Division of Agronomy, ICAR–Indian Agricultural Research Institute, New Delhi | 22–29 September, 2017 | 08 days |
| **2.** | Induction Training | CCS HAU, Hisar | 28 Nov-29 Dec, 2018 | 30 days |
| **3.** | Elsevier empowering Agriculture research in India in association with CeRA | CCS HAU, Hisar | 24August, 2018 | 01 day |
| **4** | PSA Growers Training Course | Department of Horticulture and Vegetable Science, at DHRM, CCS HAU, Hisar | 27 May 2019 | 01 day |
| **5** | Non-conventional approaches for genetic improvement of perennial horticultural crops | Division of Fruits and Horticultural Technology, ICAR-IARI, New Delhi | 17 Jan -6 Feb, 2020 | 21 days |
| **6** | Communication and presentation skills for extension personnel | Extension Education Institute, Nilokheri, Haryana | 4-7August, 2020 | 04 days |
| **7.** | Hydroponic: The future of food without soil | Division of Basic Science and Humanities, faculty of Horticulture, SKUAST-Kashmir | 17-26 March, 2022 | 10 days |
| Dr R. S. Garhwal | | | | |
| **1** | National Conference on "Agricultural Resource | Central Agricultural University, Imphal through on line platform. | 17-19 July, 2020 | 03 days |

| | | | | |
|---|---|---|---|---|
| | Management for Atmanirbhar Bharat | | | |
| **2** | PRCN course | NCC Officers Training Academy, Kamptee, Nagpur | 04 Nov. 2019 to 01 Feb, 2020 | 90 days |
| **3** | Refresher Course on Educational Technology | DHRM, CCS HAU, Hisar | 21 September to 11October, 2021 | 21 days |
| Dr. Vishal Goyal | | | | |
| **1.** | Computer application | AAREM, DHRM, CCSHAU, Hisar | 16 May to 5 June, 2018 | 21 days |
| **2.** | Advances in simulation modelling and climate change research towards knowledge based research | Centre for Environmental Studies and Climate Research Agriculture (CESCRA), IARI, New Delhi | 13 Nov to 3 Dec, 2018 | 21 days |
| **3.** | Recent Technologies of Agribusiness management and Agri-Entrepreneurship (Online mode) | RajmataVijayarajeScindiaKrishiVishwa-Vidhalaya, Gwalior (MP) and National Agricultural Development Co-operative Ltd, Baramulla, J&K | 8-28 Oct., 2020 | 21 days |
| **4.** | Entrepreneurial Prospects in Agriculture and Allied fields | DHRM, CCS HAU, Hisar | 10-30 Feb. 2023 | 21 days |
| Dr. Rinku Poonia | | | | |
| **1** | Induction training | DHRM, CCSHAU, Hisar | 08 Sept. – 08 Oct., 2020 | 31 days |
| **2** | Scientific management of *Apis mellifera* colonies for nutritional and economic security | Department of Entomology, CCSHAU, Hisar | 25 Jan. -03 Feb., 2022 | 10 days |
| Dr. Sonika Bhankar | | | | |
| **1** | Induction Training Course | DHRM, CCSHAU, Hisar | 18 Nov, - 17 Dec., 2019 | 30 days |
| **2** | One-day workshop on "Awareness and Use of scopus Citation Database" | Nehru Library, CCSHAU, Hisar | 20 Nov., 2019 | 01 day |
| **3** | Technology interventions towards transformation of agriculture, sericulture, animal husbandry and allied sectors into sustainable enterprises for atmanirbhar bharat | Central Sericultural Research & Training Institute (CSRTI), Central Silk Board Ministry of Textiles, Government of India, Mysuru, Karnataka and AEDS | 11-31 Oct., 2020 | 21 days |
| **4** | Extension of commercialized vegetable processing technologies | EEI, Nilokheri, Karnal | 24-28 Aug., 2020 | 5 days |
| **5** | Refresher Course on Extension Management | AAREM, DHRM, CCSHAU, Hisar | 4-24 May, 2022 | 21 days |
| **6** | Training in accounts for teachers and technical employees for departmental examination | DHRM, CCS HAU, Hisar | 31 Aug., 04 Sept., 2021 | 05 days |
| **7** | Awareness and use of scopus citation and indexing database, | College of Agriculture, Kaul | 25 March, 2022 | One day |

| | | | | |
|---|---|---|---|---|
| | and other e-resources | | | |
| Dr. Ashwani Kumar | | | | |
| **1** | Advancement of physiological strategies for crop improvement against abiotic stresses conducted | ICAR-CSSRI, Karnal | 20-29 Aug., 2018 | 10 days |
| **2** | Agricultural research methodologies practices and their management | CAU-College of Horticulture & Forestry, Pasighat, Arunachal Pradesh | 4-24 Oct, 2021 | 21 days |
| **3** | Entrepreneurship strategies in agriculture, horticulture, animal husbandry & allied sectors for economic development of india | DEE, Uttar Banga Krishi Vishwa-Vidhyalaya,Cooch Behar, West Bengal | 01-21 Dec.2021 | 21 days |
| Mr. Sunny Kumar | | | | |
| **1** | Induction Training | AAREM, DHRM, CCSHAU, Hisar | 08 Sept. - 08 Oct., 2020 | 30 days |
| **2** | Refresher course on statistical tools and techniques for analysis of agricultural data | AAREM, DHRM, CCSHAU, Hisar | 8-28 July, 2020 | 21 days |
| **3** | Attended online workshop on "Zero to Infinity" | Placement cell, Department of Mathematics, Shaheed Udham Singh Govt. College Matak Majri, Indri (Karnal) | 18-22 Jan., 2022 | 05 days |
| Dr. S.R. Verma | | | | |
| **1** | Accounts and Rules of CCS HAU | AAREM, DHRM, CCS HAU, Hisar | 07-11 May, 2018. | 05 days |
| **2** | Induction Training | AAREM, DHRM, CCS HAU, Hisar | 07 June to 07 July, 2018 | 31days |
| **3** | Advances in agricultural extension and advisory services | National Institute of Agricultural Extension Management (MANAGE), Hyderabad | 01 - 21 Nov., 2018 | 21 days |
| **4** | Trainers training programme for skill training | Agricultural Skill Council of India, New Delhi at SKRAU, Bikaner | 20 -22 Sept., 2018 | 03 days |
| **5** | National Training Planning Workshop 2020 | National Institute of Agricultural Extension Management (MANAGE), Hyderabad | 30-31 Jan., 2020 | 02 days |
| **6** | Mastering the techniques of effective online teaching | Faculty Development Centre, G.B. Pant University of Agriculture & Technology, Pantnagar, (Uttrakhand) | 25-27 Feb., 2021 | 03 days |
| **7** | Innovations in Educational Technology | ICAR National Academy of Agricultural Research Management (NAARM), Hyderabad | 04-08 Oct., 2021 | 05 days |
| Dr. Darshana | | | | |
| **1.** | Workshop on awareness and use of scopus citation database | Nehru Library, CCS HAU, Hisar | 29 Nov., 2019 | 01 day |
| **2.** | Winter school on artificial intelligence in agriculture | ICAR-Indian Agricultural Statistic Research Institute, New Delhi | 15 Feb.- 7 March, 2022. | 21 days |
| **3.** | Winter school on water productivity enhancement in scarcity zones: approaches and applications | Centre for Natural Resources Management, S. D. Agricultural University, Sardarkrushinagar, district Banaskantha, Gujarat | 18 Jan- 7 Feb., 2023 | 21 days |

| | | | | |
|---|---|---|---|---|
| Dr. Ravi Kant | | | | |
| **1** | 30th ICAR –CAFT course on Mocrobila genomics and proteomics in diagnosis and control of disease of veterinary importance | ICAR-Centre for advance faculty training, Department of Veterinary Microbiology, LLRUVAS, Hisar | 07 -27 Nov., 2017 | 21 days |
| **2** | 32nd ICAR –CAFT course on 'Recent advances in cell based technologies for animal disease diagnostics and therapeutics' | ICAR-Centre for advance faculty training, Department of Veterinary Microbiology, LLRUVAS, Hisar | 11-31 Oct., 2018 | 21 days |
| **3** | Faculty development program on teaching learning and assessement (online) | Teaching learning centre, Central University of Rajasthan | 23 Nov- 3 Dec. 2020 | 10 days |
| **4** | Refresher course on extension management From | AAREM, DHRM, CCSHAU, Hisar | 04 24 May, 2022 | 21 days |
| Dr. Subhash Chander | | | | |
| **1** | Biodiversity Governance | NIRD & Panchayati Raj, MORD, Govt. of India | 11-13 March, 2019 | 04 days |
| **2** | Refresher course on Language Skills (Online) | DHRM, CCSHAU, Hisar | 27 May-16 June 2020 | 21 days |

## Trainings Organized by the Faculty at College Campus:

**1.** Two-week training on 'Agripreneurship for the students' of COA, Kaul from 20.09.2019 to 03.10.2019 for 40 students.

2. Two-week training on 'Personality Development for the students' of COA, Kaul from 04.03.2020 to 17.03.2020 for 40 students.
3. Ten days training on 'Dairy Farming for students'of COA, Kaul from 20.12.2021 to 30.12.2021 for 50 students.
4. NAHEP Training on 'Basic of entrepreneurship development in agriculture' from 02-04, June, 2020.
5. 'Post-harvest of fruits and vegetables for value addition'from 3-12, January, 2022.

ENGINEERS'
DAY

ENGINEERS'

# FOREWORD

Haryana is one of the leading states for agriculture production in the country despite occupying only 1.4% of the total geographical agricultural area of the country. It is one of the largest contributors of food grain to the central pool.

Though the country is fast marching onto the path of modernity through industrialization yet agriculture sector remains the backbone of the economy. Agriculture helps industry too and provides raw material to it.In addition to feeding our population, agriculture also contributes in a prominent way to the country's export endeavours, employment generation and socio-economic upliftment of rural masses.

The advancements in the areas of food and agriculture have been possible due to an intelligently planned and conscientiously imparted agricultural education. Under-graduate and post-graduate programmes in Agricultural Engineering are consistently modified as per recommendations of Deans and BSMA committees and needs of society. Agricultural engineers have vital role to play in a rapidly changing scenario. Natural resources are shrinking/depleting, availability of manpower for agricultural operations is reducing and expectation for sustainable growth in agriculture is increasing. This scenario has increased the responsibility of agricultural engineers to help in conserving natural resources, reducing drudgery and achieving timeliness in agricultural operations etc.

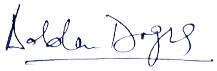
CCSHAU, Hisar was among the first four universities to receive accreditation from ICAR in 2001 for its excellence in teaching, research and extension. Since then it has gone from strength to strength and has fortified its teaching, research and extension activities further. It now has collaborative programmes with the ICAR Institutes in education and research. The University believes in innovative ventures and I am happy to note that COAE&T has taken several ground-breaking initiatives. CCSHAU is a leader amongst the higher education institutes of the country and has won many prestigious awards and honours.

The University is creating new vistas in its chosen fields and has become truly a global university with various international MoU's and an increased student reach.

Accreditation is a process of authorization or official approval of the profile, strengths, and achievements of an institution. The Self Study Report of the College of Agricultural Engineering & Technology give us an opportunity to acquaint stakeholders afresh with our goal to provide holistic education to our students in the field of agricultural engineering.

The commitment of all members of the SSR Committee of the College in preparing the SSR is really appreciated and acknowledged.

**Prof. B. R. Kamboj**
Vice Chancellor
CCSHAU, Hisar



# PREFACE

College of Agricultural Engineering and Technology (COAE&T), established in 1992, is one of the constituent colleges of Chaudhary Charan Singh Haryana Agricultural University (CCS HAU), Hisar. As per the mandates of CCS HAU, the college has made significant contribution in the field of Teaching, Research and Extension. The College offers four year degree programme of B.Tech. (Agricultural Engineering). Besides this, the College also offers M.Tech. (Agricultural Engineering), with specialisation in the disciplines of Farm Machinery and Power Engineering (FMPE), Processing and Food Engineering (PFE), Renewable and Bio-energy Engineering (RBEE) and Soil and Water Engineering (SWE) and Ph. D. (Agricultural Engineering) with specialisation in the disciplines of Farm Machinery and Power Engineering (FMPE), Processing and Food Engineering (PFE) and Soil and Water Engineering (SWE) . The course curriculum is updated from time to time as per the guidelines of different committees constituted by the Indian Council of Agricultural Research (e.g. Deans' and BSMA committee).

The alumni of COAE&T have earned respect and recognition and are well placed in different sectors ranging from engineering, marketing, business, administration, research and education. The role being played by our alumni is a testimony to the fact that our graduates are capable to fulfil the expectations of diversified job market. The faculty of the college have developed/ tested several technologies for the efficient management of natural resources, post harvest management of agricultural produce and mechanisation of different agricultural operations. The Farm Machinery Testing Centre being run by the Department of Farm Machinery and Power Engineering is one of the best farm machinery testing centre amongst the centres running in different agricultural universities of our country.

The COAE&T was accredited from ICAR for B.Tech.(Agricultural Engineering) and M.Tech. (Agricultural Engineering) upto 31.3.2023 and hence, has submitted this Self Study Report (SSR) seeking further accreditation for different academic programmes being offered by the college. This document contains SSRs for B.Tech. (Agril. Engg.) as well as M.Tech. (Agri. Engg.) programmes in the disciplines of FMPE, PFE, RBEE and SWE. The information contained in this SSR is based on facts and available official records. While preparing the SSR, care has been taken to follow the procedures and guidelines issued by the ICAR.

The motivation and support received from Prof. B.R. Kamboj, Vice-Chancellor, CCS HAU, Hisar, during the preparation of this document is respectfully acknowledged. Valuable inputs and support of Deans, Directors and other Officers of the University, Heads of Departments and faculty of COAE&T are thankfully acknowledged. Special efforts made by the Director HRM, Dr.Aparna, Dr. Kushal Raj and Dr.Rajinder Kumar are gratefully acknowledged.

**Prof. Baldev Dogra**
Dean, COAE&T
CCS HAU, Hisar

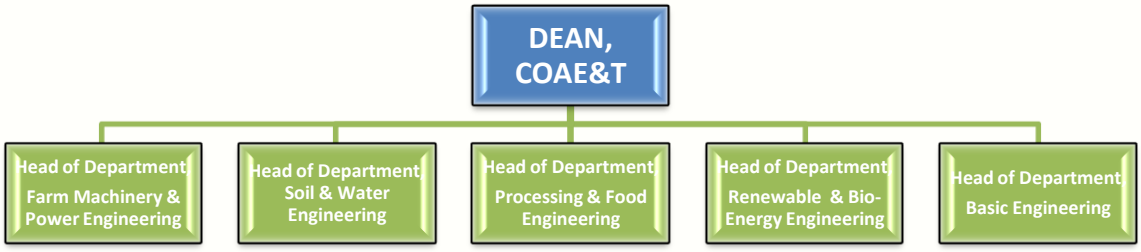
CC SHAU
COLLEGE OF AGRICULTURAL ENGINEERING AND TECHNOLOGY
1992



# SELF STUDY REPORT FOR COLLEGE OF AGRICULTURAL ENGINEERING & TECHNOLOGY

The College of Agricultural Engineering and Technology (COAE&T) is a Constituent college at the main campus of the Chaudhary Charan Singh Haryana Agricultural University(CCS HAU) in Hisar. Initially, the Academic Council CCS HAU meeting on June 11, 1987, vide agenda item BB-12 approved the B. Tech. (Agricultural Engineering) undergraduate curriculum with an intake of 20 students under the College of Agriculture. Later on, the COAE&T was founded on August 21, 1992, following the 142nd Board of Management meeting, as approved vide agenda item B-26 on March 24, 1992. Master of Technology (Agril. Engg.) was started in the department of Farm Power & Machinery and Soil & Water Engineering in 1993. Thereafter, Department of Agricultural Processing & Energy was established in August 1996 with UG and PG degrees. The section of Basic Engineering was founded in October 1996 to serve UG and PG students. In 2013-14, B. Tech. admittance slots were fixed to 35 to focus on individual student instruction and personal attention. The Ph.D. program started in all three departments in 2016. In March of 2017, the Department of Basic Engineering and the Department of Renewable and Bio-Energy Engineering were established. According to Fifth Deans' Committee recommendations, the syllabi and curricula were updated to address future challenges and recent developments, with more emphasis on Student Ready Programme to expose students to different agricultural issues. Agricultural engineers help to increase crop production and farmer income. Agricultural engineers help to ensure farm operation timeliness through efficient agricultural implements and machinery, land and water management, post-harvest technology and processing, and energy conservation.

## Mandate/Objectives

* Nurturing scholarly education in different branches of study in the discipline of Agricultural Engineering
* Furthering the advancement of learning and pursuit of research in the discipline of Agricultural Engineering
* Undertaking the extension by transferring well-proven technology for the benefit of the farming community

**Organizational Set up**

### 6.5.1. College Administration

**6.5.1.1. College Dean's office Establishment:** *Whether the Dean's post sanctioned by the appropriate authority as per ICAR Model Act/UGC guidelines.* **YES**
*Date of selection of present Dean, mode of selection, tenure etc. shall be mentioned. Clearly mention the staff and infrastructure/facilities available in the Dean's Secretariat.*

Following the ICAR Model Act, the appropriate authority sanctioned the Dean's position, and Thus, CCSHAU recruited for four years through a nationwide open selection. The present Dean was appointed and joined on January 11, 2022.

**Staff of the Dean Secretariat***

| Name of the post | Sanctioned | In position | Vacant |
|---|---|---|---|
| Dean | 01 | 01 | 00 |
| Establishment | | | |
| AAO/ Supdt. | 01 | 00 | 01 |
| Personal Sec./ Personal Asstt. | 01 | 01 | 00 |
| Office Assistants (No.) | 02 | 02 | 00 |
| Clerks (No.) | 02 | 01 | 01 |
| Sr. Scale Steno | 01 | 01 | 00 |
| Jr. Scale Steno | 01 | 01 | 00 |
| Storekeeper (No.) | 02 | 02 | 00 |
| Jeep Driver (No.) | 02 | 02 | 00 |
| Messengers (No.) | 02 | 00 | 02 |
| Helper (No.) | 02 | 01 | 01 |
| Security Guards (No.) | 02 | 00 | 02 |
| Sweeper | 01 | 01 | 00 |
| Total | 20 | 13 | 07 |

**Additional staff is also engaged through out sourcing policy as and when needed.*

Hospital and hostel facilities are essential university facilities. The University's Estate and Maintenance office handles positions related to building maintenance. The position of Hostel Warden, Assistant Warden, Cook, Assistant Cook, and Mess Helper fall under the purview of the University level Students' Welfare Directorate.

**Infrastructure /facilities available in the Dean's Secretariat**

The Dean's Secretariat has adequate infrastructure and facilities for the efficient coordination and implementation of various academic activities.

**6.5.1.2. Monitoring Mechanism for Quality Education (on-line):** *Whether the College is having an internal quality assurance system, with appropriate structure and processes, and with enough flexibility to meet the diverse needs of the stakeholders which is required for planning, guiding and monitoring quality assurance and quality enhancement activities of the Colleges. How effectively monitoring of teaching, research and extension across the departments is being conducted. Mention the impact of monitoring on the outcome of the College with reference to students' excelling in academics, research and extracurricular activities.*

Yes, the college has a monitoring mechanism in place.

- The college has a Board of Studies (BOS), a College Project Review Committee (CPRC), and a Departmental Advisory Committee (DAC) for each department. These committees oversee college research, extension, and course content quality. The College Steering Committee, Equivalence Committee, Time Table, and Date Sheet Committee were also established.
- The college has an internal quality assurance system with the appropriate structure and processes, as well as sufficient adaptability to accommodate the diverse requirements of its stakeholders. An Internal Quality Assurance Committee comprised of all department heads has been constituted.
- Each student is assigned a faculty advisor who oversees their daily activities and performance and personality development after admission to the college. Advisors support students with academics and extra curricular. Advisors help students with personal and academic issues in tutorial classes controlling officers hold department-specific technical review sessions to oversee funds utilization.
- Faculty members keep an eye on undergraduates while they participate in summer internships. Teachers are strongly encouraged to participate in relevant national and international seminars. Faculty members are permitted duty leave to fulfill their pedagogical responsibilities.

**Monitoring of Teaching:**

- Self-evaluation reports (SARs) are required annually of all faculty members, whereas confidential reports (CRs) are required annually of all other employees. After being evaluated by Deans and Directors, SARs are sent on to the Vice Chancellor for final approval. Graduate students must get approval from both the Departmental Advisory Committee and the Advisory Committee before beginning work on their thesis or dissertation. Graduate students often present departmental seminars to professors for critique. The synopsis goes through one more round of internal review before being sent off to the Dean of the PGS for stamp of approval.
- The classrooms have been equipped with CCTV cameras. The college often organises national seminar/ workshops and invited lectures to better expose the staff and students to the latest developments in the field of education.

**Monitoring of Research:**

- The Director of Research, ADR, Dean COAE&T, and HODs of the pertinent and linked departments convene the Annual Technical Programme Meeting to examine and oversee research in all departments. Faculty members present departmental scheme research results at Annual Technical Committee meetings.
- A technical programme committee discusses research action plans. The competent authority approves tour programmes and diaries.

**Monitoring of Extension:**

- The extension activities to be conducted by faculty members are discussed with the concerened HoDs and further finalized during Station Advisory committee (SAC) meetings.
- The controlling authority approves tour schedules/diaries and itinerary programmes.
- Stakeholder feedback is considered for future enhancements.

**Impact of Monitoring on the Outcome of the College**

## Student's Awards

| Year | Awards |
|---|---|
| **2018-19** | Athira C.R. 2017AE14M Gold Medal (Academic) |
| **2019-20** | Peter WaboiMwaurah 2018AE5M Gold Medal (Academic) |
| **2020-21** | Vinod Kumar 2016AE3D Gold Medal (Academic) |
| **2022-23** | Pradhuman Bishnoi 2021AE45BIV Gold medal (Debate)<br>16th National Inter University Debate Competition, GBPA&T, Pantnagar |
| | Pradhuman Bishnoi 2021AE45BIV Third Prize (Cultural), Haridwar |

## Student's Awards (Extra-curricular activities like Sports, NCC, NSS)

| Year | Awards | | |
|---|---|---|---|
| **2018-19** | XIX All India Inter-Agricultural Universities Sports & Games Meet, 2018-19 held at PAU, Ludhiana(January 2-5, 2019) | | |
| | Nirmala | Silver | 4X400M Relay |
| | Amandeep | Bronze | Basket Ball |
| | Yogesh | Bronze | Basket Ball |
| **2019-20** | XX All India Inter-Agricultural Universities Sports & Games Meet, 2019-20 held at Sri Venkateswara Veterinary University, Tirupati, Andhra Pradesh (March 1-5, 2020) | | |

| | | | |
|---|---|---|---|
| | Nirmala (2015AE18BIV) | Silver | 200M |
| | Nirmala | Silver | 400M |
| | Nirmala | Bronze | 4X100M Relay |
| **2020-21** | Covid lockdown | | |
| **2021-22** | Pragya Choudhary | Gold medal | state level NSS camp from 17th to 23rd November 2021 at GJUS&T, Hisar (Haryana) |
| | Akash | second prize in dance competition | National Integration camp from 19th to 25th November, 2021 at Maharishi Dayanand University, Rohtak (Haryana) |

NSS unit of COAE&T Sadbhavna Divas Rally in August, 2019 in CCSHAU

Vaccination Drive at Campus School, NSS volunteers participated in the drive

Student Nisha Solanki has participated in Drone festival of India, New Delhi (Pragati Maidan) during27-28 May 2022 and interacted regarding drone operator technology.

**6.5.1.3. CC/Board of Studies:** *Whether the CC in the Department level and Board of Studies at the College is in place? The composition of the BoS and date of conduct of meetings for last five years and major recommendations made by the BoS should be given in tabular form.*

Yes, College of Agricultural Engineering & Technology has DAC at the Department level and Board of Studies at College level.

## Board of Studies

The Board of Studies is responsible for proposing new courses of study, modifications to curricula, etc. for the various programmes offered by the University. The Board of Studies also routinely reviews the teaching standards.

**Composition**

| | | |
|---|---|---|
| **Chairperson** | **:** | Dean, COAE&T |
| **Members** | **:** | HOD, Farm Machinery & Power Engineering<br>HOD, Processing and Food Engineering<br>HOD, Soil and Water Engineering<br>HOD, Renewable and Bio-energy Engineering<br>HOD, Basic Engineering<br>Dr. M.S. Sidhpuria, Special Invitee |
| **Secretary** | **:** | Dr.Vijya Rani, HOD, FMPE |

## Date of conduct of meetings for last five years and major recommendations

| | | |
|---|---|---|
| **2018-19** | **06.10.2018**<br><br>**15.11.2018** | • The Course content of Tractor Mechanic & Tractor Operator under Skill Development Programme in Certificate/Diploma Courses at SNIATTE, CCSHAU, Hisar was considered by the BOS and approved.<br>• The courses of M.Tech. (Agril. Engg.) with specialization in Renewable Energy Engineering and Ph.D. (Agril. Engg.) with specialization in Renewable Energy Engineering, were recommended for approval from RIC. |
| **2019-20** | **14.11.2019**<br><br>**12.02.2020** | • The course catalogue for B.Tech. COAE&T was approved in accordance to 5th Deans' Committee, ICAR. Considering the importance of UGC Module on Consumer affairs, DSW office may explore the possibilities to organize special lecture/short duration course for the UG students.<br>• Two new certificate courses "Food Processing" and "Design, Installation, operation and maintenance of protected agriculture structures" was recommended for approval. |
| **2020-21** | **19.01.2021** | • Dr. Ravi Gupta was assigned as Nodal Officer to work on the modalities and requirements for approval of M.Tech./Ph.D. from AICTE.<br>• The BOS recommended the qualification for the post of Dean, COAE&T for approval from RIC |
| **2021-22** | **26.04.2022** | • The information related to AICTE-CII Survey of Industry-linked Technical Institutes 2021 was presented by Dr. Nitin Kumar, Department of Processing and Food Engineering and reported to the Dean, COAE&T. |
| | **26.04.2022** | • Regarding admission policy 2022-23, the decision of not having admission in Ph.D. will be continued. |
| **2022-23** | **13/12/2022** | • Admission of WPCOS candidate in COAE&T, CCSHAU, Hisar was discussed and denied due to non matching of the required educational qualification for admission to M.Tech. (Agril. Engg. ) at COAE&T, CCS HAU, Hisar.<br>• The course ME-501, Mechatronics and robotics in Agriculture was recommended by BOS to be changed to ME 501/EE 508 and same may be proposed in BSMA<br>• Deptt. of Basic Engineering was allowed to explore the possibilities for starting M. Tech. in their core disciplines because of non possibility of Co-major |

| | | |
|---|---|---|
| | | supervisor to other departments.<br>• Dean, COAE&T updated the BOS members regarding the MOU between DCRUST, Murthal and CCS HAU |

**Departmental Advisory Committee:** The Departmental Advisory Committee (DAC) renders advice to Head for upgradaion of teaching, research and extension within each department of the college.

**Composition of DAC:**

**Department of Farm Machinery & Power Engineering**

| | | |
|---|---|---|
| Chairperson | : | Dr. Vijaya Rani, HOD |
| Secretary | : | Er. Naresh |
| Members | : | Dr. Anil Kumar,Er. Swapnil Choudhary, Er. Swapnil Choudhary,Er. Bharat Patel,Dr. Ganesh Upadhyay |

**Date of conduct of meetings for last five years and major recommendations**

| | Date | Major Recommendations |
|---|---|---|
| **2018-19** | **11.04.2018** | • The Departmental Advisory Committee approved the name of Er. Anil Kumar, Assistant Professor, Deptt. of FMPE for participation in summer school on "Adaptation of energy Efficient Agricultural Technology for climate Change Mitigation" from 04-24, June 2018 held by College of Agricultural Engineering and Post Harvest Technology, Ranipool, Gangtok, Sikkim. |
| | **16.04.2018** | • Er. Anil Kumar, Assistant Professor, will look after the work of the scheme C(a)Dte-R-1-Agri. (A)-State, in place of Er. Bharat Patel, DES, of Department of Farm Machinery & Power Engineering, COAE&T, CCS HAU, Hisar.<br>• The Title and objectives of the scheme C(a)Dte-R-1 Agri. (A)-State was discussed and finalized. |
| | **09.07.2018** | • Allotment of courses to faculty members for B.Tech (Agril. Engg.) and B. Sc. (Agriculture) Program for the 1st Semester 2018-19<br>• Allotment of courses to faculty members for M.Tech.&Ph.D. Program for the 1st Semester 2018-19<br>• The Departmental Advisory Committee approved the name of Er. Mukesh Jain, Er. Bharat Patel, Er. Swapnil Choudhary and Er. Naresh for participation in two week training on "Robotics and Automation", in last fortnight of July, 2018 to be held at COAE&T, CCS HAU, Hisar. |
| | **15.09.2018** | • The problems of adopted villages will be identified and project work to some UG students of FMPE department will be given on those problems.<br>• The faculty of the department will actively participate in activities related to cleanliness in and around college premises.<br>• The students of M.Tech. (2018-19) were allotted Major Advisor vide rule number 27.1, 27.2 and 54$^{th}$ amendment of University Calendar Volume II.<br>• The Departmental Advisory Committee approved the name of Er. Anil Kumar, Assistant Professor, FMPE to attend and present paper on "An Overview of In-Situ Mechanical Management of Paddy Straw in Haryana" in International Conference on Worldwide Research Initiatives for Agriculture Science and Technology from 24 to 26, October, 2018 held at Sher-e-Kashmir University of Agricultural Sciences and Technology, Kashmir, J&K. |

| | | |
|---|---|---|
| | **05.10.2018** | • The Course content of Tractor Mechanic & Tractor Operator under Skill Development Programme in Certificate/Diploma Courses at SNIATTE, CCSHAU, Hisar were approved. |
| | **26.12.2018** | • Courses allotted to faculty members for B. Tech. (Agril. Engg.) and B. Sc. (Agriculture) Program for the 2nd Semester 2018-19<br>• Courses allotted to faculty members for M.Tech. and Ph.D. Program for the 2nd Semester 2018-19<br>• The Departmental Advisory Committee approved the name of Er. Anil Kumar and Er. Mukesh Jain, Assistant Professors to attend and present paper at the 53rd ISAE (Indian Society of Agricultural Engineers) Annual Convention from January 28-30, 2019 going held at Institute of Agricultural Sciences, Banaras Hindu University (BHU), Varanasi, UP. |
| | **21.01.2019** | • The Departmental Advisory Committee approved the name of Er. Anil Kumar, Er. Mukesh Jain, Er. Swapnil Choudhary and Er. Naresh to attend and present paper in International symposium on "Innopreneurship: A need of Sustainable Agriculture" & Rao Bahadur Dr. Ram Dhan Singh Fifth Memorial Lecture from 2-3 Feb., 2019 held at CCS Haryana Agricultural University, Hisar. |
| | **20.04.2019** | • The Departmental Advisory Committee approved the name of Er. Ajit Singh Sangwan for participation in "Short Course on Language & Interactive Skills" from 23th April to 2nd May, 2019 held at DHRM, CCS HAU, Hisar. |
| **2019-20** | **08.07.2019** | • Courses allotted to faculty members for B. Tech. (Agril. Engg.) and B. Sc. (Agriculture) Programme for 1st Semester, 2019-20<br>• courses allotted to faculty members for M. Tech. and Ph.D. Programme for 1st Semester 2019-20<br>• The committee approved the filing of patent for the following two machines:<br>▪ Tractor PTO operated paddy thresher cum dryer cum dehusker cum polisher<br>▪ Tractor mounted carrot harvester<br>• The committee approved the name of Er. Mukesh Jain, Assistant Professor, Deptt. of FMPE to attend and present a paper on "On-farm production of brown rice for nutritional security" in "International Conference on Harnessing Scientific, Technological Innovations and Entrepreneurship for Sustainable Development in Africa and Asia" held during September 2-4, 2019 at HAWK University of Applied Sciences and Arts, Goettingen, Germany.<br>• The committee approved the submission of paper titled "Optimization of Combine Crop Parameters for Harvesting of CSR – 30 paddy variety by Head Feed Combine" authored by Ingole Omprakash Avdhut, Anil Kumar, Mukesh Jain, Vijaya Rani and Naresh in journal of "Agricultural Engineering Today". |
| | **17.07.2019** | • The committee approved the name of Er. Anil Kumar, Assistant Professor of department for participation in "Refresher Course on Research Management" from 25th July to 14th August, 2019 held at DHRM, CCS HAU, Hisar.<br>• The committee approved the submission of paper titled "Comparative performance and economic feasibility of different sprayers in cotton crop" authored by Aman, Anil Kumar, Vijaya Rani, Bharat Patel and Mukesh Jain in journal of "The Indian Journal of Agricultural Sciences". |
| | **19.07.2019** | • The committee approved the name of Er. Mukesh Jain, Assistant Professor of department for participation in "Refresher Course on Research Management" from 25th July to 14th August, 2019 held at DHRM, CCS HAU, Hisar. |
| | **22.07.2019** | • Er. Naresh hasassisgened the duties of updation of record for the training/workshop/seminar/conference/activities/researchpaper/abstract/patent/book/book chapter/lecture etc. of the faculty member. |
| | **26.08.2019** | • The students of M. Tech. (2019-20) were allotted Major Advisor vide rule number 27.1, 27.2 and 54th amendment of University Calendar Volume II. |
| | **29.08.2019** | • The committee approved the name of Er. Naresh and Er. Bharat Patel for participation in short course on "Advances in sugarcane mechanization technologies to reduce cost of operations & drudgery for enhancing farmers income" from September 16 - 25, 2019 held at Indian Institute of Sugarcane |

| | | |
|---|---|---|
| | | Research, Lucknow (UP).<br>• The committee approved the name of Er. Swapnil Choudhary and Er. Bharat Patel for participation in winter school training programme on "Application of Sensors, Instrumentation, artificial intelligence and machine learning in Precision Agriculture" from February 11th to March 02nd, 2019 held at ICAR-CIAE, Bhopal (MP). |
| | **19.12.2019** | • Courses allotted to faculty members for B. Tech. (Agril. Engg.) for the 2nd Semester 2019-20<br>• Courses allotted to faculty members for M. Tech. and Ph.D. Program for the 2nd Semester 2019-20<br>• The name of Er. Swapnil Choudhary has been recommended for PI of All India Coordinated Research Project (AICRP) on Farm Implements and Machinery (FIM), ICAR Scheme. |
| **2020-21** | **31.08.2020** | • The name of Dr. Ganesh Upadhyay, Assistant Professor (FMPE) was approved to attend "Induction Training Course" held at DHRM, CCS HAU, Hisar from 9th September to 9th October, 2020. |
| | **08.10.2020** | • Revised allotment of M. Tech and Ph.D. courses to faculty for the 1st Semester 2020-21.<br>• Offered and allotment of new Ph.D. courses to faculty for 1st Semester 2020-21 |
| | **19.11.2020** | • The name of Dr. Mukesh Jain, Assistant Professor (FMPE) was approved to attend "Training on Extension Management" held at DHRM, CCS HAU, Hisar from December 01-21, 2020. |
| | **27.01.2021** | • The students of M. Tech. (2020-21) were allotted Major Advisor vide rule number 27.1, 27.2 and 54th amendment of University Calendar Volume II.<br>• The students of Ph.D. (2020-21) were allotted Major Advisor vide rule number 27.1, 27.2 and 54th amendment of University Calendar Volume II.<br>• The name of Dr. Anil Kumar, Assistant Professor (FMPE) wasapproved to attend online traning on "Communication Skills and Technical Writing" held at Directorate of Human Resource Management, CCS HAU, Hisar from 03-23 February, 2021 |
| | **03.02.2021** | • Allotment of courses to faculty members for B. Tech. (Agril. Engg.) Program for the 2nd Semester 2020-21<br>• Allotment of courses to faculty members for M. Tech. and Ph.D. Program for the 2nd Semester 2020-21 |
| | **05.04.2021** | • Dr. Vijaya Rani as Major Advisor has allotted student Mr. Mohit Kumar vide rule number 27.1, 27.2 and 54th amendment of University Calendar Volume II.<br>• DAC has approved agenda for the remuneration for examination duties (UG, PG and other Exams) as per other state universities (GJU, KUK, MDU etc.) |
| | **06.05.2021** | • The committee recommended the name of Dr. Anil Kumar, Assistant Professor (FMPE) as Principal Investigator and Er. Naresh, Assistant Professor (FMPE) as Co-PI of Farm Machinery Testing Scheme.<br>• Er. Bharat Patel, Assistant Scientist (FMPE) is working in the state research scheme and he will look after work of this scheme.<br>• Re-allotment of Courses taken by Dr. Mukesh Jain during 2nd Semester, 2020-21. |
| | **17.05.2021** | • The department advisory committee discussed the agenda of Dr. Mukesh Jain, who is selected and joined as Director of NRFMT&TI, Hisar on deputation basis and wants to continue as major advisor of allotted PG students. The committee has no objection in continuation of Dr. Mukesh Jain as major advisor of PG students. |
| **2021-22** | **02.06.2021** | • The name of Dr. Ganesh Upadhyay, Assistant Scientist (FMPE) was approved to attend National Level Online Hands on Four Week Training Programme on "Applications of Computer Aided Engineering in Agriculture" during 07th June - 03rd July, 2021organized by Vasantrao Naik Marathwada Krishi Vidyapeeth, Parbhani (M.S.) India. |

| | | |
|---|---|---|
| | **20.07.2021** | • The respective PI of the experiments willsend the results of planned experiments according to the treatments taken for the year 2020-21 to him as soon as possible in proper format. |
| | **19.08.2021** | • Allotted of UG, PG and Ph.D. courses to faculty for the 1st Semester 2021-22<br>• The name of Dr. Vijay Rani, Associate Professor & Head and Dr. Anil Kumar, Assistant Professor (FMPE) was approved to attend online training course on "Effective Extension Methods for Upscaling and Outscaling of Wheat and Barley Production Technologies" organized by Extension Education Institute, Nilokheri from September 1-10, 2021. |
| | **06.09.2021** | • The name of Dr. Anil Kumar was approved to attend and present a paper on "An overview of management of paddy in rice-wheat cropping system" in National Conference on "Managing Weather and Climate Risk in Agriculture" during 28-30 September, 2021 organized by Sher-e-Kashmir University of Agricultural Sciences & Technology of Kashmir. |
| | **17.09.2021** | • The name of Dr. Ganesh Upadhyay, Assistant Scientist (FMPE) have been approved to attend National Online Hands-on Training on 'Data Science and Machine Learning Using Python' from 25$^{th}$ September, 2021 organized by Sher-e-Kashmir University of Agricultural Sciences & Technology, Kashmir in collaboration with NIELIT. |
| | **05.10.2021** | • The name of Dr. Ganesh Upadhyay was approved to attend and present a paper on "Novel Microcontroller based Draft Force Sensing Units for Measurement of Drawbar Power of Agricultural Implements" in "XV Agriculture Science Congress & ASC Expo" organized by National Academy of Agricultural Sciences and Banaras Hindu University at Institute of Agricultural Sciences, Banaras Hindu University, Varanasi from November 13-16, 2021. |
| | **27.10.2021** | • Er. Naresh took admission in Ph.D. as in-service candidate and applied for study leave of one year to complete his course work of programme. So, re-allotted courses of 1st Semester, 2021-22.<br>• Department advisory committee approved the title and name of authors of the one Hindi article for submission<br>• The name of Dr. Vijaya Rani, Associate Professor & Head and Dr. Anil Kumar, Assistant Professor (FMPE) was approved to attend and present the two papers in "55$^{th}$ Annual Convention of Indian Society of Agricultural Engineers" through online mode to be organized during 23-25 November, 2021 in Patna jointly by ISAE, New Delhi and Dr. Rajendra Prasad Central Agricultural University (RPCAU), Pusa, Samastipur, Bihar.<br>• The name of Er. Naresh was approved to attend and present a paper on "In-situ paddy straw management machinery for paddy-wheat crop rotation system" through online mode in "XV Agriculture Science Congress & ASC Expo" organized by National Academy of Agricultural Sciences and Banaras Hindu University at Institute of Agricultural Sciences, Banaras Hindu University, Varanasi from November 13-16, 2021. |
| | **12.11.2021** | • The name of Dr. Vijaya Rani, Associate Professor & Head (FMPE) has approved to attend and present a paper on "Development of a multi-row biogas slurry applicator" in "55$^{th}$ Annual Convention of Indian Society of Agricultural Engineers" through online mode to be organized during 23-25 November, 2021 in Patna jointly by ISAE, New Delhi and Dr. Rajendra Prasad Central Agricultural University (RPCAU), Pusa, Samastipur, Bihar. |
| | **02.12.2021** | • The students of M. Tech. (2021-22) were allotted Major Advisor vide rule number 27.1, 27.2 and 54$^{th}$ amendment of University Calendar Volume II.<br>• The students of Ph.D. (2021-22) were allotted vide rule number 27.1, 27.2 and 54$^{th}$ amendment of University Calendar Volume II.<br>• The name of Dr. Vijaya Rani was approved to attend ICAR Sponsored Winter School on "Farm Mechanization for Facilitating Conservation Agriculture & Climate Smart Technology" from January 4-24, 2022 organized by ICAR - Central Institute of Agricultural Engineering, Nabibagh, Berasia Road, Bhopal- |

| | | |
|---|---|---|
| | | 462038 (M.P.) |
| | **02.02.2022** | • Allotted PG student (ICAR) to the faculty member<br>• Dr. Ganesh Upadhyay has assigned the duty for incorporating the suggestion for technical programme for year 2021-22. |
| | **09.03.2022** | • Allottedcourses to faculty members for B. Tech. (Agril. Engg.) Program for the 2nd Semester 2021-22<br>• Allotted courses to faculty members for M. Tech. and Ph.D. Program for the 2nd Semester 2021-22 |
| | **13.04.2022** | • The revised structure and syllabi for M.Tech. and Ph.D. in Agricultural Engineering with specialization in Farm Machinery and Power Engineering was discussed in details and approved for further consideration by BOS, COAE&T |
| **2022-23** | **01.08.2022** | • The Vision of the department was discussed in detail and finalized by the Department advisory committee. |
| | **09.08.2022** | • Allotment of UG and PG courses to faculty for the 1st Semester 2022-23<br>• Department advisory committee approved the title and name of authors of the Abstracts for submission in 56th Annual Convection of ISAE to be held at Tamil Nadu Agricultural University, Coimbatore (Tamil Nadu). |
| | **06.10.2022** | • The newly admitted M. Tech. (FMPE) students of Academic Year 2022-23 were allotted to the faculty members<br>• The name of Dr. Anil Kumarwas approved to attend and present a paper on "Constraints and strategies for sustainability of rice wheat cropping system in Indo-gangetic plains" in National Conference on "Advances in Agrometeorological Interventions for Climate Resilience Agriculture (AGMET 2022)" organized during 02-04 November, 2022 at Tamil Nadu Agricultural University, Coimbatore, Tamil Nadu. |
| | **28.11.2022** | • The name of Dr. Vijaya Rani, Er. Swapnil Choudhary and Dr. Ganesh Upadhyay was approved to attend Annual Workshop of AICRP on FIM (ICAR) to be held at OUAT, Bhubaneswar (Odisha) during January 19-21, 2023. |
| | **06.12.2022** | • Course No. ME 501, Mechatronics and Robotics in Agriculture as per BSMA will be shared by department of Basic Engineering (Electronics + Mechanical) and Farm Machinery & Power Engineering (EE/ME-501/FMPE). The course no. of above course in the catalogue will be decided by the concern department.<br>• Course No. FMPE 516, Advanced Manufacturing Technologies as per BSMA will also be shared (ME-507/FMPE 516) among these two departments. |
| | **02.01.2023** | • AllottedUG and PG Courses to faculty for the 2nd Semester 2022-23 |

## Department of Soil & Water Engineering

Chairperson : Dr.R.K. Jhorar, HOD
Secretary : Dr. Sanjay Kumar
Members : Dr. M.S. Sidhpuria, Dr. Mukesh Kumar,Dr. Ram Naresh

| Year | Date | Major Recommendations |
|---|---|---|
| **2018-19** | 16-07-2018 | • Allotted U.G. & P.G courses for Ist semester 2018-19.<br>• Allotted U.G. students for the project work, SWE-411 for Ist Semester 2018-19.<br>• Approved the proposal submitted by Dr. Sanjay Kumar, Er Mukesh Kumar and Er. Ram Naresh to attend a two weeks training programme, organized by COAE&T on Robotics and Automation from 17.07-2018 to 30-07-2018. |
| | 21-09-2018 | • Allotted of M.Tech. students<br>• Allotted of Ph.D. students |
| | 31-12-2018 | • Allotted U.G. & P.G courses for IInd semester 2018-19. |
| | 29-01-2019 | • AllottedU.G. & P.G courses for Ist semester 2019-20.<br>• AllottedU.G. students for the project work, SWE-411 for Ist Semester 2019-20. |
| **2019-20** | 16-07-2019 | • AllottedU.G. & P.G courses for Ist semester 2019-20.<br>• AllottedU.G. students for the project work, SWE-411 for Ist Semester 2019-20 |

| | | |
|---|---|---|
| | 08-05-2020 | • NominatedDr. Mukesh Kumar for refresher course entitled "Language Skills" from 27 May to 16 June, 2020 (three weeks), conducted by AAREM, DHRM, CCS HAU Hisar. |
| **2020-21** | 04-07-2020 | • AllottedU.G. & P.G courses for I$^{st}$ semester 2019-20.<br>• Allotted advisor to UG students |
| | 25-08-2020 | • Reopened Ph.D. programme in the department |
| | 08-10-2020 | • Allotted courses to faculty members for Ph.D. programme in the department |
| | 02-01-2021 | • Allottedadvisor to M.Tech. students.<br>• Allotted advisor to Ph.D. students. |
| | 18-01-2021 | • Discontinuation of Ph.D. programme in the department |
| | 22-01-2021 | • Nominated Er. Ram Nareshfor refresher course entitled "Communication Skills and Technical Writing" from 03.02.2021 to 23.02.2021 (three weeks), conducted by AAREM, DHRM, CCS HAU Hisar. |
| | 03-02-2021 | • Allotted of UG courses<br>• Allotted M.Tech. courses<br>• Allotted Ph.D. courses |
| | 15-02-2021 | • Nomination of Er. Sundeep Kumar to attend the Three Weeks Online Certificate Course on Basic Geo-Informatics for Climate Smart Agriculture from February 22 to March 14, 2021 to be organized by Centre for Advanced Agricultural Science and Technology (CAAST) for Climate Smart Agriculture and Water Management (CSAWM) and Mahatma Phule Krishi Vidyapeeth (Agricultural University), Rahuri, Maharashtra.<br>• Nominated Dr.Sanjay Kumar to attend the International Conference on Water Resource Management from February 26 to 27, 2021 organized by MAUA&T Udaipur, Rajasthan. |
| | 09-06-2021 | • Discussed about certificate course on design, installation, operation and protected agriculture structures and associated system. |
| **2021-22** | 10-08-2021 | • Allotted U.G. & P.G courses for I$^{st}$ semester 2021-22 |
| | 07-09-2021 | • Discussed the syllabus for comprehensive examination (Ph.D. ) |
| | 16-09-2021 | • Nominated Dr. Ram Naresh for refresher course entitled "Refresher course on Educational Technology" from 21.09.201 to 11.10.2021 (three weeks), conducted by AAREM, DHRM, CCS HAU Hisar |
| | 28-10-2021 | • Allotted advisor to M.Tech. students |
| | 10.02.2022 | • Allotted U.G. courses for II$^{nd}$ Semester 2021-22<br>• Allotted P.G. courses for II$^{nd}$ Semester 2021-22<br>• Participated faculty members Dr. Kuldeep Singh Er. Mukesh Kumar on 24$^{th}$ to 26$^{th}$ March 2022 in conference/workshop/training. |
| | 25.02.2022 | • Approved Participation of Dr. Darshan Duhan from 15$^{th}$ Feb to 7$^{th}$ March 2022 in Conference/Workshop/Training |
| | 08.03.2022 | • Discussed and considered syllabus for BSMA. |
| | 26.04.2022 | • Approved participation of faculty members Dr. Kuldeep Singh and Er. Mukesh Kumar from 4$^{th}$ May to 24 May 2022 in conference workshop/training. |
| | 21.05.2022 | • Approved participation of Dr. Darshana in conference/workshop/training from 11$^{th}$ to 13$^{th}$ June 2022. |
| | 17.06.2022 | • Approved participation of Dr. Narender Kumar and Er. Ravi from 27$^{th}$june to 27$^{th}$july 2022 in conference/workshop/training |
| **2022-23** | 19.07.2022 | • Allotted U.G & P.G Courses for 1$^{st}$ Semester 2022-23<br>• Discussed on Technical Programme of Research |
| | 30.08.2022 | • Re-allotted of P.G. Courses for 1$^{st}$ Semester 2022-23 |
| | 05.09.2022 | • Allotted Major advisor to M. Tech. &Ph.D. students |
| | 09.12.2022 | • Approved participation of faculty members in conference/workshop/training |
| | 02.01.2023 | • Allotted U.G & P.G Courses for II$^{nd}$ Semester 2022-23<br>• Approved participation of faculty members Er. Kapil, DES Dr. Love Kumar |

| | | |
|---|---|---|
| | | Assis. Scientist from 11th Janurary to 10 Feb 2023 in conference/workshop/ training |

## Department of Processing and Food Engineering

Chairperson : Dr. Ravi Gupta
Secretary : Dr. Nitin Kumar
Members : Er. Sunil Kumar
: Dr. Anil Panghal

| | Date | Major Recommendations |
|---|---|---|
| **2018-19** | **18.05.2018**<br><br>**16/07/2018**<br><br><br><br>**17.10.2018**<br><br>**22.12.2018** | • The committee recommended the Er. Sunil Kumar to participate in the training pragramme on post-harvest management and storage techniques at National Institute of Plant Health Management, Hyderabad.<br>• DAC approved the name of Dr. D K Sharma, Dr V K Singh, Dr Nitin Kumar and Er Sunil Kumar for participataion in two weeks training programme on Robotics and Automation at COAE&T, CCS HAU, Hisar<br>• Allotted PG students to faculty<br>• Approved submission of RPF III in the AICRP project<br>• DAC approved the participation of Dr D K Sharma and Dr V K Singh in the 53rd ISAE Annual Convention and International Symposium at BHU, Varanasi, India.<br>• Approved updation of Departmental profile on HAU website |
| **2019-20** | **01.04.2019**<br><br>**27.09.2019**<br>**09.10.2019**<br><br>**11.11.2019**<br>**14.01.2020** | • Approved renaming the laboratories and their allotment to faculty members.<br>• Approved website updation<br>• Allottedmajor advisors for M. Tech and Ph.D. students<br>• Approved participation of Dr. Arun Kumar, Er. Sunil Kumar and Dr. Nitin Kumar in winter school at CIPHET, Ludhiana<br>• Participation of Er. Sunil Kumar in the winter school organized at NDRI, Karnal, India<br>• Approved participation of Dr. Anil Panghal in AMI conference at CUH, Mahendergarh, India<br>• The three months certificate course on Food Processing under IDP project was approved by the DAC |
| **2020-21** | **22.06.2020** | • Approved participation of Dr. Nitin Kumar in the refresher course at DHRM, CCS HAU, Hisar was approved by the DAC. |
| | **30.01.2021** | • Cross listing of the courses FPT 202 and FPT 203 was discussed in the DAC<br>• Allotted advisors to new PG students<br>• Finalization of the technical programme was discussed<br>• Approvedagenda forregular monitoring of the research work of PG students and their presentation<br>• Compilation of question papers and formulation of question bank was discussed |
| **2021-22** | **11.02.2022** | • Allotted advisors to the newly admitted Ph.D. students was discussed in the DAC |
| **2022-23** | **16.12.22** | • Approved participation of the faculty members in the 38th Annual Workshop of AICRP on PHET at CPCRI, Kasargod, India was discussed |
| | **10.01.2023** | • Association of Ph.D. scholar with faculty members in UG practical classes was discussed and approved in the DAC. |

## Department of Renewable & Bio Energy Engineering

Chairperson : Dr. Y.K. Yadav, HOD
Secretary : Dr.Yadvika
Members : Dr. Gaurav Chaudhary, Er. Nishant Chaudhary, Dr. Parvesh Antil

| | Date | Major Recommendations |
|---|---|---|
| **2018-19** | **30.06.2018** | • Finalized the course content of M.Tech.&Ph.D.<br>• Finalized technical programme of the department |
| **2019-20** | **30.01.2019** | • Dr Y.K. Yadav and Dr.Yadvika were nominated to participate and present their papers in the International Symposium on Innopreneurship: A need of Sustainable Agriculture & Rao Bahadur Dr. Ram Dhan Singh Fifth Memorial Lecture to be held at CCS HAU, Hisar from February 2-3,2019. |
| | **05.01.2019**<br><br>**30.12.2019** | • Approved participation of Parmod Sharma and KanishkVerma in the 53rd ISAE Annual Convention and International Symposium on Engineering Technologies for precision and Climate Smart Agriculture (January 28-30, 2019) at Banaras Hindu University (BHU), Varanasi, U.P., India.<br>• Courses for UG and PG courses alloted |
| **2020-21** | **22.06.2020** | • Dr. Gaurav Chaudhary requested for publication of edited books with John Wiley & Sons- Scrvener publishing house was discussed and approved. The details of books are as<br>• Book series 1: Advances in Biofeedstocks& Biofuels<br>• Book series 2: Bioprocessing in Food Science.<br>• The course distribution for UG classes for the 1st Semester of 2020-21 has been discussed and the courses were distributed.<br>• The final year B.Tech., (Agri. Engg.) students allotted to the department of RBEE was further allotted to the faculties of the department. |
| | **01.09.2020** | • Participated of new faculty (Dr. Gaurav Chaudhary, Asst. Prof. RBEE) in Induction training course being organised by DHRM-CCS HAU Hisar, a mandatory training for newly appointed faculty. |
| | **01.09.2020** | • Participated of new faculty (Er. Nishant Chaudhary) in Induction training course being organised by DHRM CCS HAU Hisar, a mandatory training for newly appointed faculty. |
| | **20.08.2020** | • DAC discussed and recommended for collaboration on the following project for "Converting waste to wealth" onward submission through Director of Research. |
| | | • Approved agenda for the components of the AICRP on Energy in Agriculture &Agro-based Industries (EAAI) should work under the newly created Department of Renewable and Bio-Energy Engineering (RBEE), CCS HAU Hisar |
| | **19.08.2020** | • Discussed the concept note for two collaborative projects<br>• PAU Ludhiana: Ex-situ utilization of paddy straw in briquetting machine and utilization of developed briquettes for direct and bio transformed fuels.<br>• NDRI Karnal: Waste to wealth-Co-fermentation of dairy waste and agro-waste for viable bioethanol production engineered stress-tolerant yeast using multienzyme co-immobilization,Co-PI from HAU: Dr. Gaurav Chaudhary |
| | **30.07.2020** | • Offered UG courses during the 1st semester 2020-21 |
| **2021-22** | **02.02.2021** | • Course distribution of UG & PG classes for 2nd Semester of 2020-21 was discussed and allotted.<br>• The distribution of PG students for their major advisor was discussed and students were allotted to the faculty |

| | | |
|---|---|---|
| | **10.08.2021** | • Allotted courses for UG & PG<br>• Distribution of UG students was done<br>• Proposal for establishment of RE lab in CCS HAU, Hisar was approved |
| | **21.09.2021** | • Submission of Project proposal to National Livestock Mission, GOI, Ministry of Fishries, Animal Husbandry and Dairying, Dept. of Animal Husbandry and Dairying by Dr. Gaurav Chaudhary (PI), Er. Nishant Chaudhary (Co-PI) and Dr. Sanjoy Ghosh as Collaborator from IIT Roorkee. Was approved |
| | **22.09.2021** | • Committee was informed that one project entitled "Fractionation of paddy straw and its valorization" costing approx. Rs. 20 lakhs was already submitted to DST Haryana by Dr.Gaurav Chaudhary. |
| | | • Project proposal entitled" Production of feed enzymes using agro-/food residues as substrate for additive to poultry feed" for the submission under 'National Livestock Mission' under submission Research and Development, Extention and Innovation, of Ministry of Fishries, Animal Husbandry and Dairying, Government of India was discussed and approved for the further submission to the agency. |
| | | • The committee recommended to add Dr. Gaurav Chaudhary as a member of project submission committee. |
| **2022-23** | **03.02.2022** | • Allotted PG students |
| | **15.02.2022** | • Approved the request of Nitin, SRF to attend "3rd International Conference On recent advances In Bio-Energy Research (ICARBR-2022)" conference.<br>• Allotted of UG/PG courses for 2nd Semester 2021-22 |
| | **09.03.2022** | • Finalized renewable Energy Engineering courses as per BSMA report |
| | **20.08.2022** | • Approved revision of M.Tech. course<br>• Approved allotment of courses for UG<br>• Approved distribution of UG students<br>• Joint Indo-Canadian Project Proposal |
| | **13.10.2022** | • Approved participation of Dr. Gaurav Chaudhary in Refresher Course on 'Enterpreneurial Prospects in Agricultural & Allied Sciences' from November 03-22, 2022 being organised by the Academy of Agricultural Research and Education Management, Directorate of Human Resource Management, CCS HAU, Hisar in collaboration with College of Home Science. |
| | **29.11.2022**<br><br>**09.11.2022** | • Approved request of Dr. Y.K. Yadav to attend Short-term Trainingon IPR at DHRM, Hisar<br>• Approved request of Dr. Y.K. Yadav to attend World Renewable Energy Congress XXI<br>• Advisor allotted M. Tech Students<br>• Allotted UG/PG courses for 2nd semester 2022-23 |

## Department of Basic Engineering

Chairperson : Dr. Amarjit Kalra, HOD
Secretary : Dr. Sandeep Bhardwaj, Convener
Members : Dr. Sandeep Dhundara, Dr.Yadvika, Dr. Parvesh Antil

| | **Date** | **Major Recommendations** |
|---|---|---|
| **2018-19** | **19.02.2018** | • Basic Engineering, New Department was created by the Board of Management vide item No. A-13 in its 225th Meeting held on 07.02.2017 so the proposed Departmental Advisory Committee of Department of Basic |

| | | |
|---|---|---|
| | | Engineering, COAE&T was constituted with two faculty member from other Department. |
| **2019-20** | **26.07.2019** | • The UG & PG courses were approved by 3rd Departmental Advisory Committee by the Department of Basic Engineering. |
| | | • Dr. Parvesh Antil allowed to attend International workshop on Biomass conservation technology for crop residue management from 19-28Nov2019 at COAE&T, CCSHAU, Hisar |
| **2020-21** | **17.06.2020** | • Approved refresher course on statistical tools and technique for analysis of agriculatural data conducted by AAREM, DHRM in collaboration with Deptt. Mathematics and Statistics, CCS HAU from 8-28 July, 2021 to Dr. Parvesh Antil |
| | **31.08.2020** | • Dr. Sandeep Dhundhara was allowed for Induction training course from 09sept-09 Oct,2020 at DHRM, CCSHAU, Hisar |
| **2021-22** | **21.12.2021** | • Approved the participation of online FDP on Solar Sprayer based village micro grids potential in Punjab from 5-7jan,2022 at UIET, PU, Chdto Dr. Sandeep Dhundhara |
| **2022-23** | **10.08.2022** | • Basic requirement of mechanical labs with required staff was recommended and forwarded to administration for approval. |
| | **30.11.2022** | • BSMA syllabus discussed with some modifications and thereafter approved |
| | **04.01.2023** | • DAC adopted the BoS suggestion for starting M.Tech. in Civil, Mechanical Engg. and Electrical Engg. field. |
| | **27.01.2023** | • DAC approved the participation of Dr. Amerjeetkalra, Dr. Rajenderkumar, Dr. Sandeep Bhardwaj in conference at CCS HAU from 17-19 Feb 2023 |
| | **13.02.2023** | • DAC approved the participation of Dr. Rajender Kumar for traning at CCS HAU from 13-22 March,2023 |

**6.5.1.4 Anti-Ragging Cell:** *In pursuance to the Judgment of the Hon'ble Supreme Court of India dated 08.05.2009 in Civil Appeal No. 887/2009, the University Grants Commission has framed "UGC Regulations on curbing the menace of ragging in higher educational institutions, 2009" which have been notified on 4th July, 2009 in the Gazette of India. Does the College follow this regulation and subsequent guidelines issued in the matter in letter and spirit? Give details*

Yes, the college conforms to the applicable regulation and subsequent guidelines. The Dean of the College of Agricultural Engineering and Technology has established a Anti-ragging committee to combat harassment.

**Composition of committee:**

Anti Ragging Squad committee has been constituted by the Dean, College of Agricultural Engineering & Technology. The following Vigilance Committee was constituted for prevention of ragging in the College.

1. Dr. Sanjay Kumar, Professor, SWE
2. Dr. Parvesh Antil, Asstt. Prof., Basic Engineering
3. Dr. Arun Kumar, Asstt. Prof., RBEE
4. Dr. Nitin Kumar, Asstt. Prof., PFE
5. Er. Bharat Patel, Asstt. Prof., FMPE

The Committee investigates incidents of misconduct and reports its findings to the appropriate authority. The committee devises guidelines for operation, frequency of visits, meeting schedules, etc., and also combats the ragging problem in the College and Hostels.Every year, a programme of orientation is conducted for new students**.**In the past five years, no incidents of ragging have been reported in the College of Agricultural Engineering & Technology.

**6.5.1.5. Biological waste disposal facility:** *Whether wastes (chemical, biological, radioactive, universal, and recyclable) are generated by a variety of research, clinical, service, maintenance, and cleaning operations at the College level? If yes, then mention the disposal mechanism being adopted as per the government guidelines*

Yes, the Chemical safety, Biological safety regulations are followed in the institute.The Committee monitors the fire safety measures and waste management procedures, including chemical and biological storage and disposal. The Estate Office of the University takes care of safety aspects and biological waste disposal generated by research, maintenance and cleaning operations. Moreover, the University has Institutional Bio Safety Committee (IBSC) registered with Department of Biotechnology, Ministry of Science and Technology, registered by Gazette Notification with Registration No. D 221. The University takes care of safety aspects and biological waste disposal generated during research, maintenance and cleaning operations of the College.

The Bio Safety Committee (IBSC) duly approved from Department of Biotechnology, Ministry of Science and Technology is as follows:

| S. No. | Name, Designation & Present affiliation | Composition |
|---|---|---|
| 1. | Dr. Jeet Ram Sharma, Director of Research, CCSHAU, Hisar | Chairman |
| 2. | Dr. Priti Malik, Lady Medical Officer, CCSHAU, Hisar | Biosafety Officer |
| 3. | Dr. Sushila Mann, Professor, Deptt. of Animal Biotechnology, LUVAS, Hisar | Outside Expert |
| 4. | Dr. Neeraj Kumar, Dean, COBS&H, CCSHAU, Hisar | Internal Member |
| 5. | Dr. Surender Pahuja, Dean, College of Agriculture, CCSHAU, Hisar | Internal Member |
| 6. | Dr. Leela Wati, Prof. & Head, Deptt. of Microbilogy, CCSHAU, Hisar | Internal Member |
| 7. | Dr. Hawa Singh Saharan, Prof. & Head, Deptt. of Plant Pathology, CCSHAU | Internal Member |
| 8. | Dr. Sangeeta Sindhu, Assoc. Prof. & Head, Deptt. of Food & Nutrition, CCSHAU, Hisar | Internal Member |
| 9. | Dr. Sanjay Kumar Thakral, Prof. & Head, Deptt. of Agronomy, CCSHAU, Hisar | Internal Member |
| 10. | Dr. Rachna Gulati, Officer in-Charge, College of Fisheries Science, CCSHAU, Hisar | Internal Member |
| 10. | Dr. Namita Singh, Professor, Deptt. of Bio& Nanotechnology, GJUS&T, Hisar | DBT Nominee |
| 11. | Dr. Shikha Yashveer, Asstt. Professor, Deptt. of MBB&B, CCSHAU, Hisar | Member Secretary |

**6.5.1.6. Institutional Ethics Committee for Experiment on Animals:** *Whether the institute/College is following CPCSEA guidelines and constituted an Institutional Animal Ethics Committee (IAEC), get their animals house facilities inspected and get their project cleared by CPCSEA and IAEC before commencing them? If yes, the college should make statement that it is adhering all guidelines in the matter.*

Yes, Ethical committee pursue the cases related to the animal research etc. Moreover, University level committee monitoring the reports and administrative control over the activities at centre level by following CPCSEA guidelines.The University has Institutional Animal Ethics Committee registered with CPCSEA (Now renamed as CCSEA) vide letter No.25/12/2017-CPCSEA dated 26.08.2022 and works in full compliance. The registration number is 2187/GO/Re/S/22 /CPCSEA. The Institutional Animal Ethics Committee duly approved from CPCSEA is as follows:

| S. No. | Name | Composition |
|---|---|---|
| 1. | Dr. S.K. Sehrawat | Chairman |
| 2. | Dr. Pushpa Kharb | Biological Scientist |
| 3. | Dr. Suresh Kumar | Veterinarian |
| 4. | Dr. Ravikant, | Scientist Incharge of Animal House Facility |
| 5. | Dr. Sangeeta C. Sindhu | Scientist from different biological discipline |
| 6. | Dr. Rachna Gulati | Member Secretary |

Yes, the College is adhering to all guidelines in the matter.

**6.5.1.7. Committee for Prevention of Sexual Harassment of Women at Work Places:** *Does the institution is adhering the sexual harassment of women at workplace (Prevention, Prohibition and Redressal Act, 2013) in letter and spirit. If yes, mention the constitution of sexual harassment committees and date of proceedings conducted in last five years in tabular form:*

Yes, a committee was constituted by the Dean for prevention of sexual harassment.

**Prevention of Sexual Harassment Committee:**

**Chairperson** : Dr. Baldev Dogra, Dean, COAE&T
**Convener** : Dr. Vijaya Rani, Professor & HOD, FMPE
**Members** : Dr. Yadvika, Associate Professor
Dr. Parvesh Antil, Asstt. Professor
Sh. Mukesh, S.S.S.
Smt. Babita, Clerk
Ms. Ekta, 2018FST30D
Ms. Pragya Chaudhary, 2019AE21BIV
Mr. Prince Goyat, 2019AE25BIV

**No complaint has been received pertaining to sexual harassment from any students in this college during the last five year.**

## 6.5.2 Faculty:

**6.5.2.1. Faculty Strength:** *Mention the Faculty position (both in sanctioned and in-position) at the College.*

| Designation | Sanctioned | In Place* | Vacant |
|---|---|---|---|
| Professor and equivalent | 1 | 1 | 0 |
| Assoc. Professor and equivalent | 10 | 7 | 3 |
| Asstt. Professor and equivalent | 26+9# | 20+9# | 6 |
| Total | 46 | 37 | 9 |

* Faculty in place working as Professor (07) and Associate Professor (01) include Personal Promotion (PP) as a personal measure. #Faculty at outstations/other colleges

**Note:** All the faculty of this programme is assigned the responsibilities for the multiple programmes. Faculty appointed in teaching also carries research and extension activities; likewise faculty appointed in research also carries teaching and extension activities.

**6.5.2.2. Faculty Profile*:***Mention department wise faculty profile in tabular form and mention whether present profile is sufficient to meet the academic requirement of the College:*

| S. No. | Name and Designation | Mobile No. and email | Specialization | Publications in number | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | | | Full paper | Conference etc. | Books | Book chapters | Man-ual | Annals/ research reports |

* Dr. M.L. Bansal has retired on 30.04.2019

**6.5.2.3. Credentials of the Faculty:** *Whether the institution has employed competent faculty members qualified to accomplish the mission and goals of the institution?* **YES**

*Give the highest qualification received by each faculty, related work experiences in the field, professional licensure and certifications, honors and awards, continuous documented excellence in teaching, or other demonstrated competencies and achievements that contribute to effective teaching and student learning outcomes.*

| S. No. | Name and Designation | Highest qualification | Honours/awards | Any Other Achievement that contributes to effective teaching and student learning and outcome |
|---|---|---|---|---|
| **Farm Machinery & Power Engineering** | | | | |
| 1. | Dr. Vijaya Rani Prof. & Head | Ph.D. | • Best paper award ISAE 2015<br>• Best paper awardISAE 2017<br>• Appreciation letter by Dean COAE&T for Coordination activities of COAE&T for Accreditation peer review team | • Co-ordinates B.Tech Training programme and placed students in reputed companies<br>• Prepared manual for Teaching<br>• Established combine lab under CSR |

| | | | | |
|---|---|---|---|---|
| | | | from ICAR | |
| 2. | Dr. Mukesh Jain Assistant Professor | Ph.D. | • Best Book award of ISAE 2017 | • Co-ordinates B.Tech Training programme and placed students in reputed companies<br>• Prepared manual for Teaching |
| 3. | Dr. Anil Kumar Assistant Professor | Ph.D. | • Best paper award of ISAE 2017 | • Power point presentations of the courses related to Farm Machinery and Power Engineering have been developed<br>• Developed Books/Manual/ Display charts etc. |
| 4. | Er. Swapnil Choudhary Assistant Scientist | M. Tech. | • University Gold Medal in M. Tech Degree Programme (2015)<br>• Best poster award GINMA-2019, CCS HAU, Hisar | • Power point presentations of the courses related to Farm Machinery and Power Engineering have been developed<br>• Developed Books/Manual/ Display charts etc. |
| 5. | Er. Naresh Assistant Professor | M. Tech. | • Best poster award GINMA-2019, CCS HAU, Hisar<br>• Appreciation letter by Dean COAE&T 2020 for compilation of information regarding AICTE and ICAR accreditation | • Power point presentations of thecourses related to Farm Machinery and Power Engineering have beendeveloped.<br>• Developed /Manual/Display chartsetc. |
| 6. | Er. Bharat Patel District Extension Specialist | M. Tech | • Best Paper Award from Bhartiya Krishi Anusandhan Patrika | • Power point presentations of thecourses related to Farm Machinery and Power Engineering have beendeveloped.<br>• Developed /Manual/Display charts etc. |
| 7. | Er. Ajit Sangwan DES ( KVK Kaithal) | M. Tech. | - | • Power point presentations of thecourses related to Farm Machinery and Power Engineering have beendeveloped.<br>• Developed /Manual/Display charts etc. |
| 8. | Dr. Ganesh Upadhayay Assistant Scientist | Ph.D. | - | • Power point presentations of thecourses related to Farm Machinery and Power Engineering have beendeveloped.<br>• Developed /Manual/Display charts etc. |
| **Processing and Food Engineering** | | | | |
| 1. | Dr. Ravi Gupta Professor & Head | Ph.D. | • Merit fellowship | • Co-ordination of UG and PG student. |
| 2. | Dr. D.K. Sharma Senior Scientist | Ph.D. | • GATE Fellowship | • Practical manuals<br>• PPT for different courses, Training placements etc |
| 3. | Dr. V.K. Singh Assistant Professor | Ph.D. | | • On lien (Since 2022) |
| 4. | Dr. Nitin Kumar Asstt. Scientist | Ph.D. | • DST Fellowship | • Training and Placement of UG and PG Students |

| | | | | |
|---|---|---|---|---|
| 5. | Er. Sunil Kumar Assistant Scientist | M. Tech | • Merit Fellowship | |
| **Soil and Water Engineering** | | | | |
| 1. | Dr. R.K. Jhorar Professor &Head | Ph.D. | • GATE fellowship of MHRD during M.Tech.<br>• Sandwich fellowship of WageningenUniversity for Ph.D.<br>• Best teacher award by CCS HAU (ICAR sponsored) for 2010-11<br>• Best Poster paper Award (2017) (SWE) from Indian Society of Agricultural Engineers | • Co-authored practical manuals on i) Hydrology, ii)Soil and Water Conservation Engineering and iii)Irrigation Engineering and Equipment Design.<br>• Developed charts as teaching and extension aids onvarious aspects of soil and water engineering.<br>• Prepared and distributed detailed course material to support on line teaching during corona pandemic |
| 2. | Dr. M.S. Sidhpuria Professor | Ph.D. | • Chaudhary Devi Lal Outstanding All India Co ordinate Research Project (AICRP) Award for the year 2009 was awarded to (AICRP) for Dryland Agriculture, Hyderabad<br>• Vice Chancellor Bronze medal in B. Tech.<br>• GATE Fellowship<br>• CSIR Senior Research Fellowship | • Development of power point presentation for PG courses |
| 3. | Dr. Sanjay Kumar Professor | Ph. D. | • Merit Scholarship during B. Tech.<br>• Merit Scholarship during M.Tech. | • Developed charts as teaching and extension aids on various aspects of soil and water engineering.<br>• Prepared and distributed detailed course material to support on line teaching during corona pandemic |
| 4. | Dr. Ram Naresh Assistant Professor | M.Tech. | • ICAR JRF, Fellowship<br>• Best Poster paper Award (SWE) from IndiaSociety of Agricultural Engineers (2019-2020) | • PPT of courses<br>• Teaching charts,<br>• Software/application development |
| 5. | Dr. Mukesh Kumar Asst. Scientist | Ph.D. | ASRB NET | - |
| 6. | Dr. Kuldeep Singh DES (KVK, Sonipat) | Ph.D. | ASRB NET | - |
| 7. | Dr. Sundeep Kumar Antil District Extension Specialist | Ph.D. | Second position in Best Poster Award (2017) in Golden Jubilee International conference on Gender Issues and Socio-Economic Perspectives for Sustainable Rural Development held during 23-25 Oct. 2017 at CCSHAU, Hisar. | • Prepared course material for UG B.Sc. Agri for online teaching during COVID-19 pandemic |
| 8. | Er Kapil DES (Agril Engg) | M. Tech. | ASRB Net | |

| | | | | |
|---|---|---|---|---|
| 9. | Dr. Narender Kumar DES (Agri. Engg) | Ph.D. | ASRB Net | |
| 10 | Er. Ravi Siwan DES (Agri. Engg) | M. Tech. | ASRB Net | |
| 11. | Dr Amandeep Singh Assistant Scientist | Ph.D. | ASRB Net | |
| 12. | Dr. Love Kumar Assistant Scientist | Ph.D. | • Qualified NTS of ICAR and also received IGKV-Fellowship He also became the first rank holder of Ph.D., CET-IGKV entrance examination.<br>• Qualified ICAR-NET in Land Water Management Engineering.<br>• Best M.Tech. Thesis Award in 2018 and Best Ph.D. Thesis Awardin 2022.<br>• Best Poster Paper Award (2016) (Soil and Water Engineering) from Information Technology Research Academy New Delhi<br>• Best Poster Paper Award (2017) (Soil and Water Engineering) from soil conservation society of india | |
| **Renewable & Bio Energy Engineering** | | | | |
| 1. | Dr. Y.K. Yadav Professor & Head | Ph. D. | • WREN Pioneer Award by World Excellence Award 2012 for Research and Innovation in Solar Energy at IIT, Delhi<br>• Distinguished Service Award for Energy in Agriculture byISAE<br>• Best Paper Awardby ISAE-2015 | • Developed course curriculum and courses for renewable energy forUG and PG<br>• Developed of Teaching Text andPractical for renewable energy<br>• Developed renewable energytechnology park for teaching &demonstration<br>• Developed of Audiovisualaids for teaching and use of ICT |
| 2. | Dr.Yadvika Assistant Scientist | Ph.D. | • Best paper award 2015<br>• Best Poster award 2015<br>• Best poster award 2016<br>• SRF Fellowship | • Developed of Audiovisualaids in Renewable energy<br>• Developed of manual/display charte |
| 3. | Arun Attkan Assistant Professor | | • UGC Fellowship | |
| 4. | Gaurav Chaudhary Assistant Professor | | • GATE 2007,2008,2010<br>• UGC JRF 2008<br>• UGC SRF 2010<br>• SERB- NPDF (National Post Doctoral Fellowship) 2017 | • Developed new Bioenergy Lab<br>• Prepared & distributed power point presentation to support teaching during Covid-19 pandemic |
| 5. | Er. Nishant Chaudhary Assistant Professor | | • MHRD scholarship (2014) | |

| | | | | |
|---|---|---|---|---|
| **Basic Engineering** | | | | |
| 1. | Dr. Amarjit Kalra Professor | Ph.D. | • Best paper award ISAE 2017<br>• FAO fellowship (2008) | • Prepared and distributed detailed course material to support on line teaching during corona pandemic |
| 2. | Dr Rajender Kumar Assistant Professor | Ph.D. | • Awarded INSACSIR-<br>• DAE/BRNSCICS Travel Fellowship toAustralia in 2015.<br>• Awarded appreciation letter by Dean, COAE&T in 2016<br>• Awarded appreciation letter by DSW, CCSHAU in 2018<br>• Technical adviser to conference at DCRUST, Murthal (2020) | • Authored practical manuals on i) HMT, ii) Workshop Technology practices iii) CAD & CAM teaching manual (iv) CAD & CAM practical manual (v) co-authored of Electrical machines practical manual<br>• Developed display boards/ charts as teaching and extension aids on various aspects of Mechanical Engineering.<br>• Training manuals/chapter for SC/ST Youth students<br>• Popular articles in Farmers magazine and various training programme for welfare of students & farmers.<br>• New laboratory setup for students for CAD/CAM and HMT<br>• Organize/ participated various Camps ( NI camp, polio camp, 10days camp, blood donation for NSS students<br>• Prepared and distributed detailed course material to students including develop and deliver lectures on Edu - Sat for Tech. Edu. Deptt., Haryana |
| 3. | Dr. Sandeep Bhardwaj Assistant Professor | Ph.D. | • QIP Fellow (AICTE<br>• Sponsored)<br>• Gate Fellowship (MHRD<br>• Sponsored) | • Training manuals for SC/ST youth students<br>• Popular articles in farmers magazine<br>• Laboratory development for construction material testing<br>• Organized/ participated various Camps (NI camp, polio camp) for NSS students |
| 4. | Dr. Sandeep Dhundara Assistant Professor | Ph.D. | • Research Award 2016, 2018, UIET, Panjab University, Chandigarh<br>• Best Paper Award, 12th IEEE India International Conference, INDICON-2015<br>• Awarded Senior Research Fellowship (SRF) by Council of Scientific & Industrial Research (CSIR)-HRDG Govt. of Indi | • PPT of courses<br>• Prepared and distributed detailed course material to support on line teaching during corona pandemic |
| 5. | Dr. Parvesh Antil Assistant Professor | Ph.D. | • TEQIP for Ph.D. (Jan 2014-Oct17)<br>• GATE 2011 | • PPT of courses<br>• New HMT lab developed |

### 6.5.2.4. Technical and Supporting Staff:

There are 96 sanctioned positions at the College, including Technical and Supporting Staff. Forty of the 96 positions are occupied, while the remaining 56 are vacant. The following is a list of the sanction, filled, and vacant positions:

| Sr. No. | Name of the Posts | Sanctioned | In position | Vacant |
|---|---|---|---|---|
| | **Technical Staff** | | | |
| **1.** | Instrumentation Engineer | 1 | 1 | 0 |
| **2.** | Assistant Engineer (Electronics) | 1 | 1 | 0 |
| **3.** | Workshop Engineer | 1 | 1 | 0 |
| **4.** | Lab Assistant | 3 | 2 | 1 |
| **5.** | Lab Technician | 1 | 1 | 0 |
| **6.** | Mechanic | 17 | 7 | 10 |
| **7.** | Driver-cum-mechanic | 2 | 2 | 0 |
| **8.** | Fitter | 5 | 0 | 5 |
| **9.** | Turner | 2 | 1 | 1 |
| **10.** | Auto Electrician | 1 | 1 | 0 |
| **11.** | Welder | 3 | 1 | 2 |
| **12.** | Carpenter | 1 | 0 | 1 |
| **13.** | Workshop Mate | 1 | 0 | 1 |
| **14.** | Technical Assistant | 1 | 0 | 1 |
| **15.** | Machine man | 1 | 0 | 1 |
| **16.** | Sr. Motor Rewinder | 1 | 0 | 1 |
| **17.** | Foremen | 4 | 1 | 3 |
| **18.** | Sr. Mechanic (Ref. & AC) | 1 | 0 | 1 |
| **19.** | Sr. Tractor Mechanic | 1 | 0 | 1 |
| **20.** | Sr. Lab assistant | 1 | 1 | 0 |
| **21.** | Assistant foreman | 1 | 0 | 1 |
| | **Supporting Staff** | | | |
| **22.** | Computer Operator | 1 | 0 | 1 |
| **23.** | Attendant | 1 | 0 | 1 |
| **24.** | Tracer | 3 | 0 | 3 |
| **25.** | Store Keeper | 3 | 2 | 1 |
| **26.** | Driver | 2 | 2 | 0 |
| **27.** | Clerk | 9 | 7 | 2 |
| **28.** | Typist | 1 | 1 | 0 |
| **29.** | Helper | 5 | 1 | 4 |
| | **Other Staff** | | | |
| **30.** | Superintendent | 1 | 0 | 1 |
| **31.** | Assistant | 3 | 3 | 0 |
| **32.** | Personal Assistant | 1 | 1 | 0 |
| **33.** | Sweeper | 2 | 1 | 1 |
| **34.** | Stenographer (Jr/Sr) | 3 | 2 | 1 |
| **35.** | Messenger | 5 | 0 | 5 |
| **36.** | Blacksmith | 1 | 0 | 1 |
| **37.** | Well Observer | 1 | 0 | 1 |
| **38.** | Vehicle Attendant | 2 | 0 | 2 |
| **39.** | Security Guard | 2 | 0 | 2 |
| | Total | **96** | **40** | **56** |

### 6.5.3. Learning resources

**6.5.3.1 College Library (digital):** *Location of the library, Present staff position (in place), Availability of the following in library, Wi-Fi, No. of books and other reading materials, No. of periodicals and research journals, No. of internet points with number of computers, Seating capacity in library, Employing the latest technology in library sciences, Stocking arrangements of books, Collection of volumes on different subjects, Latest publications in the fields of relevant subjects, Automation and user services through computer, Opening hours, Subscription of journals of national and international repute, national dailies, magazines etc.*

Yes, The College of Agricultural Engineering and Technology has the facility of digital library. The students can explore their library related facility through Desktop digitally even on their mobile with their unique username allotted to them just their after admission and class enrolment. Every faculty has their access to their own allotted computers in their departments. Moreover, CCS Haryana Agricultural University has a Nehru Library, elegantly situated in the centre of campus, is the hub of academic and research activities.It has an extensive collection of books, journal volumes, and other documents. Using RFID-enabled identification badges, RFID-enabled kiosks allow users to independently issue and return documents. The RFID System and Koha Library Management Software are used for all automated services. OPAC (Online Public Access Catalogue) enables users to access the availability of Books and other documents from the campus-wide network, allowing them to readily locate the documents they need in the Library.The Library's online catalogue is publicly accessible via AgriCat (Union Catalogue of Indian Agricultural Libraries) and WorldCat via the Internet. Through AgriCat, university students and faculty can access the catalogues of all Indian agricultural libraries and verify the availability of the desired documents. University students and faculty have access to the internet for academic and research purposes through the library. For this purpose, the library has a well-equipped computer centre with 32 of the most up-to-date PCs equipped with Internet access and a provision for laptop users as well. The library has a smart classroom that is well-equipped for teaching M.Sc. and Ph.D. students and providing training programmes for faculty and students. A well-equipped conference room is also used for academic purposes in the library.

Summer library hours are 7:00 a.m. to 8:00 p.m., and holiday hours are 7:00 a.m. to 2:00 p.m. The winter working hours are 8.30 a.m. to 9 p.m., and the holiday hours are 9 a.m. to 4 p.m. There are 6 Reading Rooms with a total capacity of 650 readers. The Night Reading Hall has a seating capacity of 80 readers and is equipped with modern amenities, including exquisite furniture, an air-conditioned environment, and an uninterrupted electrical supply. It opens immediately after the library closes and remains open until midnight every day of the week.

The library has approximately 3.82 lakhsvolumes of books and other reading material in print. In addition, the library subscribes to 106 Indian and international print and online journals. In addition, it subscribes to a number of e-resources, including indiastat.com; Britannica On-Line Academic Edition (BOLAE); DELNET resources; Scopus Citation Database; NIPA e-Resource Solution for Students Preparing for Competitive Examinations; NIPA English Writing Improvement Tool; and NIPA Online English Language Development and Improvement Resources. Through this e-resource, the library provides access to more than 4,300,000 Question Banks.Academic Collection also includes the purchase of 2,319 e-books (perpetual access) and an annual subscription to EBSCO e-Books (more than 2,30,00 e-books). These downloadable e-books are accessible at the University and in a few outstations. From the University's library portal, online access to 14 international and 92 national journals was made available. ThroughCeRA-consortium of E-Resources on Agriculture, the library provides access to over 2,659 e-journals published by highly regarded publishers. Through EBSCO Database, the library provides access to more than 2.32 million electronic volumes.The Book

Bank enables students to borrow textbooks at nominal fees for the entire semester, with the option to purchase them at a 10–35% discount.Reprographic services such as black-and-white and colour photocopying and document digitization are provided at nominal rates. This college's students utilise the Nehru Library's literature on College of Agricultural Engineering & Technology subjects as well as all of the library's other resources.

**6.5.3.2. Laboratories, Instructional farm, Workshops, Dairy Plant, Veterinary Clinic, Hatchery, Ponds etc.:** *Cleary mention about laboratories, instructional farm, workshop, dairy plant, veterinary clinic, hatchery, ponds etc facilities available in the college with its numbers, space, speciality to conduct practical/hands on training.*

The table that follows provides details about the laboratory facilities available in the various departments of the College of Agricultural Engineering & Technology.

| Sr. No. | Facilities | Numbers | Space Length (m) x Width (m)/ $m^2$ | Speciality to conduct practical | Speciality to conduct hands on training |
|---|---|---|---|---|---|
| | **Laboratories** | | | | |
| **Department of Farm Machinery & Power Engineering** | | | | | |
| 1 | Farm Machinery Lab | | 150$m^2$ | • Different manual, animal and self-propelledmachineries are available in the lab to show the components and working of the machineries to the students.<br>• Projector facility is also available to show the field working videos of the machineries. | • Experienced experts/scientists &technicians are available for conducting the trainings. |
| 2 | Farm Power Lab | | 150$m^2$ | • The laboratory contains cut sections and models for various tractor and engine systems such as fuel system, gear system, differential, electrical system and complete tractor assembly for exposing the students to tractors, engines and their systems. | • The experiments conducted in the laboratory for familiarization of students with various systems, their working principles, types, study of tractor mechanics. |
| 3 | Ergonomics Lab | | 155$m^2$ | • The facilities are available in the lab to study the anthropometry of agricultural workers, physiological parameters such as heart rate, blood pressure, calibration of subject, respiration rate, | • Training about the operation of different equipments used for human parameter measurements is given to the students of UG & PG courses. |

| | | | | | |
|---|---|---|---|---|---|
| | | | | oxygen consumption, general fatigue, overall discomfort, noise and vibration etc. | |
| 4 | Implement Yard | | 318m$^2$ | • Different operational agricultural machinery is available to show the students and visitors (farmers) of the department. | - |
| 5 | Tractor workshop located at Director Farm | | 540m$^2$ | • Facilities are available for repair & maintenance of tractors and agricultural machinery and students of UG & PG courses are made aware about the problems in the tractor and their remedies. | • Training of operation, repair & maintenance of tractors and agricultural machinery given to the students by the experienced tractor mechanics & workers. |
| 6 | Machinery workshop | | 300m$^2$ | • Facilities for the students, conducting classes on practical learning of machinery fabrication are available.<br>• Facilities like lathe machine, shaper, hydraulic press, welding set, carpentry shop etc. are available for conducting practical classes. | • Experienced staff gives training to the students about operation and working of the machineries available in the workshop. |
| **Department of Processing & Food Engineering** | | | | | |
| 1 | Engineering Properties Lab | | 7 m x 4.8 m (33 m$^2$) | • Various machineries related to unit operations in agricultural processing are available to conduct practical class. | Testing and evaluation of agricultural processing equipment |
| 2 | Fruits & Veg. Processing Lab | | 15 m x 10.9 m (163 m$^2$) | • Sorting, washing, grading, waxing and machineries are availale to conduct practical class. | Shrink wrapping of citrus fruits, Testing and evaluation of Fruits& Veg. Processing Plant |
| 3 | Agro Processing Centre | | 15 m x 9.7 m (145 m$^2$) | • Cleaning, grading, sorting, grinding, pricking equipment are avaible for training of farmers and entrepreneurs. | Primary processing of agricultural produces, sevaluationof agricultural processing equipments. |
| 4 | Food Quality Lab | | 7 m x 4 m (92 m$^2$) | • Teaching qualitative and microbial analysis of fruits and vegetables to UG and PG students. | Qualitative analysis and storage study |
| 5 | Engineering Work Shop | | 13 m x 5 m (65 m$^2$) | • Design and development of equipment pertaining Agricultural produces | Fabrication of low cast equipments |

| | | | | | |
|---|---|---|---|---|---|
| | | | | processing | |
| 6 | Food Engineering Lab | | 15 m x 10 m (150 $m^2$) | • Extrusion and food packaging related operations | Production of Extruded products and packaging technology |
| **Department of Soil & Water Engineering** | | | | | |
| 1 | Soil & Water Conservation Engineering Lab | | 152 $m^2$ approx. | • Study of irrigation watermeasurement, soil moisture and soil conservation structures | • Discharge measurement, soil moisture sensors design of soil conservation structures, rainfall frequency analysis |
| 2 | Irrigation & Drainage Engineering Lab | | 156 $m^2$ approx. | • Study of Irrigation Sprayers and agricultural drainage | • Sprayer characteristics curves<br>• Design of surface and subsurface drainage system. |
| 3 | Soil & Water Engineering Field Lab | | 12500 $m^2$ approx. | • Study of discharge measurement, soil conservation structures, water table, underground drainage system. | • Parshal flumes Water table contour maps, in-situ hydraulic conductivity measurement, study of components and uniformity coefficient of drip and sprinkler irrigation system |
| 4 | GIS Lab | | 16.8 $m^2$ approx. | • Familiarization with RS &GIS software and its application in water resource management. | • Interpolation, Map overlaying, Watershedcharacterization. |
| **Department of Renewable and Bio-Energy Engineering** | | | | | |
| **1** | Energy Lab | | 200 $m^2$ | • Design and development of low cost solar operated equipment | Evaluation of solar tunnel dryer, solar dryer, biogas plant etc. |
| **2** | Bio-Energy Lab | | 50 $m^2$ | • Development of Biofuel &value-added products | Biofuel production & analysis of biomass |
| **Department of Basic Engineering** | | | | | |
| 1 | Civil Engineering Lab | | 14.3m x 10.6 m (152$m^2$) | • Amenities for the students, as well as classes that focus on on practical learning of study of Design of structure and Soil Mechanics.<br>• Study UTM machine for mechanics of solid practical applications. | - |
| 2 | Hydraulics Engineering Lab | | 14.3 m x 10.6 m (152 $m^2$) | • Facilities for the students, as well as classes that focus on on practical learning of study of study of Fluid Mechanics and fluid machines. | - |
| 3 | Computer Lab | | 7.3 m x 4.85 m (35 $m^2$) | • Facilities for the students, as well as classes that focus on on practical learning of study of | • Hands on training on computer application and Computer-Aided Design etc. |

| | | | | | |
|---|---|---|---|---|---|
| | | | | Computer programming, Web designing & applications. | |
| 4 | Electronics Lab | | 7.15 m x 4.85 m (35 $m^2$) | • Practical study of Digital Electronics and Linear integrated circuits. | - |
| 5 | Electrical Lab | | 14.3 m x 10.6 m (152 $m^2$) | • Experimental set up of Electrical circuits for students with study of DC motors & DC Generators.<br>• Study of Induction motors. | - |
| 6 | Engineering Drawing Hall | | 14.3 m x 10.6 m (152 $m^2$) | • Study of Engineering Drawing | Hands on training on drawing & others |
| 7. | Heat and Mass Transfer | | 14.3 m x 10.6 m (152 $m^2$) | • Facilities for the students, as well as classes that focus on on practical learning of study of mass transfer applications, emissivity measurement, conduction, convention etc. | |

## LAB FACILITIES

Farm Power Lab

Farm Machinery Lab

Agro Processing Centre

Food Engineering Lab

Fruits and Vegetables Processing Lab

Food Quality Lab

Soil & Water Conservation Engineering Lab

Irrigation & Drainage Engineering Lab

Soil & Water Engineering Field Lab

GIS Lab

Mirco plots with fertigation unit

Mechanics of Solid Lab

Electrical Machines and Power Utilization laboratory

Heat and Mass Transfer Lab

Civil Engg. Lab

Refrigeration and Air-conditioning Lab

Auto-CAD Lab

Engineering Workshop

Energy Park

**6.5.3.3. Student READY/ In-Plant Training / Internship / Experiential Learning Programmes:**

*Clearly mention about the implementation of Student READY/In-plant training/ Internship/Experiential Learning programmes and learning outcomes as per the guidelines of ICAR. Profit sharing mechanism (amount) shall be mentioned for each ELP unit sanctioned by the ICAR for the college.*

The College of Agricultural Engineering and Technology offers professional education in courses like, Project on Farm Machinery and Power Engineering, Design and Maintenance of Green House, Project on Processing and Food Engineering, Remote Sensing and GIS Applications, Renewable energy resources and Project on Soil and Water Engineering. Students learnt steps to prepare compost, vermicompost and biofertilizers under ELP with title "Composting and Bio-fertilizers production" and learntprimary and secondary processing of food produce under ELP with title "Centre for Agro Processing and Engineering Services". Besides these the following is specifically included under student READY program as per 5$^{th}$ Deans' Committee recommendations

***Skill development Training-I:***

Experience with practical uses in sectors of interest (agricultural machinery and power engineering, food processing, renewable energy, soil and water engineering, information technology, etc.).

***Skill development Training-II:***

Students will be immersed in an environment representative of their chosen profession like technical parts of training and presentation report preparation.

***Industrial Attachement/Internship:***

Internships with relevant companies and institutions in the tractor and agricultural machinery sector; emphasis on precision farming. Sprayers, irrigation systems, water-saving techniques, and water-shed administration. Agricultural Engineering is a field that combines theoretical study with hands-on experience in food production, processing, value addition, renewable and bio-energy, and other related fields to give students a well-rounded education.

***Experimental Learning on campus:***

Experience with production technology; conducting standard tests on agricultural equipment; analyzing test results; writing up test reports. Agro-Process Engineering; Agro-Processing; Food Product Development; Model Plants for Food Processing and Value Addition; Selected Grain and Fruit Processing and Packaging. RBEE refers to the process of creating, deploying, and taking care of renewable energy hardware and software. Agriculture-related SWE tasks include: watershed project formulation; well and Sprayer maintenance and servicing; irrigation and drainage system design; installation of weirs and flumes for water measurement; and farm irrigation and drainage system development.

***Project Planning and Report Writing:***

Field/lab studies; project report writing and presentation.

**6.5.3.4 Curricula Delivery through IT (smart class rooms/interactive board etc.):** *Whether the College is using smart class rooms/interactive board etc. for teaching and practical's. Number of class rooms upgraded as smart class rooms should be mentioned.*

Yes, the College of Agricultural Engineering and Technology is equipped with two smart classrooms and interactive whiteboards for classroom and laboratory instruction. There is one seminar room and one committee room for students and faculty to discuss their research topics and live interaction. In each department of the college, students have access to Smart Class rooms so that they can learn in a dynamic way. The tools from multimedia presentations such as PowerPoint presentations and smart boards are used a lot by the faculty to make their teaching and learning more effective. The use of online assignment, lecture upload and use of ERP facilitates the student needy updation etc. The facility of computers to each faculty, and Lab consisting about thirty eight computers, a University website, campus-wide networking with Wi-Fi facilities, CCTV cameras, etc., make up the college's robust ICT infrastructure. Technology and Internet access are available in every college department for administrative, instructional, and scholarly work. Because of this set-up, ICT may be used in classrooms, labs, and extension programmes to better serve students. The governance of the faculty and student system is enhanced by their official ID including emails, online course enrollment, fee payment, grade submission, and student attendance etc. Faculty members from all departments utilize E-courses on websites and E-manuals to deliver curriculum. The college is well equipped computer lab with internet facility exclusively reserve for students about 38 computers, one printer and one plotter with power backup batteries since year 2008.Type of ICT Application used in curricula:

- All the Department of College uses PPT, Internet, smart classroom, digital cameras, e-mail, whatsApp groups etc for students.
- Faculty member of all the departments also use E-courses on websites and E-manuals for curricula delivery.

Computer Labs

**6.5.4 Student Development:** *Student Development at the College directs its educational efforts at fostering the intellect and character of students by integrating in-class and co-curricular experiences. To accomplish this, the college provides a wide range of educational experiences through programs and activities that complement and support the academic experience in the classroom.*

**6.5.4.1. Student Intake and attrition:** *The information about student intake and attrition, for the college as a whole but separated in UG, PG and Ph.D. categories shall be provided in tabular form for last five year.*

| Name of the degree programme | Actual students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **UG** | 41 | 49 | 47 | 53 | 49 | 7.31 | 6.12 | 14.89 | 11.32 | 6.12 |
| **PG** | 10 | 10 | 17 | 5 | 6 | 10 | 10 | 11.76* | - | - |
| **Ph. D.** | 2 | 3 | 5 | 1 | 3 | - | - | 20 | - | - |

***Due to placements/ pandemic**

**6.5.4.2. Average number of students in Theory and Practical Classes:** *Mention the degree programme-wise number of students sitting in a class for theory and practical, separately in tabular form.*

| Sr. No. | Name of the Degree Programme | Batch of students in theory class | Batch of students in practical class |
|---|---|---|---|
| 1 | **B. Tech.** | • One batch with 49 students in 1st to 3rd year each.4th year students divided into four batches | • Two batches with about 25 students in 1st to 3rd year each. 4th year students divided into four batches |
| 2 | **M.Tech.** | • One batch with 3-4 students of 1st year and 2nd year each in each Department | • One batch with 3-4 students of 1st year and 2nd year each in each Department |
| 3 | **Ph.D.** | • One batch with 1-3 students of 1st year and 2nd year each in each Department | • One batch with 1-3 students of 1st year and 2nd year each in each Department |

**6.5.4.3. Admission process:** *Clearly give complete mechanism of admission for UG, PG and Ph.D. programmes, fee payment mechanism, registration procedure, academic schedule publication at the start of the semester etc. Write information in one page only.*

The College of Agricultural Engineering & Technology offers undergraduate, post-graduate, and doctoral degrees. The number of seats at UG, PG, and Ph.D. as well as all other admission policy provisions, are determined by the Academic Council in accordance with section 23 of the Haryana and Punjab Agricultural Universities Act, 1970 and other rules framed from time to time by the competent authority as prescribed under this act. University Calendar II details the Rules and Regulations for all undergraduate and post-graduate programmes offered by CCS HAU.

**UG programs:** Section 21 of the Haryana and Punjab Agricultural Universities Act of 1970 holds the Dean accountable to the Vice-Chancellor for all matters pertaining to college organisation and the conduct of resident instruction for undergraduate students. The Registrar is accountable to the Vice Chancellor for all matters pertaining to admissions to undergraduate courses, the credit burden of students, the maintenance of academic records, attendance records, and the awarding of degrees and medals.

**PG programs:** The Dean of Postgraduate Studies is responsible for the coordination of postgraduate programmes and the organisation and administration of postgraduate instruction. Dean, PGS is also responsible for coordinating the research conducted by postgraduate students and maintaining communication with the administration. The Dean of Postgraduate Studies is accountable to the Vice-Chancellor for all matters pertaining to resident instruction for postgraduate students, including admission requirements, the quality of courses offered, the total course load required for degree

programmes, the standard of instruction, evaluation methods, practical training, and the student advisory committee.

**Mechanism of admission:**

**UG programme:** The JEE Main entrance exam is administered by NTA, New Delhi, to Haryana residents, while the ICAR exam is administered to candidates from other states.

**PG programme:** Entrance test conducted by HAU and ICAR test for other state candidates.

**Ph.D. programme:** Entrance test conducted by CCS HAU, Hisar and ICAR test for other state candidates.

**Fee payment mechanism:** Fee payment is totally online and follow up the ERP system.

**Registration procedure:** At the time of registration, online process follows.

**Academic schedule:** Academic schedule (academic calendar) is prepared, sent to various departments, distributed among faculty, and posted on the notice board at the beginning of each new semester.

**6.5.4.4. Conduct of Practical and Hands on training** *(mention brief report of one page on practical and hand on training in different courses)*

As per 5$^{th}$ Deans' Committee Recommendations core courses and professional elective courses are offered at UG level in different departments. These courses besides imparting theoretical knowledge also provide practical skills and hands-on-training as per the curriculum requirements.

Department of FMPE conducted practical and Hands on training through the experiments conducted in the laboratory for familiarization of students with different systems, their working principles, types, study of tractor mechanics. Training about the operation of different equipments used for human parameter measurements is given to the students of UG and PG courses.

The Department of PFE provided hands-on and practical training on testing and evaluating agricultural processing instruments. The dehydration of fruits and vegetables Extraction of fruit and vegetable juices using a multipurpose juice extractor Visit to a milk processing plant, preparation of soymilk from soybean milk at a soymilk processing plant, preparation of potato crisps by machine, pricking of aonla by machine, etc.

Department of SWE conducted practical and Hands on training on discharge measurement, design of soil conservation structures, rainfall frequency analysis, Design of surface and subsurface drainage system, Water table contour maps, in-situ hydraulic conductivity measurement, study of components and uniformity coefficient of drip and sprinkler irrigation system etc.

Practical and hands-on training on surveying, Engineering drawings,designof Reinforced Concrete beams using limit state and working stress methods, hands-on training on computer application, experimental set up of electrical circuits for students, study of DC motors and DC generators, study of induction motors, etc. were provided by the Department of Basic Engineering.

The Department of RBEE conducted a practical evaluation of solar tunnel dryers, solar dryers, solar biogas plants, biomass characterization, proximate and ultimate analyses, briquetting, pelleting, biomass disintegration, etc.

**6.5.4.5. Examination and evaluation process:** *The evaluation of students' performance is a central task of College administration. A brief report on examination and evaluation process for UG, PG and Ph.D. be given separately mentioning external/internal components. System of evaluation should clearly be mentioned for UG, PG and Ph.D.*

A brief report on examination and evaluation process for UG, PG and Ph.D. is given below separately mentioning external/internal components.

## UG programs

**Examination system:** The examination system for B. Tech. (Agricultural Engineering) 4-year programs is external for theory and internal for practical.

**Evaluation:** The theory examination answer scripts are getevaluatedby the Controller of Examinations. Marks for the practical examination are submitted by the relevant Instructor to the Controller of Examinations, who coordinates their compilation and submission to the Registrar.A student is deemed to have passed the relevant course(s) if he or she earns 40% or more in theory and practical separately and 50% or more in the aggregate, with the additional condition that the student must maintain a certain OGPA.

Ending 1st year = 3.5/10.0; Ending 2nd year = 4.0/10.0; thereafter = 5.0/10.0

There is no provision for supplementary examination. Student who are declared fail in one or the other course are required to repeat that course, when offered in routine provided they have maintained the required OGPA.

**Grading**: Based on the evaluation in each course, the students are awarded grades as per the following scheme.

| OGPA | Description of performance |
|---|---|
| **9.00 to 10.00** | 90 to 100% |
| **8.00 to 8.99** | 80 to 89.9% |
| **7.00 to 7.99** | 70 to 79.9% |
| **6.00 to 6.99** | 60 to 69.9% |
| **5.00 to 5.99** | 50 to 59.9% |
| **4.00 to 4.99** | 40 to 49.9% |

The students must obtain a minimum OGPA of not less than 5.0 to qualify for the degree. Based on the position of result, Detailed Marks Card (DMC) is issued to all the students. The DMC clearly shows GPA/OGPA at the end of each semester. On completion of degree, division is indicated in the DMC of final semesters (year) as under:

| OGPA | Division |
|---|---|
| **5 to 5.99** | 2nd class |
| **6.00 to 7.49** | 1st class |
| **7.5 and above** | 1st class with distinction |

## PG and Ph.D. Programs

**Examination system and evaluation:** Mid-term and end-term internal examinations are administered for theory.Two sets of question papers for each course are set for mid-term and end-term each and are submitted to the concerned HOD. For both mid-term and end-term date sheet is prepared at college level and examinations are conducted centrally. On the day of examination, the Dean/ Supdt. selects one question paper for each course for distribution among students. Practical is also conducted internally by the course instructor. For practical courses only, practical exams are conducted by the course teacher and one more teacher nominated by the HOD. Evaluation of both theory and practical is internal. Weightage for theory and practical examinations is given below:

| Credit hours (Theory & Practical) | Weightage/Marks | | |
|---|---|---|---|
| | Mid-Term | End-Term | Practical |
| 1 + 0 | 40 | 60 | - |
| 1 + 1 | 20 | 30 | 50 |
| 2 + 1 | 25 | 45 | 30 |
| 2 + 2 | 20 | 30 | 50 |
| 3 + 1 | 30 | 45 | 25 |
| 3 + 2 | 25 | 35 | 40 |
| 2 + 0 | 40 | 60 | - |
| 3 + 0 | 40 | 60 | - |
| 1 + 2 | 10 | 20 | 70 |

**Comprehensive examination (Written and Viva Voce/Oral):** In Ph.D. , after completion of 75% course work separately in major and minor subjects, written comprehensive exam is conducted. In major subject two papers are conducted and in minor subject one paper is conducted. Paper setting and evaluation is internal. Qualifying marks is 60%. Viva-Voce/Oral comprehensive exam is conducted by external examiner and grading is satisfactory/unsatisfactory.

**Thesis evaluation:**

| Evaluation steps | Master's program | Doctoral program |
|---|---|---|
| **i) Submission** | After thesis seminar | • After thesis seminar<br>• One research paper should have been accepted and second submitted or one patent filed out of thesis work |
| **ii) Evaluation** | External (One examiner) | External (Two examiners) |
| **iii) Viva Voce** | By Advisory Committee and one external examiner | By Advisory Committee and one external examiner |
| **iv) Assessment** | Satisfactory/Unsatisfactory | Satisfactory/Unsatisfactory |

**Grading:** For PG and Ph.D. programs grading is done on a 10 point scale.

(i) Minimum passing grade in a course: 6.00
(ii) Minimum OGPA to continue and to obtain degree: 6.50

**6.5.4.6. NCC/NSS units:** *Clearly mention the existence and functioning of these units and how it is benefiting the student development. A brief report should be given (without photographs).*

**NCC Unit**

NCC unit of **College of Agril. Engg. & Technology** has been functioning with COA as a single unit within the University. It is offered for three years to undergraduate students. Character, discipline, leadership, a secular outlook, a spirit of adventure, and ideals of charitable service are taught to the students. The goal of NCC training is to create a human resource of organised, trained, and motivated youth for leadership in all aspects of life, as well as personnel who are always available for national service. The students undergo a rigorous training by doing drill, weapon training, sports and cultural activities, social activities, blood donations etc. Students participate in a number of camps, including Army Attachment Camp, Basic Leadership Camp, Advance Leadership Camp, National Integration Camp, Annual Training Camp, ThalSena Camp, and others. Minimum of two casmpsare required to obtain a 'C' Certificate.In the past five years, the pass rate for 'B' and 'C' certificate examinations has been nearly 100 percent with excellent grades.Apart from military training, non-military subjects just like history and culture of India, health and hygiene, religions, customs, traditions, ethics of Indian

society are also taught. The students are made to be well-versed in the legacy of freedom movement. Students occasionally discuss any current issue of social, moral, scientific, environmental, and national importance.

**NSS Unit**

The National Service Scheme (NSS) is an Indian government-sponsored public service programme administered by the Indian government's department of youth affairs and sports. In 2006, the NSS unit at the College of Agricultural Engineering and Technology was established. The engineering students register them as both required and elective courses in the first/second and third/fourth years, respectively. These volunteers work tirelessly day and night to ensure that everyone in need in our society receives assistance. The NSS conducts many camps, each of which comes into one of four general categories: cleaning, afforestation, stage shows or processions to raise awareness of social issues, and inviting doctors for health camps. The NSS unit of B.Tech. Students held a seven-day camp in the village of Arya Nagar to raise environmental awareness and many camps organized during the period in nearby villages. Many students have participated in State-level youth Red Cross training camps, National Integration camps, Pulse polio camps and Blood Donation camps, National Adventure camps, and camps organised at CCSHAU in December 2021. The student's participation, along with their perseverance and medals at various platforms, establishes a record for merit.

**6.5.4.7. Language laboratory**: *It is required of any student to have a good command of the language for communication purposes, with clarity and accuracy being vital for effective and efficient communication. What help one to acquire such proficiency in a language are the process and the method of learning that language. Mention which of these types of Conventional, Lingua Phone, Computer Assisted Language Laboratory and Multimedia Hi-Tech Language Laboratory are being used for language teaching in the college.*

English is taught by instructors working in the Department of language and Haryanvi Culture, College of Basic Sciences & Humanities. Practicals/ Tutorials are conducted in the language lab of this department. College language instructors also utilise smart classrooms, mobile phones, and YouTube in addition to conventional methods. The college has made special efforts to enhance the students' communication abilities. Undergraduates are encouraged to use the software and YouTube to enhance their spoken English. Moreover, language Lab facilities are available with the concerned teacher and thus, facilitate the students as and when required.

For language teaching in the college, besides conventional methods, teachers use facility of smart classrooms, mobile phones and YouTube, the college has been making special drives to improve the communication skills of the students. UG students are motivated to use the software to improve spoken English. Occasionally, the Directorate of Student wefare organises training programmes in communication skills and spoken English.

**6.5.4.8. Cultural centre:** *Does the college have cultural center to empower student leaders to explore, celebrate, and educate the campus community about the diversity among them? Does the college offer and inclusive and reflective space, multicultural programming and support services that encourage positive interaction, academic, persistence, and growth among students, faculty, and staff?*

The cultural activities of the university are absolutely curriculum-based and designed to foster the personal growth of registered students. Students at the university are prepared to participate in the university's cultural programmes as well as festivals and other competitions outside the university. For cultural activities the classes are also conducted regularly. The Cultural Activities of the Directorate

are intended to be an enticing aspect of personality development for the undergraduate students of the University's constituent colleges. This activity has remained a Credit Activity (0+1). This club is one of the largest and most popular at the university, attracting an average of 200 students per year.

In addition to providing regular training to enrolled students in Music, HFLC (Haryanvi folklore and culture), and dramatics of constituent colleges, more talented students receive intensive training consisting of extra classes. Such activities serve as a source of motivation for students to develop their personalities and channel their youthful energy in a constructive manner. Special efforts were made to introduce students to Indian folklore and culture, with an emphasis on "SWANG" Since 1973, when it received recognition for regular credit activity, the club has been continuously seeking for, promoting, cultivating, and developing talent in music, dance, and drama among university students.

**6.5.4.9. Personality Development:** *Personality development programme is aimed at increasing employability of the students. Whether the college has provisions for inclusion of functional grammar in Standard English, speaking skills, reasoning, group discussions interview skills, personal interviews, quantitative ability, verbal ability, mock tests and some special sessions to promote the personality development in the students?*

The Students C&P Cell within the Directorate of Students' Welfare has been established to keep university students apprised about potential employment opportunities and to assist them in making prudent decisions regarding their future academic/professional careers. The Students Counselling & Placement Cell has been associated with the students' multifaceted development in an effort to provide them with the opportunity to develop their personalities and confront future challenges with greater confidenceThe directorate has initiated an ambitious programme to improve the students' managerial, administrative, communicative, technical, and self-employment-oriented skills in recognition of the current need to strengthen these efforts. The institute within the Directorate of Students' Welfare has been entrusted with four responsibilities: providing university students with training, placements, liaison with major industries, and guidance. The Students C&P Cell is responsible for coordinating the organisation of campus interviews for outgoing students. In addition to assisting students in finding employment, the cell has assisted students in appearing for competitive examinations and obtaining admissions, scholarships, and fellowships at recognised institutions in India and abroad. The contemporary World of Work is distinguished by two distinct characteristics. As a result of globalisation and the liberalisation of the economy, there are fewer opportunities for employment in the public sector than ever before, while the private banking/insurance/agricultural inputs sector offers more employment opportunities than ever before.

### 6.5.5. Physical Facilities

**6.5.5.1. Hostels:** *Clearly mention the number of hostels available for the College students for boys and girls, separately with its total capacity, students per room accommodated in each hostel, mess facility, drinking water, indoor games specially for girls, cleaning of hostel premises, transport facility, emergency medical facility etc.*

Presently, the number of hostels is sufficient to accommodate all registered students. In accordance with the standards, dormitory and cubicle rooms are assigned to students in all hostels. In student accommodations, there are almirahs, study tables, beds, and chairs. Student hostel prefects provide assistance to hostel wardens. The hostels are equipped with all modern amenities and facilities, such as Wi-Fi, LED televisions with dish antennas, a gym, a volleyball court, an inverter in

the mess and common area, a water cooler with water purification, a mosquito catcher, a solar water heating system, LPG supply in the mess, furniture, periodicals and national newspapers. There are air-conditioned night reading rooms, indoor sports facilities such as table tennis, a canteen, and a desert refrigerator in the common room areas, as well as well-ventilated cubical and dormitory rooms with electric fans. During the summer, the pupils are also permitted to use the desert cooler in their rooms. Every hostel has a cooperative canteen managed by students under the supervision of the hostel wardens. Consideration is given to the hygiene of the hostel's facilities.

**Transport facility**

Students have access to a central transport facility, when necessary. The vehicles can be obtained from the university's transport office for visits under various courses and educational tours. Within the campus, females and boys have access to e-rickshaws for transportation. Students are encouraged to use bicycle or walking to commute between different utilities.

**Medical Facilities**

- There is a 20-bed hospital on campus that is well-equipped. In addition to other support personnel, the hospital has one Senior Medical Officer, three Medical Officers, one Dental Surgeon, two Pharmacists, and three staff nurses. Students, university employees, their dependents, and other trainees/visitors have access to round-the-clock medical assistance.
- Casualty services are available 24/7. Every week, the Special Immunisation Clinic, T.B. Clinic, Diabetic Clinic, and Antenatal Clinic are held. Two weeks of medications for patients with chronic disease are administered and supervised. The outdoor/emergency patients are attended to by the Senior Medical Officer and Medical Officers, and the hospital's indoor facility is accessible around the clock.
- The Dental Surgeon also provides RCT and dental surgical procedures for patients, and the dental unit has been air-conditioned to improve patient care facilities. X-rays of CCSHAU/LUVAS employees and their dependents are performed in the department of Vet. Clinics. ICU, dental X-rays, and laboratory tests are performed in the Campus Hospital.
- There is an Amartya Shiksha Yojana and Personal Accident Policy that costs Rs 100 upon admission and provides Rs 1,00,000/- in accidental insurance. There is a facility available for emergencies. In the event of an emergency, the Campus Hospital provides ambulance services.

**6.5.5.2 Examination Hall:** *Mention the availability of number of examination halls, its capacity etc. for the college.*

The college has one exam hall that can accommodate 90 students. The college's lecture halls are also utilised for administering UG and PG examinations as needed. Moreover, the central exam hallis vailable at the University level where facilities can be availed as and when required for any examination purpose to the college.

**6.5.5.3. Sports and recreation facilities:** *Clearly mention the number of indoor and outdoor sports facilities available for the College students. A brief note on day to day management and use of these facilities shall be provided in the report.*

Sports are an integral component of the curriculum. During the four semesters of their UG degree programme, each student must enrol for at least one sport or co-curricular activity in order to meet the degree's requirements. With sports and other activities, the Giri Centre for student welfare and activities is an outstanding feature of this university. It features two indoor Badminton courts with seating for 600 spectators, two indoor squash courts, leisure

rooms, and two indoor multipurpose gymnasiums with sufficient seating. In the University Sports Complex, there are grounds, courts, tracks, and links. In addition, an international standard synthetic track has been installed in the Athletic Stadium. Volleyball courts are equipped with lighting for night play. The grounds for hockey, football, and cricket are well maintained.

**6.5.5.4. Auditorium:** *Does the college have auditorium? Mention its year of construction, sitting capacity and how frequently being used for the College functions.*

Yes, multipurpose hall having sitting capacity of 90 is used for college functions. Auditoriums of other colleges and Indira Gandhi Auditorium is used,, as and when required.

**6.5.5.5. Exhibition Hall / Museum (description of events):** *Does the college have the Exhibition Hall/Museum? Mention about its use and special events being conducted in these units.*

Yes, the College has exhibition hall to have various events. However, the College activities are also exhibited in University Exhibition Hall in Gandhi Bhawan through Dr. Mangal Sain museum.

### 6.5.6. Research Facilities

**6.5.6.1. Postgraduate laboratories and Equipments**: *Clearly mention the department wise PG laboratories and equipment housed in individual laboratory in the Colleges along with any other research unit.*

**Farm Machinery and Power Engineering**

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Tri-axial Vibration Meter | Machinery Testing Lab |
| 2. | Soil Compaction Meter | Machinery Testing Lab |
| 3. | Thresher multipurpose Tractor operated | Implement Yard |
| 4. | P.T.O. Torque Sensor | Machinery Testing Lab |
| 5. | Soil Compaction Meter | Machinery Testing Lab |
| 6. | Patte Meter | Machinery Testing Lab |
| 7. | Straw Baler | Implement Yard |
| 8. | Spectrometer with Teflon pipe connector | Engine Testing Lab |
| 9. | Paddy Transplanter | Implement Yard |
| 10. | Paddy Combine Harvester | Implement Yard |
| 11. | Fully Automatic Dynamometer | Machinery Testing Lab |
| 12. | Self Propelled Rotary Weeder | Implement Yard |
| 13. | Sample preparation machine for spectrometer | Engine testing lab |
| 14. | Tractor operated two row vegetable transplanter | Implement Yard |
| 15. | Tractor Operated Power Weeder (Three Row) One No. | Implement Yard |
| 16. | Tractor operated Power Weeder (two Row) Two Nos. | Implement Yard |
| 17. | Carrot Digger | Implement Yard |
| 18. | Rotary Plough | Implement Yard |
| 19. | Tractor Drawn Rotary Weeder (Three Row) | Implement Yard |
| 20. | Unmanned aerial vehicle | Testing lab |
| 21. | Pneumatic planter | Implement Yard |
| 22. | Auto steer system | Installed in tractor |

**Processing and Food Engineering**

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Extruder | Food Engineering Lab |

| | | |
|---|---|---|
| 2. | Deep Freezer | Food Engineering Lab |
| 3. | Shrink Packaging Machine | Food Engineering Lab |
| 4. | Carrot Washer | Fruits & Veg. Processing Plant Lab |
| 5. | Honey Filtration Machine | Fruits & Veg. Processing Plant Lab |
| 6. | Aonla Pricking Machine | Fruits & Veg. Processing Plant Lab |
| 7. | Maize Sheller | Fruits & Veg. Processing Plant Lab |
| 8. | Data Acquisition System | Fruits & Veg. Processing Plant Lab |
| 9. | Protein Estimation System & Distillation | Agro Processing Centre |
| 10. | Software tools ergonomics analysis | Agro Processing Centre |
| 11. | Advance Ergonomics tools with wireless | Agro Processing Centre |
| 12. | Data Logger with Sensors | Agro Processing Centre |
| 13. | Anthropometric Rods | Agro Processing Centre |
| 14. | Electronic balance | Agro Processing Centre |
| 15. | Multipurpose Juice Extraction System | Agro Processing Centre |
| 16. | Texture Analyzer | Food Quality Lab |
| 17. | Gas Analyzer | Food Quality Lab |
| 18. | Spectrophotometer | Food Quality Lab |

## Soil and Water Engineering

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Aqua probe | Soil & Water Conservation Engineering Lab. |
| 2. | Moisture tester/ Gauge | Soil & Water Conservation Engineering Lab. |
| 3. | Plant Canopy Analyser PAR-80 | Soil & Water Conservation Engineering Lab. |
| 4. | TDR | Soil & Water Conservation Engineering Lab. |
| 5. | Infiltrometer | Soil & Water Conservation Engineering Lab. |
| 6. | Submersible Sprayer “Cut Model” | Soil & Water Conservation Engineering Lab. |
| 7. | Moisture tester/ Gauge | Soil & Water Conservation Engineering Lab. |
| 8. | Cone Penetrometer | Soil & Water Conservation Engineering Lab. |
| 9. | Anemometer | Soil & Water Conservation Engineering Lab. |
| 10. | Drip Irrigation System | Soil & Water Conservation Engineering Lab. |
| 11. | Conductivity Meter | Soil & Water Conservation Engineering Lab. |
| 12. | Tensiometers | Soil & Water Conservation Engineering Lab. |
| 13. | Micro plots with fertigation facilities | Soil & Water Engineering Field Lab |

## Basic Engineering

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Tensile Testing Machine | Civil lab |
| 2. | Hydraulic Bench Attachment | Civil lab |
| 3. | UV-VIS Spectrophotometer | Civil lab |
| 4. | Emissivity measurement (HMT) | Mech. lab |
| 5. | Computers & accessories | Mech. lab |
| 6. | Electrical Machines | Electrical Machines and Power Utilization laboratory |

## Renewable and Bio-Energy Engineering

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Laminar Air Flow | Bio energy Lab |
| 2. | Autoclave | Bio energy Lab |
| 3. | Water Bath | Bio energy Lab |

| | | |
|---|---|---|
| 4. | pH Meter | Bio energy Lab |
| 5. | Analytical weighing Balance | Bio energy Lab |
| 6. | Centrifuge | Bio energy Lab |
| 7. | Microwave Oven | Bio energy Lab |
| 8. | Muffle Furnace (Fully & Semi Prog.) | Bio energy Lab |
| 9. | Refrigerated centrifuge | Bio energy Lab |
| 10. | Spectrophotometer (UV-Vis) | Bio energy Lab |
| 11. | Kjehldahl appratus | Bio energy Lab |
| 12. | Slurry dewatering machine | Bio energy Lab |

| 31. | Solar powered Sprayer | Renewable energy park |
| 32. | Solar street lights | Renewable energy park |

**6.5.6.2. Research Contingency:** *A note on amount of research contingency for each department shall be provided. Whether it meets the students' demand?*

| **Name of the College/ Department** | **Research Contingency (Rs.)** | | | | | |
|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | **2020-21** | **2021-22** | **2022-23** | **G. Total** |
| COAE&T | 99,84,926 | 8,92,82,570 | 2,19,05,577 | 1,82,20,815 | 2,15,66,755 | 16,09,60,643 |

Yes, research contingency sufficient to meets the students' demand.

### 6.5.7. Outcome/Output

**6.5.7.1. Student Performance in National Examination:** *Provide detailed information in tabular form about student Performance in JRF/SRF/NET/ARS and other National Examinations for last five years. Only those students receiving fellowships should be mentioned here.*

| **Sr. No.** | **Name of Examination** | **2018-19** | **2019-20** | **2020-21** | **2021-22** | **2022-23** |
|---|---|---|---|---|---|---|
| **1.** | JRF | 3 | 3 | 1 | 3 | - |
| **2** | SRF | - | 1 | 1 | - | - |
| **3.** | NET | - | 1 | 8 | 5 | - |
| **4.** | GATE | 1 | 6 | 4 | 8 | 1 |
| **5.** | Other National | 14 | 4 | 6 | 11 | - |

| | | | | | | |
|---|---|---|---|---|---|---|
| | Examinations including Banks | | | | | |

**6.5.7.2. Students Placement Profile:** *Provide detailed information in tabular form about student performance in ARS/and other national examinations/State level examinations or equivalent. Year wise placement profile shall be provided.*

| Sr. No. | Placement through Examination | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
|---|---|---|---|---|---|---|
| 1. | ARS | - | - | - | - | - |
| 2 | Other National Examinations (SSC, CGL) | 12 | - | 2 | 1 | - |
| 3 | Other National Examinations (GATE, CAT etc) | 1 | 6 | 4 | 8 | 1 |
| 4. | State Level Examinations or Equivalent (Bank etc.) | 14 | 4 | 6 | 11 | - |
| 5. | Placement through Interviews including Govt | 2 | - | 2 | - | 4 |

**6.5.7.3. Awards/Recognitions/Certificates:** *Provide information on awards/recognitions/certificates in tabular form for last five years separately for students and faculty.*

**Student's Awards**

**Awards/Recognitions/Certificates**

| Year | Name of the Awards | Name of Students/ Faculty |
|---|---|---|
| **Students** | | |
| 2018-19 | Gold medal (academic) | Athira C.R. 2017AE14M |
| | Silver (Sports) | Nirmala (2015AE18BIV) |
| | Bronze (Sports) | Amandeep |
| | Bronze (Sports) | Yogesh |
| 2019-20 | Gold medal (Academic) | Peter WaboiMwaurah 2018AE5M |
| | Silver & Bronze (Sports) | Nirmala (2015AE18BIV) |
| 2020-21 | Gold medal (Academic) | Vinod Kumar 2016AE3D |
| 2021-22 | Pragya Choudhary (Academic) | Gold medal |
| 2022-23 | Pradhuman Bishnoi 2021AE45BIV | Gold medal (Debate), GBPA&T, Pantnagar |
| | Pradhuman Bishnoi | Third Prize (Cultural), Haridwar |
| **Faculty** | | |
| 2018-19 | Awarded appreciation letter by DSW, CCSHAU in 2018<br>Research Award 2016, 2018, UIET, Panjab University, Chandigarh | Dr.Rajender Kumar<br>Dr. Sandeep Dhundhara |
| 2019-20 | Appreciation letter by Dean COAE&T, 2020 | Dr. Vijaya Rani |
| | Appreciation letter by Dean COAE&T, 2020 | Dr. Mukesh Jain |
| | Appreciation letter by Dean COAE&T, 2020 | Er. Naresh |
| | Best poster award in GINMA-2019 during Nov 06- | Er. Swapnil Choudhary |

| | | |
|---|---|---|
| | 08, 2019 | |
| 2021-22 | Best Presentation in National conference organized by Deptt of Math & Stat., CCSHAU, Hisar | Dr. Sandeep Bhardwaj |
| | Best Poster Presentation in IV$^{th}$ International Conference in Hybrid Mode on Innovative and Current Advances in Agriculture & Allied Sciences (ICAAAS-2022) during 12-14 June 2022 at Himachal Pradesh University, Summer Hill, Shimla (H.P.) India | Dr. Amandeep Singh |

**6.5.7.4. Employability:** *What are the set of achievements such as skills, understandings and personal attributes that make College students more likely to gain employment and be successful in their chosen occupations, which benefits themselves, the workforce, the community and the economy? Provide one page note on the subject.*

- An institution industry cell committee has been constituted in the college which worked with counselling and placement cell of this University.
- It investigates opportunities in the private sectors and coordinates campus placement drives.
- This cell also approaches different institutes/training centers for the trainings and internship of the students as per their course curriculum

**Students' Counselling and Placement Cell:**

- The Counselling and Placement Cell of the Directorate, in collaboration with the Department of Employment of Haryana, has established a University Employment Information and Guidance Bureau, which provides students with information on employment opportunities, competitive examinations, scholarships/fellowships, etc.
- It provides training/coaching for entrance exams, investigates employment opportunities in the public and private sectors, and coordinates campus interviews.
- In addition, the Cell publishes a biweekly newsletter titled "Career Bulletin" for University students to keep them informed about employment opportunities, admissions, scholarships, fellowships, etc. in India and abroad.
- The Counselling and Placement Cell also guides students and provides pertinent information regarding financial aid for starting their own businesses.

**6.5.8.** SSR of the College must have the SSR of all its Degree Programmes (following section 6.4), then the report of the Colleges shall be considered.

**6.5.9.** Certificate (Applicable when SSR is submitted for Programmes& College).

I, the Dean Dr. Baldev Dogra, College of Agricultural Engineering & Technology hereby certify that the information contained inSections 6.4 and Section 6.5.1 to 6.5.7.4 are furnished as per the records available in the college and degree awarding university.

Baldev Dogra

**Signature of the Dean of the college with Date & Seal**

**6.5.10.** Each college shall submit SSR as mentioned in 6.5.8. It shall be prerequisite for the SSR of the Agricultural University.

## 6.4. About the College

The College of Agricultural Engineering and Technology (COAE&T) is a Constituent college at the main campus of the Chaudhary Charan Singh Haryana Agricultural University (CCS HAU) in Hisar. Initially, the Academic Council CCS HAU meeting on June 11, 1987, vide agenda item BB-12 approved the B. Tech. (Agricultural Engineering) undergraduate curriculum with an intake of 20 students under the College of Agriculture. Lateron, the COAE&T was founded on August 21, 1992, following the 142nd Board of Management meeting, as approved vide agenda item B-26 on March 24, 1992. Master of Technology (Agril. Engg.) was started in the department of Farm Power & Machinery and Soil & Water Engineering in 1993. Thereafter, Department of Agricultural Processing & Energy was established in August 1996 with UG and PG degrees. The section of Basic Engineering was founded in October 1996 to serve UG and PG students. In 2013-14, B. Tech. admittance slots were fixed to 35 to focus on individual student instruction and personal attention. The Ph.D. program started in all three departments in 2016. In March of 2017, the Department of Basic Engineering and the Department of Renewable and Bio-Energy Engineering were established.According to Fifth Deans' Committee recommendations, the syllabi and curricula were updated to address future challenges and recent developments, with more emphasis on Student Ready Programme to expose students to different agricultural issues. Agricultural engineering help to increase crop production and farmer income. Agricultural engineers help toensure farm operation timeliness through efficient agricultural implements and machinery, land and water management, post-harvest technology and processing, and energy conservation.

### 6.4.1. Brief History of the Degree Programme: *Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

| YEAR | MILESTONES |
|---|---|
| **1987** | The Department of Agricultural Engineering and Technology under the College of Agriculture launched the B. Tech. (Agricultural Engineering) undergraduate degree programme. |
| **1992** | The Department evolved into the College of Agricultural Engineering and Technology, which was inaugurated on August 21, 1992. |
| **1993** | Two departments, Farm Power & Machinery and Soil & Water Engineering, were established, and the College started to award the Master of Technology in Agricultural Engineering in these departments. |
| **1996** | Another department of Agricultural Processing & Energy was established, and the M.Tech. programme was initiated. In addition, the Section of Basic Engineering was created. |
| **2010** | Farm Machinery & Power Engineering and Processing & Food Engineering are the new names for the two departments, as recommended by the 4th Deans' Committee of ICAR and approved by the university's Academic Council. |
| **2014** | Vice Chancellor Dr. K.S. Khokhar placed the foundation stone for the Farm Machinery Testing Centre on August 16, 2014. |
| **2016** | Ph.D. programme started in three departments (FMPE, SWE, PFE). |
| **2017** | Two new departments viz. Renewable Bio-Energy Engineering and Basic Engineering were created. |
| **2017** | Curriculum was revised and implemented in accordance with the recommendations of the Fifth Deans' Committee. |
| **2017** | M.Tech. Started in RBEE |
| **2023** | BSMA syllabus has been approved by BOS of COAE&T |

**Objectives:**

- Nurturing scholarly education in different branches of study in the discipline of Agricultural Engineering.
- Furthering the advancement of learning and pursuit of research in the discipline of Agricultural Engineering.
- Undertaking the extension by transferring well-proven technology for the benefit of the farming community.

**Accomplishments:**

- 862 students have graduated from the college since inception (1987) to till 31.03.2023.
- Alumni of the college are serving Govt. and privates sectors.
- Some of the alumni of the college are established as Entrepreneurs.
- Number of passed out students have obtained admission in other institutes of repute for higher education.
- Many B.Tech. Students often qualify the GATE & CAT examination.

**6.4.2 Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

| Designation | Sanctioned | In Place* | Vacant | As per 5$^{h}$ Deans' Committee |
|---|---|---|---|---|
| Professor and equivalent | 1 | 1 | 0 | 05 |
| Assoc. Professor and equivalent | 10 | 7 | 3 | 10 |
| Asstt. Professor and equivalent | 26+9$^{\#}$ | 20+9$^{\#}$ | 6 | 20 |
| Total | 46 | 37 | 9 | 35 |

* Faculty in place working as Professor (07) and Associate Professor (01) include Personal Promotion (PP) as a personal measure. $^{\#}$Faculty at outstations/other colleges

| S. No. | Name | Designation | Qualification | Specialization |
|---|---|---|---|---|
| | **Farm Machinery & Power Engineering** | | | |
| 1 | Dr. Vijaya Rani | Prof. and Head | Ph.D. | Farm Machinery & Power Engineering |
| 2 | Dr. Mukesh Jain | Assistant Professor | Ph.D. | Farm Machinery and Power Engineering |
| 3 | Dr. Anil Kumar | Assistant Professor | Ph.D. | Farm Machinery and Power Engineering |
| 4 | Er. Swapnil Choudhary | Assistant Scientist | M.Tech. | Farm Machinery and Power Engineering |
| 5 | Er. Naresh | Assistant Professor | M.Tech. | Farm Machinery and Power Engineering |
| 6 | Er. Bharat Patel | District Extension Specialist | M.Tech. | Farm Machinery and Power Engineering |

| | | | | |
|---|---|---|---|---|
| 7 | Er. Ajit Singh | District Extension Specialist | M.Tech. | Farm Machinery and Power Engineering |
| 8 | Dr. Ganesh Upadhyay | Assistant Scientist | Ph.D. | Farm Machinery and Power Engineering |
| | **Processing & Food Engineering** | | | |
| 1 | Dr. Ravi Gupta | Professor & Head | Ph.D. | Processing & Food Engineering |
| 2 | Dr. D.K. Sharma | Senior Scientist | Ph.D. | Processing and Food Engineering |
| 3 | Dr. V.K. Singh | Assistant Professor | Ph.D. | Post Harvest Process & Food Engineering |
| 4 | Dr. Anil Panghal | Assistant Professor | Ph.D. | Post Harvest Process & Food Engineering |
| 5 | Er. Sunil Kumar | Assistant Scientist | M.Tech. | Processing & Food Engineering |
| 6 | Dr. Nitin kumar | Assistant Professor | M.Tech. | Processing & Food Engineering |
| | **Soil & Water Engineering** | | | |
| 1 | Dr. R.K. Jhorar | Professor &Head | Ph.D. | Soil & Water Engineering |
| 2 | Dr. M.S. Sidhpuria | Professor & Chief Engineer (EO) | Ph.D. | Irrigation and Drainage Engineering/ SWE |
| 3 | Dr. Sanjay Kumar | Professor &ADSW | Ph.D. | Soil &Water Engineering |
| 4 | Dr. Ram Naresh | Assistant Professor | Ph.D. | Soil & Water Engineering |
| 5 | Dr. Mukesh Kumar | Asst. Scientist | Ph.D. | Soil & Water Engineering |
| 6 | Dr. Kuldeep Singh | DES( KVK, Sonipat) | Ph.D. | Soil & Water Engineering |
| 7 | Dr. Sundeep Kumar | DES( KVK, Panipat) | Ph.D. | Soil & Water Engineering |
| 8 | Er Kapil | DES (AgrilEngg) | M.Tech. | Soil & Water Engineering |
| 9 | Dr. Narender Kumar | DES (AE) | Ph.D. | Soil & Water Engineering |
| 10 | Er. Ravi | DES (AE) | M.Tech. | Soil & Water Engineering |
| 11 | Dr Amandeep Singh | Assitant Scientist | Ph.D. | Soil & Water Engineering |
| 12 | Dr. Love Kumar | Assistant Scientist | Ph.D. | Soil & Water Engineering |
| | **Renewable & Bio Energy Engineering** | | | |
| 1 | Dr. Y.K. Yadav | Professor & Head | Ph.D. | Renewable & Bio-energy Engineering |
| 2 | Dr.Yadvika | AssociateProfessor | Ph.D. | Renewable and BioenegyEngg |
| 3 | Dr. Arun Kumar Attkan | Assistant Professor | Ph.D. | Food Processing and Renewable enegy |
| 4 | Dr. Gaurav Chaudhary | Assistant Professor | Ph.D. | Bio-Energy & Bio-process Engineering |
| 5 | Dr. Nishant Chaudhary | Assistant Professor | M.Tech. | Bio-chemical Engg. |
| | **Basic Engineering** | | | |
| 1 | Dr. Amarjit Kalra | Professor& Head | Ph.D. | Electronics Engineering |
| 2 | Dr.Rajender Kumar | Assistant Professor | Ph.D. | Mechanical Engineering |
| 3 | Dr. Sandeep Bhardwaj | Assistant Professor | Ph.D. | Civil Engineering |
| 4 | Dr. Parvesh Antil | Assistant Professor | Ph.D. | Mechanical Engineering |
| 5 | Dr. Sandeep Dhundhara | Assistant Professor | Ph.D. | Electrical Engineering |

***Note:*** *All the faculty of this programme is assigned the responsibilities for the multiple programmes.*

**6.4.3. Technical and Supporting staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

Total number of sanctioned post for technical and supporting staffs is 96 and presently filled and vacant numbers of staffs are 40 and 56 respectively. Details of name of the posts, sanctioned, in position and vacant are as follows:

| Sr. No. | Name of the Posts | Sanctioned | In position | Vacant |
|---|---|---|---|---|
| | **Technical Staff** | | | |
| 1. | Instrumentation Engineer | 1 | 1 | 0 |
| 2. | Assistant Engineer (Electronics) | 1 | 1 | 0 |
| 3. | Workshop Engineer | 1 | 1 | 0 |
| 4. | Lab Assistant | 3 | 2 | 1 |
| 5. | Lab Technician | 1 | 1 | 0 |
| 6. | Mechanic | 17 | 7 | 10 |
| 7. | Driver-cum-mechanic | 2 | 2 | 0 |
| 8. | Fitter | 5 | 0 | 5 |
| 9. | Turner | 2 | 1 | 1 |
| 10. | Auto Electrician | 1 | 1 | 0 |
| 11. | Welder | 3 | 1 | 2 |
| 12. | Carpenter | 1 | 0 | 1 |
| 13. | Workshop Mate | 1 | 0 | 1 |
| 14. | Technical Assistant | 1 | 0 | 1 |
| 15. | Machine man | 1 | 0 | 1 |
| 16. | Sr. Motor Rewinder | 1 | 0 | 1 |
| 17. | Foremen | 4 | 1 | 3 |
| 18. | Sr. Mechanic (Ref. & AC) | 1 | 0 | 1 |
| 19. | Sr. Tractor Mechanic | 1 | 0 | 1 |
| 20. | Sr. Lab assistant | 1 | 1 | 0 |
| 21. | Assistant foreman | 1 | 0 | 1 |
| | **Supporting Staff** | | | |
| 1. | Computer Operator | 1 | 0 | 1 |
| 2. | Attendant | 1 | 0 | 1 |
| 3. | Tracer | 3 | 0 | 3 |
| 4. | Store Keeper | 3 | 2 | 1 |
| 5. | Driver | 2 | 2 | 0 |
| 6. | Clerk | 9 | 7 | 2 |
| 7. | Typist | 1 | 1 | 0 |
| 8. | Helper | 5 | 1 | 4 |
| | **Other Staff** | | | |
| 1. | Superintendent | 1 | 0 | 1 |
| 2. | Assistant | 3 | 3 | 0 |
| 3. | Personal Assistant | 1 | 1 | 0 |
| 4. | Sweeper | 2 | 1 | 1 |
| 5. | Stenographer (Jr/Sr) | 3 | 2 | 1 |
| 6. | Messenger | 5 | 0 | 5 |
| 7. | Blacksmith | 1 | 0 | 1 |
| 8. | Well Observer | 1 | 0 | 1 |
| 9. | Vehicle Attendant | 2 | 0 | 2 |
| 10. | Security Guard | 2 | 0 | 2 |
| | Total | **96** | **40** | **56** |

**Note:** All the staff is assigned the responsibility for the multiple programmes

**6.4.4 Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional*

*units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

## List of classroom and functional laboratories

| **No. of lecture rooms with sitting capacity** | **4** |
|---|---|
| Lecture Room No. | Seating capacity |
| 1 | 55 |
| 2 | 55 |
| 3 | 55 |
| 4 | 42 |
| 5 | 42 |
| **Others facilities** | |
| No. of lecture rooms with LED | 2 |
| No. of smart class-rooms | 2 |
| No. of labs under Dean's office with specialized purpose | 24* |
| Farm facilities (Field lab) | 2 |
| Workshops | 2 |
| Any other instructional units being utilized for the award of the Degree Programme | Implement yard, Energy Park |

## *Details of the laboratories

| **S. No.** | **Laboratories Functional** | **Activities** |
|---|---|---|
| **Department of Farm Machinery & Power Engineering** | | |
| 1 | Farm Machinery Lab | Different manual, animal and self propelled machineries are available in the lab to show the components and working of the machineries to the students. Projector facility is also available to show the field working videos of the machineries. |
| 2 | Farm Power Lab | The laboratory contains cut sections and models for various tractor and engine systems such as fuel system, gear system, differential, electrical system and complete tractor assembly for exposing the students to tractors, engines and their systems. |
| 3 | Ergonomics Lab | The facilities are available in the lab to study the anthropometry of agricultural workers, physiological parameters such as heart rate, blood pressure, calibration of subject, respiration rate, oxygen consumption, general fatigue, overall discomfort, noise and vibration etc. |
| 4 | Implement Yard | Different operational agricultural machinery is available to show the students and visitors (farmers) of the department. |
| 5 | Combine harvesting technology training lab | Different components and working models of combine harvester are available to show the students and visitors (farmers) of the department. |
| 6 | Tractor workshop located at Director Farm | Facilities are available for repair & maintenance of tractors and agricultural machinery and students of UG & PG courses make aware about the problems in the tractor and their remedies. |
| 7 | Machinery workshop | Facilities for the students, conducting classes on practical learning of machinery fabrication are available. |

| | | |
|---|---|---|
| | | Facilities like lathe machine, shaper, hydraulic press, welding set, carpentry shop etc. are available for conducting practical classes. |
| **Department of Processing & Food Engineering** | | |
| 1 | Teaching Lab | Study of the unit operations pertaining to Agricultural produces processing |
| 2 | Fruits & Veg. Processing Plant | Sorting, washing, grading, waxing and drying of fruits and vegetables |
| 3 | Agro Processing Centre | Cleaning, grading, sorting, grinding, pricking of agricultural produces. |
| 4 | Quality Assurance Lab | Qualitative analysis of fruits and vegetables |
| 5 | Engineering Work Shop | Design and development of equipment pertaining Agricultural produces processing |
| **Soil & Water Engineering** | | |
| 1 | Soil & Water Conservation Engineering Lab | Study of irrigation water measurement, soil moisture and soil conservation structures |
| 2 | Irrigation & Drainage Engineering Lab | Study of Irrigation Sprayers and agricultural drainage |
| 3 | Soil & Water Engineering Field Lab | Study of discharge measurement, soil conservation structures, water table, underground drainage system. |
| 4 | GIS Lab | Familiarization with RS & GIS software and its application in water resource management. |
| **Department of Renewable and Bio-Energy Engineering** | | |
| 1 | Renewable energy lab | Different solar heat based equipment's like solar water heater, solar tunnel dryer, solar convection dryer etc. and solar photovoltaic based systems like solar Sprayering system, solar powered cold storage are available along with solar photovoltaic simulator for UG and PG teaching available |
| 2 | Bioenergy Laboratory | Biogas plants, centrifuge, stirrers, muffle furnace, water bath, analytical weighing machine, autoclave, laminar air flow, spectrophotometer, kjehl dahl apparatus etc. are available to conduct the experiments for bioenergy. |
| **Department of Basic Engineering** | | |
| 1 | Civil Engineering Lab (CE) | Facilities for the students, conducting classes on practical learning of study of Soil Mechanics. Study of Strength of Material with UTM machine. Conduct survey and collect field data. |
| 2 | Hydraulics Engineering Lab (CE) | Facilities for the students, conducting classes on practical learning of study of Fluid Mechanics. Design the Reinforced Concrete beams using limit state and working stress methods. |
| 3 | Computer Lab (MechanicalEngg) | Facilities for the students, conducting classes on practical learning of study of Web designing & applications. Computer programming |
| 4 | Electronics Lab (EE) | Practical study of Digital Electronics, Linear integrated circuits. |
| 5 | Electrical Lab (EE) | Experimental set up of Electrical circuits for students. Study of DC motors & DC Generators. Study of Induction motors. |
| 6 | Drawing Hall (ME) | Study of Engineering Drawing |
| **7.** | HMT Lab (ME) | Faculty to have the Practical exposure with the conduction, connection, emissivitymeasurement etc. |
| **8.** | RAC Lab (ME) | Faculty to the practical exposure with refingerationunit,air condition units, compressors, condensers, etc. |

## List of major equipments available in the department:

### Farm Machinery and Power Engineering

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Tri-axial Vibration Meter | Machinery Testing Lab |
| 2. | Soil Compaction Meter | Machinery Testing Lab |
| 3. | Thresher multipurpose Tractor operated | Implement Yard |
| 4. | P.T.O. Torque Sensor | Machinery Testing Lab |
| 5. | Soil Compaction Meter | Machinery Testing Lab |
| 6. | Patte Meter | Machinery Testing Lab |
| 7. | Straw Baler | Implement Yard |
| 8. | Spectrometer with Teflon pipe connector | Engine Testing Lab |
| 9. | Paddy Transplanter | Implement Yard |
| 10. | Paddy Combine Harvester | Implement Yard |
| 11. | Fully Automatic Dynamometer | Machinery Testing Lab |
| 12. | Self Propelled Rotary Weeder | Implement Yard |
| 13. | Sample preparation machine for spectrometer | Engine testing lab |
| 14. | Tractor operated two row vegetable transplanter | Implement Yard |
| 15. | Tractor Operated Power Weeder (Three Row) One No. | Implement Yard |
| 16. | Tractor operated Power Weeder (two Row) Two Nos. | Implement Yard |
| 17. | Carrot Digger | Implement Yard |
| 18. | Rotary Plough | Implement Yard |
| 19. | Tractor Drawn Rotary Weeder (Three Row) | Implement Yard |
| 20. | Unmanned aerial vehicle | Testing lab |
| 21. | Pneumatic planter | Implement Yard |
| 22. | Auto steer system | Installed in tractor |

### Processing and Food Engineering

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Extruder | Food Engineering Lab |
| 2. | Deep Freezer | Food Engineering Lab |
| 3. | Shrink Packaging Machine | Food Engineering Lab |
| 4. | Carrot Washer | Fruits & Veg. Processing Plant Lab |
| 5. | Honey Filtration Machine | Fruits & Veg. Processing Plant Lab |
| 6. | Aonla Pricking Machine | Fruits & Veg. Processing Plant Lab |
| 7. | Maize Shelller | Fruits & Veg. Processing Plant Lab |
| 8. | Data Acquisition System | Fruits & Veg. Processing Plant Lab |
| 9. | Protein Estimation System & Distillation | Agro Processing Centre |
| 10. | Software tools ergonomics analysis | Agro Processing Centre |
| 11. | Advance Ergonomics tools with wireless | Agro Processing Centre |
| 12. | Data Logger with Sensors | Agro Processing Centre |
| 13. | Anthropometric Rods | Agro Processing Centre |
| 14. | Electronic balance | Agro Processing Centre |
| 15. | Multipurpose Juice Extraction System | Agro Processing Centre |
| 16. | Texture Analyzer | Food Quality Lab |
| 17. | Gas Analyzer | Food Quality Lab |
| 18. | Spectrophotometer | Food Quality Lab |

## Soil and Water Engineering

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Aqua probe | Soil & Water Conservation Engineering Lab. |
| 2. | Moisture tester/ Gauge | Soil & Water Conservation Engineering Lab. |
| 3. | Plant Canopy Analyser PAR-80 | Soil & Water Conservation Engineering Lab. |
| 4. | TDR | Soil & Water Conservation Engineering Lab. |
| 5. | Infiltrometer | Soil & Water Conservation Engineering Lab. |
| 6. | Submersible Sprayer "Cut Model" | Soil & Water Conservation Engineering Lab. |
| 7. | Moisture tester/ Gauge | Soil & Water Conservation Engineering Lab. |
| 8. | Cone Penetrometer | Soil & Water Conservation Engineering Lab. |
| 9. | Anemometer | Soil & Water Conservation Engineering Lab. |
| 10. | Drip Irrigation System | Soil & Water Conservation Engineering Lab. |

**Theory and practical batches for UG Programmes**

| Sr. No. | Name of the Degree Programme | Batch of students in theory class | Batch of students in practical class |
|---|---|---|---|
| 1 | **B. Tech.** | • One batch with 49 students in 1st to 3rd year each.4th year students divided into four batches | • Two batches with about 25 students in 1st to 3rd year each. 4th year students divided into four batches |

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical courses | Hands-on-training courses |
|---|---|---|---|
| B.Tech | 62 | CE 101, ME 101, ME 103, ME 203, RBEE 201, RBEE 301, RBEE 302, FMPE 304, FMPE 391/ PFE 391/ SWE 391/RBEE 391, FMPE 411/ PFE 411/ SWE 411/RBEE 411, FMPE 412/ PFE 412/ SWE 412/RBEE 412 | FMPE 390/ PFE 390/ SWE 390/ RBEE 390, FMPE 490/ PFE 490/ SWE 490/RBEE 490, FMPE 491/ PFE 491/ SWE 491/RBEE 491 |

**How far students are getting desired practical and hands-on-training as per the curriculum:**

Conduct 89 theory credits, 106 practical credits, and two full-time training sessions**.**

| Course No. | Credit Hours | Practical and Hands-on-training | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|---|
| PFE/FMPE /SWE /RBBE 390 | 5(0+5) | One-month summer training in the field of Agricultural Engineering | Exposure to industrial and institutional applications in selected field of interest (FMPE, PFE, SWE, RBEE, Information technologies etc.) |
| PFE/FMPE /SWE /RBEE490 | 5(0+5) | One-month summer training in the field of Agricultural Engineering | Exposure to an environment in which students are expected to be associated in their future career, preparation of training report technical aspects of the training and presentation |
| FMPE 491/ PFE 491/ SWE 491/RBEE 491 | 10 (0+10) | Project Planning and Report Writing (Student READY) | Exposure to industrial and institutional applications in selected field of interest |

**6.4.6 Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph. D Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

There are enough 21 PG faculty available in the College to accommodate the Masters/Ph. D. Students in various disciplines i.e. FMPE, PFE, SWE, RBEE, BE.

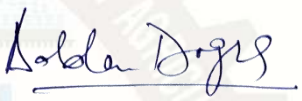
**6.4.7 Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

There is a system for inclusion the new recommendation to the courses through academic council. Earlier 4$^{th}$ and 5$^{th}$ Dean's committee's recomodationshave already implemented and BSMA is likely to be adopted by the colleges and the University well in time. Moreover, there is a system of annual self-evaluation reports (SAR) for all teaching faculty. SARs are evaluated for efficacy by the Deans and Directors before being approved by the Vice-Chancellor.

**6.4.8 Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the degree programme | Actual students admitted in last five years | | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| UG | 41 | 49 | 47 | 53 | 49 | | 7.31 | 6.12 | 14.89 | 11.32 | 6.12 |

**6.4.9 ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*



There is sufficient use of ICT in teaching as well as lab classes (practical) for the delivery of curriculum. For ICT applications, instruments such as Power Point, YouTube, CD-ROM, Software-AutoCAD, GIS, etc. are utilised.

**6.4.10** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean, Dr. Baldev Dogra, COAET hereby certify that the information contained in the Sections 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

# Programme # 2

# M.Tech. and Ph.D. (Agril. Engg.) with Specialization in Farm Machinery & Power Engineering

CC SHAU
COLLEGE OF AGRICULTURAL ENGINEERING AND TECHNOLOGY
1992

## 6.4. About the Department

The Department of Farm Machinery and Power Engineering (Earlier called as Department of Farm Power & Machinery) was created in August, 1993 with starting of M.Tech. (Agril.Engg.) with specialization in Farm Machinery and Power Engineering. The doctoral programme in the department has been started since 2016. The department deals with undergraduate, postgraduate and doctoral teaching, research and extension activities. Its aim is to promote academic excellence in the students in the field of Farm Machinery and Power Engineering. The courses at the UG, PG and Ph.D. level have been designed to equip the students with the knowledge of design, development and maintenance of farm machinery and tractor. In addition to courses related to Farm Machinery and Power Engineering, department also deals with testing of farm machineries for assurance of quality implements to the farmers. The name of department was changed from Farm Power and Machinery (FPM) to Farm Machinery and Power Engineering (FMPE) during the year 2013.

### Objectives of the Department

- Development /adoption of total package of precise, high capacity energy efficient equipment for major crops, vegetables, horticulture crops and dry-land area of state for large as well as small land holding by use of tractors or power tillers.
- To strengthen R&D centre with instrumentation, data acquisition and analysis facilities for systematic and reliable performance testing of agricultural machines.
- To promote custom hiring services through entrepreneurship by developing machinery bank, Agro service centre etc.
- Efficient and precise application of plant protection chemicals.

### 6.4.1. Brief History of the Degree Programme: *Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

Degree programme (M. Tech.) was initiated in 1993 with specialization in Farm Power and Machinery. Nomenclature of the programme was changed to Farm Machinery and Power engineering in 2010. Entry qualification for master's programme is B.Tech. (Agril.Engg.). Minimum duration of the programme is 2 years and maximum duration is 4 years. Ph. D. Programme (Agricultural Engineering) with specialization in Farm Machinery & Power Engineering was started in 2016 with one seat for regular student and one for in-service candidate.

### Objectives of the M.Tech. Programme

- Its aim is to promote academic excellence in the field of farm machinery and power engineering.
- To equip the students with the knowledge of design, development and maintenance of farm machinery and tractor.
- To conduct research in thrust areas related to farm machinery and power.

### Accomplishments of M.Tech.Programme:

- Till date, the Department of Farm Machinery & Power Engineering has registered 42 M.Tech. students. During the period under report eight students have completed and eleven students are pursuing M.Tech. degree in the department.
- Three students qualified NET in the last five years.
- Two students have joined as Assistant Professor and one student joined as ADO in bank during last five years.
- Six students went for higher studies (Ph.D.).

- Er. Nitin Karwasra, paased out student of M.Tech. programme got best paper award in 52nd Annual convention of ISAE published on his M.Tech. research work.
- Faculty and students' research brought out many research papers, abstracts and popular articles (Annexure FMPE 1)
- Some of the alumni of the college have established their Entrepreneurs.

**Objectives of the Ph.D. Programme:**

- To produce quality and specialized human resource in the areas of farm machinery and power engineering.
- To undertake research studies to address various issues related to farm machinery, power sources, machinery development and precision agriculture
- To inculcate entrepreneurship abilities among the PG students

**Accomplishments of Ph.D. Programme:**

- Two students have passed from the Department since inception.
- One student qualified NET in the last five years.
- Students under the guideance of teachers brought out many research papers (AnnexureFMPE 1).
- Post graduates from the department are serving at reputed positions in Govt. sectors.

**6.4.2 Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

Four posts of Associate Professor/equivalent and six posts of Assistant Professor and equivalent are sanctioned. There are one Professor, two Assistant Professors and two Assistant Scientists working in the department. Two DES (FMPE) equivalents to Assistant Professor are posted at KVKs. Out of these two one's headquartering is shifted to the department.

**Farm Machinery & Power Engineering**

| Designation | Sanctioned | In Place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| Professor and equivalent | 0 | 0 | 0 | 1 |
| Assoc. Professor and equivalent | 4 | 2 | 2 | 2 |
| Asstt. Professor and equivalent | 6 | 5* | 1 | 4 |
| Total | 10 | 7 | 3 | 7 |

* Faculty in place working as Professor (01) include Personal Promotion (PP) as a personal measure.

**Note:** All the faculty of this programme is assigned the responsibilities for the multiple programmes.

**Faculty Profile:**

**Farm Machinery & Power Engineering**

| S. No. | Name | Designation | Qualification | Specialization |
|---|---|---|---|---|
| 1 | Dr. Vijaya Rani | Professor & Head | Ph.D. | Farm Machinery & Power Engineering |
| 2 | Dr. Mukesh Jain | Assistant Professor | Ph.D. | Farm Machinery and Power Engineering |
| 3 | Dr. Anil Kumar | Assistant Professor | Ph.D. | Farm Machinery and Power Engineering |
| 4 | Er. Swapnil Choudhary | Assistant Scientist | M.Tech. | Farm Machinery and Power Engineering |
| 5 | Er. Naresh | Assistant Scientist | M.Tech. | Farm Machinery and Power Engineering |
| 6 | Er. Bharat Patel | Assistant Scientist | M.Tech. | Farm Machinery and Power Engineering |
| 7 | Er. Ajit Singh* | DES, FMPE | M.Tech. | Farm Machinery and Power Engineering |
| 8 | Dr. Ganesh Upadhyay | Assistant Scientist | Ph.D. | Farm Machinery and Power Engineering |

* Posted at outstation

**6.4.3. Technical and Supporting staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Staffs | Sanctioned | In position | Vacant |
|---|---|---|---|---|
| **Technical** | | | | |
| 1 | Workshop Engineer | 1 | 1 | 0 |
| 2 | Mechanic | 9 | 3 | 6 |
| 3 | Driver-cum-mechanic | 2 | 2 | 0 |
| 4 | Turner | 2 | 1 | 1 |
| 5 | Fitter-cum-operator | 4 | 0 | 4 |
| 6 | Workshop Mate | 1 | 0 | 1 |
| 7 | Auto Electrician | 1 | 0 | 1 |
| 8 | Welder | 2 | 0 | 2 |
| 9 | Carpenter | 1 | 0 | 1 |
| 10 | Vehicle Attendant | 2 | 1 | 1 |
| 11 | Blacksmith | 1 | 0 | 1 |
| 12 | Technical Assistant | 1 | 0 | 1 |
| 13 | Machineman | 1 | 0 | 1 |
| **Supporting** | | | | |
| 1 | Clerk | 1 | 1 | 0 |
| 2 | Assistant | 1 | 1 | 0 |
| 3 | Steno-Typist | 1 | 1 | 0 |
| 4 | Store-Keeper | 1 | 0 | 1 |
| 5 | Tracer | 1 | 0 | 1 |
| 6 | Helper | 2 | 0 | 2 |
| 7 | Messenger | 1 | 0 | 1 |
| 8 | Sweeper | 1 | 0 | 1 |
| **Total** | | **37** | **11** | **26** |

**Note:** All the staff is assigned the responsibilities for the multiple activities.

**6.4.4 Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

The department has well established Farm Machinery Testing Centre with three labs, one ergonomics lab, one spray Sprayer testing lab and one engine testing lab. There is two UG lab and one departmental library. Hence, sufficient numbers of labs are there to meet the course curricula requirements.

## List of Classroom and functional laboratories

| **No. of lecture rooms with sitting capacity** | **2*** |
|---|---|
| Lecture Room No. | Seating capacity |
| 1 | 42 |
| 2 | 42 |
| **Other Facilities** | |
| No. of labs under HOD, FMPE office with specialized purpose | 5 |
| Farm facilities (Field lab) | - |
| Workshops | 1 |
| Any other instructional units being utilized for the award of the Degree Programme<br>* *Class room facilities are available at the college level* | - |

## Details of the laboratories

| S. No. | Laboratories | Activities |
|---|---|---|
| 1 | Farm Machinery Lab | Different manual, animal and self propelled machineries are available in the lab to show the components and working of the machineries to the students. |
| 2 | Farm Power Lab | The laboratory contains cut sections and models for various tractor and engine systems such as fuel system, gear system, differential, electrical system and complete tractor assembly for exposing the students to tractors, engines and their systems. |
| 3 | Ergonomics Lab | The facilities are available in the lab to study the anthropometry of agricultural workers, physiological parameters such as heart rate, blood pressure, calibration of subject, respiration rate, oxygen consumption, general fatigue, overall discomfort, noise and vibration etc. |
| 4 | Sprayer Testing Lab | Sprayers testing facility are available according to the BIS codes. |
| 5 | Engine Testing Lab | Engines of up to 80 kW powers are tested in the lab under the prescribed condition according to the BIS code. |

## List of equipments at present available in the department

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Straw Baler | Implement Yard |
| 2. | Tri-axial Vibration Meter | Machinery Testing Lab |
| 3. | Soil Compaction Meter | Machinery Testing Lab |
| 4. | Thresher multipurpose Tractor operated | Implement Yard |
| 5. | P.T.O. Torque Sensor | Machinery Testing Lab |
| 6. | Patte Meter | Machinery Testing Lab |
| 7. | Spectrometer with Teflon pipe connector | Engine Testing Lab |
| 8. | Paddy Transplanter | Implement Yard |
| 9. | Paddy Combine Harvester | Implement Yard |
| 10. | Fully Automatic Dynamometer | Machinery Testing Lab |
| 11. | Self Propelled Rotary Weeder | Implement Yard |
| 12. | Sample preparation machine for spectrometer | Engine testing lab |
| 13. | Spatial Drill | KVK Kaithal |
| 14. | Tractor operated two row vegetable transplanter | Implement Yard |
| 15. | Tractor Operated Power Weeder (Three Row) | Implement Yard |
| 16. | Tractor operated Power Weeder (two Row) | Implement Yard |
| 17. | Carrot Digger | Implement Yard |
| 18. | Happy seeder | KVK, Kaithal |
| 19. | Rotary Plough | Implement Yard |
| 20. | Tractor Drawn Rotary Weeder (Three Row) | Implement Yard |
| 21. | Un-manned aerial vehicle (Drone) | Testing lab |
| 22. | Pneumatic planter | Implement Yard |
| 23. | Auto steer system | Installed in tractor |

## Lab Facilities

Farm Power Lab

Implement Shed

Combine harvesting Technology Training Lab

Engine Testing Lab

Sprayer Testing Lab

Ergonomics Lab

**Theory and practical batches for PG Programmes**

At PG level, the department of Farm Machinery & Power Engineering offers 4 core and 11 professional optional courses, of which 4 core and 8 professional optional courses have practical components. Minimum three weeks training in industry, one master seminar and 20 credit hours of research are compulsory to be completed for the M. Tech. degree.

- There are limited seats in M.Tech.programme with an average of 4-5 students. Some courses are offered as minor courses for students of other departments. There is only one batch for theory and practical classes in all the courses with an average of 4-10 students.
- Similarly, at Ph.D. level there are limited seats in Ph.D. programmes. Hence, there is only one batch for theory and practical classes in all the courses. For Ph.D., the department of Farm Machinery and Power Engineering offers 9 courses and 6 courses has practical components.

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

Sound grasp of the theory is important for a professional degree. Some of the skills are acquired through practical and hands-on training. Hence, it is important to provide learning material and opportunities that allows students to get involved in activities that increase their knowledge and skills. At PG level department offers 4 core and 8 professional optional courses having practical components. Besides imparting theoretical knowledge, students are provided practical skills and hands-on-training as per the curriculum requirements.

| Course No. | Credit Hours | Practical and Hands-on-training | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|---|
| FMPE-501* | 4 (3+1) | • Statement and formulation of design problems.<br>• Design of farm power systems.<br>• Design of mechanisms & prototypes in farm machinery. | • Development & formulation of design problems<br>• Development of mechanism and prototype of farm machinery. |
| FMPE-502* | 3 (2+1) | • Relationship of soil parameters to the forces acting on tillage tools.<br>• Wheel slippage and tyre selection<br>• Design and performance of traction devices and soil working tools. | • Found relationship soil parameters to the force acting on tillage tool.<br>• Get knowledge about selection of tyre according to the working condition.<br>• Develop traction devices and soil working tools. |
| FMPE-503* | 3 (2+1) | • Laboratory and field testing of selected farm equipment.<br>• Material testing and its chemical composition.<br>• Non-destructive testing techniques. | • Get knowledge of lab and field testing of farm machinery.<br>• Know about determining chemical composition of metals used in construction of machinery and its testing.<br>• Learn about Non-destructive testing techniques. |
| FMPE-504* | 4 (3+1) | • Vibration measurement and analysis equipment<br>• Determination of modulus of elasticity, rigidity, and MI by free vibration test.<br>• Detailed analysis of multi- degree of freedom system. | • Measure vibration and do analysis of measuring equipments.<br>• Perform different vibration test on machineries.<br>• Evaluation of logarithmic decrement and damping factor.<br>• Do analysis of multi- degree of freedom system. |
| FMPE-505 | 3 (2+1) | • Calibration of instruments<br>• Experiment on LVDT, strain gauge transducer, inductive and capacitive pickups, speed measurement using optical devices.<br>• Making of thermocouples and their testing- basic electronic circuits and application of linear ICs. | • Do calibration of instruments<br>• Perform experiments on different electronics devices.<br>• Make thermocouples and do testing of basic electronic circuits.<br>• Learn about the use of linear ICs |
| FMPE-506 | 3 (2+1) | • Mathematical modeling and analysis<br>• Computer use in solving problems of optimization, writing of | • Students make mathematical models and analysis them related to farm machinery.<br>• Use computer for solving problems |

| | | | |
|---|---|---|---|
| | | algorithms and decision making. | and decision making related to farm machinery. |
| FMPE-507 | 2 (1+1) | • Practice on software development process and modeling techniques.<br>• Use of CAD software in solving engineering problems related to design of farm machinery. | • Student's practice on software development process and modeling techniques.<br>• Learn and Practice on CAD software in solving engineering problems related to design of farm machinery |
| FMPE-508 | 3 (2+1) | • Design of tractor engine, hydraulic system and other systems.<br>• Design driver seat, place area and control | • Practice on design of tractor engine, hydraulic system and other systems.<br>• Student's design driver seat, place area and control. |
| FMPE-509 | 3 (2+1) | • Management problems and case studies. | • Student's get knowledge how to manage machinery on farm and scheduling of operations.<br>• Application of programming techniques to the problems of farm power and machinery selection. |
| FMPE-510 | 3 (2+1) | • Experiments on measurement of physical and mental capacities and limitations of human-being in relation to the stress and environment.<br>• Anthropometric measurements of human body<br>• Human response to dust, noise and vibrations, case studies on ergonomics. | • Do lab experiments on measurement of physical and mental capacities and limitations of human-being in relation to the stress and environment.<br>• Take anthropometric measurements of human body<br>• Take human response to dust, noise and vibrations and do case studies on ergonomics. |
| FMPE-511 | 3 (2+1) | • Determination of physical properties, aerodynamic properties, thermal properties and electrical properties of various food materials. | • Measurement of different engineering properties of various food materials are taken by the students.<br>• Students apply these engineering properties in design and operation of agricultural equipment and structure. |
| FMPE-514 | 1 (0+1) | • The research problem -literature review -types of research, experimental & quasi-experimental research-causal comparative & correlation research Survey research- sampling techniques.<br>• Optimization software – GAMES – applications, electronic spread sheet – solver.<br>• Image analysis software – applications.<br>• General computational software for research – MATLAB – applications – statistical applications,<br>• Report writing – interpretation and reporting. | • Practice on different software that helps in research of the student.<br>• Make presentations and present to the faculty. |

| | | | |
|---|---|---|---|
| | | • Scientific writing techniques.<br>• Presentation -techniques. | |
| **Ph.D. Programme** | | | |
| FMPE 601** | 3 (3+0) | • Advances in farm machinery and power engineering | • New machineries and their working procedure<br>• Lab & Field evaluations of the machinery<br>• Tractor dynamics, development of the model and computer-aided designing.<br>• Checking, interpretation and statistical analysis of results. |
| FMPE 602** | 3 (3+0) | • Mathematical modeling in farm machinery and power engineering | • Simulation for system modeling<br>• Prediction models for traction devices<br>• Analysis of random data<br>• Formulation and analysis of models |
| FMPE 603 | 2 (2+0) | • Energy conservation and management in production agriculture | • Energy requirement of different operations in agricultural production systems<br>• Planning and management of agricultural production systems for energy conservation and energy returns assessment<br>• Energy use planning and forecasting |
| FMPE 604 | 3 (2+1) | • Computer aided analysis and design of farm machinery | • Design process, modeling using CAD, architecture of CAD system.<br>• Agricultural engineering system analysis<br>• Steps in feasibility analysis, cost analysis.<br>• Design of farm machinery with the help of CAD |
| FMPE 605 | 4 (3+1) | • Machinery for natural resource management and precision farming | • Introduction to GIS and GPS, study of models - farm machinery usage.<br>• Precision farming using GIS and GPS.<br>• Mechanism of power shovels, drag lines, earth diggers, clamshells etc.<br>• Earth work estimation, unit cost of operation,<br>• Work scheduling, machinery maintenance and entrepreneurship |
| FMPE 606 | 4 (3+1) | • Soil mechanics | • Physical and engineering properties of soil.<br>• Pressure distribution diagram and earth pressure<br>• Stability requirements of a foundation, soil rating, soil loading tests<br>• Housel's bearing capacity method, perimeter area ratio method. |
| FMPE 607 | 3 (2+1) | • Dynamics of farm machinery | • Farm machine systems characteristics and evaluation.<br>• Analysis of forces, motion and their equilibrium in the elements of farm machines.<br>• Dynamic balancing and stability of farm machines,<br>• Analysis of typical problems in tractor implement system. |
| FMPE 608 | 3 (2+1) | • Production technology | • Product, risk analysis.<br>• Get knowledge of workshop planning and layout.<br>• Know about workshop practices applied in prototype production<br>• Know about common tool and press |

| | | | |
|---|---|---|---|
| | | | operations<br>• Do practice of welding; welding processes; metal cutting and machining process<br>• Get knowledge about Non-traditional methods of machining.<br>• Know about computer aided manufacturing system, CNC, DNC, robotics etc. |
| FMPE 609 | 1 (0+1) | • Special problem in farm machinery and power engineering | • Planning and formulation of a problem related to Farm Power and Machinery Engineering & identification of suitable solutions |

***Compulsory courses*

**6.4.6 Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**i) Supervision of students in M.Tech.programme offered by the department**

| Year | Numberofstudents on roll | Numberof PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 10 | 4 | 2.50:1 |

| 2021-22 | 7 | 7 | 1:1 |
| 2022-23 | 10 | 7 | 1.43:1 |

**i) Supervision of students in Ph.D. programme offered by the department**

| Year | Number of students on roll | Numberof PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 3 | 3 | 1:1 |
| 2019-20 | 3 | 4 | 0.75:1 |
| 2020-21 | 3 | 4 | 0.75:1 |
| 2021-22 | 4 | 4 | 1:1 |
| 2022-23 | 3 | 7 | 0.43:1 |

**6.4.7 Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

There is a system for inclusion the new recommendation to the courses through academic council. Earlier 4th and 5th Dean's committee's recomodations have already implemented and in current BSMA is likely to be adopted by the colleges and the University well in time. Moreover, there is a system of annual self-evaluation reports (SAR) for all teaching faculty. SARs are evaluated for efficacy by the Deans and Directors before being approved by the Vice-Chancellor.

**6.4.8 Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Tech.** | 3 | 2 | 4 | 3 | 3 | 20* | 33* | 0 | 0 | 0 |
| **Ph.D.** | 0 | 0 | 2 | 1 | 0 | 0 | 0 | 0 | 25* | 33* |

***Due to placements/ pandemic**

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

There is sufficient application of ICT in teaching as well as lab classes (practical) for curricula delivery. For ICT application, some tools are used such as Power point presentations, YouTube, CD-ROM, Software-AutoCAD, GIS etc.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme)
I, the Dean COAE&T, Dr. Baldev Dogra hereby certify that the information contained in the Sections 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

## 6.4. About the Department

The Department of Processing & Food Engineering (Earlier called as Department of Agriculture Processing & Energy) was established in March 1996. The Department deals with undergraduate and postgraduate teaching, research and extension activities. In addition to courses related to processing, department also deals with various courses in the upcoming field of energy like renewable energy sources, energy management in food processing industries etc. Department deals with the innovations in the field of Food Processing which are vital for agro-processing, transforming the raw material to the finished products at an increased rate of production, productivity and at a reduced cost of production and to meet the demands as well. Food Processingdeal all aspects of the unit operation involved in processing the raw material to the finished products, their packaging and safe storage too. The name of Department was changed from Agriculture Processing & Energy (APE) to Processing & Food Engineering (PFE) during the year 2013.

### 6.4.1. Brief History of the Degree Programme:

*Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

- M.Tech. was started in discipline "Agricultural Processing & Food Engineering" with 3 seats in the Department 1996.
- The name of degree was changed from Agricultural Processing & Food Engineering to Processing & Food Engineering (PFE) during the year 2013.
- Started Ph. D. Programme (Agricultural Engineering) with specialization in Processing & Food Engineering in 2016 with one seat for regular student and one for in-service candidate.

**Objectives of the Programme:**

- To promote academic excellence in the field of Processing & Food Engineering.
- To equip the students with the knowledge of design, development Agro processing machinery
- To provide academic excellence to students in the following thrust areas:
  - Development of crop specific post harvest techniques for reduction in quantitative & qualitative losses of farm produce.
  - Development of machines for different post harvest unit operations
  - Reduction in post harvest losses
  - Income and employment generation through Agro-Processing Centers in rural areas - Hermetic storage of grains

**Accomplishments:**

- Thirty-three students have passed from the Department till date.
- Four students qualified NET in the last five years.
- Four students have joined as Assistant Professor and two students joined as AO in bank during last five years.
- Seven students enrolled for higher studies (Ph.D.) during last five years.
- Students' research brought out 42 Research papers, **2 Patent**, 2 Best paper award, 12 Book Chapters/Books, 15 Popular articles and 25 abstracts **(Annexure PFE I).**
- Alumni of the Deptt. are serving Govt. and privates sectors.
- Some of the alumni of the deptt. have established their Entrepreneurs.

**Objectives and accomplishmentsof the Ph.D. Programme**

- To promote academic excellence in the field of Processing & Food Engineering.

- To equip the students with the knowledge of design, development Agro processing machinery
- To provide academic excellence to students in the following thrust areas:
  - Development of crop specific post harvest techniques for reduction in quantitative & qualitative losses of farm produce.
  - Development of machines for different post harvest unit operations
  - Reduction in post harvest losses
  - Development of novel food packaging materials and novel processing techniques

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

**Processing &Food Engineering**

| Designation | Sanctioned | In Place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| **Professor and equivalent** | 0 | 0 | 0 | 1 |
| **Assoc. Professor and equivalent** | 1 | 1* | 0 | 2 |
| **Asstt. Professor and equivalent** | 6 | 4 | 2 | 4 |
| | 7 | 5 | 2 | - |

* Faculty in place working as Professor (01) include Personal Promotion (PP) as a personal measure

**Note:** All the faculty of this programme is assigned theresponsibilities for the multiple programme.

**Faculty Profile:**

**Processing & Food Engineering**

**Theory and practical batches for PG Programmes**

- There are limited seats in M.Tech.programme with an average of 4-5 students. Some courses are offered as minor courses for students of other departments. There is only one batch for theory and practical classes in all the courses.
- Similarly, at Ph.D. level there are limited seats in Ph.D. programmes. Hence, there is only one batch for theory and practical classes in all the courses. For Ph.D., the department of Processing & Food Engineering offers 9 courses and 6 courses has practical components.

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

The Department of Processing & Engineering offers 14 courses at Maters level. Out of these 14 courses, 14 courses provide practical skills and hands-on training. Besides imparting theoretical knowledge, students are provided practical skills and hands-on-training as per the curriculum requirements. In addition to these courses, one course on Masters Research also provides hands-on-training in research.

| **Course No.** | **Credit Hours** | **Practical and Hands-on-training** | **How far students are getting desired practical and hands-on-training as per the curriculum** |
|---|---|---|---|
| PFE 501* | 2+1 | Solving problems on steady and unsteady state conduction with or without generation; | Acquaint and equip students about hydrological process and analysis of hydrological data required for design process. |
| PFE 502*/<br><br>FMPE 511 | 2+1 | Experiments for the determination of physical properties like, length, breadth, thickness, surface area, bulk density, porosity, true density, coefficient of friction, angle of repose and colour for various food grains, fruits, vegetables, spices and processedfoods, | Provide the knowledge of different techniques of measurement of engineering properties and their importance in the design of processing equipments |
| PFE 503* | 2+1 | Solving problems on single and multiple evaporator, distillation, crystallisation, extraction, leaching, membrane separation and mixing. | Study of unit operations of food industries and their design features. |
| PFE 504* | 2+1 | Calculation of heating and cooling load; design calculation of moisture condensation in agricultural buildings; study of moisture migration behaviour in storage bins; design aspect of cold storage. | Acquaint and equip the techniques to control temperature, humidity and other composition of air to create favourable environment in the agricultural<br><br>structures. |
| PFE 505@/<br>FST 527 | 2+1 | Identification of energy efficient processing machines. Assessment of energy consumption, production and its cost in food processing plants, visit to related food processing industry. | Acquaint and equip the students with different energy management techniques including energy auditing of food industries. |
| PFE 506@ | 2+1 | Physical properties of cereals and pulses, raw and milled products quality evaluations; parboiling and drying; terminal velocities of grains and their fractions; study of paddy, wheat, pulses and oilseeds milling equipments; planning and layout of various milling plants. | Provide the knowledge of post harvest technology of cereals, pulses and oilseeds with special emphasis on their equipments |
| PFE 507 | 2+1 | Design and drawing of mechanical dryers, milling equipment, separators, evaporators, mixers and | Design features of different food processing equipments being used in the industries and with the layout, planning of different food |

| | | | |
|---|---|---|---|
| | | separators. | and processing plants. |
| PFE 508 | 2+1 | Determination of size, shape, density, area-volume-mass relationship of fruits and vegetables, sugar-acid ratio of fruits, evaluation of washer, grader and packaging methods. | Processing of fruits and vegetables and the design features of the equipments used for their processing. |
| PFE 509 | 2+1 | Experiments in slaughtering, dressing, wholesale and retail cutting: Curing, preservation of meat and meat products | To acquaint and equip the students with processing of meat and meat products and thedesign features of the equipments used for their processing. |
| PFE 510@/FST 505 | 2+1 | Identification and testing of packaging materials; Determination of wax from wax paper; Testing of lacquered tin plate sheets. | Packaging methods, packaging materials, packaging machineries, modern packaging techniques etc. |
| PFE 511 | 2+1 | Microbiological examination of food, hazard analysis, premises design, HACCP project plan; CCP, CCP Decision tree, HACCP control chart. | Provide the knowledge latest standards to maintain food quality as well as to study HACCP protocol. |
| PFE 512@ | 2+1 | Kinetics of one substitute reactions, kinetics of growth in batch cultures, designconsideration for bioreactors, media preparation and sterilization, microprocessor basedmonitoring of bioprocess parameters. | Acquaint and equip the students with the basic principles of biochemical and process engineering. |
| PFE 513 | 2+1 | Quality evaluation of stored products, design of storage structures, cold storage, load estimation, construction, maintenance, static pressure drop. | Safe storage of food materials, design of storage structures and the design of different material handling equipments used in the industries |
| PFE 514@/ SST 507 | 2+1 | Operation and performance evaluation of various seed processing equipments | Processing of seeds, operation and maintenance of different seed processing machinery & dryers. |
| **Compulsory courses; @Courses open for PG students of other Deptt. /Colleges: To be taught by:  Processing & Food Engineering;  Processing & FoodEngineering and Food Science & Technology* | | | |
| **Ph. D. Programme** | | | |
| PFE 601 | 2+1 | Texture classification. Relation of food texture with structure and rheology. Principles and practices of objective texture measurements, viscosity measurements. Sensory methods of texture and viscosity measurements and their correlation. Rheological properties of foods. | Mathematical models and their application along with pipe line design and Sprayer selection for non-Newtonian fluids. Recent advances in textural, rheological and viscoelastic characteristics of foods and their associated mathematical models. |
| PFE 602 | 3+0 | Low temperature preservation - advantages and applications cooling | Acquaint and equip the students with the |

| | | | |
|---|---|---|---|
| | | and cold storage –freeze concentration and membrane separation process - hurdle technology - principles and applications - food irradiation -, microwave processing - microwave equipment - hydrostatic pressure treatment of food - application of heat energy and ultrasound | principles of advances in food processing |
| PFE 603 | 2+1 | Introduction to mathematical, correlative and explanatory models. Formulation, idealization and simplification of the problems. Probability models, series and linear mathematical approximation, dynamic and interacting dynamic processes. Applications of mathematical modelling techniques to food processing operations like parboiling, convective drying, pasteurization, dehydration, shelf-life prediction, fermentation, aseptic processing | Acquaint and equip the students with the principles of mathematical models in food processing |
| PFE 604 | 2+1 | Isotherm models, psychrometry, construction and use of psychrometric charts. Air flow and resistance, principles and equipments for air movement and heating, drying methods and theory of drying, driers, classification and other allied equipment, drying models. Heat requirements and thermal efficiency of drying system, aeration, tempering and dehydration, operation of driers and their controls, selection of driers, performance testing of grain driers | Acquaint and equip the students with the principles of advances in drying of food materials |
| PFE 605 | 2+1 | Generation of by-products, agricultural and agro industrial byproducts/ wastes, properties, on site handling, storage and processing. Collection of wastes, utilization pattern as fuel, agricultural waste fired furnaces: Mechanism, construction and efficiency, suitability of wastes as fuel, fuel briquettes, briquetting process, equipment, factors affecting briquetting. Utilization of wastes for paper production, production of particle board, utilization, by-products from rice mill, rice husk, rice bran, utilization | Acquaint and equip the students with the principles of agricultural waste and byproduct utilization |

1992

# Programme # 4

# M.Tech. and Ph.D. (Agril. Engg.) with Specialization in Soil & Water Engineering

CC SHAU
COLLEGE OF AGRICULTURAL ENGINEERING AND TECHNOLOGY
1992

## 6.4. About the Department

The Department of Soil & Water Engineering was established in the year 1993. The department deals with undergraduate and postgraduate teaching, research and extension activities. Its aim is to promote academic excellence in the field of Soil and Water Engineering. The courses at the UG and PG level have been designed to equip the students with the knowledge of hydrology, crop water requirement, irrigation methods, groundwater, drainage and soil & water conservation as well as advanced fields of micro-irrigation, GIS and remote sensing etc. The department also conduct research under different fields of Soil and Water Engineering pertaining to farmers' problems and advancement in the field.

**Objectives of the Department**

- Imparting education in the field of Soil and Water Engineering to both undergraduate students i.e. B.Tech. (Agril. Engg.)/B.Sc. (Hons) Ag. and post graduate students i.e. M.Tech. (Agril. Engg.) with specialisation in Soil and Water Engineering and Ph.D. in Soil & Water Engineering
- Advancement of learning and prosecution of research in the field of Soil and Water Engineering
- Undertaking Extension activity for farmers in the field of Soil and Water Engineering.

### 6.4.1. Brief History of the Degree Programme: *Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

Post graduate programme of M.Tech. was started in 1993 with 3 seats in the Department. The Ph.D. programme in the Department was started in 2017. Entry qualification for master's programme is B.Tech Agricultural Engineering.

**Objectives of initiating M.Tech.programme**

- To generate human resource in the field of Soil & Water Engineering.
- To provide academic excellence to students in the following thrust areas:
  - Evaluation and modification of the farm irrigation and drainage practices
  - Development of decision support systems for different water management practices
  - Rainwater harvesting and management
  - Irrigation and fertigation scheduling with drip irrigation system
  - Identification of measures for the conservation of energy

**Accomplishments:**

- 47 students have passed M.Tech. from the Department since inception.
- 9students qualified NET in the last five years.
- 7 students enrolled for higher studies (Ph.D.) during last five years.
- Students' research brought out good quality research papers.
- Post graduates from the department are serving at reputed positions in Govt. and privates' sectors.

**Objectives of initiating Ph.D. programme:**

- To produce quality and specialized human resource in the areas of Soil & Water Engineering.
- To undertake research studies to address various issues related to Soil & Water Engineering related to farm irrigation and drainage practices, rainwater harvesting, development of DSS,

irrigation and fertigation scheduling, energy conservation in Sprayers, groundwater, evapotranspiration studies.

- To inculcate entrepreneurship abilities among the PG students

**Accomplishments:**

- 6 students have passed Ph.D. from the Department since inception.
- Two students qualified NET in the last five years.
- Students' research brought out 24 research papers.
- Post graduates from the department are serving at reputed positions in Govt. sectors.

**6.4.2 Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the DegeeProgramme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

Soil & Water Engineering Field Lab

GIS Lab

## Details of the laboratories

| S. No. | Laboratories | Activities |
|---|---|---|
| 1 | Soil & Water Conservation Engineering Lab | Study of water measurement, soil conservation structures |
| 2 | Irrigation and Drainage Engineering Lab | Study of Irrigation Sprayers and agricultural drainage |
| 3 | Soil & Water Engineering Field Lab | Study of water measurement, soil conservation structures, water table, underground drainage system |
| 4 | GIS Lab | Familiarization with GIS software and its application in water resource management |

## List of equipments at present available in the department

| S. No. | Name of equipment | Location/Lab |
|---|---|---|
| 1. | Aqua probe | Soil & Water Conservation Engineering Lab. |
| 2. | Moisture tester/ Gauge | Soil & Water Conservation Engineering Lab. |
| 3. | Plant Canopy Analyser PAR-80 | Soil & Water Conservation Engineering Lab. |
| 4. | TDR | Soil & Water Conservation Engineering Lab. |

| | | |
|---|---|---|
| 5. | Infiltrometer | Soil & Water Conservation Engineering Lab. |
| 6. | Submersible Sprayer "Cut Model" | Soil & Water Conservation Engineering Lab. |
| 7. | Moisture tester/ Gauge | Soil & Water Conservation Engineering Lab. |
| 8. | Cone Penetrometer | Soil & Water Conservation Engineering Lab. |
| 9. | Anemometer | Soil & Water Conservation Engineering Lab. |
| 10. | Drip Irrigation System | Soil & Water Conservation Engineering Lab. |
| 11. | Conductivity Meter | Soil & Water Conservation Engineering Lab. |
| 12. | Tensiometers | Soil & Water Conservation Engineering Lab. |
| 13. | Micro plots with fertigation facilities | Soil & Water Engineering Field Lab |

**Theory and practical batches for PG Programmes**

- At M.Tech.level, the Department of SWE offers 16 courses and 09 courses have practical components besides research work. There is only batch for theory classes and one batch for practical classes in all the courses with an average of 4-8 students.

Similarly, there are limited seats in Ph.D. programmes. Hence, there is only one batch for theory and practical classes in all the courses.

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

Besides imparting theoretical knowledge, following courses provide practical skills and hands-on-training as per the curriculum requirements to the students.

**Conduct of Practical and Hands-on-Training in M.Tech. Soil & Water Engineering**

The Department of Soil & Water Engineering offers 16 courses at Masters level. Out of these 16 courses, 9 courses provide practical skills and hands-on training. Besides imparting theoretical knowledge, students are provided practical skills and hands-on-training as per the curriculum requirements. In addition to these courses, one course on Masters Research also provides hands-on-training in research. ForPh.D., the Department of SWE offers 11 courses and 3 courses have practical components besides one course on research.

| **Course No.** | **Credit Hours** | **Practical and Hands-on-training** | **How far students are getting desired practical and hands-on-training as per the curriculum (bullet form)** |

| SWE 601 | 3(3+0) | Advanced Hydrology | • Stochastic analysis of hydrological data<br>• Simulation and synthetic methods inhydrology<br>• Test for randomness and trend<br>• Model parameter estimation |
| SWE 602 | 3(3+0) | Advanced Hydro-dynamics in Soil Aquifer Systems | • Physical and mathematical concept of soil aquifer system.<br>• Confined seepage under hydraulic structures.<br>• Application of analytic theory<br>• Dynamics of groundwater spreading |
| SWE 603 | 3(3+0) | Modeling Soil Erosion Processes | • Mechanics of soil erosion.<br>• Estimation of critical wind velocity for erosion<br>• Theory of particle and sediment<br>• transport<br>• Watershed modeling |
| SWE 604 | 3(2+1) | Soil and Water Systems Simulation and Modelling | • Systems engineering for water management<br>• Rainfall-runoff models<br>• Overlandand Channel flow simulation<br>• Flood control |
| SWE 605 | 2(2+0) | Hydro-Chemical Modeling | • Review of hydrodynamics in flow through porous media<br>• Hydrodynamic dispersion convection<br>• Adsorption in solute transport<br>• Contaminanttransport |
| SWE 606 | 3(3+0) | Plant Growth Modelling and Simulation | • Crop growth modeling<br>• Types ofmodels<br>• Plantenvironment, process<br>• Quantitative analysis of plant processes |
| SWE 607 | 2(2+0) | Advances in Irrigation and Drainage | • Surface irrigation system and modeling<br>• Atomationandfertigation design<br>• Synthetic materials for drainage systems<br>• Controlled drainage |
| SWE 608 | 3(2+1) | Design of Pressurised Irrigation System | • Pipeline hydraulic and economics<br>• Design of travelling, centre pivot and linear moving systems<br>• Clogging problems-causes and remedial measures<br>• Design strategy for micro irrigation systems |
| SWE 609 | 1(0+1) | Special Problem in Soil & Water Engg. | • Planning and formulation of a problem related to Soil and Water Engineering andidentification of suitable solutions |

**6.4.6 Supervision of students in PG/Ph.D.programmes:** *Number of students being supervised byFaculty in case of Masters/Ph. D.Programme (as per ICAR/UGC guidelines). Mention the realistic*

*figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**Supervision of students in M.Tech.programmes offered by the Department**

| Year | Numberofstudents on roll | Numberof PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 8 | 5 | 0.6 : 1 |
| 2019-20 | 8 | 5 | 0.6 : 1 |
| 2020-21 | 11 | 5 | 2.2 : 1 |
| 2021-22 | 7 | 5 | 1.4 : 1 |
| 2022-23 | 5 | 5 | 1: 1 |

**Supervision of students in Ph.D. programmes offered by the Department**

| Year | Numberofstudents on roll | Numberof PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 6 | 3 | 2:1 |
| 2019-20 | 6 | 3 | 2:1 |
| 2020-21 | 8 | 3 | 2.67 : 1 |
| 2021-22 | 7 | 5 | 1.4: 1 |
| 2022-23 | 5 | 5 | 1: 1 |

**6.4.7 Feedback of stakeholders (Students, parents, industries, employers, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the degree programme. What action the University has taken in last five years to address the issues raised in the feed back?*

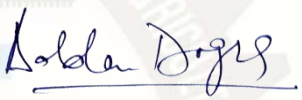
There is a system for inclusion the new recommendation to the courses through academic council. Earlier 4$^{th}$ and 5$^{th}$ Dean's committee's recomodations have already implemented and in current BSMA is likely to be adopted by the colleges and the University well in time. Moreover, there is a system of annual self-evaluation reports (SAR) for all teaching faculty. SARs are evaluated for efficacy by the Deans and Directors before being approved by the Vice-Chancellor.

**6.4.8 Student intake and attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Tech.** | 4 | 3 | 4 | 1 | 1 | - | 33* | 25* | - | - |
| **Ph.D.** | 1 | - | 2 | 0 | 3 | - | - | - | - | - |

***Due to placements/ pandemic**

**6.4.9 ICT Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*



There is sufficient application of ICT in teaching as well as lab classes (practical) for curricula delivery. For ICT application, some tools are used such as Power point presentations, YouTube, CD-ROM, Software-AutoCAD, GIS etc.

**6.4.10** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. Degree Programmes, separately, and to be presented College-wise.

**6.4.11** Since the accreditation of Programmes is related to the All India Admission from ICAR and also having weightage for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean COAE&T, Dr. Baldev Dogra hereby certify that the information contained in theSection 6.4.1 to 6.4.9 is furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College Date& Seal**

CC SHAU
COLLEGE OF AGRICULTURAL ENGINEERING AND TECHNOLOGY
1992

# Programme # 5

# M.Tech. (Agril. Engg.) with Specialization in Renewable & Bio-Energy Engineering

CC SHAU
COLLEGE OF AGRICULTURAL ENGINEERING AND TECHNOLOGY
1992

**6.4.1 Brief History of the Degree Programme:** *Clearly mention in which year the degree program was initiated along with its objective and accomplishments.*

Degree programme (M. Tech.) was initiated in 2020with specialization in Renewable & Bio-Energy Engineering. Entry qualification for master's programme is B.Tech. (Agril.Engg.). Minimum duration of the programme is 2 years and maximum duration is 4 years.

**Objectives of the M.Tech.Programme**

- Its aim is to promote academic excellence in the field of Renewable & Bio-Energy Engineering.
- To equip the students with the knowledge of design, development and maintenance of the renewable energy technologies and process development for biofuels and other value-added products.
- To conduct research in thrust areas related to Renewable & Bio-Energy**.**
- Testing and poularization of renewable energy technologies suitable for Haryana state.

**Accomplishments of M.Tech.Programme:**

- Till date the Department of Renewable & Bio-Energy Engineering has produced oneM.Tech. students from the start of master's program i.e. 2020.

**6.4.2 Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of Research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangement being made to complete the curriculum, it should be clearly mentioned in the report.*

Five posts of Assistant Professor/equivalent are sanctioned. There are one Professor (promoted through CAS), one Associate Professor (promoted through CAS) and two Assistant Professors in the department.

**Renewable & Bio-Energy Engineering**

| Designation | Sanctioned | In Place* | Vacant | Faculty recommended by the ICAR/UGC |
|---|---|---|---|---|
| **Professor and equivalent** | 0 | 0 | 0 | 1 |
| **Assoc. Professor and equivalent** | 0 | 0 | 0 | 2 |
| **Asstt. Professor and equivalent** | 5 | 4* | 1 | 4 |
| **Total** | **5** | **4** | **1** | 7 |

* Faculty in place working as Professor (01) and Associate Professor (01) include Personal Promotion (PP) as a personal measure.

**Note:** All the faculty of this programme is assigned the responsibilities for the multiple programmes.

**Renewable & Bio-Energy Engineering**

| S. No. | Name | Designation | Qualification | Specialization |
|---|---|---|---|---|
| **1** | Dr. Y. K. Yadav | Professor & Head | Ph.D. | Renewable Energy |
| **2.** | Dr.Yadvika | Associate Professor | Ph.D. | Renewable & Bio-Energy |
| **3.** | Dr. Gaurav | Assistant Professor | Ph.D. | Bio-Energy& Bioprocessing Engg. |

| | | | | |
|---|---|---|---|---|
| | Chaudhary | | | |
| **4.** | Dr. ArunAtkan | Assistant Professor | Ph.D. | Food processing and Renewable Energy |
| **5.** | Dr. Nishant* | Assistant Professor | M.Tech. | Bio-chemical Engg. |

*Working with ICAWM, CCSHAU

**6.4.3. Technical and Supporting staff:** *The position of the technical and supporting staff of the Degree* Programme including farm and field workers need to be mentioned for both sanctioned and in-*place.*

| S. No. | Staffs | Sanctioned | In position | Vacant |
|---|---|---|---|---|
| **Technical** | | | | |
| 1 | Lab Technician | 1 | 1 | 0 |
| 2 | Lab Assistant | 1 | 1 | 0 |
| **Supporting** | | | | |
| 1 | Clerk | 1 | 1 | 0 |

*Note: All the staff is assigned the responsibilities for the multiple activities.*

**6.4.4 Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the degree programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of Classroom and functional laboratories**

| **No. of lecture rooms with sitting capacity** | **2*** |
|---|---|
| Lecture Room No. | Seating capacity |
| 1 | 42 |
| 2 | 42 |
| **Other Facilities** | |
| No. of labs under HOD, RBEE office with specialized purpose | 5 |
| Farm facilities (Field lab) | - |
| Workshops | 1 |
| Any other instructional units being utilized for the award of the Degree Programme<br>* *Class room facilities are available at the college level* | - |

**Details of the laboratories**

| S. No. | Laboratories | Activities |
|---|---|---|
| 1 | Renewable energy lab | Different solar heat-based equipment's like solar water heater, solar tunnel dryer, solar convection dryer etc. and solar photovoltaic based systems like solar Sprayering system, solar powered cold storage are available along with solar photovoltaic simulator for UG and PG teaching available |
| 2 | Bioenergy Laboratory | Biogas plants, centrifuge, stirrers, muffle furnace, water bath, analytical weighing machine, autoclave, laminar air flow, spectrophotometer, kjehl dahl apparatus etc. are available to conduct the experiments for bioenergy. |

**LAB FACILITIES**

## 1. Renewable Energy Lab& Park:

## 2. Bioenergy Laboratory:

**List of equipments at present available in the department**

| S. No. | **Name of equipment** | **Location/Lab** |
|---|---|---|
| 1. | Laminar Air Flow | Bioenergy Lab |
| 2. | Autoclave | Bioenergy Lab |
| 3. | Water Bath | Bioenergy Lab |
| 4. | pH Meter | Bioenergy Lab |
| 5. | Analytical weighing Balance | Bioenergy Lab |
| 6. | Centrifuge | Bioenergy Lab |
| 7. | Microwave Oven | Bioenergy Lab |
| 8. | Muffle Furnace (Fully & Semi Prog.) | Bioenergy Lab |
| 9. | Refrigerated centrifuge | Bioenergy Lab |
| 10. | Spectophotometer (UV-Vis) | Bioenergy Lab |
| 11. | Kjehldahlappratus | Bioenergy Lab |
| 12. | Slurry dewatering machine | Bioenergy Lab |
| 13. | Waste decomposer | Bioenergy Lab |
| 14. | Moisture Analyser | Bioenergy Lab |
| 15. | Pyranometer | Renewable Energy Lab |
| 16. | Sun Shine recorder | Renewable Energy Lab |

| | | |
|---|---|---|
| 17. | Solar PV simulator | Renewable Energy Lab |
| 18. | Tunnel Dryer | Renewable energy park |
| 19. | Solar convection dryer | Renewable energy park |
| 20. | Solar dessicant seed dryer | Renewable energy park |
| 21. | Cabinet dryer | Renewable energy park |
| 22. | Solar PV cold storage | Renewable energy park |
| 23. | Solar Hara | Renewable energy park |
| 24. | Briquttingmachie | Renewable energy park |
| 25. | Pelleting machine | Renewable energy park |
| 26. | Vermicompost separator | Renewable energy park |
| 27. | Shredder | Renewable energy park |
| 28. | Chopper | Renewable energy park |
| 29. | Mixer | Renewable energy park |
| 30. | Biogas plants | Renewable energy park |
| 31. | Solar powered Sprayer | Renewable energy park |
| 32. | Solar street lights | Renewable energy park |

**Theory and practical batches for PG Programmes**

- At PG level, the department of Renewable & Bio-Energy Engineeringoffers 4 core and 10 professional optional courses, of which 2 core and 2 professional optional courses have practical components. Onemaster seminar and 20 credit hours of research are compulsory to be completed for the M. Tech. degree.
- There are limited seats in M.Tech.programme with an average of 4-5 students. Some courses are offered as minor courses for students of other departments. There is only one batch for theory and practical classes in all the courses with an average of 4-10 students.

**6.4.5 Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlies any professional degree. But there are some skills that can only be learned through hands-on -practice. It is important that much of the learning material in any given course should be provided in a way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hands-on-training as per the curriculum and meeting above mentioned requirements.*

Sound grasp of the theory is important for a professional degree. Some of the skills are acquired through practical and hands-on training. Hence, it is important to provide learning material and opportunities that allows students to get involved in activities that increase their knowledge and skills. At PG level department offers 2 core and 2 professional optional courses along with 20 masters research credits have practical components.Besides imparting theoretical knowledge, students are provided practical skills and hands-on-training as per the curriculum requirements.

| **Course No.** | Credit Hours | Practical and Hands-on-training | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|---|
| **RBEE 501*** | 2+1 | • Study of a box type solar cooker, study of a solar distillation plant, | • Study of different solar energy harvesting techniques |

| | | | |
|---|---|---|---|
| | | • Study of direct and indirect solar dryer,<br>• Study of solar photovoltaic power generation and water Sprayering systems,<br>• Study of biomass briquetting/palleting machines,<br>• Study and testing of improved cookstoves,<br>• Study of a biomass gasifiers,<br>• Study of a KVIC and Deenbandhubiogas plants,<br>• Study and testing of biogas appliances,<br>• Study of techniques for utilization of biogas-spent slurry,<br>• Study of wind energy conversion systems and devices. | • Study of cookstoves<br>• Biogas plants<br>• Wind conversion technologies |
| **RBEE 502*** | 2+1 | • Characterization of Biomass: Proximate, biochemical and ultimate;<br>• Size reduction techniques: shredders, grinders, hammer mills;<br>• Bailing of biomass;<br>• Densification techniques: Pelletization, briquittting;<br>• Combustion of biomass: cookstoves;<br>• Biomass geyser; Pyrolysis: Biochar, bio-oil and syngas;<br>• Gasification: Study of gasifiers;<br>• Biofuel production: ethanol,<br>• Solvent extraction of hydrocarbons;<br>• Biogas: measuring instruments,<br>• Burners;<br>• I.C. engine performance;<br>• Composting techniques: pot, windrow, pit, vermicompost etc. | • Understanding biomass composition<br>• Processing of biomass<br>• Conversion technologies of biomass |
| **RBEE 505** | 2+1 | • Study of energy use pattern in various processing units i.e., rice mills, sugar mills, dal mills, oil mills, milk plants, food industries etc.<br>• Energy audit study and management strategies in food processing plants.<br>• Identification of energy efficient processing machines.<br>• Assessment of energy consumption, production and its cost in food processing plants,<br>• visit to related food processing industry. | • Auditing and identification of different energy inputs<br>• Management of energy usage<br>• Visit of food processing industry |
| **RBEE 508*** | 2+1 | • Studies on greenhouse cooling system,<br>• performance evaluation of fan-pad cooling system,<br>• studies on greenhouse irrigation system, | • Understanding greenhouse effect practically<br>• Applications of the greenhouse effect |

| | | | |
|---|---|---|---|
| | | • studies on greenhouse automation systems,<br>• one-week training/internships in greenhouse technology and management,<br>• studies on different root substrates and hydroponics cultivation,<br>• studies on greenhouse lighting system. | |

** Compulsory courses*

**6.4.6 Supervision of students in PG/Ph.D. programmes:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure number of qualified faculty in relation to the intake of students, as per the guidelines in the matter.*

**i) Supervision of students in M.Tech.programme offered by the department**

| Year | Numberofstudents on roll | Numberof PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | - | - | - |
| 2019-20 | - | - | - |
| 2020-21 | 5 | 3 | 1.66:1 |

## PATENTS/ DESIGN PATENT GRANTED/ APPLIED

### FMPE

1. An Integrated Paddy Thresher with Dryer, De-Husker and Polisher (Application No.: TEMP/E-1/31160/2019-DEL, Dated: 22-07-2019)
2. An Agricultural Machine for Harvesting Root Vegetables (Application No.: TEMP/E-1/39624/2019-DEL, Dated: 17-09-2019)
3. Tractor operated straw combine suitable for paddy and wheat crops (Application No.: TEMP/E-1/36311/2020-DEL, Dated: 30.07.2020)

### PFE

4. Pedal operated machine for pricking fruits and vegetables, Nitin Kumar, D K Sharma and M K Garg, Patent No 406360Grant Date: 29-7-2020
5. A Pricking Machine for Pricking Fruit. M K Garg, Dinesh Sharma, Patent No.342783 Grant Date: 12-9-2022
6. Patent for HAU Solar Assisted Sugarcane Juice Extraction Cart is registered in the name of Chaudhary Charan Singh Haryana Agricultural University Indian Design Application No. 109573 Dated: 16/02/2021

*Annexure- COAE&T-II*

| | | | • Winter School training on Application of Sensors, Instrumentation, artificial intelligence and machine learning in Precision Agriculture at ICAR-CIAE Bhopal. | National | 14.02.2020 to 05.03.2020 |
| | Dr. Ganesh Upadhyay | | • Golden Jubilee International Conference on New Millennia Agriculture - Novel Trends and Future Scenario held in CCS HAU, Hisar | International | 06.11.2019 to 08.11.2019 |
| | Dr. Mukesh Jain | | • Participated in "Refresher Course on Research Management" from held at DHRM, CCS HAU, Hisar. | National | 25.07.2019 to 14.08.2019 |
| **2020 -21** | Er. Naresh | | • "Web based International Training on Automation and Robotics in Agriculture" organized by PAU, Ludhiana through virtual platform (Zoom) during. | National | 22.07.2020 to 31.07.2020 |
| | | | • District level Kisan Seminar organized by Agriculture and Farmer's Welfare Department, Hisar | National | 04.09.2020 |
| | Er. Swapnil Choudhary | | • "Web based International Training on Automation and Robotics in Agriculture" organized by PAU, Ludhiana through virtual platform (Zoom) during. | National | 22.07.2020 to 31.07.2020 |
| | | | • XXXV Annual Workshop of AICRP on "Farm Implements and Machinery" organized by ICAR-CIAE, Bhopal through virtual platform (Zoom). | National | 23.02.2021 to 25.02.2021 |
| | Dr. Ganesh Upadhyay | | • "Web based International Training on Automation and Robotics in Agriculture" organized by PAU, Ludhiana | International | 22.07.2020 to 31.07.2020 |
| | | | • Induction Training Course conducted by AAREM, Directorate of Human Resource Management, CCS HAU, Hisar | National | 08.09.2020 to 08.10.2020 |
| | | | • XXXV Annual Workshop of AICRP on "Farm Implements and Machinery" at CCS HAU, Hisar | National | 23.02.2021 to 25.02.2021 |
| | Dr. Mukesh Jain | | • Attended "Training on Extension Management" held at DHRM, CCS HAU, Hisar. | National | 01.12.2020 to 21.12.2020 |
| **2021 -22** | Er. Anil Kumar | | • Attended online training course on "Effective Extension Methods for Upscaling and Outscaling of Wheat and Barley Production Technologies" organized by Extension Education Institute, Nilokheri, Karnal. | National | 01.09.2021 to 10.09.2021 |

| | | | | | |
|---|---|---|---|---|---|
| | Er. Naresh | | • XV Agricultural Science Congress & ASC Expo organized by NAAS and BHU at Institute of Agricultural Sciences, Banaras Hindu University, Varanasi. | International | 13.11.2021 to 16.11.2021 |
| | | | • Webinar on "Engineering Interventions for reducing human drudgery in Cotton Crop" organized under ICAR-NAHEP-IDP Project by the Department of FMPE, COAE&T, CCS HAU, Hisar. | National | 08/07/2021 |
| | Er. Swapnil Choudhary | | • Webinar on "Engineering Interventions for reducing human drudgery in Cotton Crop" organized under ICAR-NAHEP-IDP Project by the Department of FMPE, COAE&T, CCS HAU, Hisar. | National | 08/07/2021 |
| | | | • Participated in XXXVI Annual Workshop of AICRP on "Farm Implements and Machinery" organized by ICAR-CIAE, Bhopal through virtual platform (Zoom) | National | 22.02.2022 to 24.02.2022 |
| | Dr. Ganesh Upadhyay | | • Applications of Computer Aided Engineering in Agricultureorganized by Vasantrao Naik Marathwada Krishi Vidyapeeth, Parbhani | National | 07.06.2021 to 03.07.2021 |
| | | | • Data Science and Machine Learning Using Pythonorganized by Sher-e-Kashmir University of Agricultural Sciences & Technology, Kashmir in collaboration with NIELIT, Chandigarh | National | 27.09.2021 to 01.11.2021 |
| | | | • XV Agricultural Science Congress & ASC Expo organized by NAAS and BHU at Institute of Agricultural Sciences, BHU, Varanasi | International | 13.11.2021 to 16.11.2021 |
| | | | • Webinar on "Engineering Interventions for reducing human drudgery in Cotton Crop" organized under ICAR-IDP-NAHEP Project by the Department of FMPE, COAE&T, CCS HAU, Hisar | National | 08.07.2021 |
| | | | • XXXVI Annual Workshop of AICRP on "Farm Implements and Machinery" organized byICAR-CIAE, Bhopal through virtual platform (Zoom) | National | 22.02.2022 to 24.02.2022 |
| | Dr. Vijaya Rani | | • Attended online training course on "Effective Extension Methods for Upscaling and Outscaling of Wheat and Barley Production Technologies" organized by Extension Education Institute, Nilokheri, Karnal. | National | 01.09.2021 to 10.09.2021 |
| | | | • Attended ICAR Sponsored Winter School on "Farm Mechanization for Facilitating Conservation Agriculture & Climate Smart Technology" organized by ICAR - Central Institute of Agricultural | National | 04.01.2022 to 24.01.2022 |

| | | | | | |
|---|---|---|---|---|---|
| | | | Engineering, Nabibagh, Berasia Road, Bhopal. | | |
| **2022 -23** | Er. Naresh | | • 56th Annual Convention of Indian Society of Agricultural Engineers on Agricultural Engineering Innovation for Global Food Security and International Symposium on India @2047: Agricultural Engineering Perspective' organized by ISAE and Tamil Nadu Agricultural University, Coimbatore, Tamil Nadu. | International | 09.11.2022 to 11.11.2022 |
| | | | • International conference on 'Climate Resilient Agriculture for Food Security and Sustainability' | International | 17.02.2023 to 19.02.2023 |
| | | | • One day International Workshop on "Crop Residue Management through Biomass Conversion Technologies. | National | 02.03.2023 |
| | Er. Swapnil Choudhary | | • Training and Visit (T & V) workshop for month of June 2022 organized by SNIATTE, CCS HAU, Hisar | National | 08/06/2022 |
| | | | • International conference on 'Climate Resilient Agriculture for Food Security and Sustainability at CCS HAU, Hisar. | International | 17.02.2023 to 19.02.2023 |
| | | | • One day International Workshop on "Crop Residue Management through Biomass Conversion Technologies at COAE&T, CCS HAU, Hisar. | International | 02.03.2023 |
| | Dr. Ganesh Upadhyay | | • 56$^{th}$Annual convention of ISAE and International Symposium on "India @2047 Agricultural Engineering Perspective" at TNAU, Coimbatore | National | 09.11.2022 to 11.11.2022 |
| | | | • International conference on 'Climate Resilient Agriculture for Food Security and Sustainability' held in CCS HAU, Hisar | International | 17.02.2023 to 19.02.2023 |
| | | | • XXXVII Annual Workshop of AICRP on "Farm Implements and Machinery" at OUAT, Bhubaneswar | National | 19.01.2023 to 21.01.2023 |
| **DEPARTMENT OF BASIC ENGINEERING** | | | | | |
| 2017 -18 | Dr. Rajender Kumar | | • Annual Convention of Indian Society of Agricultural Engineers (ISAE) and National Symposium on "Doubling Farmers' Income through Technological Interventions", organized by AAU, Anand, Gujrat | International | Jan 08-10, 2018 |
| | Dr. Sandeep Bhardwaj | | • IndoRock 2017 ISRMTT, Delhi | National | 25$^{th}$-27$^{th}$ October 2017 |
| 2018 -19 | Dr. Rajender Kumar | | • 53$^{rd}$ Annual Convention of Indian Society of Agricultural Engineers (ISAE) and International Symposium on "Engineering Technologies for precision & climate smart agriculture" at Varanasi | International | Jan 28-30, 2019 |
| | Dr. Parvesh Antil | | • One week STC on modeling and simulation on MATLAB through ICT conducted by MechEnggDeptt., | | 21-25/5/2018 |

| | | | | | |
|---|---|---|---|---|---|
| | | | NIEC, New Delhi from 21/5/2018 to 25/5/2018 (one week) | | |
| 2019-20 | Dr. Rajender Kumar | | • 3rd National Conference on Medical Instrumentation,Biomaterials and Signal Processing (NCMBS-20) organized by DCRUST, Murthal | National | Feb 26-27, 2020 |
| | Dr. Sandeep Bhardwaj | | • AICTE Training And Learning (ATAL) AcademyIndian Institute of Space Science and Technology, Department of Space,Government of India. | National | 02.11.2020 to 06.11.2020 |
| | Dr. Parvesh Antil | | • Attended Induction Training Course conducted by Academy of Agricultural Research and Education Management, Directorate of Human Resource Management at CCS HAU Hisar. | | 1.06.19 to 01.07.19 |
| 2020-21 | Dr. Rajender Kumar | | • Conference organized by and at DCRUST, Murthal<br>• One week training course on Development of Laboratory Instruction organized by National Institute of Technical Teachers' Training & Research (NITTTR), Kolkata.<br>• One week training course on Implications & Realities of Industry 4.0 organized by SLIET, Longowal under TEQIPIII. | International | March 22-23, 2021<br>8-12 June, 2020<br>21-25 Dec, 2020 |
| | Dr Sandeep Bhardwaj | | • FDP on Innovations managementEducation Research at Delhi University.<br>• International webinar on recent advances in Geotechnical Engg. Research& practices.<br>• Online refresher course on Extension Management AAREM at CCSHAU, Hisar. | National<br>National<br>National | 17-30.08.2020<br>01-10.07.2020<br>11-31.12.2020 |
| | Dr Parvesh Antil | | • Refresher Course on Statistical Tools and Techniques for Analysis of Agricultural Data conducted by the Academy of Agricultural Research and Education Management, Directorate of Human Resource Management in Collaboration with Department of Mathematics & Statistics, CCS HAU, Hisar from 08-28 July, 2020 | National | 08-28 July, 2020 |
| | Dr. Sandeep Dhundhara | | • Conference on Integrated Interdisciplinary Innovations in Engineering (ICIIIE 2020) held at UIET, Panjab University, Chandigarh (Online Virtual Conference Platform)<br>• Induction Training Course at Academy of Agricultural Research | International | August 28-30, 2020<br>08 Sept., |

| | | | | | |
|---|---|---|---|---|---|
| | | | and Education Management, Directorate of Human Resource Management, CCSHAU, Hisar<br>• Delivered expert lecture on the topic "*Overview of MATLAB Software and its applications*" in three days webinar on "Introduction to Matlab and its applications" Organized under Institutional Development Plan (IDP) of National Agricultural Higher Education Project at CCS Haryana Agricultural University, Hisar | National<br><br>National | 2020 to 08 Oct., 2020<br><br>27-29 April, 2020 |
| 2021-22 | Dr.Rajender Kumar | | • International Conference on Contemporary Advances in Mechanical Engineering (ICCAME-2021), organized by the Department of mechanical Engineering, Chandigarh Engineering College, Landran Mohali, Punjab<br>• Online FDP on Optimization Techniques for Engineering Applications organized by NIT, Warangal | International | August 27-28, 2021<br><br>April 7-15th , 2021 |
| | Dr. Sandeep Bhardwaj | | • National Conference on Mathematical Sciences for Applied and Agricultural Sciences<br>• Refresher course on Educational Technology, HAU. Hisar | National | 22nd Feb., 2022.<br><br>21Sept-11.10.2021 |
| | Dr ParveshAntil | | • Paper presented in 55th Annual Convention of ISAE and International symposium on 'Emerging trends in Agricultural Engineering Education, Research and Extension' organized by ISAE and DRPCAU, Pusa, Samastipur, Bihar at Patna, Bihar | International | November 23-25, 2021 |
| | Dr. Sandeep Dhundhara | | • Delivered expert lecture on "*Role of batteries in Village Microgrids*" in INDO-UK International Partnership Development Workshop on Solar Sprayer-based villagemicrogrids-potential for tackling theenergy/water/food nexus in Punjab(January05 - 07, 2022) Organized by: University Institute of Engineering and Technology,Panjab University, Chandigarh andBirmingham City University (UK) | International | 06-01-2022 |
| 2022-23 | Dr. Amarjit Kalra, Dr.Rajender Kumar and Dr.Sandeep Bhardwaj | | • International Conference on climate Resilient Agriculture for food Security and Sustainability at CCSHAU, Hisar | International | Feb 17-19,2023 |
| | Dr. Sandeep Dhundhara | | • 3 months International Training on "*Agrirobotics& Automation Agriculture*" at the School of Computing, Engineering and Built | International | December 28, 2022 to March 27, 2023 |

| | | | | | |
|---|---|---|---|---|---|
| | | | Environment, Birmingham City University (BCU), Birmingham, UK from under NAHEP-IDP<br>• Organised three days' training on "Installation of Electrical appliances for Farming" under National Agricultural Higher Education Project (NAHEP)-Institutional Development Programme (IDP) at CCS Haryana Agricultural University, Hisar | National | 9-11 Jan 2023 |

## TRAINING/ IDP/ CERTIFICATE COURSES ORGANIZED/ CONDUCTED

| | ***SR. No*** | ***Training details (duration)*** | ***No. of participants*** |
|---|---|---|---|
| *FMPE* | 1. | Manufacturing better quality crop-residue management machinery (19.08.2019 to 23.08.2019) | 30 |
| | 2. | Robotics and Automation (17.07.2018 to 30.07.2018) | 30 |
| | 3. | Campus to Corporate (24.02.2020 to 29.02.2020) | 30 |
| | 4. | Campus to Corporate (02.03.2020 to 07.03.2020) | 30 |
| | 5. | Robotics and Automation (25.02.2020 to 01.03.2020) | 20 |
| | 6. | Robotics and Automation (02.03.2020 to 07.03.2020) | 20 |
| | 7. | UAV application of pesticides for crop protection (21/11/2022 to 23/11/2022). | 25 |
| | 8. | UAV application of pesticides for crop protection (28/11/2022 to 30/11/2022). | 25 |
| | 9. | Application of UAVs for crop health monitoring using hyperspectral/ multispectral imagery (05/12/2022 to 07/12/2022). | 25 |
| | 10. | Application of UAVs for crop health monitoring using hyperspectral/ multispectral imagery (12/12/2022 to 15/12/2022). | 25 |
| *SWE* | 1 | Design, Installation, Operation and Maintenance of Protected Agriculture Structures from 8/11/2021 to 18/02/2022 | 20 |
| *PFE* | 1 | 90 days certificate course on “Food Processing” in 2022 conducted that was funded by IDP from 25-6-2019 to 24-9-2019 | 25 |
| | 2 | 3 days Training on Valorisation of horticultural wastes in 2023 (Batch 1 from 01-02-2023 to 03-02-2023; Batch 2 from 06-02-2023 to 08-02-2023). | 25 |
| | 3 | 15 days Training Programme on AutoCAD for B.Tech. Students in collaboration with DSW from 16-10-1019 to 30-02-2019. | 20 |
| | 4 | 3 days Training on Value added products from cereals and millets in 2023 (Batch 1 from 10-02-2023 to 14-02-2023; Batch 2 from 16-02-2023 to 20-02-2023) | 25 |
| *RBEE* | 1 | Second generation Bio Ethanol Production, January 2-4, 2023 | 20 |
| | 2 | Biogas Production from Agro- Waste Residue, January 5-7, 2023 | 25 |
| | 3 | Second generation Bio Ethanol Production, January 16-18, 2023 | 22 |
| | 4 | Biogas Production from Agro- Waste Residue, January 19-21, 2023 | 25 |
| *BE* | 1 | Installation of Electrical appliances for Farming, 9-11 Jan 2023 | 25 |

***Annexure- FMPE I***

## RESEARCH PAPER

| Sr. No. | Title | Naas Rating |
|---|---|---|
| | **2018** | |
| 1. | Choudhary, S. (2018). Potential, availability and projections of animal farming in India. *Int J Avian & Wildlife Biol*, *3*(3), 219-220. | - |
| 2. | Kerketta, A. K., Mishra, B. P., Choudhary, S., & Mahilang, K. K. S. (2018). Development of Subsoiler Suitable for Chhattisgarh Plain. *Int. J. Pure App. Biosci*, *6*(1), 1478-1485. | 4.74 |
| 3. | Kumar, A., Naresh., Rani, V., & Jain, M. (2018). Performance evaluation of happy seeder after paddy harvested with combine harvester. *Haryana Agricultural University Journal of Research*; 48(1), 7-10. | - |

## ABSTRACT

1. Narayan Gatkal, Rani Vijaya, Naresh, Jain Mukesh and Kumar Vinod (2018). Performance and economic evaluation of modified rotary weeder for narrow spaced crops. Paper abstract published in the souvenir of *52nd Annual convention of ISAE and National Symposium on "Doubling Farmers' Through Technological Interventions*" held at Anand Agricultural University, Anand (Gujarat) during Jan 8-10, 2018.

2. Narayan Gatkal, Rani Vijaya, Naresh, Jain Mukesh and Kumar Vinod (2018). Design modifications and optimization of rotary weeder for narrow spaced crops. Paper abstract published in the souvenir of *52nd Annual convention of ISAE and National Symposium on*

*"Doubling Farmers' Through Technological Interventions*" held at Anand Agricultural University, Anand (Gujarat) during Jan 8-10, 2018.

3. Kumar Vinod, Rani Vijaya, Jain Mukesh and Naresh (2018). Design of "Anjul" seed metering mechanism for round seeds and its seed pattern characteristics. Paper abstract published in the souvenir of *52nd Annual convention of ISAE and National Symposium on "Doubling Farmers' Through Technological Interventions*" held at Anand Agricultural University, Anand (Gujarat) during Jan 8-10, 2018.

4. Kumar Vinod, Rani Vijaya, Jain Mukesh and Naresh (2018). Parameter optimization of "Anjul" seed metering mechanism for okra seeds. Paper abstract published in the souvenir of *52nd Annual convention of ISAE and National Symposium on "Doubling Farmers' Through Technological Interventions*" held at Anand Agricultural University, Anand (Gujarat) during Jan 8-10, 2018.

5. Avdhut omparkash Ingole, Kumar Anil, Rani Vijaya, Jain Mukesh, Kumar Naresh and Kumar Vinod (2018). Optimization of crop-combine parameters for harvesting of paddy varieties HKR-47 by head feed combine. Paper abstract published in the souvenir of *52nd Annual convention of ISAE) and National Symposium on "Doubling Farmers' Through Technological Interventions*" held at Anand Agricultural University, Anand (Gujarat) during Jan 8-10, 2018.

6. Naresh, Choudhary Swapnil and Patel Bharat (2019). Smart farming technologies and their use in agriculture: A Review. Paper abstract published in the International Symposium on "*Innopreneurship: A need of Sustainable Agriculture"* held at CCS HAU, Hisar, Haryana from 02-03 January 2019.

7. Choudhary Swapnil, Naresh and Patel Bharat (2019). Scope and Opportunity of Artificial Intelligence (AI) in Modern Agriculture. Paper abstract published in the *International Symposium on "Innopreneurship: A need of Sustainable Agriculture*" held at CCS HAU, Hisar, Haryana from 02-03/02/2019.

8. Jain Mukesh, Rani Vijaya, Kumar Anil, Choudhary Swapnil, Patel Bharat and Naresh (2019). Front line demonstration of paddy straw management technologies. Paper abstract published in *53rd Annual Convention of Indian Society of Agricultural Engineers*, BHU, Varansi (UP) Date: 28-30 Jan, 2019

9. Kumar Anil, Rani Vijaya, Jain Mukesh, Naresh, Choudhary Swapnil and Patel Bharat (2019). An overview of mechanical management of paddy straw in Haryana. Paper abstract published in *53rd Annual Convention of Indian Society of Agricultural Engineers*, BHU, Varansi (UP) Date: 28-30 Jan, 2019

10. P. Kumar, B. Patel, Gagandeep, V.R. Kamat, Naresh and V. Rani (2019). Study the effect of air induction nozzles on foliar application of urea solute. Paper abstract published in *53rd Annual Convention of Indian Society of Agricultural Engineers*, BHU, Varansi (UP) Date: 28-30 Jan, 2019.

11. Mukesh Jain, Vijaya Rani and Naresh. Feasibility trials on high clearance tractor sprayer; Paper abstract published in *53rd Annual Convention of Indian Society of Agricultural Engineers*, BHU, Varansi (UP) Date: 28-30 Jan, 2019.

12. Kumar Anil, Rani Vijaya, Jain Mukesh, Naresh, Choudhary Swapnil and Patel Bharat (2019). An overview of mechanical management of paddy straw in Haryana. Paper abstract published in the

"*53rd Annual Convention of Indian Society of Agricultural Engineers (ISAE) and International Symposium on Engineering Technologies for Precision and Climate Smart Agriculture*" held at Institute of Agricultural Sciences, BHU, Varanasi, UP from 28-30 January 2019.

13. Jain Mukesh, Rani Vijaya, Patel Bharat and ChoudharySwapnil (2019). Design and development of tractor operated leaf collector. Paper abstract published in the "*53rd Annual Convention of Indian Society of Agricultural Engineers (ISAE) and International Symposium on Engineering Technologies for Precision and Climate Smart Agriculture*" held at Institute of Agricultural Sciences, BHU, Varanasi, UP from 28-30 January 2019.

14. Pawan Kumar, Bharat Patel, Gagandeep, Vivek R Kamat, Naresh and Vijaya Rani (2019) Study the Effect of Air Induction Nozzles on Foliar Application of Urea Solute; *53rd Annual Convention of Indian Society of Agricultural Engineers,* BHU, Varansi (UP) Date: 28-30 Jan, 2019.

15. Gagandeep, Bharat Patel, Pawan Kumar, Mukesh Jain and SwapnilChoudhary (2019) Development of Pneumatic Trap-cum- Electric Swatter for Control of White Fly; *53rd Annual Convention of Indian Society of Agricultural Engineers,* BHU, Varansi (UP) Date: 28-30 Jan, 2019.

16. ChoudharySwapnil, Naresh and Patel Bharat (2019). Scope and Opportunity of Artificial Intelligence (AI) in Modern Agriculture. Paper abstract published in the *International Symposium on "Innopreneurship: A need of Sustainable Agriculture" held at CCS HAU, Hisar, Haryana* from 02-03/02/2019.

17. Choudhary, Swapnil; Patel, Bharat; and Naresh (2019). Robotics the future of farm mechanization. Paper abstract published in the Golden Jubilee *International Conference on New Millennia Agriculture- Novel Trends and Future Scenario* (GINMA-2019) at CCSHAU, Hisar during Nov 06-08, 2019.

18. Naresh, ChoudharySwapnil and Patel Bharat (2019). Smart farming technologies and their use in agriculture: A Review. Paper abstract published in the *International Symposium on "Innopreneurship: A need of Sustainable Agriculture*" held at CCS HAU, Hisar, Haryana from 02-03 February 2019.

19. Gagandeep, Patel Bharat, Aman and Charan Singh (2019) Economic feasibility of raised bed multi crop planter for wheat and fenugreep. Paper abstract published in the *International Symposium on "Innopreneurship: A need of Sustainable Agricultur*e" held at CCS HAU, Hisar, Haryana from 02-03/02/2019.

20. Anil Kumar, Vijaya Rani, Mukesh Jain and Bharat Patel (2019) Performance evaluation and economic feasibility of paddy straw baler in combine harvested fields; *International Symposium on Innopreneurship: A need of sustainable Agriculture* and Rao Bahadur Dr. Ram Dhan Singh Fifth Memorial Lecture, COA, CCSHAU, Hisar. Date: 2-3 Feb, 2019.

21. Upadhyay,G., & Raheman, H. (2019). Dynamometer units fitted with commercial load cell for measurement of draft force. *8th Asian-Australasian Conference on "Precision Agriculture"* at Punjab Agricultural University, Ludhiana, Punjab, India from 14$^{th}$ – 17$^{th}$ October, 2019.

22. Choudhary Swapnil, Naresh and Patel Bharat (2019). Scope and Opportunity of Artificial Intelligence (AI) in Modern Agriculture. Paper abstract published in the *International Symposium*

*on "Innopreneurship: A need of Sustainable Agriculture"* held at CCS HAU, Hisar, Haryana from 02-03 February 2019.

23. Jain Mukesh, Rani Vijaya and Choudhary Swapnil (2019). Front line demonstrations of tractor operated mulcher. Paper abstract published in the "*53rd Annual Convention of Indian Society of Agricultural Engineers (ISAE) and International Symposium on Engineering Technologies for Precision and Climate Smart Agriculture*" held at Institute of Agricultural Sciences, BHU, Varanasi, UP from 28-30 January 2019.

24. Jain Mukesh, Rani Vijaya and Choudhary Swapnil (2019). Feasibility trials on PTO driven disc harrow. Paper abstract published in the "*53rd Annual Convention of Indian Society of Agricultural Engineers (ISAE) and International Symposium on Engineering Technologies for Precision and Climate Smart Agriculture*" held at Institute of Agricultural Sciences, BHU, Varanasi, UP from 28-30 January 2019.

25. Vijaya Rani, Naresh, Vinod Kumar, Mukesh Jain and Anil Kumar. Adoption and profitability of remote sensing in India from farmers perspective. Paper abstract published in the *Golden Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario* (GINMA-2019) at CCSHAU, Hisar during Nov 06-08, 2019.

26. Choudhary, Swapnil; Patel, Bharat; and Naresh (2019). Robotics the future of farm mechanization. Paper abstract published in the *Golden Jubilee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario* (GINMA-2019) at CCSHAU, Hisar during Nov 06-08, 2019.

27. Kumar M, Choudhary S, Jain M amd Naresh (2020). Comparative evaluation of PTO driven disc harrow, offset disc harrow and rotary tiller. Paper abstract published in the *54th Annual Convention and International Symposium on "Artificial Intelligence Based Future Technologies in Agriculture"* organized by ISAE, New Delhi and MPKV, Rahuri at Pune, India during 7-8 January 2020.

28. Patel B, Choudhary S and Naresh (2020). Electrical method of weeding for organic farming: A review. Paper abstract published in the *54th Annual Convention and International Symposium on "Artificial Intelligence Based Future Technologies in Agriculture"* organized by ISAE, New Delhi and MPKV, Rahuri at Pune, India during 7-8 January 2020.

29. Upadhyay, G., Rani, V., Naresh, Choudhary, S., & Patel, B. (2020). Application of unmanned aerial vehicles (UAVs) in Precision Agriculture: A Review. *54th Annual Convention of ISAE and International Symposium on "Artificial Intelligence Based Future Technologies in Agriculture*" atPune, Maharashtra from 07$^{th}$-09$^{th}$ January, 2020.

30. Upadhyay, G., & Raheman, H. (2020). Soil compaction induced due to multiple passes of active tilling. *53rd Annual Convention of ISAE and International Symposium on "Engineering Technologies for Precision and Climate Smart Agriculture*" at Banaras Hindu University, Varanasi from 28$^{th}$ - 30$^{th}$ January, 2020.

31. Choudhary, S., Patel, B., Naresh., Upadhyay, G. and Rani, V. (2021). Comparative evaluation between seed drill equipped with pre- emergence herbicide application unit and conventional seed drill. Paper abstract published in the *55th Annual Convention of Indian Society of Agricultural*

*Engineers and International Symposium* organized by ISAE, RPCAU and BAMETI, Pusa, Samastipur, Bihar India during 23-25 November 2021.

32. Patel, B., Choudhary, S., Upadhyay, G., Naresh and Rani, V. (2021). An automatic cutoff system for a seed drill equipped with pre-emergence herbicide application unit. Paper abstract published in the *55th Annual Convention of Indian Society of Agricultural Engineers and International Symposium* organized by ISAE, RPCAU and BAMETI, Pusa, Samastipur, Bihar India during 23-25 November 2021.

33. Naresh., Choudhary, S., Upadhyay, G., Patel, B. and Rani, V. (2021). Feasibility testing of a pneumatic planter for sowing of maize and cotton crop in sandy loam soil. Paper abstract published in the *55th Annual Convention of Indian Society of Agricultural Engineers and International Symposium* organized by ISAE, RPCAU and BAMETI, Pusa, Samastipur, Bihar India during 23-25 November 2021.

34. Deepak, V Rani, B Patel and Naresh (2021). Development of multi-row biogas slurry applicator. Paper abstract published in the *55th Annual Convention of ISAE and International Symposium* organized by ISAE, RPCAU and BAMETI, Pusa, Samastipur, Bihar India during 23-25 November 2021.

35. Upadhyay, G., Choudhary, S., Naresh, Patel, B., and Rani, V. (2021). Performance evaluation of precision belt planter for planting of okra crop in flat and raised beds. *55th Annual convention of ISAE and International Symposium on "Emerging trends in Agricultural Engineering Education, Research and Extension"* at Patna, Bihar from 23rd - 25th November, 2021.

36. Naresh, Upadhyay, G., Choudhary, S., Patel, B., and Kumar, A. (2021). In-situ paddy straw management machinery for paddy-wheat crop rotation system. *XV Agricultural Science Congress & ASC Expo* organized by NAAS and BHU at Institute of Agricultural Sciences, Banaras Hindu University, Varanasi from 13th November 2021 to 16th November 2021.

37. Upadhyay, G. (2021). Novel microcontroller based draft force sensing units for measurement of drawbar power of agricultural implements. *XV Agricultural Science Congress & ASC Expo* organized by NAAS and BHU at Institute of Agricultural Sciences, Banaras Hindu University, Varanasi from 13$^{th}$ November 2021 to 16$^{th}$November 2021.

38. Upadhyay, G., Naresh, Choudhary, S., Patel, B. & Rani, V. (2022). Crop monitoring using multispectral aerial imagery acquired from unmanned aerial vehicle (UAV). *56th Annual convention of ISAE and International Symposium on "India @2047 Agricultural Engineering Perspective"* at Tamil Nadu Agricultural University, Coimbatore from November 09$^{th}$ -11$^{th}$ November, 2022.

39. Nisha, K., Upadhyay, G., Naresh., Patel, B., Choudhary, S. and Rani, V. (2022). An embedded microprocessor based hydraulic cone penetrometer for soil compaction measurement. *56th Annual convention of ISAE and International Symposium on "India @2047 Agricultural Engineering Perspective"* at Tamil Nadu Agricultural University, Coimbatore from November 09$^{th}$ -11$^{th}$ November, 2022.

40. Naresh., Upadhyay, G., Choudhary, S., Kumar, A., & Patel, B. (2022). Feasibility testing of a power tiller operated vertical conveyor reaper (VCR) for harvesting paddy and wheat crops. *56th Annual convention of ISAE and International Symposium on "India @2047 Agricultural*

*Engineering Perspective"* at Tamil Nadu Agricultural University, Coimbatore from November 09th -11th November, 2022.

41. Naresh., Upadhyay, G., Patel, B., Choudhary, S. & Rani V. (2022). Assessment of the PTO torque requirement of different active tillage implements. *56th Annual convention of ISAE and International Symposium on "India @2047 Agricultural Engineering Perspective"* at Tamil Nadu Agricultural University, Coimbatore from November 09th -11th November, 2022.

42. Patel, B., Upadhyay, G., Rani, V., Choudhary, S., & Naresh. (2022). Comparative study of UAV sprayer and knapsack sprayer for spray deposition on cotton crop. *56th Annual convention of ISAE and International Symposium on "India @2047 Agricultural Engineering Perspective"* at Tamil Nadu Agricultural University, Coimbatore from November 09th -11th November, 2022.

43. Choudhary, S., Rani, V., Naresh, Patel, B. &Upadhyay, G. (2022). Field evaluation of a tractor operated paper-tape vegetable transplanter. *56th Annual convention of ISAE and International Symposium on "India @2047 Agricultural Engineering Perspective"* at Tamil Nadu Agricultural University, Coimbatore from November 09th -11th November, 2022.

44. Choudhary, S., Patel, B., Upadhyay, G., Naresh, Kumar, A. & Rani, V. (2022). Evaluation of a shredder for management of cotton stalks and pink bollworm. *56th Annual convention of ISAE and International Symposium on "India @2047 Agricultural Engineering Perspective"* at Tamil Nadu Agricultural University, Coimbatore from November 09th -11th November, 2022.

45. Mittal, Vipul; Choudhary, Swapnil; and Rani, Vijaya (2022). Energetics and Techno-Economic feasibility testing of small tractor operated seed-cum-fertilizer drill. Paper abstract published in *National Conference on Mathematical Sciences for Applied and Agricultural Research* at CCS HAU, Hisar on Feb 22, 2022.

# FOREWORD

It is indeed a matter of gratification that we embark on the journey towards accreditation from the Indian Council of Agricultural Research (ICAR). The report of the College of Basic Sciences & Humanities represents a comprehensive assessment of our academic programs, research activities, infrastructure, and overall institutional development.

The College of Basic Sciences & Humanities is a glorious institution of academic excellence, research innovation, and community engagement. Our commitment towards providing quality education and producing skilled professionals in the fields of basic sciences and humanities has been unwavering. The College offers a wide range of undergraduate courses and postgraduate programmes that integrate sciences and humanities to provide a holistic education to our students. Our faculty members, renowned experts in their fields, are committed in delivering high-quality instructions, promoting research-driven learning, and fostering an environment conducive to critical thinking and innovation among students.

Research and innovation are integral to its mission as a leading institution in basic sciences and humanities. Through several research initiatives, all the faculty and students strive to generate knowledge, discover new technologies and contribute to the advancement of scientific understanding in our fields of expertise. They are actively engaged in pioneering research that addresses various pressing challenges in sustainable development of the society.

Accreditation from ICAR is a significant milestone for any institution. It signifies recognition of our academic and research endeavours, and our commitment to uphold the highest standards of education and research. We are determined to meet and exceed the benchmarks set by ICAR, continuously enhancing the quality of our programs, infrastructure, and support services.

I would like to extend my heartfelt appreciation to the self-study committee, faculty, staff, students, and all stakeholders who have contributed their time, expertise, and valuable insights in the preparation of this self-study report. I am confident that this self-study report will serve as a foundation for our ongoing efforts towards accreditation from ICAR.

**Prof. B. R. Kamboj**
Vice Chancellor
CCSHAU, Hisar

# PREFACE

It is my privilege as the Dean, College of Basic Sciences and Humanities, Chaudhary Charan Singh Haryana Agricultural University to submit this Self Study Report for validation & accreditation to Indian Council of Agricultural Research. The College of Basic Sciences and Humanities (COBS&H) was established in 1970 as one of the constituent colleges of CCS Haryana Agricultural University, Hisar. The College has a magnificent four storey building. The College offers M.Sc. and Ph.D. degree programmes in various disciplines. The admission to M.Sc. and Ph.D. programmes are through Common Entrance Test conducted by the University. The College also offers basic sciences and humanities courses to undergraduate and post graduate students of all constituent colleges of the University. It also offers two P.G. Diploma courses namely, "Communication skills in English" and "English-Hindi Translation".

The COBS&H has eleven departments namely Botany & Plant Physiology, Chemistry, Biochemistry, Food Scienc & Technology, Languages & Haryanavi Culture, Mathematics & Statistics, Physics, Microbiology, Molecular Biology, Biotechnology & Bioinformatics, Sociology and Zoology and one Computer Section.

The Faculty of the College is well qualified, competent and highly dedicated. Several faculty members have received ICAR sponsored Best Teacher Award and recognition from National/International Societies. The faculty has implemented several adhoc research projects from outside national & international agencies, and published quality research papers in high-impact factor journals. The College has filed 14 patent applications, one published and two have already been granted.

The COBS&H has the honour of having distinguished persons achieving Padamshree Award, positions of Vice-Chancellors of various Indian Universities and being the senior administrators in organizations like ICAR, CSIR, CCMB and ICRISAT.

The COBS&H has modern smart class rooms, CCTV cameras, air-conditioned committee room and an auditorium with modern audio-visual facilities having with seating capacity of about 315 persons. The college has 23 net houses, two transgenic green houses, one centre of bio-fertilizer production and technology, biogas plant and composting pits. The college has a computer centre for imparting computer literacy, providing internet and Wi-Fi services, technical support for marking attendance on AEBAS (Aadhar Enabled Biometric Attendance Systems), use of Anti Plagiairism Software - Turnitin to ensure the academic integrity of the research work, implementation of the IUMS (Integrated University Management System) modules for the digitization of the work and process, mangement and regular updation of university website, video-conferencing system.

The COBS&H has well equipped laboratories with various sophisticated instruments like Fourier transform infrared spectroscopy, Atomic absorption spectrometer, Gel documentation system, HPLC, Particle size analyzer, Flash chromatography system, Impedance analyzer, Chlorophyll meter, Gas sensor setup, Multichannel electrochemical workstation, Multimode spectrophotometer, Bioreactor, PCR machine, Automatics protein analyzer, etc.

The COBS&H has a Botanical Garden covering an area of 10.5 acres with rich plant biodiversity of about 600 plant species comprising of various ornamental foliage, seasonal flowering plants, bamboo species, ferns, cacti/succulent plants, medicinal/ aromatic plants, horticultural plants like chrysanthemums, roses, aquatic plants, climbers, shrubs, herbs and trees. The collection of planting material has been maintained for imparting knowledge to students, scientists and visitors.

The effective teaching, stringent examination and evaluation procedures have made the students to excel in their respective fields. The faculty of college strives tirelessly to upgrade skills & knowledge of students to make them responsible citizens of India. The students are provided holistic education with the commitment to serve the country. This SSR is a communication of sincere efforts to present the goals of the college.

A total of about 206 PG students have qualified NET/JRF (UGC, CSIR, ICAR) and other competitive exams in past five years. Several students have secured fellowships including INSPIRE, CSIR, ICMR, UGC etc. The alumni of the college have found placements in reputed Institutions such as ASRB, DRDO, CSIR, ICAR, SAUs, Govt. Colleges, public/private institutions/industries etc.

We look forward to a rewarding interaction with the ICAR Peer Review team during their forthcoming visit to our institution.

**Prof. Neeraj Kumar**
Dean, COBS&H
CCS HAU, Hisar

# SELF STUDY REPORT OF
# COLLEGE OF BASIC SCIENCES AND HUMANITIES

Established in 1964, as a part of the erstwhile PAU Ludhiana, the College of Basic Sciences and Humanities became one of the independent constituent Colleges of Haryana Agricultural University, Hisar in 1970. **Dr. S.R.Vyas** was the founder Dean of this College. Initially started with the trimester system of education, it was replaced by semester system in 1987-88. The College runs M.Sc. and Ph.D. programmes in different disciplines *i.e.*, Biochemistry, Bioinformatics, Botany, Chemistry, Environmental Sciences, Food Science and Technology, Mathematics, Microbiology, Molecular Biology and Biotechnology, Physics, Plant Physiology, Sociology, Statistics and Zoology. The Food Science and Technology discipline was started in 1996. In 2002, Centre of Food Science and Technology was established as a multidisciplinary centre of excellence in Food Science & Technology after taking some components from allied departments of University viz., Foods and Nutrition, Horticulture, Microbiology, Animal Products Technology and Agricultural Processing & Energy. Department of Biotechnology was created in 1997 with faculty merger from Genetics, Microbiology, Biochemistry and Plant Breeding departments promoting interdisciplinary research. Departments of Mathematics, Statistics and Physics, Botany and Plant Physiology have started M.Sc. courses in Physics and Environmental Science from 2017-18, respectively. A separate Physics department was created in 2018. Department of Physics has started Ph.D. programme from 2019. Department of Mathematics & Statistics has started Ph.D. programme in mathematics from 2019 and Department of Botany and Plant Physiology has started Ph.D. programme in Environmental Science from 2020.

The College imparts quality education to postgraduate students of Basic Sciences and Humanities. It also undertakes teaching of undergraduate and post graduate students from all constituent colleges of the University. The College is a symbol of performance, potential and progress. Its iconic status of 52 years makes it an unrivalled institute of research, teaching and extension.

The Collegehas a unique distinction and privilege to have faculty honoured with –

- Padam Shri (Dr. J.B. Chowdhury)
- Vice Chancellors of CCS Haryana Agricultural University, G.B. Pant University of Agriculture and Technology, Pant Nagar (Uttarakhand), OPJS University, Rajasthan
- Rafi Ahmed Kidwai, Hari Om Ashram Trust, ICAR team awards.
- Fellows of NAAS, IAS, NASI etc.
- The faculty has secured several prestigious International Fellowships (Rockefeller Foundation's PDF and BCF, DAAD, DUO, Indo-Japan Exchange, INSA-DFG, AHRD Fellowships (ICAR), DBT Overseas Associate fellowship), for post-doctoral, research and teaching.
- Faculty members (Dr. Urmil Verma, Dr. Rajvir Singh, Dr. S.C. Goyal, Dr. U.K. Varshney, Dr. Pushpa Kharb, Dr. S.S. Sindhu) have received ICAR sponsored "Best Teacher Award" of the University in the past.
- The faculty has been awarded several competitive research grants over the years from international agencies such as UNDP, PL480, Rockefeller Foundation, USA and National agencies like DBT, DST-GOI, SERB, ICAR, CSIR, DRDO, UGC, SPARC, RKVYand Private agencies.

- Several students were awarded Jawahar Lal Nehru best thesis award by ICAR. Several students were also bestowed with V.D. Kashyap Gold Medal and Silver Jubilee Gold Medal for best thesis.
- Several teachers are on Editorial Boards of high ranking journals, member Board of Studies in other Institutions.
- Our students are pursuing higher degrees in reputed National and International Institutes and have been selected as faculty in reputed Institutions such as DRDO, ICGEB, SAUs, Universities, Government Colleges, Public/ Private Institutions/Industries.

## VISION

- To impart basic education integrating teaching, research and extension in areas relevant to agriculture with academic excellence

## MISSION AND GOAL

- To produce quality human resource
- To conduct basic research in state/nation's priority areas related to agriculture
- To develop technologies to combat various constraints in agricultural production in the country
- To reduce the gap between existing and novel technical innovations, development of products and their speedy commercialization

## OBJECTIVES

- To impart knowledge in various disciplines of basic sciences to the students from constituent colleges of the university
- To strengthen and achieve excellence in teaching, research and to develop quality human resource in various disciplines of basic sciences
- To develop skills and values among students to make them competent not only for government services and industries but also as entrepreneurs
- To develop technologies that can contribute towards the upliftment of the Indian rural economy, employment generation and increased avenues of self employment
- To develop new technologies for sustainable agricultural production and to refine existing technologies. These are communicated to the stakeholders through class room teaching, seminars, exhibitions, expert lectures and through lab and field demonstrations
- To develop linkage with national and international universities, industries and to promote public-private partnership

**6.5.1. College Administration:** *Whether the Dean's post has been sanctioned by the appropriate authority as per ICAR Model Act/UGC guidelines? Date of selection of person, Dean mode of selection, tenure etc. shall be mentioned. Clearly mention the staff and infrastructure/facilities available in the Dean's Secretariat.*

Yes, the Dean's post is sanctioned by the appropriate authority as per ICAR Model Act. The Dean is appointed on a tenure basis for a period of four years through open selection on All India basis. **Dr. Neeraj Kumar** has been appointed Dean, College of Basic Sciences and Humanities on March 30, 2022.

### 6.5.1.1. College Dean's Office Establishment

| DEAN'S SECRETARIAT | | |
|---|---|---|
| **Dean's Name** | | **Dr. Neeraj Kumar** |
| | | **Staff available with Dean** |
| **Staff** | **Sanctioned posts** | **In position (filled)** |
| AAO/ Supdt. | 01 | 01 |
| Personal Secretary/ Personal Assistant | 01 | 01 |
| Office Assistants (Nos.) | 03 | 03 |
| Junior Scale Stenographer (Nos.) | 02 | 02 |
| Store Keeper (Nos.) | 01 | 00 |
| Clerks (Nos.) | 02 | 01 |
| SLA (Nos.) | 01 | 01 |
| Driver | 01 | 01 |
| Liftman | 01 | 01 |
| Daftri (Nos.) | 01 | 01 |
| Sweeper(Nos.) | 08 | 02 |
| Plant Observer (Nos.) | 01 | 01 |

### Infrastructure available in Dean's Secretariat

Different sections of the Dean's secretariat (establishment and accounts branch, academic branch, PS office, AAO/superintendent office, cashier desk, store, committee room, common room for girl students) are well furnished and have all the facilities required to carry out their work. There are 5 wash rooms, 1 for Dean, 2 females and 2 males. In addition, there is an auditorium with a seating capacity of about 315 persons. The details of the infrastructure in the secretariat are as under:

| **Dean's Office** | **:** | **Dean's Chamber, Sofa Set, Computer with Printer, Scanner, Table, Chairs, Cupboard, AC, Phone** |
|---|---|---|
| Establishment and Accounts Branch | : | Tables, Chairs, Almirahs, Cupboards, Computers |
| Academic Branch | : | Tables, Chairs, Almirah, Cupboards, Computers |
| PS Office | : | Chair, Table, Sofa, Computer, Almirahs, Cooler, Phone |
| AAO/Superintendent Office | : | Table, Chair, Phone, Cooler |
| Cashier Desk | : | Table, Chair, Cooler, Almirah, Rack |
| Store | : | Table, Chair, Almirah, Computer, Racks |
| Committee Room | : | 01 with seating capacity of 50 persons and equipped with LCD, Video Conferencing Facility |
| Waiting Lounge / Hall for Visitors | : | 01 with Sofas, Tables, Chairs, Drinking Water |
| Common Room for Girl Students | : | 01 with Sofas, Tables, Chairs |
| Washrooms/Toilets | : | 05 (1 for Dean, 2 Females and 2 Males) |
| Auditorium | : | 01, Established in 1976 with seating capacity of 315 persons, stage, interactive podium and LCD Facility |
| Lift and Ramp | : | Differently abled friendly |
| Computer Centre (College Level) | : | 01 (with 60 Computers and 8 Printers) |
| Departments | : | 11 + Computer Section<br>1. Biochemistry<br>2. Botany and Plant Physiology |

| | | |
|---|---|---|
| | | 3. Chemistry<br>4. Food Science and Technology<br>5. Languages and Haryanvi Culture<br>6. Mathematics and Statistics<br>7. Microbiology<br>8. Molecular Biology, Biotechnology and Bioinformatics<br>9. Physics<br>10. Sociology<br>11. Zoology |
| Examination Hall with Dean's Office (no.) | : | 01, Ground floor with seating capacity of 40, Blackboard and CCTV |
| Conference Hall | : | 01<br>Situated in Centre for Bio-fertilizer Production and Technology, Department of Microbiology with seating capacity of 40<br>Equipped with LCD projector with Screen |
| Smart Class Rooms (No.) | : | 01, Ground floor with seating capacity of more than 40, with LCD Projector and Interactive Board, Blackboard |
| Seminar/ Lecture Rooms (No.) | : | **15** (All Departments and Computer section) |
| Biochemistry | : | **01** (Room No. 436), Seating capacity- 40 with LCD Projector, Computer, CCTV, Blackboard and Screen, Interactive Board. |
| Botany and Plant Physiology | : | **01** (Room No. 326), Seating capacity- 40 with LCD Projector, Computer, CCTV Camera, Blackboard and Screen, Interactive Board |
| Chemistry | : | **01** (Room No. 141), Seating capacity- 30 with LCD Projector, Computer, CCTV, Blackboard and Screen, Interactive Board. |
| Food Science and Technology | : | **02** (Room No. 5, 101), Seating capacity- 30 with LCD Projector, Computer, Blackboard and Screen |
| Languages and Haryanvi Culture | : | **01** (Room No. 410), Seating capacity- 30 with LCD Projector, Computer, CCTV, Blackboard and Screen |
| Mathematics and Statistics | : | **01** (Room No. 14), Seating capacity- 40 with LCD Projector, Computer, CCTV, Blackboard and Screen, Interactive Board. |
| Microbiology | : | **01** (Room No. 220), Seating capacity- 40 with LCD Projector, Computer, CCTV, Blackboard and Screen, Interactive Board. |
| Molecular Biology, Biotechnology and Bioinformatics | : | **02**(Room No. 23, 24) **01**(Room No. 110 at College of Biotechnology), Seating capacity- 40 with LCD Projector, CCTV, Blackboard and Screen, Interactive Board. |
| Physics | : | **01** (Room No. 04), Seating capacity- 30 with LCD Projector, CCTV, Blackboard and Screen |
| Sociology | : | **01** (Room No. 203), Seating capacity- 40 with LCD Projector, Computer, CCTV, Blackboard and Screen |
| Zoology | : | **01**(Room No. 313), Seating capacity- 40 with LCD Projector, Computer, CCTV, Blackboard and Screen |
| Computer Section | : | **01**, Seating capacity- 40 with LCD Projector, Computer, CCTV, White Board and Screen, 86" Interactive Flat Panel with OPS |
| Exhibition Hall | : | 01 at ground floor with Display Boards and Tables |
| College Library | : | Central Library available and<br>Departments have separate Libraries |

**Facilities for differently abled persons: Ramp, Lift and Car Parking**

Central facilities include Directorate of Students Welfare, Library, Estate and Maintenance Office, Hospital and Hostel facilities.

**6.5.1.2 Monitoring Mechanism for Quality Education:***(Whether the College is having an internal quality assurance system, with appropriate structure and processes, and with enough flexibility to meet the diverse needs of the stakeholders which is required for planning, guiding and monitoring quality assurance and quality enhancement activities of the Colleges):*

Yes, the College has an Internal Quality Assurance Cell (IQAC). Since its revised constitution in 2021-22, after Covid pandemic meetings were held.

**Composition of Internal Quality Assurance Cell (IQAC)**

(a) Chairperson: Dr.Neeraj Kumar, Dean, COBS&H

(b) Senior teachers and administrative official:

1. Dr. Manju S. Tonk, Professor, Department of Mathematics and Statistics
2. Dr. Rachna Gulati, Officer Incharge, COFS
3. Dr. R.K. Gupta, Professorand Head, Department of Zoology
4. Dr. Vinod Kumari, Professorand Head, Department of Sociology
5. Dr. Rita Dahiya, Professorand Head, Department of Physics
6. Sh. Harpal Singh, Superintendent, COBS&H

(c) External Experts:

1. Dr. Lajpat Rai, Professor (Retd.), Mathematics and Statistics, COBS&H, CCS HAU, Hisar
2. Dr. A.S. Nandwal, Plant Physiologist (Retd.),COBS&H, CCS HAU, Hisar

(d) Director/Coordinator: Member Secretary

Dr. Leela Wati, Professor and Head, Department of Microbiology

The IQAC started working towards realizing the goals of quality enhancement and sustenance. The prime task of the IQAC is to develop a system for conscious, consistent and catalytic improvement in the performance of college. The IQAC is playing a significant role in maintaining and channelizing the efforts and measures of the college towards academic excellence.

**Functions of IQAC**

- Implementing and improving choice based credit system for curricula of the campus courses

- Monitoring the teaching-learning process
- Emphasizing on filling of vacant teaching and non teaching posts
- Encouraging organization of conferences/seminars/workshops *etc*. by departments
- Supporting and encouraging the research projects sponsored by the university and outside agencies
- Strengthening trainings and placement of students
- Facilitating alumni interactions at department level
- Suggesting new inter-disciplinary programmes in the departments
- Capacity building and trainings for faculty and staff competence
- Organizing trainings for skill development and entrepreneurship
- Ensuring extra guidance to students of SC/ST, OBC and weaker section
- Reviewing internal quality assurance at the end of the year
- Improving teaching based on feedback from the students, teachers and parents
- Quick redressal of common complaints and women empowerment
- A non-smoking and zero tolerance for ragging college

**Monitoring of Teaching**

- At the end of the Academic Year, teachers write their Self-Assessment Report in discussion with Head of Departments which is submitted to the Vice-Chancellor through Controlling Officers. In this report, they present the work done in the past year and future plan of the work. Self-Appraisal Report of individual teachers is evaluated by HOD, Dean/DR/DEE and VC. The comments of final accepting authority are communicated to the teacher for further improvement.
- Evaluation of teachers through feedback proforma from students.
- Programme of work, synopsis and thesis work of PG students is approved by Departmental faculty, Advisory Committee and finally approved by the Dean, PGS.
- The synopsis seminar brings suggestions which are included in final version. The internal evaluation by expert further improves it before submission to the Dean PGS for final approval.
- CCTV cameras have been installed in the lecture rooms/ Seminar rooms which can be monitored in Dean's office.
- Faculty members and students are encouraged to attend trainings, summer school etc. and financial assistance is provided.
- To monitor the students' progress, advisory committee meetings are convened regularly and advise the student regarding finalization of programme of work and research work.
- In case of non-teaching staff, confidential reports are written and approved by their Controlling Officers, these are also communicated for further improvement.
- Regular reports are sent to stake-holders in general and to agency from where grant is received specifically.
- The dignitaries or eminent scientists visiting CCSHAU interact with faculty members and students and sometimes they deliver talk on the field of specialization which is very near to our university priority areas. There is a provision of study leave, sabbatical leave for faculty.
- For retention of faculty members, they are given re-employment upto the age of 63 years. There is a well-defined process in the university. The proposals for re-employment either come through Head of the Departments or the interested faculty member can give direct

application to Registrar which is then forwarded to Chairman of the committee for re-employment.

### Monitoring of Research

- The University monitors the quality of research work of faculty members by conducting Research Project Committee (RPC) and Technical Programmes (TP) meetings. RPC discusses the Research schemes that need modifications in the title or objectives and proposals received from different departments are discussed in RPC meetings for further implementation.
- Technical Programme meetings are conducted under the chairmanship of Director of Research and in presence of Dean of concerned college to discuss research outcomes of different schemes and future plan of work.
- In Technical Programme, all HODs and faculty members from related field are invited to participate in the discussion. Faculty members present their work and future plan through power point presentations and if the committee feels the programme of work is modified as per the suggestions.
- Mid-term appraisal meetings are held to review the research work, bottle necks and future course of action.

The Project Review Committee (PRC) has been constituted in the College for submission of projects to external agencies for funding to review and approve the projects. It is mandatory for all scientists to get the projects enroute through PRC before submitting to Project Monitoring and Evaluation Committee of University. At college level, the following Project Review Committee has been constituted.

1. Dr. Neeraj Kumar, Dean COBS&H, Chairman
2. Dr. Sudhir Kumar, Dean COB, Member
3. Dr. Leela Wati, HOD, Microbiology, Member
4. Dr. Rita Dahiya, HOD, Physics, Member-Secretary
5. Dr. O. P. Sheoran, Professor, Mathematics and Statistics, Member

### Monitoring of Extension

To promote institution – neighbourhood – community network and student engagement, contributing to good citizenship, service orientation and holistic development of students and society. Different activities are undertaken at College level and University.

The Dean, COBS&H has constituted the following DHAKAD Committee for overall development of students in compliance to the office Endst. No. DSW/22/2946-49 dated 13-07-2022 regarding DHAKAD Programme implementation in CCS HAU initiated by Haryana State Narcotics Control Bureau, Government of Haryana.

1. Nodal/Senior Dhakad: Dr. R. K. Gupta, Professor and Head, Zoology, Dhakad: Lakshay, Nikita
2. Nodal/Senior Dhakad: Dr. Manoj Kumar, Assistant Professor, Mathematics and Statistics, Dhakad: Ajay
   Sharma, Surbhi
3. Nodal/Senior Dhakad: Dr. Rakesh Sehrawat, Assistant Professor, Microbiology, Mukesh Kumar, Pratiksha
4. Nodal/Senior Dhakad: Dr. Devender Singh, Assistant Professor, LHC, Dhakad: Prince Boora, Jyoti

5. Nodal/Senior Dhakad: Dr. Rahul Kumar, Assistant Professor, Chemistry, Dhakad: Sanchit, Pooja
6. Nodal/Senior Dhakad: Dr. Sushil Nagar, Assistant Professor, Biochemistry, Dhakad: Sunil, Kajal Kumari
7. Nodal/Senior Dhakad: Dr. Vinay Kumar, Assistant Professor, Physics, Dhakad: Sunil Kumar, Raman Devi
8. Nodal/Senior Dhakad: Dr. Subhash Chander, Assistant Professor, Sociology, Dhakad: Amit, Manisha
9. Nodal/Senior Dhakad: Dr. Anita, Assistant Professor, Botany and Plant physiology, Dhakad: Pankaj, Gayatri

To create awareness among students and employees of the College about the threats posed by alcohol, tobacco and other drug abuse, the following Drug Prevention Committee has been constituted:

1. Dr. R. K. Gupta, Professor and Head, Zoology, Coordinator
2. Dr. Rakesh Sehrawat, Assistant Professor, Microbiology, Member
3. Dr. Devender, Assistant Professor, LHC, Member
4. Dr. Vinay Kumar, Assistant Professor, Math & Stat, Member
5. Dr. Vinay Kumar, Assistant Professor, Physics, Member
6. Dr. Bas Kaur, Assistant Professor, Sociology, Member
7. Dr. Sarita, Assistant Scientist, Botany and Plant Physiology, Member
8. Dr. Vinod Sangwan, Assistant Scientist, Biochemistry, Member
9. Dr. Jayant Sindhu, Assistant Professor, Chemistry, Member

Anti-drug oath taking ceremony

**Programmes/Activities undertaken**

- Organized seminar on "Indian Constitution and Dr. B.R. Ambedkar" on the occasion of 127th Birth Anniversary of Dr.Ambedkar on 13.04.2018.
- Organized seminar on "Dr. Ambedkar's thoughts on Social and Economic Justice" on the occasion of 128th Birth Anniversary of Dr.Ambedkar on 12.04.2019.
- Organized seminar on Role of "Dr. B.R. Ambedkar on Land and Water Reform" on the occasion of Constitution Day on 26.11.2019.
- Organized seminar on "Dr. B.R. Ambedkar: Samajik Samrasta Ke Agradoot" on the occasion of 131st Birth Anniversary of Dr.Ambedkar on 13.04.2022.

- Government of India celebrated 'Azadi ka Amrut Mahotsava' in commemoration of 75 years of Independence. During this celebration the CCS Haryana Agricultural University Hisar, Haryana, India organized an online lecture series by renowned scientists in their respective fields. In this context, Keynote Speaker, Dr. Rajesh Jalota delivered a lecture in the webinar entitled 'Reducing Carbon Emissions- Simple Solutions to Complex Problems' on June 03, 2022 through Zoom Meeting.

- The College of Basic Sciences & Humanities celebrated the '**World Environment Day**' on 4th June, 2022 in which tree plantation was done in the college campus.
- आजादी के अमृत महोत्सव के तहत मौलिक विज्ञान एवं मानविकी महाविद्यालय के "हर घर तिरंगा" कार्यक्रम का आयोजन किया गया | प्रत्येक विभाग अध्यक्ष ने अपने -अपने विभाग में तिरंगा फहराया , जिसमें विभाग के सभी सदस्यों तथा विद्यार्थियों ने भाग लिया | इसके उपरांत महाविद्यालय के सामने प्रांगण में सभी ने मिलकर तिरंगा फहराया जिसमें कॉलेज के अधिष्ठाता महोदय डॉक्टर नीरज कुमार सभी विभागाध्यक्ष, प्राध्यापक वर्ग, कर्मचारी वर्ग तथा विद्यार्थियों ने बढ़ -चढ़कर भाग लिया | सभी ने देशभक्ति की भावना से ओत-प्रोतहोकर भारत माता की जय–जयकार की|

**आजादी के अमृत महोत्सव के तहत "हर घर तिरंगा" कार्यक्रम**

- Department of Sociology is involved in organization of various extension activities in adopted village "Shamsukh" under Unnat Bharat Abhiyan, Adarsh Gram Yojna and Swachh Bharat Abhiyan. Dr. Vinod Kumari, Convener; Dr.Jatesh Kathpalia, Dr. Rashmi Tyagi, Dr. Subhash Chander and Dr. Bas Kaur are members during the period under report. Following important activities were undertaken and expert lectures were delivered by the faculty.

## Progress Report of Adopted Village 'Shamsukh' for the Year 2018-19

| Sr.No. | Dated | Name of faculty | Awareness/Activities Campaigns |
|---|---|---|---|
| 1. | 28.04.2018 | Dr. Subhash Chander, Assistant Professor | MGNREGS and Rodent Control |
| | | Dr. Ravi Kant, Assistant Professor | |
| 2. | 26.05.2018 | Dr. Vinod Kumari, Professor and Head | Change in Food Habits during Summer Season |
| | | Dr. Virender Hooda | Stubble Burning |
| | | Dr. Ashok Kumar | Kisan Mela |
| 3. | 29.06.2018 | Dr. Vinod Kumari, Professor and Head | Health during Raining Season |
| | | Dr.JateshKakthpalia, Assistant Scientist | Importance of Cleanliness |
| 4. | 31.08.2018 | Dr. Rashmi Tyagi, Assistant Professor | Importance of Sports in Education |
| | | Dr.Shikha, Assistant Professor; | Waste Management |
| 5. | 29.09.2018 | Dr. Rashmi Tyagi, Assistant Professor | Benefits of Nuclear and Joint Families |
| | | Dr. Dharam Prakash Assistant Professor | Conservation of Soil Nutrients |
| 6. | 18.10.2018 | Dr. Vinod Kumar, Professor and Head | Sanitation and Cleanliness |
| | | Dr. Subhash Chander, Assistant Professor | Elementary Education System in Haryana |
| 7. | 16.11.2018 | Dr. Vinod Kumari, Professor and Head | Environment and Health |
| | | Dr. Jatesh Kathpalia, Assistant Scientist | Paddy Straw Management |
| | | Dr. Rashmi Tyagi, Assistant Professor | Environmental Conservation |
| | | Dr. Rekha, Assistant Professor | Preparing Seasonal Vegetable Pickle |
| 8. | 29.01.2019 | Dr. Vinod Kumari, Professor and Head | Importance of Nutrients |
| | | Dr. Rashmi Tyagi, Assistant Professor | Mahilaon Ki Samaj Mein Sakriya Bhoomika |
| | | Dr. Subhash Chander Assistant Professor | Importance of Education in Agricultural Field |
| | | Dr. Rekha, Assistant Professor | Preparation of Notorious Ladoos |
| 9. | 14.03.2019 | Dr. Jatesh Kathpalia, Assistant Scientist | Traditions of Haryana |
| | | Dr. Krishna Hooda, Professor and Head | Haryanvi Sanskriti |
| | | Dr. Manju S.Tonk, Professor and Head | Science and Our Culture |

## Progress Report of Adopted Village 'Shamsukh' for the Year 2019-20

| Sr.No. | Dated | Name of faculty | Awareness/Activities campaigns |
|---|---|---|---|
| **1.** | 28.05.2019 | Dr. Jatesh Kakthpalia, Assistant Scientist | Importance of Agricultural Technologies |
| | | Dr. Shikha Mehta, Assistant Professor | Biogas Plant and its Utility |

Lecture-cum-demonstration "How to conserve soil nutrients" in adopted Village, Nangthala on 28.02.2023

**Department of Microbiology**

- Biofertilizers are sold via PPP mode through MoU signed between Department of Microbiology, CCS HAU with Habitat Genome Primary Producers Company, village Ramayan, Hisar since July 2018

Centre of Biofertilizer Production and Technology

Various Types of Biofertilizers

- The faculty members of Microbiology attend weekly duties at ATIC helpline throughout the year to guide farmers regarding Biofertilizers, Composting and Biogas Technology.

- Microbial-based technologies such as Solid State Biogas Plant, Composting and Biofertilizers Production are demonstrated at Kisan Mela/ Krishi Mela, Kisan Diwas and other Mela organised by the university.

Prof. B. R. Kamboj, Vice-Chancellor, CCSHAU conversing about biofertilizer at demonstration stall during Kisan Mela 2022

Sh. Manohar Lal Khattar, Hon'ble Chief Minister, Haryana and other dignitaries gracing the occasion of Kisan Mela, 2023

Dignitaries gracing the occasion of Kisan Mela, 2023

- Demonstrations are conducted by the scientists of Microbiology Department for validation of the 'Decomposer Technology' through exhaustive multi-locational farmer's field trials in different districts.

Scientists demonstrating the farmers about Decomposer Technology at farmers' field

Application of microbial culture at farmers' field for paddy straw degradation

### Department of Molecular Biology, Biotechnology and Bioinformatics

- The department is engaged in large scale production of high quality planting material of different Crops Species, Horticultural, Medicinal and Ornamental Plants using Plant Tissue Culture Techniques.
- Plants raised through Tissue Culture Techniques are sold in the department and Kisan Mela's

Bandaru Dattatreya, Hon'ble Governor of Haryana conversing with Prof. B. R. Kamboj, Vice-Chancellor CCSHAU, Hisar at Plant Tissue Culture Centre on October 2, 2021

Prof B.R. Kamboj Vice-Chancllor , CCSHAU, Hisar conversing about plants raised through Tissue Culture at demostration stall during Kisan Mela 2022-23

## FOOD SCIENCE AND TECHNOLOGY

### Programmes/Activities undertaken

- Value added food products were sold seasonally through ATIC and HAU mart by the Centre under Experiential Learning Programme (EL-4), Self Finance (SF-56) and Plan Scheme (1140/C(a)Dte-R-1-Agri. (A) State) and also during Kisan Mela (*Rabi* and *Kharif*), Kisan Diwas, Flower Shows, Geeta Jayanti Mahotsav, Exhibitions, etc.

| Zoology | 40 | 5.11-6.21 | 49 | 4.20-12.06 |

Details are provided in individual programme.

One hundred thirty six (136) students were placed in Government and Private organizations under report**(All Departments Annexure V).**

**Student Participation in Conferences/ Seminars/ Symposiums/ Workshops**

Forty seven (47) M.Sc. students **(All Departments Annexure III)** and three hundred eight (309) Ph.D. students **(All Departments Annexure III)** attended and presented their work in Conferences/ Seminars/ Symposiums/ Workshops as under-

| Programme | 2018 | 2019 | 2020 | 2021 | 2022 | 2023 | Total* |
|---|---|---|---|---|---|---|---|
| M.Sc. | 07 | 09 | - | 03 | 19 | 09 | 47 |
| Ph.D. | 28 | 64 | 13 | 49 | 93 | 62 | 309 |
| Total | 35 | 73 | 13 | 52 | 112 | 71 | 356 |

***Total number includes the students who attended multiple events**

**6.5.1.3 CC/Board of Studies:** *Whether the CC in the Department level and Board of Studies at the College is in place? The composition of the BoS and date of conduct of meetings for last five years and major recommendations made by the BoS should be given in tabular form.*

Yes, College of Basic Sciences and Humanities has Board of studies (BOS) at college level and Departmental Advisory Committee (DAC) at department level**.**These are constituted with the approval of the Competent Authority.

**Composition of BOS**

**Chairperson:** Dean, COBS&H

**Members:**

1. HOD, Biochemistry
2. HOD, Botany and Plant Physiology
3. HOD, Chemistry
4. HOD, Languages and Haryanvi Culture
5. HOD, Mathematics and Statistics (Member Secretary)
6. HOD, Microbiology
7. HOD, Molecular Biology, Biotechnology and Bioinformatics
8. HOD, Physics
9. HOD, Sociology
10. HOD, Zoology and Aquaculture
11. Incharge, Computer Section
12. HOD, CFST

**Role of Board of Studies**

- The college has a Board of Studies which is responsible for proposing new courses, curricula modification, number of seats for admission and procedures *etc*. for the various programs offered by the college.
- The Boards of Studies prescribes syllabi so as to ensure integrated and well-balanced courses of study.

- The Board of Studies also overviews the standards of teaching and research regularly.

**Date of Conduct of Meetings for Last Five Years and Major Recommendations made by the BOS/ HODs Meeting are given below:**

| | | |
|---|---|---|
| **2018-19** | | |
| 1. | 27.06.2018 | Starting PG programme in Mathematics |
| | | Deciding about the course MBB-533 |
| | | New PG Courses in Sociology |

| | | |
|---|---|---|
| **2019-20** | | |
| 1. | 15.07.2019 | To start M.Sc./Ph.D. programme in the discipline of Mathematics,Physics and Botany. |
| 2. | 20.12.2019 | No. of seats of different programmes |
| | | Change of qualification if any (Minimum qualifications for admission of fresh as well as in service candidates) |
| | | Industrial visits included in the syllabus of following courses: MICRO-505 (Microbial Biotechnology), MICRO-508 (Environmental Microbiology), MICRO-510 (Industrial Microbiology), MICRO-601 (Advances in Fermentation). |
| | | |
| **2020-21** | | |
| 1. | 19.03.2020 | Starting Ph.D. programme in the discipline of Environmental Science in Department of Botany and Plant Physiology |
| | | Introduction of a new deficiency course SOC 403 |
| | | Change in Credit hours and Shifting of SOC 511 in 1st semester instead of 2nd semester. |
| **2021-22** | | |
| | | ---------- |
| **2022-23** | | |
| 1. | 14-03-2022 | No. of Seats of different programmes. |
| | | Change of qualification if any (Minimum qualifications for admission of fresh as well as in service candidates. |
| | | a) Proposal for Gold Medal in department of Mathematics and Statistics, COBS&H for M.Sc. topper in the name of Dr. Deepak Grover, Ex-HOD, Mathematics and Statistics<br>b) M.A. (English) 5 seats and Ph.D. (English) 2 seats in the department of Language and Haryanvi Culture |
| 2. | 27.04.2022 | Restructuring masters' and doctoral course curricula and syllabi of BSMA. |
| | | Change of qualification if any (Minimum qualifications for admission of fresh as well as in service candidates). |
| | | M.A. English (5 seats) and Ph.D. English (2 seats) in the Department of Languages and Haryanvi Culture. |
| | | Change in rules for thesis submission for M.Sc. and Ph.D. |
| | | a) Maximum number of credit hours registered per semester may be increased to 24<br>b) Synopsis submission period limit may also be extended till third semester for M.Sc. and 4th Semester for Ph.D.<br>c) Each HOD to ensure regarding offering compulsory courses preferably during first semester<br>d) The time table and examination schedule of courses where multidisciplinary students get registered may be planned at Dean level |

| | | |
|---|---|---|
| | | e) Industrial visit be included in masters' / doctoral programme of Microbiology (Micro 503, Micro 506, Micro 507, Micro 509, Micro, 510 Micro 601, Micro 604 & ENS 603 & ENS 504) |
| 3. | 08.08.2022 | "Har Ghar Tiranga"Programme. |
| **2023** | | |
| 1. | 16.01.2023 | Nomination of Secretary, BOS |
| | | Finalization of Course Curriculum of BSMA |
| | | a) The proposal of modification/addition of service courses of computer science offered by the Computer Section to different departments.<br>b) Requirement of funds for exhibition Hall of the College.<br>c) Strengthening of teaching and research in the COBS&H. |
| 2. | 14.02.2023 | No. of seats of different programmes |
| | | Change of qualification if any (Minimum qualifications for admission of fresh as well as in service candidates) |
| | | a) Nomenclature of degree<br>b) Nomenclature of Department of Zoology & Aquaculture" as "Department of Zoology". |

**Composition of Departmental Advisory Committee (DAC)**

**Chairperson:** HOD

**Members:**

1. Professor (Member)
2. Ex. HODs (Member)
3. Associate Professor/Scientist (Member)
4. Assistant Professor/Scientist (Member - Secretary)

**Role of DAC**

- The Departmental Advisory Committee is responsible for management of teaching, research and extension within each department of the college.

**6.5.1.4.: Anti-Ragging Cell:** *In pursuance to the Judgment of the Hon'ble Supreme Court of India dated 08.05.2009 in Civil Appeal No. 887/2009, the University Grants Commission has framed "UGC Regulations on curbing the menace of ragging in higher educational institutions, 2009" which have been notified on 4th July, 2009 in the Gazette of India. Does the College follow this regulation and subsequent guidelines issued in the matter in letter and spirit? Give details.*

Yes, the college has Anti-ragging committee which follows regulation and subsequent guidelines issued in the matter. This Anti-ragging committee is constituted by the Dean.

**Anti-ragging Committee**

**A. Composition of the Committee:**

**Teachers**

Dr. Aparna, HOD, LHC
Dr. Baljeet Singh Saharan, Senior Scientist, Microbiology
Dr. Dharmbir Singh, Assistant Professor, COFS
Dr. Manoj Kumar, Assistant Professor, Department of Maths and Statistics
Dr. Vinod Goyal, Assistant Professor, Department of Botany and Plant Physiology

Dr. Sarita Devi, Assistant Professor, Department of Botany and Plant Physiology
Dr. Ajay Pal, Assistant Professor, Department of Biochemistry
Dr. Devender Singh, Assistant Professor, LHC
Dr. Jayant Sindhu, Assistant Professor, Department of Chemistry
Dr. Bas Kaur, Assistant Professor, Department of Sociology

**PG Students**

Ms. Phagun Mehta D/o Professor, S.K. Mehta, Department of Mathematics and Statistics
Mr. Ajay Shama, S/o Sh. Netra Prasad Sharma, Department of Mathematics and Statistics
Mr. Sunil Kumar, S/o Sh. Rohtash Kumar, Department of Physics
Ms. Mansi D/o Dr. Ram Niwas, Department of Chemistry

**Non-Teaching Staff**

Sh. Jai Singh, Personal Assistant, Dean, COBS&H
Sh. Rajesh Kumar, Assistant, Dean, COBS&H
Ms. Pooja Rani, JSS, COBSH

**Parents**

Dr. R. P. Sihag, 1845, Sector-14, Hisar, Haryana – 9416307523
Sh. Ramgopal Verma, H. No. 748 Near Old Jindal Park, Mill Gate, Hisar, Haryana – 8607802440
Sh. Gulshan Kamra, H. No. 45, Gali No. 3, Jawahar Nagar, Hisar, Haryana – 9996795444

**B. Activities**

1. The committee monitors the events involving ragging, enquire into and report to the Dean, COBSH and work out modalities of functioning, frequency of visits, meetings *etc.* The committee check the ragging menace during the college hours in and around the college premises and also make surprise raids on hostels and other places vulnerable to incidents of ragging.
2. Anti-ragging Committee is functional and Ragging is banned in the University. The University has adopted the UGC Regulations on Curbing the Menace of Ragging in Higher Educational Institutions, 009 as well as the directions of the Hon'ble Apex Court. The Haryana Prohibition of Ragging in Educational Institution Ordinance/Rule 2012 has also been adopted by the University *w.e.f.* 27.9.2012. Rules on Curbing the Menace of Ragging 2012 are at Chapter-IX of this Prospectus.
3. The application form for admission, enrolment or registration contains an undertaking by the students and parents, mandatorily in English and in Hindi and/or in one of the regional languages known to the parents/guardians of the applicant, as provided in the English language in Proforma II to these Rules, to be filled up and signed by the parents/guardians of the applicant to the effect that he/she has read and understood the provisions of these Rules as well as the provisions of any other law for the time being in force, and is aware of the prohibitions of ragging and the punishments prescribed, both under penal laws as well as under these Rules and also affirm to the effect that his/her ward has not been expelled and or debarred by any institution and further aver that his/her ward would not indulge, actively or passively, in the act or abet the act of ragging and if found guilty of ragging and/or abetting ragging, his/her ward is liable to be proceeded against under these Rules or under any penal law or any other law for the time being in force and such action would include but is not limited to debarment or expulsion of his/her ward.

4. The Dean/Principal shall punish the student found guilty of ragging after following the prescribed procedure.
5. The Anti-Ragging Committee of the University shall take an appropriate decision, in regard to punishment or otherwise, depending on the facts of each incident of ragging and nature and gravity of the incident of ragging established in the recommendations of the Anti-Ragging Squad.
6. The Anti-Ragging Committee may, depending on the nature and gravity of the guilt established by the Anti-Ragging Squad, recommend, to those found guilty, one or more of the following punishments, namely;
   - i) Suspension from attending classes and academic privileges.
   - ii) Withholding/withdrawing scholarship/ fellow-ship and other benefits.
   - iii) Debarring from appearing in any test/examination or other evaluation process.
   - iv) Withholding results.
   - v) Debarring from representing the institution in any regional, national or international meet, tournament, youth festival *etc*.
   - vi) Suspension/expulsion from the hostel.
   - vii) Cancellation of admission.
   - viii) Rustication from the institution for period upto three years.
   - ix) Expulsion from the institution and consequent debarring from admission to any other institution for a period of three years.
   - x) Forfeiting campus placement opportunity or recommendations
   - xi) Imposition of fine upto Rs. 25000/-

**No instance of ragging has been reported during the last five years from the college.**

**6.5.1.5. Biological Waste Disposal Facility:** *Whether wastes (chemical, biological, radioactive, universal, and recyclable) are generated by a variety of research, clinical, service, maintenance, and cleaning operations at the College level? If yes, then mention the disposal mechanism being adopted as per the government guidelines.*

Yes, the waste generated by various research and cleaning operations is collected and disposed off at sites meant for disposal at University level. The chemical, biological and recyclable wastes are generated through research, *service*, maintenance, and cleaning operations. The University has constituted Institutional Biosafety Committee for reviewing research on genetically modified crops:

1. Dr. Jeet Ram Sharma, Director of Research, Chairman
2. Dr. Shikha Yashveer, Assistant Professor, Member-Secretary
3. Dr. Priti Malik, Lady Medical Officer, Biosafety officer
4. Dr. Sushila Maan, Professor, Outside Expert
5. Dr. Namita Singh, Professor, GJUS&T, DBT Nominee
6. Dr. Neeraj Kumar, Dean, COBS&H, Internal Member
7. Dr. Neeraj Kumar, Professor and Head, MBB, Internal Member
8. Dr. Surender Pahuja, Professor and Head, Genetics & Plant Breeding, Internal Member
9. Dr. Leela Wati, Professor and Head, Internal Member
10. Dr. Hawa Singh Saharan, Professor and Head, Internal Member
11. Dr. Sangeeta Sindhu, Professor and Head, Internal Member
12. Dr. Sanjay Kumar Thakral, Professor and Head, Internal Member
13. Dr. Rachna Gulati, Officer Incharge, COFS, Internal Member

The College has also constituted Chemical and Biosafety Committee (CCBC) for reviewing projects and research activities that involve possible biological, chemical, and physical hazardous at the laboratories. The CCBC also monitor the fire safety arrangements and waste management practices including storage and disposal of chemicals, biological and other materials. The committee conduct training programs to educate students and faculty about laboratory safety issues to avoid any unwanted event. The overall motto of CCBC is to ensure the safety of students, faculty and staff, mitigate environmental pollution and eventually improve the research standard.

The Dean, COBS&H has also constituted the committee to assess the ways of disposing waste in various departments of the College**.** Committee comprised of following members:

1. Dr. Neeraj Kumar, Dean COBS&H, Chairman
2. Dr. Rahul Kumar, Assistant Professor, Chemistry, Member-Secretary
3. Dr. Ajay Pal, Assistant Professor, Biochemistry, Member
4. Dr. Ravikant, Assistant Professor, Zoology, Member
5. Dr. Jayant Sindhu, Assistant Professor, Chemistry, Member
6. Dr. Vinod Goyal, Assistant Scientist, Botany & Plant Physiology, Member
7. Dr. Anuj Rana, Assistant Scientist, Microbiology, Member
8. Dr. Vinay Kumar, Assistant Professor, Physics, Member

College of Basic Sciences and Humanities, CCS HAU Hisar conducted a training on "Chemical and Biosafety Practices in the Laboratory" for the newly admitted M.Sc. and Ph.D. students of the College from 10-20 October, 2022. This training involved lectures on Laboratory Safety Practices pertaining chemical, biological, fire, electric hazardous among the others. Hands-on Training was also provided to the students from various departments namely Microbiology, Chemistry, Biotechnology, Plant Physiology and Zoology department. The training was organized under the supervision of "Chemical and Biosafety Committee" of the College.

Faculty members from Biotechnology, Chemistry, Microbiology, Physics, Botany and Plant Physiology and Zoology delivered lectures and hands on training on safety aspects in the laboratory considering subject specific safety issues. The participating students were made aware about roles and responsibilities of researcher and students conducting experiments and handling hazardous materials, bioagents, chemicals. Further, safety aspects related to the instrumental operation to ensure risk free work in the laboratory were also provided. This training benefitted the students by education them about appropriate precautions and safe guards for good lab safety practices.

Training on Laboratory Safety Techniques

**6.5.1.6. Institutional Ethics Committee for Experiment on Animals:** *Whether the Institute/College is following CPCSEA guidelines and constituted an Institutional Animal Ethics Committee (IAEC), get their animals house facilities inspected and get their project cleared by CPCSEA and IAEC before commencing them? If Yes, the college should make statement that it is adhering all guidelines in the matter.*

Yes, the University has constituted Institutional Ethical Committee for reviewing the all research project and research proposals related to animals in the university:

1. Dr. Naresh Jindal, Director of Research, LUVAS
2. Dr. Jeet Ram Sharma, Director of Research, CCS HAU, Hisar
3. Dr. Manju Mehta, Dean COHS, CCS HAU, Hisar
4. Dr. Neeraj Kumar, Dean COBS&H, CCS HAU, Hisar
5. Chief Medical Officer, Civil Hospital, Hisar
6. Dr. Preeti Malik, Senior Medical Officer, University Hospital, CCS HAU, Hisar
7. Professor and Head, Department of Sociology, CCS HAU, Hisar
8. Dr. Pooja Kataria, MD, Department of Community Medicines, MAMC Agroha
9. Mrs. Saroj Bala, Legal Expert, H.No. 2360, Sector 9 & 11, Hisar
10. Dr. A.S. Nandwal, Professor, (Retired), Member from the Community
11. Associate Director (BS/HS), Directorate of Research, CCS HAU, Hisar
12. Additional Director of Research, CCS HAU, Hisar

The College has also constituted Ethics Committee which follows regulation and animals are maintained in a proper and healthy manner and are not subjected to unnecessary pain or suffering before, during and after performance of experiments on them.

1. Dr. Neeraj Kumar, Dean COBS&H, Chairman
2. Dr. R. K. Gupta, HOD, Zoology, Member
3. Dr. Leela Wati, HOD, Microbiology, Member
4. Dr. Sushila Singh, Assistant Professor, Chemistry, Member
5. Dr. Ajay Pal, Assistant Professor, Biochemistry, Member
6. Dr. Anita, Assistant Scientist, Botany and Plant Physiology, Member

**6.5.1.7. Committee for Prevention of Sexual Harassment of Women at Work Places:** *Does the institution is adhering the sexual harassment of women at workplace (Prevention, Prohibition and Redressal Act, 2013) in letter and spirit:*

The Vice-Chancellor has constituted the following Internal Complaints Committee for considering the cases of sexual harassment of women for Campus at CCS HAU, Hisar till further orders:

1. Dr. Manju Singh Tonk, Professor, Department of Mathematics and Statistics
2. Smt. Kailash Rani, SSS, O/o CAU
3. Dr. S. K. Sharma, Assistant Scientist, Senior Welfare Officer, CCS HAU
4. Sh. Kapil Arora, Incharge legal Cell
5. Smt. Sudesh Devi W/o Sh. Jagat Singh, Mahils Welfare Society, H. No. 1618, Sector-13, Hisar (NGO)

The Dean, COBS&H has also constituted a committee for prevention of sexual harassment.

1. Dr. Neeraj Kumar, Dean, COBS&H, Chairman
2. Dr. Manju S. Tonk, Professor and Head, Mathematics and Statistics, Member
3. Dr. Krishna Hooda, Professor, LHC, Member
4. Dr. Jayanti Tokas, Associate Professor, Biochemistry, Member
5. Dr. Hemant Poonia, Assistant Professor, Mathematics and Statistics, Member
6. Dr. Subhash Chander, Assistant Professor, Sociology, Member
7. Dr. Sachin Kumari, Assistant Professor, Chemistry, Member
8. Ms. Monika, Junior Scale Stenographer, Dean, COBS&H, Member

### 6.5.2 FACULTY

**6.5.2.1. Faculty Strength:** *Mention the Faculty position (both in sanctioned and in-position) at the College.*

There are 08 sanctioned posts of Professors/equivalent, 19 Associate Professors/equivalent and 100 Assistant Professor/equivalent in the college. Currently total faculty strength (in position) of the college is 67 including 02 Professor/equivalent, 05 Associate Professor/equivalent and 61 Assistant Professor/equivalent. Faculty of Basic Science and Humanities is also posted in College of Agriculture CCS HAU main campus, Bawal and Kaul. The faculty is involved in teaching, research and extension activities and also guides students.

Some posts of Assistant Professors/equivalent have been advertised and are expected to be filled very soon.

| Designation | Sanctioned | In position* | Vacant posts | As per fifth Deans' Committee |
|---|---|---|---|---|
| Professor and equivalent | 08 | 02 | 06 | There is no UG programme in the college |
| Associate Professor and equivalent | 19 | 5 | 14 | |
| Assistant Professor and equivalent | 100 | 61 | 39 | |
| **Total** | **127** | **67** | **60** | |

***Includes personal promotes**

**6.5.2.3. Credentials of the Faculty:** *Whether the institution has employed competent faculty members qualified to accomplish the mission and goals of the institution? Give the highest qualification received by each faculty, related work experiences in the field, professional licensure and certifications, honors and awards, continuous documented excellence in teaching, or other*

*demonstrated competencies and achievements that contribute to effective teaching and student learning outcomes.*

The faculty of the college is highly qualified with international exposure in teaching as well research. The faculty members have won national, international awards, honours and recognitions, such as Commonwealth Fellowship, National Biotechnology Associate ship, Rafi Ahmed Memorial award, Hari Om Ashram Trust Award, DRDO Young Scientist Award, Henry Doubleday Research Fellowship, DAAD fellowship, Humboldt A. V. Fellowship, Rock feller Fellowship, EC Fellowship, DBT overseas Fellowship, Japanese Government Fellowship etc.

- The faculty acts as expert paper setter and external examiner for several Universities in UG, PG and Ph.D. programmes.
- The faculty members are using their expertise in their research work, guiding of students as well as in teaching.
- Several faculty members have brought patents to the university while several patent applications are in pipeline.
- Technologies have been developed and a few of these have been commercialized.
- The faculty has brought laurels to the university by bagging prestigious national and international awards like Rafi Ahmed Kidwai Award, Hari Om Ashram Award, Monsanto Beachell Award etc.
- They are using power point presentation, internet and interactive teaching by speaking and written assignments.
- The faculty has published several manuals, e- books/ articles related to research and teaching in their respective disciplines.
- Several faculty members are on selection boards of other universities such as KUK, ARS, MDU, CDLU, PAU etc.
- Faculty attends refresher courses, seminars, symposia etc on regular basis.
- Faculty is also handling DST sponsored FIST and PURSE schemes.

**Credentials of the Faculty are given in the following Table:**

| S. No. | Name, Designation Highest Qualification | Honors/Awards /Any other achievement* |
|---|---|---|
| **1.** | Dr. Leela Wati, Professor and Head, Ph.D. | • Developed protocol for conversion of paddy straw into ethanol<br>• Popularization of solid state biogas technology |
| **2.** | Dr. Rajesh Gera, Ph.D., Additional Director of Research, Director Store & Purchase | • PI- RKVY RAFTAR (ABIC) |
| **3.** | Dr. Baljeet Singh Saharan, Sr. Scientist, Ph.D.; Post Doc. (Germany & USA) | • Member of National Committee Nominated by Director General (ICAR) to Re-validate the results of SPNF model vide letter no. F.No. NRM/7-3/2019-AFC Dated 15.05.2019.<br>• Louis Pasteur National Academic Excellence Award 2021<br>• Award certificate of excellence in reviewing by Asian Research Journal of Agriculture in recognition of outstanding contribution to the quality of journal, Regent Street, London, UK (Certificate No: SDI/HQ/PR/Cert/90870/DRB). |

| | | |
|---|---|---|
| | | • Best article award for article entitled "Natural Farming: Advantages of Mixed Cropping During Vegetable Farming" which got published in Volume 04 – Issue 09 in Agriculture & Food: e-Newsletter<br>• Member of BOM (Chancellors' nominee), CSK HPKV, Palampur, 2019-21<br>• Member of BOM (Chancellors' Nominee), Veer Narmad South Gujarat University, Surat<br>• Member of BOM (Chancellors' nominee), Gujarat University, Ahmadabad 2022-24<br>• Nominated member (Governors' nominee) of Board of Management of CSKHPKV, Palampur, HP (2019-21)<br>• Member PG Board of Studies Kurukshetra University, Kurukshetra<br>• Member, NCERT Committee for development of syllabi for schools<br>• Member ICAR committee for development of syllabus for PG courses in natural farming<br>• Member Committee for development of UG and PG syllabus for degree in natural farming by government of Gujarat |
| **4.** | Rakesh Kumar, Assistant Professor, Ph.D. | • Young Scientist Award by Society for Scientific Development in Agriculture & Technology |
| **5.** | Kamla Malik, Ph.D. | • Received "Letter of Appreciation" for remarkably work and devotion to duty from Former Vice Chancellor, CCS HAU, Hisar 2020.<br>• Received Best oral presentation award during International Conference "Water, Agriculture, Dairy and Food Processing for Sustainable Economy (WADFPSE2022) held at Eternal; University, Baru Sahib, Sirmour, Himachal Pradesh on March 25- 26, 2022.<br>• Nominated and completed International training programme under NAHEP-IDP project (2021-22) for three months (15 November, 2021 to 14 February, 2022) training in Texas A & M University, College Station, Texas, USA |
| **6.** | Dr. Seema Sangwan, Assistant Professor, Ph. D. | • Granted patent: (1) Dhamija, S.S. and Sangwan, S. (2018) A renewable resource drives starchy raw material to ferment fast in to ethanol. Patent No. 303453.International fellowship for training on International Pedagogy under NAHEP-Institutional Development Plan (IDP) project for Capacity Building of Faculty of CCS HAU, Hisar.;<br>• Received Research Grant (2022) of Rs 30 lakh for R&D project entitled "Development of liquid fertilizer from agro-industrial waste for mitigating climate change and environmental pollution" has been approved by Haryana State Council for Science Innovation and Technology, Science and Technology Department, Panchkula, Haryana. |
| **7.** | Jagdish Parshad, Assistant Scientist, M.Sc. | • Young Scientist Award for outstanding contribution and recognition in the field of Science, Bioscience, Agriculture & Medical Science on World Biosciences Congress 2022<br>• Best poster award in the National Conference on Maize for Resource Sustainability, Industrial Growth and Farmers Prosperity held during February 23-25, 2022 at Maharana Pratap University of Agriculture and Technology, Udaipur, Rajasthan, India.<br>• Appreciation letter received for best centre award of AICRP Weed Management |
| **8.** | Dr. Anuj Rana, Ph.D., PDF | • Best oral presentation award in International Conference organized by Association of Microbiologist of India, held at Central University of Haryana Mahendargarh, Nov 15-18 (2019). |

| | | |
|---|---|---|
| | | • Appreciated for coordinating USAID funded CAAI-VT project (2020-21) and organizing International workshops on Capacity development for agricultural innovation systems in collaborations with CAAI-Afghanistan, Virginia Tech-USA for holding an Indo-US-Afghanistan training modules by Director of Research, CCSHAU, Hisar.<br>• Appreciated for coordinating GRAIN (Grain Research & Innovation) Program in collaboration with Michigan State University, USA and guidance to international students by Dean PGS, CCSHAU, Hisar.<br>• Nominated as Coordinator International Affairs Cell by Vice Chancellor CCSHAU, Hisar.<br>• One United States patent published (US2023/0026437 A1 dated Jan 26, 2023. |
| **9.** | Shikha Mehta, Assistant Scientist, Ph.D. | • Silver Jubilee Gold Medal for Women for best Ph.D thesis, CCS HAU, Hisar<br>• Received Gold Medal for securing first class and first position in M.Sc. (Microbiology), MDU, Rohtak<br>• Best poster Award in Golden Jubilee International Conference on New Millennia Agriculture Novel Trends & Future Scenario, CCS HAU, Hisar from November 6-8, 2019. |
| **10.** | Ram Niwas, Assistant Professor, Ph.D. | • Letter of appreciation of copyright on " Online Analysis tools for computation of LC50, LD50 or GR50 (Probit Analysis) given by Vice - Chancellor |
| **11.** | Shikha Ahalawat, Assistant Professor, Ph.D. | • Teacher of the Year Award – 2020; received in 4th International Conference on "Global Approaches in Natural Resource Management for Climate Smart Agriculture (GNRSA- 2020) during Pandemic Era of COVID-19" held at Conference Hall, Shobhit Deemed University, Modipuram, Meerut, UP, from 26 – 28 February 2021. |
| **12.** | Dr. Devender Singh, Assistant Professor, Ph.D. | • Conferred with Dr. Sarvepalli Radha krishnan Global Educator Award-2022 |
| **13.** | Dr. Rita Dahiya, Professor, Ph.D. | • ICAR Sponsored Best Teacher Award for the year 2011-12 , DAAD fellowship for research work in Germany in 2008 & 2002 and INSA-DFG fellowship for research in Germany in 2004, and International training in the area of 'Carbon sequestration and climate change' at Colorado State University, Fort Collins, USA during 2009-2010 sponsored by NAIP, ICAR, New Delhi |
| **14.** | Dr. Vinay Kumar, Assistant Professor, Ph.D. | • Awarded Project entitled "Study the impact of Swift heavy ion irradiation on Molybdenum disulfide ($MoS_2$) for Application as Gas Sensor" (2022) funding agency IUAC, New Delhi. INDIA |
| **15.** | Dr. K.D. Sharma, Professor, Ph.D., Dean, PGS | • Acted as Director of RDS Seed Farm, CCS HAU- Hisar |
| **16.** | Dr. Neeraj Kumar, Professor, Ph.D., Dean, COBS&H | • Acted as Additional Director of Research, CCS HAU- Hisar<br>• Professor and Heads, Department of Biochemistry, Chemistry, Botany and Plant Physiology and Molecular Biology and Biotechnology |
| **17.** | Dr. Renu Munjal, Professor, Ph.D. | • Awarded a SPARC project entitled "Combining rust resistance with non-structural carbohydrates (NSC) in wheat to achieve food security." in 2019-20<br>• Visited Copenhagen University, Denmark for ASEM-DUO-Indian Professor fellowship sponsored by Government of South Korea from 7$^{th}$ November to 6$^{th}$ December, 2021. |

| | | |
|---|---|---|
| | | • Collaborated in development of various varieties of wheat WH 1270, WH1184, WH 1142, WH 1124, WH 1105, WHD 948, WHD 943, WH 1025 and WH 1021<br>• Professor and Head of the Department from December 2017 to November 2021<br>• Received DUO professor award in 2020 |
| **18.** | Dr. Sridevi T., Professor, Ph.D. | • Coordinator of KVK Panchkula, CCS HAU Hisar |
| **19.** | Dr. Anita Kumari, Assistant Scientist, Ph.D. | • Awarded project entitled "Leveraging genetic resources for accelerated genetic improvement of Linseed using comprehensive genomics and phenol typing approaches" as a part of network project funded by DBT, New Delhi in 2020.<br>• Collaborated in development of mustard varieties RH 725 and RH 761 |
| **20.** | Dr. Sarita Devi, Assistant Scientist, Ph. D., PDF | • Award for International training under NAHEP – Institutional Development Plan Project (IDP) for the year 2019 sponsored by Indian Council of Agricultural Research and World Bank at Victoria Research Station, Australia from 19th April to 18th July, 2019.<br>• Awarded best poster presentation award in Golden Jubilee International Conference on New Millennia Agriculture Novel Trends and Future Scenario organized by CCS Haryana Agricultural University, Hisar, India from November 6-8, 2019<br>• Collaborated in development of sorghum variety CSV 44F |
| **21.** | Dr. Vinod Goyal, Assistant Scientist, Ph.D. | • Awarded a SPARC project entitled "Combining rust resistance with non-structural carbohydrates (NSC) in wheat to achieve food security." in 2019-20<br>• Visited Wuzberg, Germany for ASEM-DUO-Indian Professor fellowship (1 month) sponsored by Government of South Korea from 19th August to 8th September, 2022.<br>• Collaborated in development of various varieties of mustard RH 1424 and RH 1706 |
| **22.** | Dr. L.K. Chugh, Professor (Retired) | • Bajra Section, awarded Best ICAR-AICRP Centre Award (2021-22) for significant contribution in the field of Pearl Millet Improvement in the 57th Annual Group Meeting of All India Coordinated Research Project on Pearl Millet held online from March 02-03, 2022 |
| **23.** | Dr. Jayanti Tokas, Associate Professor, Ph.D. | • Best Oral presentation award in 6th International conference on Current Issues in Agricultural, Biological and Applied Sciences for sustainable development from June 11-13, 2022 organized by Kalimpong Science Centre, Kalimpong, West Bengal.<br>• Outstanding Scientist Award in the International Best Scientist Awards, held on 18th& 19thJan, 2020, New Delhi, India, Organized by VDGOOD Professional Association |
| **24.** | Dr. Ajay Pal, Assistant Professor, Ph.D. | • Conferred with 'Best Researcher Award' in International Scientist Awards 2019 on Engineering, Science and Medicine by VDGOOD-Technology Factory on 16 November, 2019. |
| **25.** | Dr. Nisha Kumari, Assistant Professor, Ph.D. | • Young Scientist Award" in International Conference on "Recent Advances in Agricultural, Environmental & Applied Sciences for Global Development" was held on September 27-29, 2019 at Dr. Yashwant Singh Parmar University of Horticulture and Forestry, Nauni, Solan, Himachal Pradesh |

| | | |
|---|---|---|
| **26.** | Dr. Shiwani Mandhania, Assistant Scientist, Ph.D. | • Filed a patent (Application No.: 201811004928) on "A method for removal of gossypol from cotton seed" during 2018 |
| **27.** | Dr. Vinod Kumar, Assistant Scientist, Ph.D. | • Filed a patent application on "Bottle gourd (Lagenaria siceraria) tablet preparation incorporated with biocellulose from *Gluconacetobacter liquefaciens* and a method thereof" Application No.: 202211056545, filed on 01.10.2022, Inventors: Anju Kumari, Anil Panghal, Ritu, Rakesh Kumar, Bharti Dixit, Rakesh Gehlot, D S Duhan, Vinod Kumar<br>• Best Oral Presentation Award in National Conference "Himalayan Cereals for Food and Nutritional Security: Currents Status and Opportunities" held at Department of Biochemistry, GBPUA&T, Pantnagar on September 06, 2022 |
| **28.** | Dr. Sushil Nagar, Assistant Scientist, Ph.D. | • Research Excellence Award 2021, awarded by Institute of Scholars (InSc)<br>• Filed a patent application on "Method for xylan extraction from corncob and wheat bran", Application No.: 202211056375, filed on 30.09.2022, Inventors: Sushil Nagar, Kajal Kumari, Vinod Kumar |
| **29.** | Dr. Neeraj Kharor, Assistant Scientist, Ph.D. | • Forage Section, CCSHAU Hisar AICRP on Sorghum, Hisar Centre received Best Center Award for the overall performance during the period 2021-2022 on 29.04.<br>• Bajra Section, awarded Best ICAR-AICRP Centre Award (2021-22) for significant contribution in the field of Pearl Millet Improvement in the 57$^{th}$ Annual Group Meeting of All India Coordinated Research Project on Pearl Millet held online from March 02-03, 2022 |
| **30.** | Dr. Sushila Singh, Assistant Professor, Ph.D. | • BEST ARTICLE AWARD (article id 31456), published in Volume 02, Issue 09 in Agriculture & Food: e-Newsletter, ISSN: 2581 -8317.<br>• BEST ARTICLE AWARD (article id31166), published in Volume 02, Issue 08 in Agriculture & Food: e-Newsletter, ISSN: 2581 -8317. |
| **31.** | Dr. Anushree, Assistant Scientist, Ph.D. | • MOST IMPACTFUL ARTICLE, In Vigyan Varta: An International E-Magazine for Science Enthusiasts for the month of August, 2022, vol-3, page no. 141-144, E-ISSN: 2582-9467. |
| **32.** | Dr. Vinod Kumari, Professor, Ph.D. | • Awarded by Om Sterling Global University in appreciation of education, training, research and development services provided for the benefits of society |
| **33.** | Dr. Jatesh Kathpalia, Assistant Scientist, Ph.D. | • Dr. A.P.J. Abdul Kalam Scientist Award, 2020 by The Society of Tropical Agriculture, New Delhi<br>• Best Paper Presenter Award in International Conference by BPSMV, Sonipat<br>• Scientist of the year for outstanding contribution in the field of rural sociology and women empowerment |
| **34.** | Dr. Rashmi Tyagi, Assistant Professor, Ph.D. | • Dr. A.P.J. Abdul Kalam Scientist Award, 2020 by The Society of Tropical Agriculture, New Delhi<br>• Best Paper Presenter Award in International Conference by BPSMV, Sonipat<br>• Distinguished Scientist for outstanding contribution in the field of rural sociology and women empowerment |
| **35.** | Dr. Subhash Chander, Assistant Professor, Ph.D. | • Dr. A.P.J. Abdul Kalam Scientist Award, 2019 by The Society of Tropical Agriculture, New Delhi |
| **36.** | Dr. Upendra Kumar, | • Visiting Scientist, Stockbridge School of Agriculture, University of |

| | | |
|---|---|---|
| | Assistant Professor, Ph.D., PDF | Massachusetts, Amherst, USA<br>• Elected Fellow of "The Linnaean Society of London" in 2021<br>• Certificate of Appreciation from Vice-Chancellor, CCS HAU, Hisar for the award of SPARC projects with the University of Massachusetts, Amherst, USA.<br>• Received Certificate of Recognition from The Science and Engineering Research Board (SERB) and the American Chemical Society (ACS) acknowledge and appreciate for reviewing the posters of SERB-ACS National Postdoctoral Fellowship (NPDF) Research Poster Competition 2021, under the category of Life Sciences.<br>• Best paper presentation award in 12th International Wheat Genetic Symposium (12thIWGS) September 8-14, 2013, Pacifico Yokohama, JAPAN.<br>• Received Young Scientist Award (2015) given by Uttarakhand Council for Science & Technology, Govt. of Uttarakhand<br>• Received a merit certificate for best presentation award at Golden Jubilee International Conference on "New Millennia Agriculture-Novel Trends and Future Scenario" organised by the Directorate of Research, CCS HAU, Hisar from November 6-8,2019.<br>• Member Faculty of CCS HAU, Institutional Innovation Cell, Ministry of Human Resource Development, Govt. of India |
| **37.** | Dr. Nita Lakra, Assistant Scientist, Ph.D. | • UGC-Dr. D.S. Kothari Post Doctoral Fellow , 2015<br>• Invitation to visit UMASS, Amherst, MA, USA (July 2016): Under a Bilateral Agreement between the University of Massachusetts Amherst and the Jawaharlal Nehru University, New Delhi for research collaboration.<br>• Special acknowledgment: A text book of Biotechnology editor H.K. Das (Wiley) 5th edition correction and editing of chapter 15 (Plant biotechnology). ISBN: 78-81-265-1014-6.<br>• Awarded SERB-SURE project grant, 2023 |
| **38.** | Dr. Neeru Singh Redhu, Assistant Professor, Ph.D. | • Received "Certificate of Appreciation" for outstanding contribution for organizing National Symposium on Transgenic Crops in India: Progress and Challenges, March 16-17, 2016.<br>• Received "Certificate of Honour" for outstanding contribution for organizing National Conference on Trends in Nanobiotechnology, November 29-30, 2016.<br>• Received "Letter of Appreciation" for remarkably work and devotion to duty from Dean College of Basic Sciences and Humanities, CCS HAU, Hisar 2017.<br>• Received Best oral presentation award during International Conference "Reimaging Rainfed Agro-ecosystems - challenges & Opportunities (ICRA-2022) held at ICAR-CRIDA, Hyderabad on December 22- 24, 2022. |
| **39.** | Dr. Rakesh Gehlot Professor and Head, CFST with additional charge of the Head, Department of Horticulture | • Filed two patents |
| **40.** | Dr. Rekha, Assistant Professor, Ph.D. | • Best oral presentation award in the online national seminar on "Mathematical Sciences: Repositories of Logical Thoughts and Analytical Tools" organised by the Department of Mathematics & Statistics, |

| | | |
|---|---|---|
| | | CCSHAU, Hisar on December 22, 2020. |
| **41.** | Dr. Anju Kumari, Assistant Professor, Ph.D. | • International training on "Food processing" from the Department of Chemical & Materials Engineering, Faculty of Engineering, The University of Auckland, New Zealand under NHAEP- institutional development plan project (IDP) from April 01 to June 29, 2019<br>• Received distinction in Post Graduate Diploma in Education Technology & Management from NAARM and University of Hyderabad, India in 2020.<br>• Filed three patents |
| **42.** | Dr. O.P. Sheoran, Professor and Head, Ph.D. | • Received V.D. Kashyap Gold Medal for best thesis work for the year 2010-11.<br>• Worked as Co-Principal Investigator in ICAR Ad hoc Project entitled "To obtain optimum plans for Partial Diallel Crosses and to prepare package for important mating designs".<br>• Software package named "Statistical Package for Mating Designs (SPMD)" has been Patented/copyrighted by National Research and Development Council (NRDC), New Delhi.<br>• Development of Online Statistical Analysis tools (OPSTAT) to cater the agricultural scientific community for their statistical analysis work. This tool has been used by more than 26 lakhs times across 143 countries since 7.2.2022 to 14.5.2023 as reported by google analytics.<br>• Automation of university functioning for the offices of Comptroller (GUC, Budget, AUC, CPF/GPF); Registrar (Human resource database, Entrance Examination), XEN-elect. (Electricity bills, telephone bills).<br>• Worked as Nodal officer (College of Basic Sciences in prestigious IDP project of the University)<br>• Worked as Incharge Computer Section of the University<br>• Granted Copyright on "Principal Component Analysis - Online Statistical Analysis Tool" (Registration Number SW-13417/2020).<br>• Granted copyright on Development of Online Analysis Tool for Computation of LC50, LD50 or GR50 (Probit analysis) Registration Number SW-13437/2020).<br>• Granted Copyright on "Online tool For Analysis of Series of Experiments in Randomized Block Designs" (Registration Number SW-13436/2020).<br>• Granted Copyright on Development of online analysis tool for analysis of augmented designs from Copyright Office, Govt. of India (Registration Number SW-14301/2021).<br>• Granted Copyright on Development of online analysis for k-means cluster analysis from Copyright Office, Govt. of India (Registration Number SW-14121/2021).<br>• Granted Copyright on Development of online of Latin Square Design and Strip Plot Design (Registration Number SW-14302/2021).<br>• Granted Copyright on Development of Web based Application for Post-Hoc Test for Comparisons of Means (Registration Number SW-14220/2021).<br>• Received a letter of appreciation by Honorable Vice-Chancellor, CCS HAU for brining 3 copyrights in the name of CCS HAU Hisar (Registration Number SW-13417/2020, SW-13437/2020 and SW-13436/2020)<br>• Working as Head of the department from Aug 23, 2022 |
| **43.** | Dr. Manju Singh Tonk Professor, Ph.D., SPIO, COBS&H | • Granted Copyright on "Online tool For Analysis of Series of Experiments in Randomized Block Designs" (Registration Number SW-13436/2020).<br>• Granted Copyright on "Principal Component Analysis - Online Statistical Analysis Tool" (Registration Number SW-13417/2020). |

| | | |
|---|---|---|
| | | • Granted copyright on Development of Online Analysis Tool for Computation of LC50, LD50 or GR50 (Probit analysis) (Registration Number SW-13437/20<br>• Worked as Incharge IPR Cell and BPD unit from August, 2017 to November, 2019<br>• Worked as Incharge IQAC of COBS&H<br>• Certificate of Honor presented by HAUTA in recognition of the Manuals authored in the field of Mathematics.<br>• Received a letter of appreciation by Honorable Vice-Chancellor, CCS HAU for securing copyrights in the name of Chaudhary Charan Singh Agricultural University, Hisar. |
| **44.** | Dr. Hemant Poonia, Assistant Professor, Ph.D. | • Got an appreciation letter by Honorable Vice-Chancellor, CCS HAU on Teacher's Day (05-09-16) for delivering effective and interactive teaching.<br>• Best Paper Certificate awarded by International Academy of Science, Engineering and Technology (IASET) Society in 2016.<br>• Got a certificate of Best Oral Presentation for his research work entitled "Optimization of farm land resources of marginal and small farmers using linear programming model" in the national seminar on "Mathematical Sciences: Repositories of Logical Thoughts and Analytical Tools" held on December 22, 2020 organized by the Department of Mathematics and Statistics, CCS HAU, Hisar.<br>• Granted Copyright on Development of Mathematical Modelling for Prediction of P.T.O Power Requirement for Rotavator (Registration Number SW-13325/2020).<br>• Granted Copyright on "Principal Component Analysis - Online Statistical Analysis Tool" (Registration Number SW-13417/2020).<br>• Received a letter of appreciation by Honorable Vice-Chancellor, CCS HAU for securing a copyright on "Principal Component Analysis- Online Statistical Analysis Tool" in the name of Chaudhary Charan Singh Haryana Agricultural University, Hisar. (Registration Number SW-13417/2020) |
| **45.** | Dr. Vinay Kumar, Assistant Professor,Ph.D. | • Granted Copyright on Development of online analysis tool for analysis of augmented designs from Copyright Office, Govt. of India (Registration Number SW-14301/2021).<br>• Granted Copyright on Development of online analysis for k-means cluster analysis from Copyright Office, Govt. of India (Registration Number SW-14121/2021).<br>• Granted Copyright on Development of online of Latin Square Design and Strip Plot Design (Registration Number SW-14302/2021).<br>• Granted Copyright on Development of Web based Application for Post-Hoc Test for Comparisons of Means (Registration Number SW-14220/2021). |

**6.5.2.4. Technical and Supporting Staff (No.):** *Whether the College has appointed (in place) sufficient technical/laboratory/firm staff to cater the need of practical and field experiments. Mention department wise distribution to technical, supporting and field staff in the tabular form.*

In eleven departments and one computer section, 22 technical, 16 supporting and 07 field staff are in positions.

| Department | I. Technical | II. Supporting staff | III. Field staff |
|---|---|---|---|
| Biochemistry | 03 | 01 | 00 |
| Botany and Plant Physiology | 02 | 02 | 02 |
| Chemistry | 02 | 01 | - |
| Food Science and Technology | 03 | 02 | 02 |
| Languages and Haryanvi Culture | - | 01 | - |
| Mathematics and Statistics | - | 01 | - |
| Microbiology | 03 | 02 | 01 |
| MBBB | 03 | 03 | 02 |
| Physics | 03 | - | - |
| Sociology | - | 01 | - |
| Zoology | - | - | - |
| Computer Section | 03 | 02 | - |
| **Total** | **22** | **16** | **07** |

### 6.5.3. LEARNING RESOURCES

**6.5.3.1 College Library (digital):** *Location of the library, Present staff position (in place), Availability of the following in library, Wi-Fi, No. of books and other reading materials, No. of periodicals and research journals, No. of internet points with number of computers, Seating capacity in library, Employing the latest technology in library sciences, Stocking arrangements of books, Collection of volumes on different subjects, Latest publications in the fields of relevant subjects, Automation and user services through computer, Opening hours, Subscription of journals of national and international repute, national dailies, magazines etc.*

There is digital library in the College. Each faculty member and students have access to the digital library. Most of the departments of the college have departmental libraries with good collection of books and theses which are accessible to students and faculty. In departmental libraries of the College, there are 1245 books, 1600 M.Sc. theses and 691 Ph. D theses.

- CCS Haryana Agricultural University has a centrally located Nehru Library with Library Advisory Committee to decide the guidelines for its smooth functioning.
- The Committee comprises Vice-Chancellor as its Chairman and University Librarian as its Member-Secretary. All the Deans/Directors, Registrar, Comptroller, Principal- College of Agriculture, Kaul and President of HAUTA are its ex-officio members, while one HOD, one faculty member and one PG student from each College are nominated by the Vice-Chancellor for two academic years.
- Students are encouraged to consult the library which is well equipped with a large number of books and other facilities like Krishikosh, CeRA (Consortium for e-resources in Agriculture), BOLAE (Britannica Online Academic Edition), Scopus database, DELNET (Developing Library Network) database, NDL (National Digital Library) resources and video conferencing. The library provides access to e-dictionary, Thesaurus, Biography of world

great personalities and e-books. It is the hub of academic and research activities of the University; housed in a centrally located elegant building.

- It provides information support to teachers, scientists, extension specialists, students, and other members including non-teaching staff and general public.
- Library regularly conducts training programmes for faculty and students and gets feedback. Suggestions are incorporated in creating better facilities to its users.
- Videoconferencing facility and multimedia service are other important facilities provided to Library users. Entire collection of library has been made bar-coded for automated circulation activities.
- Library security has been monitored by CCTV Security System.
- Implementation and maintenance of Anti-Plagiarism software (Turnitin)
- Implementation of IUMS/ERP modules for the Digitization of University Work.

**6.5.3.2 Laboratories, Instructional Farm, Workshops, Dairy Plant, Veterinary Clinic, Hatchery, Ponds etc.:** *Clearly mention about laboratories, instructional farm, workshops, diary plant, veterinary clinic, hatchery, ponds etc. facilities available in the College with its numbers, space, specialty to conduct practical/hands on training.*

**Under Graduate Laboratories**

| Departments | | Number | Lab no. | Location | Facility in the lab |
|---|---|---|---|---|---|
| Biochemistry | : | 01 | Biochem. 1 (Lab No. 3) | COBS&H | Chemicals, Reagents, Glassware etc. and Equipment |
| Botany and Plant Physiology | : | 02 | Bot.1, 319 | COBS&H | Facility to conduct different Botany and Plant Physiology Courses Practical |
| Chemistry | : | 01 | 409 | COBS&H | Burette, Pipettes, other Glassware, Reagents, Chemicals, Furnace etc. |
| Languages and Haryanvi Culture | : | 01 | -- | COBS&H | Computers,Interactive Board, Language Software |
| Microbiology | : | 01 | 413 A | COBS&H | Microscopes, Glass Slides, Stains, Petri Plates |
| Physics | | 01 | 413 B | COBS&H | All facility for Undergraduate Practical available |
| Zoology | : | 01 | Zoo 315 | COBS&H | Preserved specimen of different Phylum, Tissue SlidesFacility for conducting Physiological Tests |
| Computer Section | : | 01 | Lab-I | Computer Section | Desktop Computers with Internet and various Programmes |
| **Total** | : | **09** | | | |

In addition to UG and PG laboratories, there are specialized research laboratories in each department for conducting research in specific areas. The information regarding these laboratories in the various departments of the College is as under:

| Departments | Name and number | Specialty to conduct practical/hands on training |
|---|---|---|
| Biochemistry | **05** | |
| | Lab No. 415 | Differential expression and proteome studies, purification and characterization of agriculturally important enzymes |
| | Lab No. 417 | Synthesis and application of nanoparticles in agriculture |
| | Lab No. 420 | Synthesis and application of nanoparticles in agriculture |
| | Lab No. 424 | Evaluation of food and fodder crops for quality traits and anti-nutritional factors |
| | Lab No. 432 | Purification, characterization and immobilization of enzymes |
| Botany and Plant Physiology | **07** | |
| | Lab No. 318 | For practical classes and research work of student |
| | Lab No. 319 | Conduct different Botany and Plant Physiology courses practical for UG students |
| | Lab No. 320 | Identification of salt and heavy metal hyperaccumulator plants |
| | Lab No. 329 | Identification of physiological markers (MSI, RSI, photosynthetic efficiency, photochemical quantum yield, CTD, pollen viability) under different abiotic stresses |
| | Lab No. 331 | Physiological changes in response to agricultural pollutants and strategic research for environment and climate resilient sustainable agriculture |
| | Lab No. 334 | $N_2$-fixation mechanism (leghemoglobin, nitrogenase activity and oxidative metabolism) under abiotic stress condition in different nodules |
| | Lab no. 318 | Conduct different Botany and Plant Physiology courses practical for UG students |
| Chemistry | **07** | |
| | Lab No. 123 | Natural product and heterocyclic synthesis lab |
| | Lab No. 407 | Green chemistry and nano innovation lab |
| | Lab No. 137 | Functionalized materials research lab. |
| | Lab No. 127 | Advanced organometallic synthesis lab |
| | Lab No. 124 | Diversity oriented organic synthesis lab |
| | Lab No. 138 | Porous material lab |
| | Lab No. 117 | Sustainable chemistry lab |
| Computer Section | **01** | |
| | Network Lab | Installation of Local Area Network equipment and Servers |
| Mathematics and Statistics | **01** | |
| | Lab No. 15 | Used by UG/PG and professional elective students to develop teaching material and other assignment work. |
| Microbiology | **08** | |
| | Lab No. 202 | Molecular characterization of microorganisms |
| | Lab No. 207 | Development of biocontrol agents for various pests and diseases of crops |

| | | |
|---|---|---|
| | Lab No 217 | For study of microbial interactions with plants |
| | Lab No. 222 | Development of strategies for bioremediation of polluted sites |
| | Lab No. 225 | For study of microbes and their activities in soil |
| | Lab No. 229 | Study of microbial fermentations |
| | Lab Nos. 237 & 234 | Production of different biofuels |
| | Lab Nos. 115A and B | Study of microbial genomics |
| Molecular Biology and Biotechnology | **06** | |
| | Lab Nos. 01 & 02 | Bioinformatics Lab |
| | Lab No. 05 (COBT) | Functional Genomics and Molecular Breeding |
| | Lab No. 102 (COBT) | Computational and Biophysics Lab |
| | Lab No. 104 (COBT) | Molecular Biology Lab |
| | Lab No. 108 (COBT) | Plant Proteomics and Metabolomics Lab |
| Physics | **03** | |
| | Lab No. 112 | Advanced equipment lab |
| | Lab No. 115 | Material synthesis lab |
| | Lab No. 404 | Thin film lab |
| Zoology | **06** | |
| | Lab No. 302 | Vermiculture lab experiments |
| | Lab No. 305 | Animal physiological studies, Animal behavior study |
| | Lab No. 306 | **S**tudying taxonomical aids |
| | Rodentology Lab No. 307 | Rodent pest management |
| | Avian Biology Lab 310 | Avi-faunal study lab |
| | Acarology Lab No. 311 | Mites management lab |
| Food Science and Technology | **07** | |
| | Lab No. 1 | Fruits and vegetables processing and quality analysis |
| | Lab No. 2 | Pilot plant for spray drying of foods |
| | Lab No. 3 | Chemical and nutritional quality assessment |
| | Lab No. 4 | Instrumental analysis of foods |
| | Lab No. 5 | Food microbial quality management |
| | Lab No. 6 | Pilot plant for fruits and vegetables processing |
| | Lab No. 7 | Cereal processing and quality analysis |

### Farm Area/Net Houses/Green Houses Facilities with College

| **Departments** | **Number** | **Facility** |
|---|---|---|
| Biochemistry | 05 Net house | Growing crops for biochemical characterization |
| Botany and Plant Physiology | 07 Screen House | For conducting of experiments |
| Microbiology | 06 Screen House, | For evaluation of microbial strains<br>Biogas production experiments |

| | | |
|---|---|---|
| | Biogas plants,<br>Composting pits | Compost preparation |
| Molecular Biology and Biotechnology (COBT) | 01, High-tech Containment Facility,<br>02, Green House,<br>03, Polyhouse | For growing transgenic plants<br><br>For conducting experiments<br>Growing crops for molecular characterization |
| Physics | 01 Screen House | For conducting experiments |
| Zoology | 04 Screen house | For earthworm and plant mite rearing |
| Total | **29** | |

Any other information which is not covered in the infrastructure may be added preferably in tabular form

| **Departments** | **Facility** |
|---|---|
| Botany and Plant Physiology | Botanical Garden |

Vice-Chancellor Prof. B.R. Kamboj during Inaugural Ceremony of "Urban Expo and Flower Fest-2022"

The Department of Botany and Plant physiology, College of Basic Sciences and Humanities, CCSHAU, Hisar has a Botanical Garden covering 10.5 acres land with rich plant diversity of more than 600 plants species comprising of various ornamental foliage, seasonal flowering plants, bamboospecies, ferns, cacti/succulent plants, medicinal/ aromatic plants, horticultural plant like chrysanthemums, roses, aquatic plants, climbers, shrubs, herbs and trees. The collection of planting material has been maintained for imparting knowledge to students, scientists and visitors. The department has also done pioneering work in conserving the indigenous plant species and efforts have also been made for introduction of exotic plant species. Eminent dignitaries from various places used to visitthis unique botanical garden. Botanical Garden is well established site and very helpful in updating of knowledge and interest of students/Scientists and other users about plant world.

| | |
|---|---|
| Microbiology | Center of Biofertilizers Production and Technology |

The Department of Microbiology has been producing biofertilizers for the last 40 years as per the demand of farmers and other farm agencies. The biofertilizers produced are:

- *Rhizobium* biofertilizer (Rhizoteeka) for nitrogen fixation in different pulses and legumes like moong, urd, arhar, soybean, pea, gram, berseem and ground etc.
- *Azotobacter* biofertilizer (Azoteeka) for nitrogen fixation in different crop plants including vegetables, flowers and fruits etc.

- PSB biofertilizer (Phosphoteeka) for solubilization of insoluble/ fixed P in the soil for all crop plants.
- Biocontrol bioinoculants (Bioteeka) *Azotobacter chroococcum* strain HT-54 for control of molya disease in wheat and barley; and *Gluconoacetobacterdiazotropicu*s controlling root knot nematode in cotton
- A well-equipped unit for biofertilizer production. Since July, 2018, the biofertilizers are produced and sold through Public Private Partnership mode with M/S HABITAT Genome Improvement Primary Producers Company Pvt. Ltd. Village Ramayan, Hisar.

Conference hall having 40 seating capacity for training to students, entrepreneurs and farmers regarding biofertilizer production and application.

| | |
|---|---|
| Molecular Biology, Biotechnology and Bioinformatics | Three transgenic greenhouses |

The transgenic greenhouses are used by the department to conduct experiments on development of transgenics of crops of agricultural importance. The facilities are also used by post graduate students for their approved thesis work.

| | |
|---|---|
| Zoology | Museum (Room No. 316) |

The Museum house preserved specimen of invertebrate and vertebrate phyla belonging to different orders. Stuffed animals, skeletal systems, display boxes, models, charts etc are also displayed in the museum. It is used for taxonomy practical by undergraduate and post graduate students.

### 6.5.3.3 Student READY/In-Plant Training/Internship/Experiential Learning Programmes:

*Clearly mention about the implementation of Student READY. In-plant training/Internship/ Experimental Learning Programmes and learning outcomes as per the guidelines of ICAR. Profit sharing mechanism (amount) shall be mentioned for each ELP unit sanctioned by the ICAR for the College.*

#### 1. Experiential Learning Unit in Department of Microbiology/ MBB&B

**Title:** Production of medicinal and Aromatic plants through Tissue Culture and Production of Biofertilizers

**Income/Revenue generated :** Rs. 68,000/-

**Expertise gained**

- Students were able to isolate and purify the potential bioinoculants
- The trained students were able to produce biofertilizers at large scale.

**Status of EL Unit**

- PG students of the department are using the created facilities for their research work.
- UG students of college of Agriculture are getting biofertilizer training regarding bioinoculants through module 8.

#### 2. Experiential Learning Programme in Food Science and Technology

**Title:** Processing of fruits, vegetables and some other food items (EL-4)

**Number of students trained:** Total 49 students including 35 under graduate, along with M.Sc. and Ph.D. students were trained during the last five years.

**Income/Revenue generated:** Total sale of value added food products was worth Rs. 3,99,468/- during the period under report.

**Expertise gained:** The students were imparted practical demonstrations for processing, packaging, labelling, and sale of following value added food products from fruits, vegetables and grain crops:

- Ready-to-serve (RTS) drink from pineapple, guava, mango, ber, papaya and bael;
- Squashes from mango, pineapple, orange, bael, guava and papaya;
- Syrups from pomegranate, orange, raw mango-mint, rose and almond;
- Preserve/murrabba and candy from aonla, bael, ber, karonda and carrot;
- Sauces/Ketchup, chutneys, pickles, confectioneries and dehydrated products
- Biscuits, cakes, muffins and instant mixes;

Student activity during Experiential Learning Programme of Food Science and Technology

Students were also trained for calculating cost of production, GST, price fixation and profit sharing along with maintenance of records. They displayed, supervised, sold products and disseminated awareness/information/knowledge to the visitors *i.e.*, farmers, women, self- help groups, students, dignitaries and participated in various events like Kisan Mela/Training/ Exhibition Conferences/HAU Mart/ Flower Show/Kisan Diwas/ Geeta Mahotsav etc. during various programmes held at and/or outside CCSHAU through stall ELP during various functions/events organized and represented by university.

**Status of ELP:** Experiential Learning Programme envisaged proactive training, imparted to students in agriculture and its allied enterprises. It aimed to stress upon the importance of entrepreneurship in student minds for developing entrepreneurship skills. The ELP was conducted during the last semester of final year students of Undergraduate Programme *i.e.*, B.Sc. (Hons.) Ag. The entire scheme of experiential learning followed the established system of "Earn While You Learn". Expenditure limit under ELP increased up to Rs 2.0 lac from initial seed money of Rs. 50000/-.

### 3. In-Plant Training in Food Science and Technology

All M.Sc. students were imparted compulsory four weeks training after completion of the major course work during semester break in reputed Food Industry/ Organization and submit report. During period under review, sixteen students successfully completed In-Plant training in India and Abroad.

***6.5.3.4.1.*** **Curricula Delivery through IT (Smart Class Rooms/Interactive Board etc.):** *Whether the College is using smart class rooms/interactive board etc. for teaching and practicals. Number of class rooms upgraded as smart class rooms should be mentioned.*

The College of Basic Sciences and Humanities has robust ICT infrastructure comprising more than one hundred computers, one smart class room/interactive board for teaching, lecture rooms with computer facility, Wi-Fi facilities, CCTV cameras, *etc.* The faculty members of the college use ICT in teaching, practical, office and research purposes. Every department has one Seminar Room with computer, LCD projector and internet connection. Every faculty members have computer printer and internet connection in their offices. The office of every department has computer facility with internet connection. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, YouTube and CD ROM in teaching different courses at UG, PG and Ph.D. level.

- Two hundred Desktops are available in the college with specifications of: i3, i5 and i7 Core, 500GB/1TB HDD and 2 GB/4 GB RAM.
- All the computers are connected through LAN for better connectivity.
- Computers are well equipped with recent software such as Microsoft Office, SPSS, SAS and Turnitin to improve writing skills of students and assist them in checking plagiarism of research thesis.
- In College every node is connected with internet and free of cost Wi-Fi facility is available in the hostel rooms.
- Regular courses of computers and special trainings on use of ICT are provided to teachers/students.
- Students deliver seminars and lectures in smart class rooms enabled with LCD Projector and internet.

**Type of ICT Application used in Curricula**

Faculty of each department uses power point presentations, white board, YouTube and CD ROM in teaching courses at UG, PG and Ph.D. level. The Department of Botany & Plant Physiology uses power point presentations, white board, YouTube and CD ROM in teaching courses at UG, PG and Ph.D. level. The Centre of Food Science and Technology uses power point presentations, white board, e-manuals. The Department of Chemistry uses power point presentations, white board, YouTube and CD ROM. The Department of Languages and Haryanvi Culture uses power point presentations, white board. The Department of Mathematics and Statistics uses power point presentations, white board, CD ROM, e manuals etc. The Department of Molecular Biology, Biotechnology and Bioinformatics uses power point presentations, white board, YouTube and CD ROM in teaching courses at UG, PG and Ph.D. level. The Department of Microbiology uses power point presentations, white board, YouTube and CD ROM in teaching different courses. The Department of Sociology uses power point presentations, YouTube and CD ROM in teaching courses at UG and PG level. The Department of Zoology uses power point presentations, white board, in teaching all courses atUG, PG and Ph.D. level. The faculty also use of CeRA, digital library, Youtube videos, digital camera, emails etc. And Whatsapp groups were also created for teaching the courses.

### 6.5.4 STUDENT DEVELOPMENT

**6.5.4.1 Student Intake and Attrition:** *The information about student intake and attrition, for the college as a whole but separated in UG, PG and Ph.D. categories shall be provided in tabular form for last five year.*

| Degree program | Actual students admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| PG | 46 | 49 | 47 | 54 | 52 | 5.30 | 13.76 | 11.10 | 8.66 | 4.20 |
| Ph. D. | 29 | 65 | 58 | 56 | 45 | 3.30 | 6.80 | 2.80 | 1.25 | - |

**6.5.4.2 Number of Students in Theory and Practical Classes:** *Mention the Degree Programme wise number of students sitting in a class for theory and practical. Complete list of academic programmes (UG and discipline wise masters and Ph.D.) for which accreditation is sought, need to be provided. The list should provide only programmes in which students are already passed out.*

The college offers courses to students of this college in different disciplines. These courses are open to students of different departments of other colleges as well.

- The number of students varies in each course.
- Some of the courses being compulsory for different disciplines of the college and other colleges, the strength of students vary between 40-100.
- Courses taken under minor subject are in high demand and number of enrolments is more.
- Ph.D. courses (600 series) are generally taken by students of the department and number of students vary from 2-10 students in such course.
- Batches in Practical courses vary from 1-3, each batch has about 20-25 students.

**6.5.4.3 Admission Process:** *Clearly give complete mechanism of admission for UG, PG and Ph.D. programmes, fee payment mechanism, registration procedure, academic schedule publication at the start of the semester etc. Write information in one page only.*

- The College ensures publicity and transparency in the admission process through advertisement in the local dailies, national dailies, websites, and conducting common entrance tests through centralized university system.
- The admission process for the college is transparent. Prior advertisement regarding admission process is published in the national newspaper and also on the university web portal. There is entrance examination for the admission and OMR sheets are being checked using software to avoid any kind of bias and omissions. There is strict observation during the entrance examination including photographs of candidates, thumb impression and signature. The doubtful case, if any, is debarred from admission.
- Process of admission is through Common entrance examination for all the masters' and Ph.D. programme.
- The minimum percentage of marks for admission to all the Masters' and in the college and affiliated college of the university is 60% for General category and 57% for SC/ST candidates. Admission is based on the merit in the entrance examination.

- The minimum cut off marks in the Common Entrance Test for the M.Sc. programmes are 40% for General Category and 38% marks for Scheduled Caste candidates.

### Strategies adopted to Increase/Improve Access for Following Categories of Students

- Distribution of seats for admission against the seats meant to be filled in with candidates having Haryana Resident Certificate at Master's Level Programmes is as under:
- (i) Scheduled Castes 20%
- (ii) Backward Classes Block –A (BC-A) 16%
- Block –B (BC-B) 11%
- Roster for Master's programmes is followed. Roster points for reservation for different categories in a block of 100 seats in each college is as under:
- Scheduled Castes (20%)
- Backward Classes: Block-A (16%) and Block-B (11%)
- Person with Disability (3%)
- General Category: Rest of the points belong to the general category.
- One additional seat in each college is created for SC, BC(A), BC(B)& Person with Disability (PwD) category if candidate (s) of these categories are available. Admission against this seat is made on the basis of inter se merit amongst the candidates of the relevant category. Admission to Ph.D. programme in one discipline giving representation to above category is restricted to not more than 50% of the prescribed seats for Haryana Residents.

### PG Programmes – At a Glance (2022-23)

| Programme | Disciplines | Eligibility | Number of seats |
|---|---|---|---|

*Seats filled through ICAR

### Mechanism of Admission

- Prospectus is made available on university website i.e. http://hau.ac.in for submission of on-line application forms.
- There is Common Entrance Test for M.Sc.as well as Ph.D. in all the disciplines in the college.
- Admission is based on Merit in the Common Entrance Test. The minimum cut off marks in the Common Entrance Test for the above M.Sc. programmes are 40% for General Category and 38% marks for Scheduled Caste candidates (there will be no negative marking) to get admission in Master's Programme as per qualification.
- Eligibility for ICAR nominees for Ph.D. degree is for (a) In-service candidates from State Agricultural Universities/ICAR Institutes. (b) The Candidates who have qualified ICAR-SRF (PGS) examination.
- The minimum qualifications for admissions of fresh as well as in-service candidates shall be 60% marks (where OGPA is not given) or a grade point average of 6.5 (10.00 basis) at Master's level in the subject concerned from a recognized University.
- As per Govt. policy and guidelines received, there is reservation in admission policy, fee concession, granting fellowship, free books, free trainings, Computers *etc.* (Details available in the prospectus on University website).
- The Result of Entrance Tests/Agriculture Aptitude/Common Entrance Test is displayed on University website http://hau.ernet.in. Candidates are advised to visit this website.
- Attendance in person at the time of Counselling is compulsory.
- Admission Committee for the Post Graduate programmes is as under: Dean, Postgraduate Studies Chairperson Concerned Dean(s)/Director Member Registrar or Assistant Registrar (Acad.) Member Admission Committee verify the eligibility of the candidates for particular programme before Counselling.
- Thereafter, candidate is allowed provisional admission on the basis of merit, as per rules and subject to availability of seats.
- The candidates admitted have to pay fee there and then and register themselves on due date (s) failing which they will forfeit their claim of admission.

### Fee Payment Mechanism

The fees can be paid on line using a portal available at the website.

**Registration Procedure**

- Registration for the first semester of the programme is part of admission and is governed by admission rules.
- Registration for subsequent semesters takes place on the date notified in academic calendar.

**Academic Schedule**

1. Academic calendar is provided at the start of the semester.
2. Every student is required to attend at least 75% of the lectures delivered and practicals conducted separately.
3. Final examination is held as per schedule given in the academic calendar
4. HOD ensures that a major advisor is assigned to each post-graduate student within one month after admission, in consultation with the post-graduate faculty of the Department in which the student is doing his/her major work.
5. The Advisory committee for each student is approved by the Dean, PGS on the recommendations of the advisor through the Head of the Department, Dean of the College, in the same semester.
6. The major advisor guides the student in planning the programme of his/her studies and in the choice of courses. He/she will also help in determining the credit load which the student can safely and conveniently carry in each semester and advises regarding the addition and withdrawal of courses. He/she keeps in touch with the academic progress of the student.
7. The CCS HAU team/individual student is allowed to participate in authorized tournaments, declamation and other contests of national level, state level and inter-university level are given benefit of attendance to the extent of maximum of two participations with a total duration of 10 days in a semester.
8. In the Ph.D. programme, besides the examination and other exercises, there is also written and viva-voceexamination.
9. The M.Sc. thesis is evaluated by an Examining Committee constituting Student's Advisory Committee and One external examiner appointed by the Dean, PGS.
10. The Ph.D. thesesare evaluated by two external examiners of different institutions. The final oral examination conducted by an Examining committee constituting Student's Advisory Committee and one external examiner from other institutions out of the two to whom the thesis were sent for evaluation.
11. The student(s) who have normally completed 75% of the course work can apply for overseas pre-doctoral fellowships and are permitted for research in foreign country.
12. The students with first position in OGPA are given certificates in Prize Distribution Function organized by the college.

**6.5.4.4. Conduct of Practical and Hands on Training:** *Mention the brief report on how the practical and hand-on-training is being conducted in different courses to meet the student satisfaction. Write information is one page only.*

College of Basic Sciences and Humanities lay emphasis on practical component of post graduate courses. It motivates students, help them to develop important skills and improve their understanding of theory through practical experience. These courses besides imparting theoretical knowledge also provide practical skills and hands-on-training as per the curriculum requirements. As per 5$^{th}$ Deans' Committee Recommendations courses are offered by all departments for Under Graduates of College of Agriculture, IC College of Home Science and College of Agriculture Engineering and Technology. Courses with practical components provide practical skills and hands-on training as per the curriculum requirements.

The **Department of Biochemistry** provides practical skills and hands on trainings in separation of biomolecules using GLC and HPLC, Radioisotopy, Purification of Enzymes, Extraction of DNA/RNA using ELISA, Western Blotting, Fluorescent Antibody Test, Polymerase Chain Reaction. Students are also exposed to techniques related with carotenoids estimation, trypsin and chymotrypsin inhibitor activities in seeds, Estimation of sugars, proteins, vitamins in fruits. Two courses, viz., Techniques in Biochemistry and Advanced Techniques in Biochemistry are 100 per cent practical oriented. Undergraduates are exposed to **p**reparation of solutions and buffers, quality and quantity determination of sugar and proteins, Paper chromatography and TLC.

In the Department of **Botany and Plant Physiology**, students study various methods for studying the plant water status, effect of abiotic stresses (salt, water, high and low temperature) on plant growth and development and role of hormones under abiotic stresses. The students study the bioassays for different plant growth hormones (Auxins, Cytokinin**,** Gibberellins, ABA, Ethylene and their physiological effects in plants. Students get acquainted with study of different growth and yield parameters in different crops. Students learn the procedurefor extraction of chlorophyll content, photosynthetic activity, stomatal conductance, computer applications in plant physiology, crop productivity and modelling. Students get acquainted with various methods of testing seed viability, vigour and nutrient sufficiency and deficiency levels. Undergraduatestudents conduct experiments on physiological processes like imbibition, osmosis, transpiration, respiration, photosynthesis. Students were acquainted with the structure, types and modifications of root, stem, leaves and flowers.

**Centre of Food Science and Technology** train the students to develop value added food products from fruits, vegetables, cereals, pulses and oilseeds through practical demonstrations and hands on practice. Efforts are made for building entrepreneurship spirit and business management competence among the students. After doing experiments with their own hands, studentsacquaint with properties, role of various constituents in foods, interaction and changes during processing, importance of various foods and nutrients in human nutrition, different groups of micro-organisms associated with food, their activities, destruction and detection in food. The Centre also has the facilities to acquaint the studentswith basic principle of Food Engineering and its Processes, with importance of various foods process, their evaluation, food quality parameters and control systems, food standards, regulations, specifications. The Centre also acquaints the students with packaging methods, packaging materials, packaging machineries, modern packaging techniques etc.

The **Department of Chemistry** has the facilities to conduct experiments on Infrared, Mass spectrometry, pH meter, conductivity, refractometry, chromatography, viscosity, Complex preparation, Complexometric titrations, Magnetic properties, Quantitative analysis, Synthetic preparation, Compounds Identification *etc*. Students are able to Gas layer chromatography for pesticides estimation Analytical Techniques for active pesticides and pesticide formulation. Students are able to understand Organic compounds preparation, Dyes preparation and Intermediates identification. The courses helpthe students in Identification of radicals, removal of colour stains from cloths, detection of elements and organic functional groups. Students got basic knowledge about the Titration by EDTA method, BOD and COD in water sample, Chromatographics analysis and Organic functional groups.

Students are benefitted by the courses offered in the **Department of Languages and Haryanvi Culture.** The undergraduate students are given some imaginary situations to practise conversation to overcome their hesitation in speaking. Keeping in view their spoken English; the students were able to recognize the different phonetic symbols and the sounds they represent. Students

were able to read and comprehend the different newspapers and magazines with ease. The students were benefitted by having the magical mixture of grammar, vocabulary and phonetics. Students were given the guidelines for facing interviews and mock interviews were also conducted so that they could get confidence for appearing in interviews. They could learn pronunciation of English words because now they knew the proper use of dictionary. Keeping in mind the need of the hour, the students were taught how to speak in front of audience which definitely brought positive change in them. They were prepared for group discussion which is very important criteria for the selection process in jobs.

By performing practical exercises, students taking courses of **Department of Mathematics, and Statistics** acquainted with the basic concepts of statistics and mathematics applicable in agriculture and its allied fields. Problems based on AP, GP and binomial expansion, Matrices, Inverse of Matrices and solution of system of equations, differentiation and Integration equip the students to carry out scientific studies. The courses also help in **c**onducting basic, applied and adaptive research in statistics and promote the application of advanced statistical techniques through the use of latest computing techniques for data management and analysis using different software packages. **The Computer Section** offers four practical oriented courses which are taken as minor or supporting courses. These practical courses helped the student to become familiarize with computers, different softwares, hardwares etc.

**The Department of Molecular Biology, Biotechnology and Bioinformatics** has the facilities for estimation of proteins; RNA and DNA, SDS-PAGE of proteins, DNA isolation, purification and characterization, DNA restriction analysis, Polymerase chain reaction, preparation of growth media for bacterial culture, Gel electrophoresis- agarose and PAGE (nucleic acids and proteins), Isolation of plasmid DNA from bacteria, Recombinant DNA construction, Inoculation, subculturing and plant regeneration, Anther and pollen culture; embryo rescue; protoplast isolation, and culture, Gene transfer and selection of transformed tissues/plants, Immunoassays including ELISA; western blotting, Dot blot analysis; Southern hybridization; Molecular markers (RAPD, SSR, AFLP etc) and their analysis; SNP identification and analysis; Proteomics (2D gels, mass spectrometry, etc.); RNAi (right from designing of construct to the phenotyping of the plant); Yeast 1 and 2-hybrid interaction.

Practicals on Bioinformatics help the students to gain expertise on use of INTERNET and students are able to perform searches on MEDLINE, CD-ROM; bibliographic databases; RASM OL, M OLM OL, M X, VRMLetc, use of molecular model packages and visualization tools. The courses also provide information on Gene Information Resources: GenBank, EMBL, Protein Information Resources: Swiss-Prot, BLOCKS, Gene Prediction Tools: GENSCAN, GRAIL; Structural Databases: PDB, CSD, RELIBASE, REBASE, File Format Converter; Tools: BABEL, ReadSeq, NCBI Resources; Visualization tools – RasMol, QMol, SwissPDB, Pymol, Modeling Tools: MODELLER, SwissPDB, Geno3D, Docking Tools: Chimera, Dock, AutoDock, GRAMM, Hex, Argus Lab.; Proteomics Tools: EXPASY, CDART, 3D-Structure Optimization Tools, Sequence Analysis Tools: BLAST, FASTA, EMBOSS, TCOFFEE, Phylogenetic Analysis; Tools: Phylip, NTSYS, CLUSTALW/CLUSTALX, BIOEDIT.

**The Department of Microbiology** offers practical and hands on training in ten M.Sc. courses out of 12 courses. By conducting practicals with their own hands, students are able to isolate, characterize and maintain different microorganisms, Students are made familiar to different techniques used for characterization of metabolites, cell size and growth behavior of microbes.They are able to apply modern techniques like gene transfer, electroporation, plasmid isolation and their application to construct microbe with desired traits. Students are able to enumerate microbial activity

in different kinds of soils, isolate and develop new microbial products of commercial use. Students get basic knowledge about the microbiology lab, staining techniques and media preparation, culture and isolation of bacteria, algae & fungi of agriculture importance, staining techniques and media preparation**,** production of biofertilizers**.** They are also able to understand the biological aspects of viruses, role of microbes in environment, its pollution abatements and standards of environment pollution.

**The Department of Physics** has facilities to conduct experiment to undergraduate and postgraduate students. The Department provides hands on training using Fourier transform infrared spectrometer, Impedance analyzer, Thermal properties analyzer, Photo luminescence setup, Tube furnace, Geiger muller counter, Gas sensor setup, PN junction diode, Multichannel electrochemical workstation, etc.

**The Department of Sociology** conducts field study-cum-institutional visits, prepare field projects for analysing the problems of agriculture and rural society and make theme based group which help students to understand the concepts and proper methodology. Assignments for e.g. functioning of Gram Panchayat, caste system, jajmani system, Mahatma Gandhi National Rural Employment Guarantee Scheme, education system *etc*. are given to students so that they gain exposure. Students are also exposed to application of computers in social research. Undergraduate Course is based on participatory process with the teacher playing the role of facilitators, the learners' centred approach adopted by the teacher includes activities designed as interactive and experimental with the resulting emphasis on learning by doing the exercises such as group discussion, case study, exercise/game, self –analysis by students about their styles and behaviour, role play and participants' presentations.

**The Department of Zoology** have practical portion in all M.Sc. courseswhich ameliorated students' knowledge about biochemical and cytological techniques, mounting the specimen, histology, tissues, organ systems, skeleton, morphological and behavioral characters of organisms, developmental stages, regeneration and metamorphosis in animals. Students are able to recognize different organisms belonging to invertebrates and vertebrate phyla. Students are benefitted by conducting experiments with their own hands. (They are able to recognize and identify different organisms belonging to invertebrates and vertebrate phyla.) Students collect the insects and other invertebrates from different habitats and preserve the organisms. Students are able to prepare seven types of keys to identify class, orders and species. Students are able to extract mites from stored grains, plants, soil, animals and house dust, observe damage symptoms. Students are able to culture different species of plant mites, stored mites, earthworms and entomopathogenic fungi for management of mites.

### Conferences/ Seminars/Webinars/Workshops/Trainings etc. Organised

### Computer Section

1. "State Eligibility Test in Computer Appreciation and Application (SETC)" from 05.03.2018 to 09.03.2018 at Computer Section in collaboration with Academy of Agricultural Research and Education Management, DHRM, CCS HAU, Hisar, Haryana, India.

2. “State Eligibility Test in Computer Appreciation and Application (SETC)” from 04.02.2019 to 08.02.2019 at Computer Section in collaboration with Academy of Agricultural Research and Education Management, DHRM, CCS HAU, Hisar, Haryana, India.
3. “How to Skill Up during COVID-19” from 05.08.2020 to 14.08.2020 in collaboration with Director of Research, CCS HAU, Hisar, Haryana, India.
4. “Statistical Data Analysis for Research Scholars” from 18.02.2019 to 27.02.2019 at Computer Section in collaboration with Directorate Student Welfare, CCS HAU, Hisar, Haryana, India.
5. “Statistical Data Analysis for Research Scholars” from 14.10.2019 to 24.10.2019 at Computer Section in collaboration with Directorate Student Welfare, CCS HAU, Hisar, Haryana, India.
6. “Statistical Data Analysis for Research Scholars” from 24.02.2020 to 04.03.2020 at Computer Section in collaboration with Directorate Student Welfare, CCS HAU, Hisar, Haryana, India.
7. "Basic Level Computer Appreciation Course" from 13.09.2021 to 22.09.2021 at Computer Section in collaboration with Academy of Agricultural Research and Education Management, DHRM, CCS HAU, Hisar, Haryana, India.
8. “State Eligibility Test in Computer Appreciation and Application (SETC)” from 22.12.2021 to 26.12.2021 at Computer Section in collaboration with Academy of Agricultural Research and Education Management, DHRM, CCS HAU, Hisar, Haryana, India.
9. “State Eligibility Test in Computer Appreciation and Application (SETC)” from 05.09.2022 to 09.09.2022 at Computer Section in collaboration with Academy of Agricultural Research and Education Management, DHRM, CCS HAU, Hisar, Haryana, India.
10. “Basic Level Computer Appreciation Course (BLCA)” from 16.11.2022 to 29.11.2022at Computer Section in collaboration with Academy of Agricultural Research and Education Management, DHRM, CCS HAU, Hisar, Haryana, India.

Basic Level Computer Appreciation Course (BLCA)

### Department of Botany and Plant Physiology

- Two daysWorkshop Hands-On Training Program on "Basic and Advanced Instrumentation in Plant Physiology" from 10-11 January, 2019.
- International Workshop on "Molecular Mapping of Economic Traits using High-Throughput Technologies" by the department under the SPARC project, MHRD, GOI from 8th to 17th July, 2019.
- International Workshop on "Plant Genomics" by the department under the SPARC project, MHRD, GOI from 25th February – 5th March, 2020.

### Department of Mathematics and Statistics

- National e-seminar entitled "Mathematical Sciences: Repositories of Logical Thoughts and Analytical Tools" on Dec 22, 2020.
- Online Webinar on "Computational Techniques for Applied Sciences" on July 06-07, 2020.
- Symposium on "Connecting the World with Data we can Trust" on October 20, 2020.
- workshop on **"**Recent Computational Techniques of Mathematical Sciences for Researchers" to celebrate National Mathematics Day on Jan. 22, 2020
- National Conference entitled "Mathematical Sciences for Applied and Agricultural Research" on Feb. 22, 2022 in blended mode.
- National Level Refresher Course on "Statistical Tools and Techniques for Analysis of Agricultural Data for the teachers and scientists of SAUs from July 8-28, 2020 conducted by AAREM in collaboration with Department of Mathematics and Statistics, CCSHAU, Hisar.
- Refresher course on "Statistical Methods and Data Analysis" for faculty members of CCSHAU and other universities in collaboration with Directorate of Human Resource, CCSHAU, Hisar.

### Department of Microbiology

- Twelve days International Indo-US-Afghanistan CAAI Workshop on "Capacity Development for Agricultural Innovation Systems: Agricultural Research and Climate-Smart Agriculture Approaches" from 7-18 March, 2020at CCSHAU campus.
- Two days Online Indo-US Afghanistan International Workshop on "Development of Essential Research Capabilities: Design, Implement and Perform Analysis in Applied Research" 23 & 29th June 2020.
- International Workshop on "Climate Change" on at 16th, 23rd, 30th July and 6th August 2020.
- Three days Online Indo-US Afghanistan International workshop on "Integrated Pest Management" 14, 15 and 22 September 2020.
- Two days Online International Webinar on "Deep learning for Detection and Management of Plant Disease" 8thand 12thMarch, 2021 in collaboration with Jagan Nath University, Bahadurgarh, India and CCSHAU, Hisar.
- Two days Online Indo-US Afghanistan International Workshop on "Training on Agribusiness Experiential Learning" on 5thand 6th April 2021.
- Three days Online Indo-US Afghanistan International workshop on "Basic and Advance Laboratory/Farm Technologies in Agriculture" on 28th-30th June, 2021.
- Webinar on "Evaluation of Zero Budget Natural Farming (ZBNF) Model under different Cropping Systems in Haryana" on 10th August 2021.
- Webinar on "Sustainable technologies for crop residue management" on 24th August 2021.

- International Webinar in the celebration of 'Azadi ka Amrit Mahotsava' on topic of "What can the Microbiome tell us about the Conditions in Agricultural Soil" on 29th September 2021.
- International Webinar in the celebration of 'Azadi ka Amrit Mahotsava' on topic of "Antibiotic Resistance in Agro environments between: Epidemiology and Microbial Ecology" on 24th May 2022.
- International Webinar in the celebration of 'Azadi ka Amrit Mahotsava' on topic of "Your Future after Undergraduate or Postgraduate Degree" on 9th September 2022.

**Centre of Food Science and Technology**

- "Fruits and Vegetables Processing" for SC youth at CFST, CCSHAU, Hisar from February 20-27, 2018
- "Fruits and Vegetables Processing" for SC youth at CFST, CCSHAU, Hisar from March 12-19, 2019
- "Fruits and Vegetables Processing" for SC Youth at CFST, CCSHAU, Hisar from February 26 to March 04, 2020
- "Food Processing and Value Addition" for ABIC Incubateesat CFST, CCSHAU, Hisar from January 15-16, 2021
- "Food Processing" for students from Amritsar Group of Colleges, Amritsar, Punjab from April 08-14, 2021
- "Food Processing and Value Addition" at CFST, CCSHAU, Hisar for Progressive and Innovative Farmers/Lady Farmers of Haryana from April 25-29, 2022 in CFST

**6.5.4.5. Examination and Evaluation Process:** *The evaluation of student's performance is a central task of College administration. A brief report on examination and evaluation process for UG, PG and Ph.D. be given separately mentioning external/internal components. System of evaluation should clearly be mentioned for UG, PG and Ph.D.*

The evaluation of P.G. students is internal. Academic performance of the students is reviewed annually on the basis of their performance in different courses and general conduct. Students whose performance is below prescribed standard (less than 6.5 for PG) are dropped out after one year and are informed that improvement in the future semester is necessary to obtain the minimum scholastic standards.

- The course work to be offered in M.Sc. or Ph.D. programme is designed for the individual student considering the research mandate of the department as well as state and national priorities in agriculture.
- Monitoring is done through mid-term and final exams and practical exams.
- Speaking assignments are also given.
- Performance reports or semester reports are provided to student and the major advisor.
- Once the programme of work is finalized, the student has to clear all the courses.
- The students also submit the synopsis of the proposed research work in M.Sc. and Ph.D. This is first evaluated by advisory committee and then presented in the department as synopsis seminar.
- The improvements are incorporated in accordance with the suggestions received. The synopsis is further evaluated by a concerned teacher and after addressing to his/her comments, submitted through HOD to Dean, Post Graduate Studies for approval.

### PG and Ph.D. Programs

**Examination System and Evaluation:** For theory, mid-term and end-term internal examinations are conducted. Two sets of question papers for each course are set for mid-term and end-term each and are submitted to the concerned HOD. For both mid-term and end-term date sheet is prepared at college level and examinations are conducted centrally. On the day of examination HOD selects one question paper for each course for distribution among students. Practical is also conducted internally by the course instructor. For practical courses, practical exams are conducted by the course teacher and one more teacher nominated by the HOD. Evaluation of both theory and practical is internal. Weightage for theory and practical examinations is given below:

| Credit hours (Theory and Practical) | Weightage/Marks | | |
|---|---|---|---|
| | Mid-Term | End-Term | Practical |
| 1 + 0 | 40 | 60 | - |
| 1 + 1 | 20 | 30 | 50 |
| 2 + 1 | 25 | 45 | 30 |
| 2 + 2 | 20 | 30 | 50 |
| 3 + 1 | 30 | 45 | 25 |
| 3 + 2 | 25 | 35 | 40 |
| 2 + 0 | 40 | 60 | - |
| 3 + 0 | 40 | 60 | - |
| 1 + 2 | 10 | 20 | 70 |

**Comprehensive Examination (Written and Viva-voce/Oral):** In Ph.D., after completion of 75% course work separately in major and minor subjects, written comprehensive exam is conducted. In major subject two papers are conducted and in minor subject one paper is conducted. Paper setting and evaluation is internal. Qualifying marks is 60%. Viva-voce/Oral comprehensive exam is conducted by external examiner and grading is satisfactory/ unsatisfactory.

### Thesis Evaluation

| Evaluation steps | Master's program | Doctoral program |
|---|---|---|
| i) Submission | After thesis seminar | • After thesis seminar<br>• One research paper should have been accepted/presentedin national/international/symposium/conference/seminar or one patent submitted/filed in lieu of the research publication out of the thesis work |
| ii) Evaluation | External (One examiner) | External (Two examiners) |
| iii) Viva Voce | Open Viva-voce: External Examiner, Advisory Committee, faculty members and students | Open Viva-voce: External Examiner, Advisory Committee, faculty members and students |
| iv) Assessment | Satisfactory/Unsatisfactory | Satisfactory/Unsatisfactory |

**Grading:** For PG and Ph.D. programs grading is done on a 10 point scale.

(i) Minimum passing grade in a course: 6.00
(ii) Minimum OGPA to continue and to obtain degree: 6.50

**6.5.4.6. NCC/NSS units:** *Clearly mention the existence and functioning of these units and how it is benefiting the student development. A brief report should be given (without photographers).*

The NCC/NSS units are available at university level for participation of students.

**6.5.4.7. Language Laboratory:** *It is required of any student to have a good command of the language for communication purpose, with clarity and accuracy being vital for effective and efficient communication. What helps one to acquire such proficiency in a language is the process and the method of learning that language. Mention which of these type of conventional, Lingua phone, Computer Assisted Language Laboratory and Multimedia Hi-Tech Language Laboratory are being used for language teaching in the College.*

Students are motivated to improve spoken English. In addition to routine teaching methods, teachers use smart classrooms, group discussions and internet use (YouTube) so that students have good command of the language. The college magazine published also gives a very good platform to improve language expression among students. LCD, audio visual aids, cassette recorders and computers are used by the faculty for effective teaching. Professional courses, experts lectures, seminars, workshops, conferences etc. are organized from time to time. The college has been making special drives to improve the communication skills of the students by organizing declamation contest, quizzes etc. Spectrum PG magazine is released bi-yearly by university.

**6.5.4.8. Cultural Centre:** *Does the College has cultural cent to empower student leaders to explorer, celebrate, and educate the campus community about the diversity among them? Does the College offers an inclusive and reflective space, multicultural programming and support services that encourage positive interaction, academic persistence and growth among students, faculty and staff?*

Yes, the following Cultural Forum has been constituted by the Dean, COBS&H for the College of Basic Sciences and Humanities.

| | |
|---|---|
| **Patron:** | Dr. Neeraj Kumar, Dean, COBS&H |
| **Advisors:** | Dr. Krishna Hooda, Professor, Languages and Haryanvi Culture |
| | Dr. Manju Singh Tonk, Professor and Head, Mathematics and Statistics |
| **President:** | Dr. Aparna, Professor and Head, Languages and Haryanvi Culture |
| **Vice-president:** | Dr. Rashmi Tyagi, Assistant Professor, Sociology |
| **Secretary:** | Dr. Seema Sangwan, Assistant Professor, Microbiology |
| **Joint Secretary:** | Dr. Devender Singh, Assistant Professor, Languages & Haryanvi Culture |
| **Treasurer:** | Dr. Ajay Pal, Assistant Professor, Biochemistry |

**Conveners of Various Committees**

| | |
|---|---|
| **Discipline:** | Dr. Rakesh Kumar, Assistant Professor, Microbiology (Convener) |
| | Dr. Subhash Chander, Assistant Professor, Sociology (Co-Convener) |
| **Function Arrangements:** | Dr. Kamla Malik, Assistant Scientist, Microbiology (Convener) |
| | Dr. Bas Kaur, Assistant Professor, Sociology (Co-Convener) |
| **Science Activities:** | Dr. Sushila Singh, Assistant Professor, Chemistry (Convener) |
| | Dr. Anita Kumari, Assistant Plant Physiologist, Botany and Plant Physiology, (Co-Convener) |
| **Literary Activities:** | Dr. Jayanti Tokas, Associate Professor, Biochemistry (Convener) |

| | |
|---|---|
| | Dr. Poonam Mor, Assistant Professor, LHC (Co-Convener) |
| **Theatre Activities:** | Dr. Sarita Devi, Assistant Scientist, Botany & Plant Physiology (Convener) |
| | Dr. Sheetal Chaudhary, Assistant Professor, Computer Section, (Co-Convener) |
| **Music and Dance:** | Dr. Mahender Kumar, Folk Musician, LHC (Convener) |
| | Dr. Sachin Kumari, Assistant Professor, Chemistry (Co-convener) |
| **Graphic Arts:** | Dr.Jatesh Kathpalia, Assistant Scientist. Sociology (Convener) |
| | Dr. Ravikant, Assistant Professor, Zoology (Co-convener) |

**Members**

1. Dr. Vinay Kumar, Assistant Professor, Physics
2. Dr. Meena Sindhu, Assistant Scientist, Microbiology
3. Dr. Shikha Mehta, Assistant Scientist, Microbiology
4. Dr. Anuj Rana, Assistant Scientist, Microbiology
5. Dr. Monika Kayasth, Assistant Microbiologist, Microbiology
6. Dr. Sushil Nagar, Assistant Scientist, Biochemistry
7. Dr. Rahul Kumar, Assistant Professor, Chemistry
8. Dr. Anushree, Assistant Chemist, Chemistry
9. Dr. Sarita Rani, Assistant Professor, Mathematics and Statistics
10. Dr. Vikash, Assistant Professor, Mathematics and Statistics
11. Dr. Shikha Ahlawat, Assistant Professor, Zoology

**The Dean COBS&H has constituted the following College Magazine Committee** to inform, inspire, entertain and create awareness on a number of current social issues to a diverse readership.

**Patron-in-chief**

**Dr. B.R.Kamboj**

Vice-Chancellor, CCS HAU, Hisar

**Patron**

**Dr. Neeraj Kumar**

Dean, COBS&H, CCS HAU, Hisar

**Science Section**

Dr. Leela Wati, Principal Scientist, Department of Microbiology

Dr. Seema Sangwan, Assistant Professor, Department of Microbiology

Dr. Ajay Pal, Assistant Professor, Department of Biochemistry

Dr. Vinod Goyal, Assistant Scientist, Department of Botany and Plant Physiology

**English Section**

Dr. Aparna, Associate Professor, Department of Language and Haryanvi Culture

Dr. Poonam Mor, Assistant Professor, Department of Language and Haryanvi Culture

Dr. Devender Singh, Assistant Professor, Department of Language and Haryanvi Culture

### Hindi Section

Dr. Krishna Hooda, Professor, Department of Language and Haryanvi Culture

### Extra/co-curricular Activity Section

Dr. Manju S. Tonk, Professor, Department of Mathematics and Statistics

Dr. Jatesh Kathpalia, Assistant Scientist, Department of Sociology

Dr. Rashmi Tyagi, Assistant Professor, Department of Sociology

### Layout and Designing

Dr. Sushila Singh, Assistant Professor, Department of Chemistry

Dr. Anita Kumari, Assistant Scientist, Department of Botany and Plant Physiology

Dr. Vinay Kumar, Assistant Professor, Department of Physics

### Student Editors

Ms. Sonam Sihag, Ph.D. Scholar, Department of Biochemistry

Ms. Shaikh Tabassum, Ph.D. Scholar, Department of Microbiology

Mr. Mukul, Ph.D. Scholar, Department of Botany and Plant Physiology

Ms. Nishu Sehrawat, M.Sc. Student, Department of Microbiology

Ms. Jyoti Yadav, PGDC, Department of LHC

## The Following Students got Prizes in the College, State and National Events

| Year | Name of students |
|---|---|
| **2018** | • Ms. Kavita Rani - Scientist Associate Award from "Society for Scientific Development in Agriculture and Technology", at "International Conference on GRISAAS-2018", Rajasthan Agricultural Research Institute, Durgapur, Jaipur, Raj., India.<br>• Ms. Dhinu Yadav - Best Oral Presentation Award during 2nd international conference on ABAS, 20-22 October, 2018, Swami Vivekanand Subharti University, Meerut, U.P. (India).<br>• Ms. Dhinu Yadav - Best Poster Award (Second position) during International Conference on GRISAAS, 28-30 October 2018, Rajasthan Agricultural Research Institute, Durgapura, Jaipur (India).<br>• Ms. Sonam Antil - S.R. Vyas Gold Medal for Academic session 2018-19. |
| **2019** | • Ms. Parvesh Devi - Best Paper (Oral) Presentation Award, Proceedings of International conference on Advances in Basic Sciences held at department of Physics GDC Memorial College,Bahal,Haryana on February 7-9, 2019<br>• Ms. Neelam Rani (2018BS16D) - 2nd position in Best Poster Presentation during Symposium on "Avenues and challenges in life science" on February 22, 2019 at St. Wilfred's PG College, Jaipur.<br>• Ms. Shikha Bidhan - Best Research Scholar Award - 2019 by Agricultural Technology Development Society, Ghaziabad (U.P) on the occasion of 3rd International Conference on Global Initiatives in Agricultural and Applied Sciences for Eco-friendly Environment from June 16-18, 2019 at Tribhuvan University, Kathmandu, Nepal.<br>• Ms. Manish Jangra (2018BS15D) - 1st position in Best Oral Presentations during International Conference on "Stewardship towards sustainability" from September, 6-7, 2019 at SGT University, Gurugram, Haryana<br>• Ms. Sonam Antil - Best Poster Award during Golden Jubliee International Conference on New Millennia Agriculture- Novel Trends and Future Scenario (GINMA), on 6-8 November 2019, CCSHAU, Hisar.<br>• Mr. Pankaj Sharma - Best Poster Award during 60th Annual Conference of Association of Microbiologists of India (AMI), 15-18 November, 2019, Central University of Haryana<br>• Ms. Diksha (2019BS27D) - S.R. Vyas Gold Medal for Academic session 2019-20<br>• Ms. Dhinu Yadav - Silver Jubilee Gold Medal for Women for Academic session 2019-20<br>• Mr. Naseer (2014FST39D)- Best Ph.D. Thesis award in 2019 by Society of Integrated Development of Agriculture, Veterinary and Ecological Sciences, Jammu |
| **2020** | • Ms. Savita Rani - Best Research Scholar Award during National Conference on Recent Trends and New Frontiers in Biotechnology, Agriculture Science and Environment (NCRTNFBASE) on 22- 23 February, 2020, St John's College, Agra.<br>• Ms. Barkha Rana - S.R. Vyas Gold Medal for Academic session 2020-21.<br>• Ms. Ritu Devi BEST ARTICLE AWARD: article id 31166, published in Volume 02, Issue 08 in Agriculture & Food: e-Newsletter, ISSN :2581 -831 on 14 August, 2020.<br>• Ms. Monika Moond BEST ARTICLE AWARD: article id 31456, published in Volume 02, Issue 09 in Agriculture & Food: e-Newsletter, ISSN :2581 -8317 on 15 September, 2020. |
| **2021** | • Ms. Neel Kamal - Best Student Award by Microbiologists Society, India for the Academic session 2020-2021<br>• Ms. Anu Bala 2019BS62D - Best poster award in International webinar on 'Alternative therapies to mitigate microbial resistance' from February 23-24, 2021 at ICAR-IVRI, Izatnagar<br>• Ms. Ankita (2018FST48M) -University Level Gold Medal in recognition of her having secured highest OGPA in M.Sc. for the year 2020-21 |

| | |
|---|---|
| **2022** | • Ms. Minakshi (2020BS04D) - 2nd position in Best Poster Presentation during National Symposium on "Crop protection through bio-rational approaches – current trends and future prospective & national meeting of Indian Plant Pathological Society (NZ)" on 10 March, 2022 at Department of Plant Pathology, College of Agriculture, CCS HAU, Hisar.<br>• Ms. Renu (2018BS28D) - Second prize in oral presentation in International Conference on "Recent Innovations in biological research, from March 17-18, 2022 at Krishnammal College for Women, Coimbatore, Tamil Nadu, India.<br>• Ms. Rashmita (2021BS06PGDC) - 1st prize in National Level Online Slogan Writing Competition organized by English Literary Society, Dyal Singh College, Karnal on 14 May,2022<br>• Ms. Alka (2018BS23D) - Third prize for the poster in XXXIV annual convention of Indian association of veterinary microbiologists, immunologists and specialists in infectious diseases and national conference on 'Current trends in immunodiagnostics & vaccinology for health of livestock and poultry' held at CAFT LUVAS from May 27-28, 2022.<br>• Ms. Rajita Beniwal - Best Paper award during the National conference on "Sustainable Environmental perspectives; A journey from Ancient India" organized by Environmental Studies and Department of Botany, Deendayal Upadhyaya College, University of Delhi in association with Paryanvaran Gatividhi, Sharanya (NGO), New Delhi on 5-6 June,2022 (online).<br>• Ms. Nidhi Sharma - Best Poster Award during International Conference on Recent Advances and Innovations in Biological and Applied Sciences (RAIBAS) on 14-16 June, 2022, SGT University, Gurugram.<br>• Ms. Aarti (2017BS32D) - 1st position in Best Oral Presentation during International Conference on "Recent advances and innovations in biological and applied sciences (RAIBAS 2022)" from June 14-16, 2022 at SGT University, Gurugram.<br>• Ms. Sapna (2017BS31D) - 2nd position in Best Poster Presentations during ISPP North Zonal Seminar-2022 on "Inter-disciplinary research strategies for climate resilient agriculture" on June 25, 2022, at Sugarcane Breeding Institute Regional Centre, Karnal<br>• Ms. Babita Rani (SRF) - 3rd position in Best Poster Presentations during ISPP North Zonal Seminar-2022 on "Inter-disciplinary research strategies for climate resilient agriculture" on June 25, 2022, at Sugarcane Breeding Institute Regional Centre, Karnal.<br>• Ms. Aarti (2017BS32D) - 3rd position in Best Oral Presentations during ISPP North Zonal Seminar-2022 on "Inter-disciplinary research strategies for climate resilient agriculture" on June 25, 2022, at Sugarcane Breeding Institute Regional Centre, Karnal.<br>• Ms. Diksha - Best Poster Presentation Award during 7th International Conference on "Opportunities and Challenges in Agriculture, Environmental & Biosciences for Global Development (OCEABGD) on 29-31 October, 2022, Goa University, Goa.<br>• Ms. Neelam Rani (2018BS16D) - 1st position in Best Poster Presentation during VIIth International Conference on "Global research initiatives for sustainable agriculture and allied science (GRISAAS-2022) " from November 21-23 2022 at Birsa Agricultural0 University, Ranchi, Jharkhand, India.<br>• Ms. Pooja Ahlawat (2019BS46D) - Received Best Article Award in Agriculture and Food: e-newsletter 04 (6), 2022 |
| | • Ms. Rashmita (2021BS06PGDC) 2nd prize in State Level Inter College Hindi Poetic Recitation (LHC)<br>• Mr. Manjeet (2022BS26PGDC) and Ankita (2022BS02PGDC) have been declared the best athletes of CCSHAU, Hisar |

**Students' participation in Co-Curricular Activities**

The University organizes Sports Day and Cultural Events where the faculty and staff participate. At college level, different events: Teacher's day, Fresher's day, Women's day *etc.* are organized.

College of Basic Sciences and Humanities won Runners Up Trophy during 50th Annual Athlete of CCSHAU, Hisar on December 08-09, 2022.

**6.5.4.9. Personality Development:** *Personality development programme is aimed at increasing employability of the students. Whether the College has provision for inclusion of functional grammar in Standard English, speaking skills, reasoning, group discussions interview skills. Personal interviews, quantitative ability, verbal ability, mock tests and some special sessions to promote the personality development in the students?*

Yes, the College provides overall personality development and encourages innovation, communication and other skill for better performance in today's competitive world. The following programmes and efforts are undertaken for personality development-

| **Skills development resources** | | |
|---|---|---|
| Resume making | Email writing | Language fluency |
| Vocabulary Skills | Public Speaking | Group Discussion (Hindi English) |
| Leadership Skills | Communication Skills | Personality Development (Hindi English) |
| Dress for Interview | Interview and its types | Mock Interview |
| SSB Interview | Check your Trainability | Check Your Employability |
| Evaluate Your Personality | Interview Behaviour and Body language (Hindi English) | |
| Phone Etiquettes | Self Confidence | Indian Agriculture |
| Interview's Questions and Answers (Hindi English) | | Download YouTube Video |
| Internship-A Pathway for Job Offer | | |

- **Workshops on "Personality Development and Communication Skills**" are also conducted from time to time for personal enrichment like power of positive thinking, interpersonal relationships and stress management.
- **Personality Development Trainings** are also conducted by the Directorate Students' Welfare in collaboration with the Department of Languages and Haryanvi Culture.
- **Visit for** PG students to national laboratories.
- P.G. students are exposed to Computers and software.
- Students are encouraged to publish their findings. This helps in their writing and expression skills.
- The students are included in Organizing committees for Seminar, conferences etc. This gives them enough exposure to improve organizational and career related skills.
- The students skill is also developed through educational trips.
- Classroom presentations, participation in national and international seminars, workshops give them confidence in Group discussion, Personal interview and socialization. It also encourages leadership, multiple intelligence and critical thinking.

### 6.5.5. PHYSICAL FACILITIES

**6.5.5.1. Hostels:** *Clearly mention the number of hostels available for the College students for boys and girls, separately with its total capacity, students per room accommodated in each hostel, mess facility, drinking water, indoor games specially for girls, cleaning of hostel premises, transport facility, emergency medical facility etc.*

#### Hostel Facilities

- The accommodation is provided in seventeen (17) hostels of the University out of which thirteen (13) are at Hisar Campus (five for male, seven for female and one for PG married students). Depending upon availability, the hostel accommodation is provided.
- For girl students' accommodation is provided in Gangotri, Yamnotri, Godavari, Narmada and Women Scholar hostels. M.Sc. students share rooms (double occupancy) while Ph.D. students are provided single accommodation.
- Similarly, for Boys students' accommodation is provided in different hostels of the university.
- The hostel residents are provided R.O. water, TV, Magazines, newspapers and indoor games for recreation. The selected hostels have tennis courts also.
- All the hostels are cleaned and maintained regularly.
- The Hostels are equipped with the facilities such as Wi-Fi, LED with dish antennae, solar water-heating system, gas connection, furnitureand water coolers with purifier system are provided.
- All Mess of hostels are running on cooperative basis.

#### Transport Facility

It is provided on case to case basis as and when required. The vehicles can be requested from the transport office of the university for visits under different courses and educational tours.

#### Students' Counselling and Placement Cell

- The Counselling and Placement Cell of the Directorate in association with the Department of Employment, Haryana, has set up as University Employment Information and Guidance

Bureau, which provides information to the students on job opportunities, competitive examinations, scholarships /fellowship etc.

- It also conducts trainings/coaching classes for the entrance examinations and explores job opportunities in the public and private sectors and arranges the campus interviews.
- The Cell also brings out a fortnightly newsletter 'Career Bulletin' for students of the University to keep them abreast of information on job opportunities, admissions, scholarships, fellowships etc. in India & abroad.

**Medical Services**

**MedicalassistancetoStudents: Health Centre, Health Insurance etc.**

- There is a well-equipped 20 bed Hospital in University campus at Hisar. Round the clock medical aid is provided to the students, University Employee and their dependants and other trainees/visitor.
- The Hospital has Senior Medical Officer, 4 Medical Officer, Dentist, Nursing Sister (one each) and 4 staff nurses. Round the clock medical aid is provided to the students, University Employee and their dependants and other trainees/visitors.
- Causality services are run round the clock. Special Immunization Clinic, T.B.Clinic, Diabetic and Antenatal Clinic is run once every week. For chronic disease patient's medicines for two weeks are being provided and supervised. The outdoor/emergency patients are attended by the Senior Medical Officer and Medical Officers and Indoor facility is also available in the hospital round the clock.
- The Dental Surgeon also provides the service of RCT+ Dental surgical procedure of the patient and dental unit has been made Air-conditioned for better care facility of the patients. X-rays of the employees and their dependents of CCSHAU/LUVAS are being done in the department of Vet. Clinics. Facility i.e. ICU, X-Rays of Dental and lab tests are performed in the Campus Hospital.
- There is Amartya Shiksha Yojana and Personal Accident Policy for which Rs 100/- is charged at the time of admission to cover accidental insurance of Rs. 1,00,000/-.

**6.5.5.2 Examination Hall:** *Mention the availability of number of examination halls, its capacity etc. for the college.*

Yes, there is one examination hall with Dean's office. Seminar rooms of different departments are also used for examination purpose.

**6.5.5.3. Sports and Recreation Facilities:** *Clearly mention the number of indoor and outdoor sports facilities available for the College students. A brief note on day to day management and use of these facilities shall be provided in the report.*

Yes, the College has central facility of Giri Centre for student welfare, sports and recreation activities.

- It has two indoor Badminton Courts with a seating capacity for 600 spectators, two indoor Squash Courts, Hobby Rooms, two multi-purpose indoor Gymnasiums, two outdoor Tennis Courts with a reasonable seating capacity. Grounds / courts / tracks /links are available in the University Sports Complex.

- A Synthetic Track of international standard has also been provided in the Giri Centre for Athletic.
- Volleyball grounds have light arrangements for playing at night. Hockey, Football and Cricket grounds are well maintained.
- The Directorate of Students' Welfare is also responsible for promotion of all co-curricular activities such as Sports, NCC, NSS, Mountaineering and adventure, Graphic Arts, Literary, Music, Dance, Dramatics etc.
- For promotion of these activities, regular classes and various trainings/ workshops are arranged from time to time.
- The college organizes Talent Search programmes, sport activities and cultural programmes regularly
- The Directorate of Students' Welfare is also responsible for promotion of all co-curricular activities such as Sports, NCC, NSS, Mountaineering and adventure, Graphic Arts, Literary, Music, Dance, Dramatics, NIS etc.
- Regular classes and various trainings/ workshops are arranged from time to time.

**6.5.5.4. Auditorium:** *Does the College has auditorium? Mention its year of construction, sitting capacity and how frequently being used for the College functions.*

Yes, the auditorium of the college was constructed in1976 which is used for college functions such as holding large scale meetings, conferences, seminars, workshops, Fresher's Day etc. It has seating capacity of 315 persons. The auditorium is air conditioned and has state of art sound system, podium etc. The auditorium is used regularly for college level as well as university level functions.

**6.5.5.5. Exhibition Hall / Museum:** *Does the College have the Exhibition: Does the College have the Exhibition Hall/Museum? Mention about its use and special events being conducted in these units.*

Yes, the college hasExhibition Hall and is used time to time for following activities :-

- Display of Teaching, Research, Extension and Extra co-curricular activities of college
- Technologies developed, publications and showcase of various achievements.

### 6.5.6. RESEARCH FACILITIES

**6.5.6.1. Postgraduate Laboratories and Equipment's:** *Clearly mention the department wise PG laboratories and equipment housed in individual laboratory in the College along with any other research unit.*

Yes, the College has the following Postgraduate Laboratories:

**Post Graduate Labs with College**

| Departments | | Number | Lab no. | Location | Facility in the lab |
|---|---|---|---|---|---|
| **Biochemistry** | **:** | 01 | 421 | Department | Facilities to conduct different Courses Practical |
| **Botany and Plant Physiology** | **:** | 01 | 324 | Department | Facilities to conduct different Botany and Plant Physiology Courses Practical |
| **Chemistry** | **:** | 01 | 409 | Department | Burette, Pipettes, other Glassware, Reagents, Chemicals, Furnace etc. |

| | | | | | |
|---|---|---|---|---|---|
| **Mathematics and Statistics** | **:** | 01 | 15 | Department | Total computers = 16, 10 Computers are connected with Internet Facility along with one common/ attached printer. The Statistical Softwares SAS, R, SPSS etc. are available to conduct the PG Practicals |
| **Microbiology** | **:** | 01 | 215 | Department | Facilities to conduct different Classes/Practicals |
| **Molecular Biology, Biotechnology and Bioinformatics** | **:** | 01 | 104 | COBT | Experiments under different Courses are conducted in this lab |
| **Physics** | **:** | 01 | 403 | Department | Physics Practicals |
| **Sociology** | **:** | 01 | 211 | Department | Facility to conduct different courses practical |
| **Zoology (UG and PG)** | **:** | 01 | Zoo 315 | Department (common with UG Lab) | Facilities to conduct practicals of different courses |
| **Computer Section** | **:** | 01 | Lab-II | Computer Section | Desktop Computers with Internet and various Programmes |
| **Total** | **:** | **10** | | | |

**6.5.6.2. Research Contingency:** *A note on amount of research contingency for each department shall be provided. Whether it meets the students' demand?*

Yes, the detail of amount of research contingency of each department are as under:

| **Name of theDepartment** | **Research Contingency in Rs.** | | | | | |
|---|---|---|---|---|---|---|
| | **2018-19** | **2019-20** | **2020-21** | **2021-22** | **2022-23** | **G. Total** |
| Biochemistry | 1404330 | 1418000 | 36973700 | 28004000 | 2738100 | 70538130 |
| Chemistry | 571000 | 1383000 | 32173500 | 25935340 | 821140 | 60883980 |
| Zoology | 1114190 | 993790 | 707090 | 711500 | 2622600 | 6149170 |
| MBB | 2007000 | 2180870 | 2894000 | 3890000 | 3162000 | 14133870 |
| Mathematics and Statistics | 19800 | 14760 | 19760 | 36500 | 66030 | 156850 |
| Physics | 101557 | 795608 | 878238 | 26156016 | 1012378 | 28943797 |
| Botany and Plant Physiology | 485841 | 242535 | 248696 | 13892647 | 5560534 | 20430253 |
| Microbiology | 3718600 | 3874000 | 41367630 | 22306010 | 4747000 | 76013240 |
| Food Science &Technology | 13792 | 164408 | 369807 | 388280 | 799327 | 1735614 |
| Sociology | 212800 | 50200 | 45200 | 70000 | 79050 | 457250 |

**Whether it meets the students' demand: Yes**

### 6.5.7 Outcome/ Output

- The College develops learning outcomes through students' feed back
- The institution monitors and communicates the progress and performance of students during the course/programme through Dean, PGS and Registrar.
- All P.G. courses have practical as well as research component.
- All the M.Sc. and Ph.D. programmes offered by the college have compulsory research component and there is a students' placement cell.
- The students' performance and learning outcomes are used for planning and over coming barriers of learning as feedback of the students is taken into consideration and courses are revised as per Dean Committee report.
- The institution monitors and ensures the achievements through placement of students in different organization.
- The institution and individual teachers use assessment/ evaluationas an indicator for student performance.

**6.5.7.1 Student Performance in JRF/SRF/NET/ARS and other National Examinations:** *Provide detailed information in tabular form about student performance in JRF/SRF/NET/ARS and other national examinations for the last five years. Only those students receiving fellowships should be mentioned here.*

A. **Students performance in NET/ARS/GATE or any other examination:**

A total of two hundred seven (207) students cleared NET/ARS/GATE etc. Details are in **Department Annexure VII.**

**B. Students recipient of fellowships other than university merit fellowship (Student Academic Award)**

A total of one hundred twenty eight (128) students received fellowships/scholarships during the period under report as listed below:-

| 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | **Total** |
|---|---|---|---|---|---|
| 21 | 39 | 33 | 17 | 18 | 128 |

***Department AnnexureVIII***

**6.5.7.2 Student Placement Profile:** *Provide detailed information in tabular form about student performance in ARS/and other national examinations/State level examinations or equivalent. Year wise placement profile shall be provided.*

**Students Placement:**

One hundred thirty six (136) were placed as ARS scientists, Scientists, Lecturer, Asstt. Professor, Research Associate, SRF and private jobs. The details are listed in individual SSRs for programmes of the departments. A summary of Students placements is given in **Department Annexure V**.

**6.5.7.3 Awards/Recognitions/Certificates:** *Provide information on awards/recognitions/certificates in tabular form for last five years separately for students and faculty.*

### Awards/Recognitions/Certificates received by students

**Dr. S.R. Vyas Gold Medal** (Best student in M.Sc. Microbiology based on OGPA)

| Sr. No. | Year | Students' Name |
|---|---|---|
| 1 | 2018-19 | Ms. Sonam Antil |
| 2 | 2019-20 | Ms. Diksha |
| 3 | 2020-21 | Ms. Barkha Rana |

- Three students from Department of Microbiology were conferred with Silver Jubilee Gold Medal for Women for best Ph.D. Thesis

### Awards/Recognitions/Certificates received by faculty

- Five faculty members have received ICAR sponsored "Best Teacher Award" of the University.

### International Achievements:

**A. Awards/Recognitions/Certificates received by faculty:**

- Conferred with certificate of excellence in reviewing by Asian Research Journal of Agriculture in recognition of outstanding contribution to the quality of journal, Regent Street, London, UK (Certificate No: SDI/HQ/PR/Cert/90870/DRB).
- Seven faculty members (Dr. Ajay Pal, Dr. Jayanti Tokas, Dr. Sarita, Dr. Anju Kumari, Dr. Kamla Malik, Dr. Seema Sangwan and Dr. Rahul Dhaka) participated in International training under NAHEP – Institutional Development Plan Project (IDP) sponsored by Indian Council of Agricultural Research and World Bank.

**i) Patents applied**

**1. Six faculty members from College of Basic Sciences and Humanities have applied for patents**

- Patents applied: 11

  Department of Biochemistry: 202211056375, 201811004928

  Department of Food Science and Technology: TEMP/E-1/17799/2018-DEL, 202011032917TEMP/E-5/1008/2021/DEL

  202111054589TEMP/E-1/61853/2021-DEL

  Department of Chemistry: Temp/E-1/568507/2019-DEL, Temp/E-1/24987/2019-DEL, 21pp. 2008DE01624 A 20110429, 202211021310 A, 202211021311 A

  Department of Microbiology: TEMP/E-1/45495/2021 DEL
- Patent published: 01

  Department of MBB&B: 201811012100
- Patents granted: 02

  Department of Biochemistry: Patent No. 247904

  Department of Microbiology: Patent No. 303453

**B. Research Projects of faculty from outside Agency:** The faculty received 14 research projects from agencies like ICAR,DBT,DST,UGC etc. This is in addition to state funded research projects in each department. Details are provided in **Annexure COBSH-I (Page No. 405)**

**C. Publications of the Faculty:** The faculty has published Research papers, books, book chapters and manuals. These are listed in **Annexure COBSH-II (Page No. 408).**

**D. Participation of Faculty in Conferences/ Seminars/ Workshops etc.:**
The faculty members attended a number of conferences, workshops, trainings and seminar as given in **Annexure COBSH-III (Page No. 428)**

**6.5.7.4. Employability:** *What are the set of achievements such as skills, understandings and personal attributes that make College students more likely to gain employment and be successful in their chosen occupations, which benefits themselves, the workforce, the community and the economy?*

- The Counselling and Placement Cell of the Directorate in association with the Department of Employment, Haryana, has set up a University Employment Information and Guidance Bureau, which provides information to the students on job opportunities, higher education, competitive examinations, scholarships /fellowship etc.
- It conducts trainings/coaching classes for the entrance examinations and explores job opportunities in the public and private sectors and arranges the campus interviews. This has helped the students to go for higher studies. About 61% students of our college opt for Ph.D.
- A fortnightly newsletter 'Career Bulletin' brought about by the cell of the University helps the students to be abreast of information on job opportunities, admissions, scholarships, fellowships etc. in India and abroad.
- University website also informs trainings, interview schedules and skill development courses.
- The Directorate of Student's Welfare organizes various coaching classes for competitive exams regularly covering in Banking, Defence sector, ICAR- JRF/SRF, CSIR-NET/JRF etc.
- Seminars workshops are organized for international fellowships such as Monsanto Beachell-Borlaug International Scholarship programme.
- The Counselling and Placement Cell also guides and provides relevant information for financial assistance to students for setting up their own ventures and encourage entrepreneurship.
- Science Forum of the University provides chance to students for interaction with CEO/ other officers/ Alumni. Students also interact with eminent personalities during their visit and plan the areas of possible future research.
- A number of students are being benefitted and get opportunity to work in the international laboratories.
- Exchange/collaborative program for teaching and research with other Agricultural universities/ institutes provides a platform for student mingle with experts of other organizations. At present university has MoU with PAU, Ludhiana; Tech. Institute of Textile and Sciences, Bhiwani; Centre for Plant Biotechnology, Hisar; Haryana Space Applications Centre, Hisar, Govt. of Haryana; CIMMYT, New Delhi; Central Soil Salinity Research Institute, Karnal; Sugarcane Breeding Institute, Coimbatore; ICAR-Directorate of Mushroom Research, Chambaghat, Solan (HP); Director of Wheat Research, Karnal; ICAR-Central Institute of Post harvest Engineering & Technology, Ludhiana.

**6.5.8.** SSR of the College must have the SSR of all its Degree Programmes (following section 6.4), then the report of the Colleges shall be considered:

Yes, SSR of this College has included SSR of all its degree programmes.

**6.5.9.** Certificate (Applicable when SSR is submitted for Programmes & College).
I, the Dean, **Dr. Neeraj Kumar** hereby certify that the information contained in Sections 6.4 and Section 6.5.1 to 6.5.7.4 are furnished as per the records available in the College and Degree awarding University.

**Signature of the Dean of the College with Date & Seal**

**6.5.10.** Each College shall submit SSR as mentioned in 6.5.8. It shall be prerequisite for the SSR of the Agricultural University.

# PROGRAMMES

1. M.Sc. Biochemistry and Ph.D. Biochemistry
2. M.Sc. Botany & Plant Physiology and Ph.D. Botany & Plant Physiology
3. M.Sc. Chemistry and Ph.D. Chemistry
4. M.Sc. Food Science & Technology and Ph.D. Food Science & Technology
5. M.Sc. Math & Statistics and Ph.D. Math & Statistics
6. M.Sc. Microbiology and Ph.D. Microbiology
7. M.Sc. Molecular Biology and Biotechnology and Ph.D. Molecular Biology and Biotechnology and M.Sc. Bioinformatics
8. M.Sc. Physics and Ph.D. Physics
9. M.Sc. Sociology and Ph.D. Sociology
10. M.Sc. Zoology and Ph.D. Zoology
11. Languages and Haryanvi Culture
12. Computer Section

# M.Sc. Biochemistry
# and
# Ph.D. Biochemistry

## 6.4 About the Department

The department of Biochemistry runs excellent teaching programs at M.Sc. and Ph.D. degree levels. Annually, the department offers 3 UG courses and 18 PG courses in Biochemistry discipline. The current areas of research in Biochemistry are: plant biochemistry, enzymology, biochemistry of fruits during ripening and post-ripening, molecular biology, biochemical and molecular mechanism(s) of abiotic stresses and nanotechnology for plant growth and protection. The Department has successfully completed a number of research projects funded by other agencies (ICAR, DBT, CSIR etc.). The research findings from various research programs in Biochemistry have been presented in the national and international conferences/symposia and also published in the form of a large number of research papers in reputed journals. Apart from various research programs being carried out in the department, its faculty is extending support to other departments of the university in interdisciplinary co-ordinated research programs particularly in the areas of Biotechnology and Molecular Biology, Microbiology, Agronomy and Genetics and Plant Breeding. In recognition of the excellent research activities in the department, many of its faculty members and students have been conferred with national scientific awards and visiting fellowships.

The department has a team of highly qualified and experienced faculty who has shown excellence both at the national and international levels.

### Objectives of the Department

- To impart quality education to the UG and PG students of different colleges of the University and to develop human resource specialized in various aspects of basic and applied Biochemistry
- To carry out biochemical studies in relation to improvement of field, vegetable and fruit crops
- To synthesize and characterize nanomaterials for plant growth and protection

### 6.4.1. Brief History of the Degree Programme: *Clearly mention in which year the Degree Program was initiated along with its objective and accomplishments.*

M.Sc. and Ph.D. degree programme in Biochemistry were initiated in 1970

### Objectives of Initiating M.Sc. Programme

- To produce quality human resource in the discipline of Biochemistry
- To develop technologies that can contribute towards employment generation and increased avenues for self-employment
- To provide training and specialization to students in following research areas:
  - Biochemical and molecular evaluation of varieties for quality improvement and anti-nutritional factors
  - Biochemistry and molecular biology of biotic and abiotic stresses in plants
  - Biochemistry of fruits and vegetables during ripening and post-ripening
  - Manipulation of metabolic pathways at molecular level to increase shelf life of fruits
  - Manipulation of metabolic pathways for reserve biosynthesis and utilization
  - Enzyme engineering and functional genomics/proteomics
  - Bioactive principles of agro-industrial products and by-products

### Accomplishments of M.Sc. Programme

- Till date the department of Biochemistry has conferred degrees to 218 M.Sc. students. During the period under report 17 students have completed their Master's degree **(Annexure BIOCHEM- I).** Eleven M.Sc. students are on roll **(Annexure BIOCHEM- II).**

- The department has well developed infrastructure for the M.Sc. programme with seminar rooms and well-equipped laboratories.
- Three students participated in conferences and symposia **(Annexure BIOCHEM- III),** and published 11 research papers **(Annexure BIOCHEM-IX)**
- Four students have been placed in public and private sector jobs **(Annexure BIOCHEM-V).**
- Two students have been availing national level scholarships from ICAR (NTS) **(Annexure BIOCHEM-VI)** and three M.Sc. pass-out students cleared NET Exam **(Annexure BIOCHEM- VII)**. Most of the other students are getting merit fellowship/ stipend from the University.

### Objectives of Initiating Ph.D. Programme

- To produce quality human resource in the discipline of Biochemistry
- To provide training and specialization to students in following research areas
- Biochemistry and molecular biology of biotic and abiotic stresses in plants
- Biochemistry of fruits and vegetables during ripening and post-ripening
- Manipulation of metabolic pathways at molecular level to increase shelf life of fruits
- Immobilization of industrially important enzymes
- Manipulation of metabolic pathways for reserve biosynthesis and utilization
- Enzyme engineering and functional genomics/proteomics
- Bioactive principles of agro-industrial wastes
- Biochemical and molecular evaluation of varieties for quality improvement

### Accomplishments of Ph.D. Programme

- Till date the department of Biochemistry has conferred degrees to 98 Ph.D. students.
- Since 2018 to October 2022, 6 students have completed their Ph.D. degree and 17 students are on roll. **(Annexure BIOCHEM-I and II).**
- Forty three Ph.D. students participated in conferences and symposia **(Annexure BIOCHEM-III).** Most of the students attended and participated in more than one symposium/ conference.
- Nine students have been placed in public and private sector jobs **(Annexure BIOCHEM-V)**
- Seven students have qualified NET, GATE and other national level exams **(Annexure BIOCHEM- VII)**
- Eight students have been availing national level scholarships like PM Fellowship, CSIR JRF, NFOBC etc. and most of the other students got fellowships/ stipend from university. **(Annexure BIOCHEM-VIII)**
- Ph. D students published 29 research papers **(Annexure BIOCHEM-IX)**
- Ms. Kajal Kumari has filed a patent application on “Method for xylan extraction from corncob and wheat bran”, Application No.: 202211056375, filed on 30.09.2022, Inventors: Sushil Nagar, Kajal Kumari, Vinod Kumar

### Student Data for the Last Five Years

| Name of the Department | Biochemistry | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Degree programme offered by the department | Specialization | Year of start | No. of Seats | | | | | | No. of students passed out | | | | | |
| | | | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total |
| M.Sc. | Biochemistry | 1970 | 4 | 6 | 4 | 6 | 4 | 24 | 3 | 1 | 5 | 5 | 3 | 17 |
| Ph.D. | Biochemistry | 1970 | 3 | 5 | 3 | 4 | 2 | 17 | 0 | 1 | 1 | 2 | 2 | 06 |
| | | Detail in Annexure BIOCHEM- I | | | | | | | | | | | | |

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of research staff, extension staff, contractual faculty, guest faculty adjunct faculty or any other arrangements is being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Designation | Sanctioned | in place* | Vacant |
|---|---|---|---|---|
| 1. | Professor and equivalent | 02 | 0 | 02 |
| 2. | Associate Professor and equivalent | 02 | 01 | 01 |
| 3. | Assistant Professor and equivalent | 06 | 03 | 03 |
| | Total | 10 | 04 | 06 |

** The faculty under Professor and also includes personal promotes.*

***Note:** All the faculty of this programme is assigned the responsibilities for the multiple programmes.*

### Faculty Profile

At present there is one Associate Professor (promoted under CAS) and six Assistant Professors/ equivalents out of which three Assistant Professor/equivalents are posted outside the department. The faculty attended various seminars, conferences, workshops at national and international levels regularly. Faculty of the department published more than 90 research papers in journals of national and international repute, 12 book chapters in last five years. The faculty has handled a number of projects funded by other agencies.

One vacancy of Associate Professor/equivalents and one vacancy of Assistant Professor have already been advertised.

| S. No. | Name | Designation | Email and Mobile No. | Specialization |
|---|---|---|---|---|
| 1 | Dr. Jayanti Tokas | Associate Professor | jiyaccshau@gmail.com 9729989988 | Plant Biochemistry, Post-Harvest Biochemistry of Fruits, Nutritional Biochemistry |
| 2 | Dr. Ajay Pal | Assistant Professor | ajaydrdo@rediffmail.com 9466534456 | Nanotechnology, Plant Biochemistry, Enzymology |
| 3 | Dr. Nisha Kumari* | Assistant Scientist | nishaahlawat211@gmail.com 9468117723 | Plant Biochemistry, Oil Seed Quality |
| 4 | Dr. Shiwani Mandhania* | Assistant Scientist | smbiochem@gmail.com 9466812467 | Plant Biochemistry, Cotton Biochemistry |
| 5 | Dr. Sushil Nagar | Assistant Scientist | sushil661@gmail.com 9813448824 | Enzymology, Plant Biochemistry |

| | | | | |
|---|---|---|---|---|
| 6 | Dr. Neeraj Kharor* | Assistant Scientist | Nkharor@gmail.com 8587871988 | Animal Biochemistry, Forage quality attributes |
| 7 | Dr. Vinod Kumar | Assistant Scientist | sangwan.vinod@hau.ac.in 9548057828 | Plant Biochemistry, Nutritional Biochemistry |
| Faculty Retired during 2018-22 | | | | |
| 1 | Dr. L.K. Chugh | Senior Scientist | chuglk@yahoo.co.in 9416485109 | Pearl Millet Biochemistry |
| 2 | Dr. H R Singhal | Professor | singalhr59@gmail.com 9416489005 | Plant Biochemistry |
| 3 | Dr. Veena Jain | Principal Scientist | Veena.nicejain@gmail.com 9416993463 | Plant Biochemistry |

***Faculty posted in COA, Hisar***

## Other Achievements of the Faculty

- Dr. Ajay Pal conferred with '**Best Researcher Award'** in the International Scientist Awards, 2019 on Engineering, Science and Medicine by VDGOOD-Technology Factory, 16 November, 2019.
- Dr. Jayanti Tokas got **Outstanding Scientist Award** in the International Best Scientist Awards, 18$^{th}$ – 19$^{th}$ January, 2020, New Delhi, India, organized by VDGOOD Professional Association.
- Dr Jayanti Tokas got **Best Poster Award** in Golden Jubilee International Conference on New Millenia Agriculture- Novel Trends and Future Scenario, 6$^{th}$ – 8$^{th}$ November, 2019 at CCS Haryana Agricultural University, Hisar, Haryana.
- Dr Nisha Kumari received **"Young Scientist Award"** in International Conference on "Recent Advances in Agricultural, Environmental and Applied Sciences for Global Development", 27$^{th}$ - 29$^{th}$ September, 2019, Dr.Yashwant Singh Parmar University of Horticulture and Forestry, Nauni, Solan, Himachal Pradesh.
- Dr. Shiwani Mandhania filed a **patent (Application No.: 201811004928**) on **"**A method for removal of gossypol from cotton seed" during 2018.
- Dr. L.K. Chugh and team of Bajra section was awarded appreciation certificate by the Project Director (Pearl Millet) for the **Best AICRP centre** for the period 2013-18 on 24$^{th}$ March, 2018 during Annual Group Meeting of Pearl Millet.
- Dr. Neeraj Kharor and team of Bajra section, awarded **Best ICAR-AICRP Centre Award** (2021-22) for significant contribution in the field of Pearl Millet Improvement in the 57$^{th}$ Annual Group Meeting of All India Coordinated Research Project on Pearl Millet held online from 2$^{nd}$ – 3$^{rd}$, March 2022.
- Dr. Neeraj Kharor and team of Forage section, CCS HAU Hisar AICRP on Sorghum, Hisar Centre received **Best Center Award** for the overall performance during the period 2021-2022 on 29$^{th}$ April, 2022.
- Dr. Vinod Kumar won **Best Oral Presentation Award** in National Conference "Himalayan Cereals for Food and Nutritional Security: Currents Status and Opportunities" held at Department of Biochemistry, GB Pant University of Agriculture and Technology, Pantnagar on 6$^{th}$ September, 2022.
- Dr. Vinod Kumar has filed a **patent application** on "Bottle Gourd (*Lagenaria siceraria*) Tablet Preparation Incorporated with Biocellulose from *Gluconacetobacter liquefaciens* and a Method Thereof" **Application No.: 202211056545**, filed on 1$^{st}$ October, 2022, Inventors: Anju Kumari, Anil Panghal, Ritu, Rakesh Kumar, Bharti Dixit, Rakesh Gehlot, D S Duhan, Vinod Kumar.
- Dr. Sushil Nagar received "**Research Excellence Award 2021**" from Institute of Scholars Society.

**6.4.3. Technical and Supporting Staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Designation | Sanctioned | In place |
|---|---|---|---|
| 1. | **Office staff** | | |
| | Assistant | 1 | 1 |
| | Clerk | 1 | 0 |
| | PA/Steno | 1 | - |
| | Messenger | 1 | - |
| 2. | **Lab staff** | | |
| | Lab Assistant | 2 | - |
| | Any other (SLA) | 2 | 2 |
| 3. | **Field staff** | | |
| | Beldar | 1 | - |

Note: All the staff is assigned the responsibilities for the multiple programmes.

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the Degree Programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention Theory and practical batches for the Degree Programme.*

**List of classroom and functional laboratories**

| Laboratories | Activities |
|---|---|
| No of lecture room with seating capacity | One with seating capacity of 50 |
| No of lecture room with LCD | One |
| Net houses | Five |
| No of laboratories with specialized purpose | Five research Lab, One UG and one PG |
| | **Biochemistry Lab No. 415:** Differential expression of proteins and their studies |
| | **Biochemistry Lab No. 417:** Synthesis and application of nanoparticles in agriculture |
| | **Biochemistry Lab No. 420:** Isolation and evaluation of bioactive principles |
| | **Biochemistry Lab No. 424:** Evaluation of food and fodder crops for quality traits and anti-nutritional factors |
| | **Biochemistry Lab No. 432:** Purification, characterization and immobilization of microbial enzymes |

The facilities in the department are sufficient to meet the requirements of the course curricula.

**List of Equipment's in the Department:**

| Sr. No. | Location/Lab | Name of Equipment |
|---|---|---|
| 1. | Lab No. 415 | Deep Fridge (-20°C), pH Meter, 2D Gel Electrophoresis System, Visible Spectrophotometer, Weighing Balance, Double Beam UV Visible Spectrophotometer, Water Bath, Refrigerator |
| 2. | Lab No. 417 | Mili-Q Water Purification System, pH Meter, Weighing Balance, Double Beam |

| | | |
|---|---|---|
| | | UV Visible Spectrophotometer, Refrigerated Centrifuge With Accessories, Horizontal Electrophoresis, Vertical Electrophoresis, Water Bath, Refrigerator, Vortex Shaker, Magnetic Stirrer |
| 3. | Lab No. 420 | Rotary Evaporator, Probe Sonicator, Weighing Balance, Refrigerated Centrifuge With Accessories, Refrigerator, Vortex Shaker, Magnetic Stirrer |
| 4. | Lab No. 424 | pH Meter, Atomic Absorption Spectrophotometer, Gel Documentation System, Microwave Digestion System, Ice Flaker, High Pressure Liquid Chromatography (HPLC) System, Weighing Balance, Visible Spectrophotometer, Double Beam UV Visible Spectrophotometer, Thermocycler, Refrigerated Centrifuge With Accessories, Horizontal Electrophoresis, Vertical Electrophoresis, Water Bath, Refrigerator, Vortex Shaker, Magnetic StirrerBiosafety cabinet |
| 5. | Lab No. 432 | Freeze Dryer , Orbital Shaker Incubator, Fourier Transform Infrared Spectroscopy (FTIR), Deep Fridge (-80°C), Deep Fridge (-20°C), pH Meter, Cold Storage Cabinet, Particle Size Analyzer (Psa), Mili-Q Water Purification System, Visible Spectrophotometer, Bath Sonicator, Weighing Balance, Double Beam UV Visible Spectrophotometer, Refrigerated Centrifuge With Accessories, Horizontal Electrophoresis, Vertical Electrophoresis, Water Bath, Refrigerator, Trans-Illuminator, Vortex Shaker, Magnetic Stirrer, Biosafety cabinet |

### Theory and Practical Batches

At UG level, the Department of Biochemistry offers one UG Course to undergraduates of College of Agriculture, one UG course to undergraduates of College of Fisheries Sciences and one UG Course to undergraduates of I.C. College of Home Science. All the courses have practical components.

- For course Biochem 101 offered to CoA in sem 1$^{st}$ (4yr prg) has two sections at CoA Hisar, and one section at CoA Kaul in with an average of about 30-40 students with two practical groups in each section. One section is at CoA Bawal (6 yrprg) with an average of about 30-40 students with two practical groups in each section.
- For course Biochem 102 offered to COHS in sem 1st has one theory batch with an average of about 60-70 students with two groups for practical classes.
- The course AQC 102 offered to CoFS in sem1st (4yr prg) one section with an average of about 20 students with one practical group in section.
- At M.Sc. level, the department of Biochemistry offers M.Sc. degree in Biochemistry. In M.Sc. Biochemistry, there are 10 courses out of which 3 courses have practical component.
- At Ph.D. level, the department of Biochemistry offers Ph.D. degree in Biochemistry. In Ph.D. Biochemistry, there are 8 courses out of which 1 course have practical component.

**6.4.5. Conduct of Practical and Hands-on-training:** *It is important to have a sound grasp of the theory that underlines any professional degree. But there are some skills that can only be learned through hands-on –practice. It is important that much of the learning material in any given course should be provided in way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hand-on-training as per curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical courses | Course details | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|---|---|

| | | | | |
|---|---|---|---|---|
| B.Sc. (Hons) Community Science | 1 | 1 | 1 | |
| | BIOCHEM 102 | BIOCHEM 102 | Qualitative and quantitative tests for carbohydrates, lipids, proteins, amino acids and vitamin-C; determination of pH, analysis of proximate constituents in food | Basic knowledge about the course 'BIOCHEM 102' |
| B.Sc. (Hons) Agriculture | 1 | 1 | 1 | |
| | BIOCHEM 101/MBB 101* | BIOCHEM 101/MBB 101* | Preparation of solutions and buffers, use of pH meter, colour reactions of carbohydrates, proteins, amino acids and lipids, quantitative determination of sugars and proteins; qualitative separation of sugars and amino acids by paper chromatography; separation of lipids and photosynthesis pigments by TLC, protein denaturation by heat and pH; simple enzyme assays. | Basic knowledge about the course 'BIOCHEM 101/MBB 101' |
| B.F.Sc. (Bachelor of Fisheries Science) | 1 | 1 | 1 | |
| | AQC-102 | AQC-102 | Preparation of normal solution of acid and base, buffers and reagents. Qualitative determination of carbohydrates, proteins and lipids. Estimation of total nitrogen and crude protein of fish tissue. Estimation of carbohydrates in foods. Determination of specific gravity of oil. Extraction and estimation of total lipids in fish tissue. Determination of saponification value, iodine value and free fatty acid value. | Basic knowledge about the course 'Fundamentals of Biochemistry (AQC 102)' |
| M.Sc. | 9 | 3 | 3 | |
| 1 | BIOCHEM 505 | BIOCHEM 505 | Determination of absorption maxima; extraction and estimation of carbohydrates, amino acids, proteins and nucleic acids. Separation of carbohydrates and amino acids by paper chromatography; separation of lipids by thin layer and column chromatography; separation of proteins by ion exchange and gel filtration chromatography. Extraction, purification and characterization of enzymes; electrophoretic techniques to separate proteins and nucleic acids. Centrifugation: Cell fractionation; application of GLC, HPLC, FPLC in separation of biomolecules; use of radioisotopes in metabolic studies. | Extraction and estimation of carbohydrates, amino acids, proteins and nucleic acids<br>PC of carbohydrate<br>TLC of lipids<br>Gel filtration of protein<br>Purification of enzymes<br>Radioisotopy<br>Biomolecules' separation using GLC and HPLC |
| 2 | BIOCHEM 506 | BIOCHEM 506 | Preparation of buffers and reagents. Serological tests such as bacterial slide agglutination, latex agglutination and agar gel immunodiffusion. Immunoassays including ELISA, western blotting, and fluorescent antibody test. · Hybridoma technique for production of monoclonal antibodies. · Recombinant protein antigen- | Preparation of buffers<br>Agglutination test<br>ELISA<br>Western blotting<br>Fluorescent antibody test |

| | | | | |
|---|---|---|---|---|
| | | | production and immunization of laboratory animals. · Extraction of DNA/RNA from pathogenic microorganisms, PCR, genotyping, diagnosis, etc. | Extraction of DNA/ RNA Polymerase chain reaction |
| 3 | BIOCHEM 509 | BIOCHEM 509 | Estimation of starch, lipid/oil, phenols in plant tissue/sample, Estimation of carotenoids, Estimation of trypsin and chymotrypsin inhibitor activities in seeds, Estimation of vitamin C in fruits; Reducing and non-reducing sugar in fruits; estimation of protein contents; estimation of dietary fibre, determination of limiting amino acids; estimation of phytate/oxalate. | Estimation of starch, oil and phenols Trypsin and chymotrypsin inhibitors in legumes Vitamin C in orange Sugar in fruits Dietary fibres in cereals |
| Ph.D. | 6 | 1 | 1 | |
| 1 | BIOCHEM 604 | BIOCHEM 604 | Isolation and purification of protein from microbial/plant/animal source; electrophoretic separation of protein; determination of molecular weight of protein using PAGE/ gel filtration method. Experiments on DNA: isolation, agarose gel electrophoresis and restriction analysis of DNA. Isolation of chloroplast and mitochondria by differential centrifugation and their purification by density gradient centrifugation. Isolation and purification of enzymes, isozymic analysis and enzyme immobilization | Purification and characterization of protein and enzymes Elctrophoretic techniques Gel filtration Agarose gel electrophoresis Restriction analysis of DNA Isolation of plant organelles |

**6.4.6. Supervision of Students in PG/Ph.D. Programme:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure numbers of qualified faculty in relation to the intake of the students, as pre the guidelines in the matter.*

**M.Sc.Programme**

| Year | Number of students on roll | Number of PG faculty | Student-teacher ratio |
|---|---|---|---|
| 2018-19 | 4 | 6 | 1:1.5 |
| 2019-20 | 6 | 6 | 1:1 |
| 2020-21 | 4 | 4 | 1:1 |
| 2021-22 | 6 | 4 | 1.5:1 |
| 2022-23 | 4 | 4 | 1:1 |

**Ph.D. Programme**

| Year | Numberof students on roll | Numberof PG faculty | Student-teacher ratio |
|---|---|---|---|
| 2018-19 | 3 | 6 | 1:2 |
| 2019-20 | 5 | 6 | 1:1.17 |
| 2020-21 | 3 | 4 | 1:1.33 |
| 2021-22 | 4 | 4 | 1:1 |
| 2022-23 | 2 | 4 | 1:2 |

**6.4.7. Feedback of Stakeholders:** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the Degree Programme. What action the University has taken in last five years to address the issues raised in the feedback?*

There is a system of annual self-appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice-Chancellor. Any suggestions provided by them are incorporated in the curriculum. The stakeholders' feedback on the overall performance and quality of the institutions is obtained through general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are conveyed to the HODs and controlling officers.

**6.4.8. Student Intake and Attrition in the Programme for Last Five Years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the Degree programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 4 | 6 | 4 | 6 | 5 | 0 | 20 | 0 | 0 | 20 |
| Ph.D. | 3 | 5 | 3 | 4 | 2 | 0 | 17 | 0 | 0 | 0 |

**6.4.9. Information and Communication Technology (ICT) Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of the Department of Biochemistry use ICT in teaching and practical. There is one Seminar Room with computer, LCD projector, Smart Board, Podium with computer facility and internet connection. All faculty members have computer printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, Google meet, Microsoft teams, YouTube and CD ROM etc. in teaching courses at UG, PG and Ph.D. level.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. degree programmes, separately, and to be presented college-wise.

**6.4.11.** Since the accreditation of programmes is related to the All-India admission from ICAR and also having weight age for college accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean, **Dr. Neeraj Kumar** hereby certify that the information contained in the Section 6.4.1 to 6.4.9 is furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

## PROGRAMME – 2

# M.Sc. Botany and Plant Physiology
# and
# Ph.D. Botany and Plant Physiology

URBAN FARMING EXPO AND FLOWER FEST-2022

### 6.4 About the Department

The department was carved out from the department of Botany and Plant Pathology in 1970 with academic excellence and vision to do basic and applied work in teaching and research of concerned field. The department offers M.Sc. and Ph. D. degrees in Botany, Plant Physiology and Environmental Science. The department also caters to the requirements of UG and PG programs of College of Agriculture and College of Home Science. The department has so far produced more than 185 M.Sc. and 100 Ph.D. scholars some of them occupying high positions at the national level. Most of our students got fellowship from CSIR (UGC), INSPIRE (DST), VIED (Vietnam) and UGC.

The department is having a highly trained and talented faculty that consists of three Principal Scientists/Professor (one holding position of Dean, COBS&H and one Dean of Post Graduate Studies), one Professor, and five Assistant Scientists. Most of the faculty members have visited foreign countries to attain advanced expertise in various fields of botanical and plant physiological research. Since now our teachers/scientists bagged 35 research projects from various agencies like ICAR, CSIR, DBT, New Delhi, PURSE (DST), New Delhi, DST (Haryana), INSID, Ministry of water Resources, New Delhi, Potash Research Institute of India (PRII, Gurgaon), CIMMYT, Mexico, Scheme for Promotion of Academic and Research Collaboration (SPARC), Ministry of Human Resource Development, Government of India and funding worth of several lakhs have been sanctioned to this department. Department generated recommendation on “Bio Drainage System Strip Plantation of *Eucalyptus tereticornis* for Water Logge Soils” that is also included in the Package and Practices of this University. The faculty members of this department got recognition as collaborators in development of varieties of major crops like wheat, chickpea, mustard, sorghum, oat etc. The department has done pioneering work in conserving the indigenous local species of plants and also introduction of exotic species from other places. Various native and exotic trees, shrubs, herbs, climbers, aquatic plants, cacti and succulents have been grown and arranged in taxonomical order for imparting knowledge to our students as well as general public in the Botanical Garden of approximately 10-acre land. Flower Shows and Bonsai Making trainings are organized from time to time.

**Objectives of the Department**

1. Developing physiological markers for nutrient efficiency and abiotic stress tolerance in different crop plants
2. Identification of molecular markers related to physiological traits for abiotic stress tolerance
3. Development of phytoremediation technologies for abiotic stresses
4. Morphogenesis, reproductive biology, micro propagation and anatomical studies of crop plants under biotic and abiotic stress

**6.4.1. Brief History of the Degree Programme:** *Clearly mention in which year the Degree Program was initiated along with its objective and accomplishments.*

PG programmes in Botany and Plant Physiology was initiated in the year 1970. Entry qualification for master’s programme is B.Sc. (Medical) and B.Sc. (Hons). Minimum duration of the M.Sc. programme is 2 years and maximum duration is 4 years. Minimum duration of the Ph. D. programme is 3 years and maximum duration is 5 years. Medium of instruction is English. M.Sc. and Ph.D. degree of Botany restarted in 2019-20. This department has started M.Sc. programme in Environmental Science in 2018 and Ph. D. in 2020.

### Objectives of Initiating M.Sc. Programme

- To produce quality human resource in the discipline of Botany, Plant Physiology and Environmental Science with awareness of recent development/innovation.
- To create the masters in Botany, Plant Physiology and Environmental Science with specialization in different areas of it.

### Accomplishments of M.Sc. Programme

- The department has well developed infrastructure for the M.Sc. programme with seminar rooms and well equipped modern state of art laboratories
- The department has conferred to 185 M.Sc. students. 37 students admitted during last five years **(Annexure-I)** and 15 students are presently enrolled in this department **(Annexure-II)**
- Students presented oral and poster research papers in national and international seminars/conferences **(Annexure-III)**
- Students participated in training and workshops **(Annexure-IV)**
- Students have been placed in public and private sector jobs**(Annexure-V)**
- Students have been availing national level scholarships like Junior Research fellowship (JRF) from Indian Council of Agricultural Research (ICAR), Council of Scientific and Industrial research (CSIR) etc. or university fellowship **(Annexure-VI, VIII)**
- Students of this department qualified national level test conducted by various agencies **(Annexure-VII)**
- Around 75% of the students have progressed to Ph.D. programmes
- M.Sc. students published 10 research papers in last five years (NAAS rating 0-4: -; 4-6: 7 papers; >6: 3 papers) **(Annexure-IX)**
- Students pass out in last five years **(Annexure-X)**

### Objectives of Initiating Ph.D. Programme

Ph. D. programme was initiated with the following objectives:

- To produce quality human resource in the discipline of Botany, Plant Physiology and Environmental Science with awareness of recent development/innovation.
- To create the Doctorates in Botany, Plant Physiology and Environmental Science with specialization in different areas as such
    - Abiotic stress physiology (salt, drought, heat, freezing, water logging, cold and heavy metals stress)
    - Nodulation and nitrogen fixation in leguminous plants
    - Physiology of senescence and abscission in crop plants
    - Phytoremediation, especially with reference to salt and heavy metal stress
    - Ecophysiology of tree species to evaluate bio-drainage potential of plants under waterlogged saline areas
    - Growth and development of crop plants
    - Mineral nutrition in crop plants

- Plant growth regulators to improve crop productivity
- Photosynthesis, respiration and related processes for crop improvement

### Accomplishments of Ph.D. Programmes

- The department has well developed infra-structure for the Ph.D. programme including seminar room and well equipped laboratories.
- The department has produced 100 Ph.D. students. 47 students admitted during last five years **(Annexure-I)** and 45 students are presently enrolled in this department **(Annexure-II)**
- Students presented oral and poster research papers in national and international seminars/conferences **(Annexure-III)**
- Students participated in training and workshops **(Annexure-IV)**
- Students of this department got placement in various institutions **(Annexure-V)**
- Students have been availing national level scholarships like Junior Research fellowship (JRF) from Indian Council of Agricultural Research (ICAR), Council of Scientific and Industrial research (CSIR) etc. or university fellowship **(Annexure-VI, VIII)**
- Students of this department qualified national level test conducted by various agencies **(Annexure-VII)**
- Ph.D. students published 17 research papers in last five years (NAAS rating 0-4: -; 4-6: 10 papers; >7: 3 papers) **(Annexure-IX)**
- Students pass out in last five years **(Annexure-X)**
- Alumni of the department are well placed at higher position in India and abroad.

### Student Data for the Last Five Years

| Degree programme offered by the department | Specialization | Year of start | No. of seats | | | | | | No. of students passed out | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total |
| a. M.Sc. | Botany | Restarted (2019-20) | 00 | 03 | 03 | 02 | 02 | **10** | 00 | 00 | 00 | 03 | 02 | **05** |
| b. Ph. D. | Botany | Restarted (2019-20) | 00 | 04 | 05 | 05 | 01 | **15** | 00 | 00 | 00 | 00 | 00 | **00** |
| a. M.Sc. | Plant Physiology | 1970 | 03 | 04 | 01 | 03 | 04 | **15** | 02 | 03 | 03 | 03 | 02 | **13** |
| b. Ph. D. | Plant Physiology | 1970 | 02 | 05 | 06 | 03 | 02 | **18** | 02 | 00 | 02 | 01 | 04 | **09** |

| b. Ph. D. | Environmental Science | 2020 | 00 | 00 | 04 | 02 | 05 | **11** | 00 | 00 | 00 | 00 | 00 | **00** |
| | | | **See Details in Annexure II** | | | | | | | | | | | |

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme needs to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of research staff, extension staff, contractual faculty, guest faculty adjunct faculty or any other arrangements is being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Designation | Faculty sanctioned | Faculty in place* | Vacant |
|---|---|---|---|---|
| 1. | Professor and equivalent | 1 | Lien | Nil |
| 2. | Associate Professor and equivalent | 1 | 1 | Nil |
| 3. | Assistant Professor and equivalent | 11 | 3 | 8 |
| 4. | Assistant Botanist-cum Supdt Botanical Garden | 1 | - | 1 |
| | Total | 14 | 4 | 9 |

**Note:** All the faculty of this programme is assigned the responsibilities for the multiple programmes.

*The number of faculty also includes personal promotes.

### Faculty Profile

At present one principal scientist posted in ICAR scheme at GPB, CCSHAU Hisar, One Professor (Botany) is posted at KVK as Coordinator, Panchkula, one Assistant Professor/Equivalent posted in ICAR scheme at GPB, CCSHAU, Hisar and one at RRS Kaul, three Assistant Professor/Equivalent posted in Department of Botany, CCSHAU, Hisar. Faculty of the department published more than 70 research papers in journals of national and international repute in last five years.

| S. No. | Name | Designation | Email and mobile no. | Specialization |
|---|---|---|---|---|

**Faculty posted at KVK, Panchkula, ** posted at COA, Kaul*

### Other Achievements of the Faculty

1. An International Workshop on "Molecular Mapping of Economic Traits using High-Throughput Technologies" was organized by the department under the SPARC project, MHRD, GOI from 8th to 17th July, 2019.
2. Dr. Sarita Devi visited for International training in Pedagogy (3 Months) at Victoria Research Station, Australia under NAHEP – Institutional Development Plan Project (IDP) for the year 2019 sponsored by Indian Council of Agricultural Research and World Bank from 19th April to 18th July, 2019.
3. Dr. Sarita Devi conferred with best poster presentation award in Golden Jubilee International Conference on New Millennia Agriculture Novel Trends and Future Scenario organized by CCS Haryana Agricultural University, Hisar, India from 6th – 8th, November 2019.
4. Dr. Renu Munjal visited Copenhegan University, Denmark for ASEM-DUO-Indian Professor fellowship sponsored by Government of South Korea from 7th November to 6th December, 2021.
5. Dr. Vinod Goyal visited Julius-Maximilians-Universitat, Wurzburg, Germany for ASEM-DUO-Indian Professor fellowship sponsored by Government of South Korea from 19th August to 8th September, 2022.
6. Dr. Vinod Goyal awarded a SPARC project entitled "Genotyping by Sequencing Genome wide Association study and Genomic selection approaches for the complex Trait like Stress Tolerance and Yield in Soyabean" in 2019-20.
7. Dr. Renu Munjal awarded a SPARC project entitled "Combining Rust Resistance with Non-Structural carbohydrates (NSC) in Wheat to achieve Food Security" in 2019-20.
8. Dr. Vinod Goyal (PI), Dr. Neeraj Kumar (Co-PI) and Dr. Sarita Devi (Co-PI) awarded a RKVY Project entitled "Climate change impact studies under rainout shelter in Agro-ecosystems" in 2019.
9. An International Workshop on "Plant Genomics" was organized by the department under the SPARC project, MHRD, GOI from 25th February – 5th March, 2020.
10. Dr. Anita Kumari, Dr. Renu Munjal and Dr. Ram Avtar awarded project entitled "Leveraging Genetic Resources for accelerated Genetic Improvement of Linseed using Comprehensive Genomics and Phenotyping Approaches" as a part of network project funded by DBT, New Delhi in 2020.
11. Faculty members of this department have collaborated in development of various varieties of Wheat (WH 1270), Mustard (RH 725, RH 761, RH 1424 and RH 1706), Sorghum (CSV 44F), Chickpea (HC-5 and HC-7) etc.

**6.4.3.Technical and Supporting Staff:***The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Designation | Sanctioned | In place |
|---|---|---|---|
| 1. | Clerk | 1 | 1 |
| | Steno Typist | 1 | Nil (Miss Pooja JSS from Dept. of MBB works for second half day) |
| | Store Keeper | 1 | vacant |
| | Messenger | 1 | Nil |
| 2. | Lab staff | | |
| | ➢ Lab Assistant | 2 | 1 (Sh. Pyara Singh (Working at DSW) |
| | ➢ Lab Attendant | 2 | 1 Sh. Shankar Pandey (Working at Entomology and at his place Mr. Ramesh works in Botany Dept.) |
| 3. | Field staff | | |
| | ➢ Beldar | 1 | 1 |
| 4. | Garden staff | | |
| | Head Mali | 1 | 1 |
| | Mali | 6 | Nil (Sh. Suraj Parkash posted at Horticulture department is deputed at Botanical Garden to work as Mali<br>Sh. Dwarka Parsad posted at Land Scape Unit is deputed at Botanical Garden to work as Mali |
| | Security Guard | 1 | Nil |
| | Total | 17 | 6 |

Note: All the staff is assigned the responsibilities for the multiple programmes.

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the Degree Programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention Theory and practical batches for the Degree Programme.*

**List of Classroom and Functional Laboratories**

| | |
|---|---|
| No. of lecture rooms with seating capacity | One seminar room for PG classes (seating capacity 40),<br>One seminar room for UG classes (seating capacity 30) |
| No. of lecture rooms with LCD | One |
| No. of labs with specialized purpose | **Eight Research Laboratories** |
| | **1. Botany Lab no. 318:** For practical classes and research work of student |
| | **2. UG Lab no. 319:** For conduct of practicalof different Botany and Plant Physiology courses for UG students |
| | **3. Phytoremediation Lab no. 320:** Identification of salt and heavy metal hyper accumulator plants |
| | **4. PG Lab no. 324:** For conduct of practical of different Plant Physiology courses for PG students |
| | **5. Stress Physiology Lab no. 329:** Identification of physiological markers (MSI, RSI, Photosynthetic efficiency, Photochemical Quantum Yield, CTD, Pollen viability) under different abiotic stresses |
| | **6. Environmental Science Lab no. 331:** Physiological changes in response to agricultural pollutants and strategic research for environment and climate resilient sustainable agriculture |
| | **7. Nodulation and $N_2$ – Fixation Lab no. 334:** $N_2$-fixation mechanism (leghaemoglobin, nitrogenase activity and oxidative metabolism) under |

| | |
|---|---|
| | abiotic stress condition |
| | **8. UG Lab at IATTE Building, Forage section:** For conduct of practicalof different Botany and Plant Physiology courses for UG students |
| Farm facilities/ Screen House | **Seven :**For conducting of experiments |
| Any other instructional units being utilized for the award of the degree programme | - |

### Other Instructional Units being utilized for the Award of Degree Programme

| Instructional Units | Functioning |
|---|---|
| Botanical Garden | Used for instructions of some practical and maintaining biodiversity of different plant species |
| Seminar room with LCD | Seminar room is used for presentation of assignments and delivering seminars by PG students and also used for conducting PG and UG classes. |
| Departmental library | Reference material, journals, thesis etc are referred by PG students for preparation of assignments, synopsis and thesis work. |

### List of Major Equipments available in the Department:

| S. No. | Location | Name of Equipment |
|---|---|---|
| 1 | Lab No. 318 | Microscopes |
| 2 | Lab No. 319 | Water Bath Incubator Shaker, PCR, Digital pH Meter, Electronic Balance, Oven Universal |
| 3 | Lab No. 320 | Vapour Pressure Osmometer, Refrigerated Centrifuge, Distillation Unit, Water Bath Incubator Shaker, Orbital Shaker, NIRS, Advanced AAS, SPAD |
| 4 | Lab No. 324 | Chlorophyll Meter, Seed Germinator, Growth Chamber, Water Bath Incubator Shaker, PCR, Digital pH Meter, Electronic Balance, Oven Universal |
| 5 | Lab No. 329 | Centrifuge, Refrigerated Centrifuge, IRGA, KEL + Digestion System Acid Neutralizer scrubber, Pressure Chamber, Infra-Red Thermometer, Deep Freezer (-86ºC), Leaf Area Meter |
| 6 | Lab No. 331 | KEL + Microblack Digestion System, Lyophilizer (freeze dryer) |
| 7 | Lab No. 334 | Refrigerated Centrifuge, IRGA, Distillation Unit, Eppendorf Bio-Spectrophotometer, Infra-Red Thermometer, Plant Growth Chamber, Vertical Gel Electrophoresis Unit |

### Theory and Practical Batches

At UG level, the department of Botany and Plant Physiology offers two UG Courses to undergraduates of College of Agriculture and one UG Courses to undergraduates of I.C. College of Home Science. All the courses have practical components.

- For course Bot.101/Zoo 101 offered to CoA in sem 1$^{st}$ (4yr prg) and 5$^{th}$ (6 yr prg) have two sections at CoA Hisar, and one sections at CoA Kaul, with an average of about 30-40 students with two practical group in each section. One section is at CoA Bawal (6 yr prg) with an average of about 30-40 students with two practical group in each section.
- The course Pl Phy 102 offered to CoA in sem 2$^{nd}$(4yr prg) & 6$^{th}$ (6 yr prg) have two sections at CoA Hisar, with an average of about 55-60 students with two practical group in each section. Two sections (CoA Bawal and CoA Kaul) with an average of about 55-60 students with two practical group in each section.
- For course Bot.100 offered to COHS in sem 2$^{nd}$ have one theory batch with an average of about 60-70 students with two groups for practical classes.

At M. Sc. level, the department of Botany and Plant Physiology offers M.Sc. degree in Botany, Plant Physiology and Environmental Science. In M.Sc. Botany there are 8 courses out of which 7 courses have practical component. For M.Sc. Plant Physiology there are 12 courses out of which 8 courses have practical component. This department offers M.Sc. in Environmental Sciences with 13 courses out of which 7 courses have practical component. The courses related to Environmental Sciences are taught by different related disciplines from College of Basic Sciences and College of Agriculture.

- There are limited seats in M.Sc. programme with an average of 3-4 students. Some courses are offered as minor courses for students of other departments. There is only one batch for theory classes and one batch for practical classes in all the courses with an average of 4-35 students.

At Ph.D. level the department of Botany and Plant Physiology offers Ph.D. in discipline of Botany, Plant Physiology and Environmental Sciences. In Ph.D. Botany there are 7 courses out of which 4 have practical component, 10 courses in discipline of Plant Physiology out of which 5 have practical component and 11 courses in discipline of Environmental Sciences out of which 2 courses have practical component.

- There are limited seats in Ph.D. programme with an average of 3-4 students. Some courses are offered as minor courses for students of other departments. There is only one batch for theory classes and one batch for practical classes in all the courses with an average of 4-35 students.

The department is also offering minor and supporting courses for students of various colleges of University.

**6.4.5. Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlines any professional degree. But there are some skills that can only be learned through hands-on –practice. It is important that much of the learning material in any given course should be provided in way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hand-on-training as per curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical courses | Course details | How far students are getting desired practical and hands-on-training as per the curriculum (bullet form) |
|---|---|---|---|---|
| B.Sc.Agri/CS | 03 | 03 | | |
| | BOT 101/ZOO 101 (COA) | BOT 101/ZOO 101 (COA) | Study of structure, types and modifications of root, stem and leaves though specimens<br>Study of structure of flower and its reproductive parts through specimens and slides<br>Description of different families of plants | The structure, types and modifications of root, stem, leaves and flower<br>To learn taxonomy of the plants |
| | Pl Phy 102 COA | Pl Phy 102 COA | Demonstration of imbibitions, osmosis, plasmolysis, root pressure, transpiration<br>Separation of photosynthetic pigments through paper chromatography, respiration, | To conduct experiment on physiological processes like imbibitions, osmosis, transpiration, respiration, photosynthesis |

| | | | | |
|---|---|---|---|---|
| | | | relative water content, infra red gas analyser (IRGA). | |
| | BOT 100 (COHS) NC | BOT 100 (COHS) NC | Morphology of various vegetative and reproductive parts of plants<br>Study of structure of flower and its reproductive parts through specimens and slides<br>Demonstration of experiments of diffusion, imbibition, osmosis, guttation, transpiration, respiration, photosynthesis, photoperiodism | The structure, types and modifications of root, stem, leaves and flower<br>To conduct experiment on physiological processes like imbibitions, osmosis, transpiration, respiration, photosynthesis |
| M.Sc. (Botany) | 7 | 7 | | |
| | BOT 501 | BOT 501 | Examination of representative genera of algae to study their morphology and reproductive structures, field collection and observation | Biodiversity among the members of algae. The focus is on comparative morphology and reproduction study at the class level and their phylogeny and evolutionary relationship. |
| | BOT 502 | BOT 502 | Study of structure and morphology of vegetative and reproductive organs of their preservative species of archegoniate classes | Biodiversity among the members of archegoniate. The focus is on comparative study of life cycles, phylogeny and evolutionary trends and inters linkages. |
| | BOT 503 | BOT 503 | Study of characters of representative genera in the laboratory and field, herbarium collection. | The concepts of plant organs development, rules, regulations and tools of angiosperms taxonomy. |
| | BOT 504 | BOT 504 | Study of micro- and mega-sporo genesis, embryo, endosperm and seed coat through dissection and microtomy, embryo and anther culture. | Basic knowledge of structural, developmental and functional aspects of micro sporo genesis, mega sporogenesis and embryogenesis. Focus is also on barriers to fertilization, apomixis and in vitro culture of sexual explants. |
| | BOT 505 | BOT 505 | Study of anatomy of root, stem, leaf and flower through microtomy, maceration and clearing technique. Study of normal and abnormal secondary growth. | The internal structure and development of plant organs. |
| | BOT 506 | BOT 506 | Measurement of climatic and edaphic factors; quantitative and qualitative analysis of vegetation. | To develop an understanding of the level of biological organization, fundamentals of ecosystem and plant communities. |
| | BOT 507 | BOT 507 | Study of plant specimens of economic importance and their acquaintance with theirproducts. Exploration, collection and | The different plant resources for welfare of human beings. |

| | | | | |
|---|---|---|---|---|
| | | | preservation of economically important plants and their products. | |
| | BOT 591 | BOT 591 | Master's Seminar | To strengthen teaching skills of students |
| | BOT 599 | BOT 599 | Master's Research | To strengthen research skill of students |
| M.Sc. (Plant Physiology) | 11 | 8 | | |
| | PP 503 | PP 503 | Measurement of water status of plants, determination of osmotic potential by vapour pressure and freezing point depression, determination of soil water potential and content by psychrometry and other systems. Stress imposition and quantification, stomatal conductance. Canopy temperature as a reflection of transpiration and root activity, water use-efficiency determination at whole plant and single leaf level | The effects of abiotic stresses to plant and its molecular basis. |
| | PP 504 | PP 504 | Quantification of hormones-principles of bioassays, physico-chemical techniques and immunoassay, Extraction of hormones from plant tissue. Auxins- bioassays- auxins effect on rooting of cuttings, abscission, apical dominance, Gibberellins-bioassays-GA effect on germination of dormant seeds, cytokinin-bioassays- estimation using immunoassay technique cytokinin effect on apical dominance and senescence, ABA bioassays-estimation using immunoassay technique. ABA effect on stomatal movement, Ethylene bioassays, estimation using physico-chemical techniques- effect on breaking dormancy in sunflower and groundnut. | Structure and function of plant growth regulators on growth and development of plants. |
| | PP 505 | PP 505 | Plant sampling for leaf area and biomass estimation; analysis of growth and yield parameters – LAD, NAR. CGR, LAI, LAR, SLA portioning efficiency HI, measurement of light interception, light extinction coefficient, energy utilization efficiency based energy intercepted, and realized, computer applications in plant physiology, crop productivity and modelling. | Knowledge regarding crop growth analysis and different yield prediction models. |
| | PP 506 | PP 506 | Culturing and transformation of bacteria; genomic DNA and plasmid DNA isolation from bacteria, restriction enzyme digestion and analysis by agarose | The basic concept on genome organization in prokaryotic and eukaryotic system. |

| | | | | |
|---|---|---|---|---|
| | | | gel electrophoresis, isolation of genomic DNA and RNA from plants and quantification; Culture of bacteriophage; studies on lytic and lysogenic pages. | |
| | PP 507 | PP 507 | In vitro culture of different explants such as leaf, stem, shoot apex, cotyledonary nodes, Effect of growth regulators auxin, cytokinin, ethylene on callus induction, organo genesis, somatic embryogenesis, effect of growth condition such as temperature and photoperiodon organogenesis. | The knowledge about cellular basis of growth and morphogenesis in plants. |
| | PP 509 | PP 509 | Extraction and separation of plant pigments, Isolation of chloroplasts ETC reactions- O2 evolution, Determination of rubisco content (western and ELISA), activity and activation state, enzymatic determination of starch and sucrose, determination of photosynthetic rates –gas exchange. A, gs, Ci, A/gs, C/gs- intrinsic WUE by gas exchange rates. Light, CO2, VPD response curves, Determination of photorespiration by gas exchange- (TPSAPS).<br>Genotypic/species differences in photosynthetic rates. Measurement of radiation, Eu% light interception, Determination of NH4+, reduction of inorganic nitrogen species. | Knowledge about physiological and molecular aspects of carbon reduction cycle and nitrogen assimilation. |
| | PP 510 | PP 510 | Physiological and biochemical changes in plants under nutrient sufficiency and deficiencylevels.<br>Quantification of pigment levels, enzyme activities. | Physiological and molecular aspects of carbon reduction cycle and nitrogen assimilation. |
| | PP 511 | PP 511 | Proximate analysis of chemical composition of seed; methods of testing viability; kinetics of seed imbibition and solute leakage; seed germination and dormancy breaking methods; seed invigoration and priming treatments; accelerated ageing and controlled deterioration tests; enzymatic activities and respiration during germination and effect of accelerated ageing; vigor testing methods etc. | To provide an insight into physiological processes governing seed quality and its survival. |
| | PP 591 | PP 591 | Master's Seminar | To strengthen teaching skills of students |
| | PP 599 | PP 599 | Master's Research | To strengthen research skill of students |
| | 12 | 7 | | |

| | | | | |
|---|---|---|---|---|
| M.Sc. (Environmental Science) | ENS 504 | ENS 504 | Analysis of polluted water for various micro-organisms, quality control tests, BOD and COD estimation, water treatment and anaerobic digestion, demonstration of waste water treatment and anaerobic digestion, demonstration of waste water treatment processes such as activated sludge processes, bio filter and fluidized bed process. | Knowledge of microbial diversity of the environment. |
| | ENS 505 | ENS 505 | Study of chemicals in the environment and green chemistry. | The chemicals in the environment, house hold products and green chemistry. |
| | ENS 506 | ENS 506 | Sampling of sewage waters, sewage sludge, solid/liquid industrial wasters, polluted soils and plants, estimation of dissolved and suspended solids, chemical oxygen demand (COD), biological demand (BOD), nitrate and ammonical nitrogen and phosphorus, heavy metal content in effluents. | The problems of soil, water and air pollution associated with agriculture. |
| | ENS 507 | ENS 507 | Isolation and characterization of plamid and genomic DNA, qualification of DNA and RNA, PCR amplification, Gel electrophoresis. | The basic concepts in biotechnology and its applications in environment management for sustainable eco-system. |
| | ENS 510 | ENS 510 | Determination of soil microbial population; soil microbial biomass; decomposition studies in soil, soil enzymes; measurement of important solid microbial processes such as ammonification, nitrification. $N_2$ fixation, S oxidation, P solubilisation and mineralization of other micro-nutrients; Study of rhizosphere effect. | Basics of microbiology related to soil including biogeochemical cycles, plant growth promoting rhizobacteria, microbial interactions in soil other soil activities. |
| | ENS 511 | ENS 511 | Acquisition of maps, Field data collection, map and imagery scales, software and hardware requirements and specifications for remote sensing, data products, their specifications, media types, data inputs, transformation, display types, image enhancement | Knowledge of remote sensing principles and their use to estimate of agro-meteorological variables. |
| | ENS 512 | ENS 512 | Training on techniques related to environment. | Analytical techniques related to environment. |
| | ENS 591 | ENS 591 | Master's Seminar | To strengthen teaching skills of students |
| | ENS 599 | ENS 599 | Master's Research | To strengthen research skill of students |
| | 5 | 4 | | |
| Ph.D. (Botany) | BOT 601 | BOT 601 | Developmental studies of pollen, embryo, fruit and seed of selected crop plants through dissection, microtomy, clearing technique and | Knowledge of ultra structural and functional aspects of development of male, female |

| | | | | |
|---|---|---|---|---|
| | | | histo chemical tests. | gametophytes, endosperm and embryo in addition to pollination, fertilization, apomixis and self-incompatibility. |
| | BOT 602 | BOT 602 | Studies of different methods of pollen collection and preservation, culturing of anthers, pollen and young embryos using various culturing media and study of differentiation and development. | Applied aspects of plant embryology and in-vitro culture of reproductive explants in relation to crop improvement. |
| | BOT 603 | BOT 603 | Study of structure of cell wall and anatomy of various plant organs through histo chemical methods and clearing, maceration and microtome preparation. | Contemporary advancements in plant anatomy. |
| | BOT 604 | BOT 604 | Detailed study of vegetation in different environmental conditions, study of stabilization of sand dunes in relation to survival, productivity, competition and succession. | Advanced knowledge of the plant environment interactions, biodiversity and its conservation. |
| | BOT 691 | BOT 691 | Doctoral Seminar | To strengthen teaching skills of students |
| | BOT 692 | BOT 692 | Doctoral Seminar | To strengthen teaching skills of students |
| | BOT 699 | BOT 699 | Doctoral Research | To strengthen research skill of students |
| | 8 | 5 | | |
| Ph.D. (Pl Phy) | PP 603 | PP 603 | Phenotyping approaches for the different physiological traits. Genotyping options using gene-scan systems. Development of SSR, SNP and SCAR markers, resolution of polymorphism on agarose gels and PAGE, genotyping using a DNA sequencing machine, scoring of gels and assessment of polymorphism, molecular biology – genomic/plasmid DNA isolation, RNA isolation, transformation in model system, crop transformation agrobacterium mediated transformation (in planta & in vitro), evaluation of transgenics – semiquantitative & quantitative RT-PCR, southern blot, northern blot western blot and ELISA, biochemical/physiological assay based on the function of gene & testing LOD. | Knowledge to improve the physiological traits using molecular approaches. |
| | PP 604 | PP 604 | Photosynthetic gas exchange measurements, light and CO2 response curves-determination of relative limitations to | Recent practical training to study various physiological processes in plants. |

| | | | | |
|---|---|---|---|---|
| | | | photosynthesis; chlorophyll fluorescence measurements, assessment of nutrient deficiency by use of leaf color chart.<br>Estimation of water use efficiency at whole plant and single leaf level. Use of stable and radioactive isotopes tounderstand physiological processes – canopy temperature depression (CTD) – evaluation of various plant water indices like RWC (relative water content), Leaf water retention (LWR %), and water retention capability (WRC%), relative Stress injury (RSI), evaluation of stress indices (Heat susceptibility index, heat response index). DNA & RNA isolation, cDNA synthesis & library construction, semiquantitative & quantitative RT-PCR, Northern blot, immunoassays; techniques for defined physiological processes, quantification of mineral nutrients using advanced instruments like AAS.<br>Extraction isolation and estimation of plant growth regulators. | |
| | PP 606 | PP 606 | Physiological and biochemical changes during senescence and ripening, Estimation of ethylene during senescence and ripening, determination of Reactive Oxygen Species and scavenging enzymes, Measurement of dark and alternate respiration rates during senescence and ripening. Estimation of ripening related enzyme activity, cellulases, pectin methyl esterases, polygalacturonase etc. | Knowledge of physiological changes during senescence and ripening. |
| | PP 607 | PP 607 | Adjuvants and their effect on spray droplets, chemical entry and transport. Determination of physiological and biochemical processes like photosynthesis, respiration, cell division, protein & fatty acid synthesis, membrane permeability as affected by herbicides. | Knowledge regarding weed and crop competition, and physiological and molecular aspects of herbicides. |
| | PP 608 | PP 608 | Determination of seed storage proteins. Sink drawing ability of ovules, empty ovule technique. Alpha-amylase activity in germinating seeds.<br>Role of GA in inducing amylase activity. Role of embryo in GA induced a-amylase activity. **6.4.6. Supervision of Students in PG/Ph. D. Programmes:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure numbers of qualified faculty in relation to the intake of the students, as pre the guidelines in the matter.*

**M.Sc. Programmes:**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 6 | 7 | 1:1 |
| 2019-20 | 10 | 9 | 1.11:1 |
| 2020-21 | 5 | 8 | 0.63:1 |
| 2021-22 | 7 | 7 | 1:1 |
| 2022-23 | 9 | 7 | 1.28:1 |

**Ph.D. programmes:**

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 2 | 7 | 0.29:1 |
| 2019-20 | 9 | 9 | 1:1 |
| 2020-21 | 15 | 8 | 1.88:1 |
| 2021-22 | 10 | 7 | 1.43:1 |
| 2022-23 | 08 | 7 | 1.14:1 |

**6.4.7. Feedback of Stakeholders (Student, parents, industries, employees, farmers etc:** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the Degree Programme. What action the University has taken in last five years to address the issues raised in the feedback?*

The stakeholders' feedback on the overall performance and quality of the institutions is obtained through general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are considered by the HODs and controlling officers.

**6.4.8. Student Intake and Attrition in the Programme for last Five Years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the degree programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 06 | 10 | 05 | 07 | 9 | 0 | 10 | 0 | 0 | 22 |
| Ph.D. | 02 | 09 | 15 | 10 | 8 | 0 | 0 | 0 | 0 | 0 |

**6.4.9. Information and Communication (ICT) Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of department of Botany and Plant Physiology use ICT in teaching and practical. There are two seminar rooms: one with computer, LCD projector and internet connection. All faculty members have computer printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, YouTube, emails, CD ROM, Google Meet, Microsoft Team, Web System etc. to teach all courses at UG, PG and Ph.D. level.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. degree programmes, separately, and to be presented college-wise.

**6.4.11.** Since the accreditation of programmes is related to the All India admission from ICAR and also having weight age for college accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for programme)

I, the Dean **Dr. Neeraj Kumar** hereby certify that the information contained in the Section 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

# PROGRAMME – 3

## M.Sc. Chemistry
## and
## Ph.D. Chemistry

## 6.4 About the Department

Department of chemistry was established in 1970 and degree programs were initiated in 1988.The department of chemistry runs excellent teaching programs at M.Sc. and Ph.D. degree levels. The current areas of research in chemistry are: synthesis of agrochemicals having biological activities, isolation and characterization of plant based bioactive compounds, green chemistry, environmental remediation, agricultural waste valorisation, slow-release of agrochemicals and pesticide chemistry. The department has successfully completed a number of research projects funded by the ICAR, CSIR and other agencies. The research findings from the various research programs in chemistry have been presented in the National and International conferences and also published in the form of a large number of research papers in reputed journals. Apart from the various research programs being carried out in the department, its faculty members are lending support to other departments of the university in interdisciplinary co-ordinate research programs, particularly, in the areas of Entomology, Soil Science, Agronomy and Genetics and Plant Breeding. In recognition of the excellent research activities in the department, many of its faculty members and students have been offered national scientific awards and visiting fellowships.

The department has a vibrant and rich tradition to intense academic and basic research programmes. Right from its inception, the department has a team of highly qualified and experienced faculty who have shown excellence both at the national and international levels. During last five years on an average six students were admitted in M.Sc. and six students in Ph.D. **(Annexure CHEM-I).** Presently, there are thirteen M.Sc. students and thirty three Ph.D. students on roll **(Annexure CHEM-II).**

There is no UG programme going on in the department, however, the department is offering one UG course to Undergraduates of College of Engineering and one UG course to Undergraduates of I.C. College of Home Science.

### Objectives of the Department

- To provide quality education to students and to develop human resource specialized in various aspects of basic and applied chemistry
- To develop professionals in chemistry
- To conduct research in thrust areas related to agricultural, industrial and environmental chemistry

### 6.4.1. Brief History of the Degree Programme: *Clearly mention in which year the Degree Program was initiated along with its objective and accomplishments.*

M.Sc. programme in Chemistry was initiated in the year 1988.Entry qualification for Masters programme is B.Sc./ B.Sc. (Hons) in Medical/Non-Medical/ Chemistry/ Agriculture. Minimum duration of the programme is 2 years and maximum duration is 4 years. Medium of instruction is English.

### Objectives of Initiating M.Sc. Programme

M.Sc. Chemistry programme was initiated with the following objectives:

- To produce quality human resource in the discipline of Chemistry
- To provide knowledge to students in following research areas
  - Natural Product chemistry

- Bio-efficacy and Development of Agrochemicals
- Synthetic Chemistry
- Green Synthesis
- Environmental Remediation
- Agricultural Waste Valorization
- Slow-release of Agrochemicals

**Accomplishments of M.Sc. Programme**

Since from 2018 department has produced 22 M.Sc. Students.

- Two students were participated in conferences and symposia **(Annexure CHEM-III).**
- Four students have participated in different trainings **(Annexure CHEM-IV).**
- One student has been placed in government sector job **(Annexure CHEM-V).**
- Most of the students got fellowships/ stipend from university and other sources **(Annexure CHEM-VI).**
- In last five years our students have published thirteen research papers in reputed journals having NAAS Rating from 5.21 to 12.29 **(Annexure CHEM-IX).**

**Objectives of Initiating Ph.D. Programme**

Ph.D. Chemistry programme was initiated with the following objectives:

- To provide advanced knowledge in the discipline of Chemistry
- To provide training and specialization to students in agricultural research, especially in thrust area like:
  - Natural Product Chemistry
  - Bio-efficacy and Development of Agrochemicals
  - Synthetic Chemistry
  - Environmental Remediation
  - Nanochemistry
  - Agricultural Waste Valorization
  - Slow-release of Agrochemicals

**Accomplishments of Ph.D. Programme**

Since from 2018 department has produced 15 Ph.D. Students.

- The department has well developed infra-structure for the Ph.D. Programme with seminar room, class room and well equipped laboratories.
- Twenty three students were participated in conferences and symposiam of national and international level **(Annexure CHEM-III).**
- Students in doctoral programme attended the trainings from time to time. In last five years, eighteen students have participated in different trainings (**Annexure CHEM-IV).**
- Thirteen of our students have joined the institutes of excellent repute **(Annexure CHEM-V).**

- Twenty students have been availing national level scholarships like INSPIRE DST, CSIR JRF, UGC etc. **(Annexure CHEM-VI).**
- Twenty four studentshave qualified NET, GATE and other national level exams **(Annexure CHEM-VII).**
- Our Ph. D. students have published their research outcomes in form of 24 research paper in last five year (NAAS rating 5.21-14.07) **(Annexure CHEM-IX).**
- Alumni of the department are well placed at higher position in India and abroad.

### Student data for the last five years

| **Name of the Department** | | | **Chemistry** | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Degree Programme offered by the Department | Specialization | Year of start | No. of seats | | | | | | No. of students passed out | | | | | |
| | | | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total |
| M.Sc. | Chemistry | 1988 | 4 | 8 | 8 | 7 | 5 | 32 | 1 | 5 | 4 | 7 | 7 | 24 |
| PhD | Chemistry | 1988 | 2 | 11 | 8 | 6 | 7 | 34 | 3 | 2 | 5 | 3 | 3 | 16 |
| Details in Annexure CHEM-I | | | | | | | | | | | | | | |

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme need to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of research staff, extension staff, contractual faculty, guest faculty adjunct faculty or any other arrangements is being made to complete the curriculum, it should be clearly mentioned in the report.*

| **S. No.** | **Designation** | **Faculty sanctioned** | **Faculty in place** | **Vacant** |
|---|---|---|---|---|
| 1. | Professor and equivalent | 1 | - | 1 |
| 2. | Associate Professor and equivalent | 2 | 1 | 1 |
| 3. | Assistant Professor and equivalent | 8 | 6 | 2 |
| | Total | 11 | 7 | 4 |

**Note:** All the faculty of this programme is assigned the responsibilities for the multiple programmes.

### Faculty Profile

At present there are six assistant professors/ equivalents. Faculty of the department published more than 46 research papers in journals of national and international repute, 5 book chapters in last five years.

| **S. No.** | **Name** | **Designation** | **E-mail and Mobile No.** | **Specialization** |
|---|---|---|---|---|
| 1. | Dr. Rajni Kant Sharma | Associate Professor | rajnikantsharma@ hau.ac.in 7988582711 | Organic synthesis and Natural product |
| 2. | Dr. Sushila Singh | Assistant Professor | singhsushila@hau.ac.in 8199939339 | Nano-materials, Phyto and Green Chemistry |

| | | | | |
|---|---|---|---|---|
| 3. | Dr. Anushree | Assistant Scientist | anushree@hau.ac.in 7290807066 | Catalysis, Nano-materials , Green Chemistry and Environmental Chemistry |
| 4. | Dr. Sonu Chauhan | Assistant Scientist | sonuchauhan@hau.ac.in 9812373800 | Organometallics and Organic Chemistry |
| 5. | Dr.Jayant Sindhu | Assistant Professor | jayantchem@gmail.com 9711605443 | Organic Synthesis and Sensor Development |
| 6. | Dr. Sachin Kumari | Assistant Professor | sachindalal@hau.ac.in 9812008680 | Inorganic Chemistry/Synthetic Inorganic Chemistry/Analytical Chemistry/Nanochemistry |
| 7. | Dr. Rahul Kumar Dhaka | Assistant Professor | rahulkdhaka@hau.ac.in 9411776212 | (Sustainable Chemistry) Physical and Analytical Chemistry |
| 8. | Dr. Anil Duhan* | Assistant Scientist | a.duhan@rediffmail.com 9466051639 | Analytical Chemistry |
| 9. | Dr. Sushil* | Assistant Scientist | sushilahlawat08@gmail.com 9416342952 | Agrochemical and Pesticide Residual Chemistry |
| 10. | Dr. Ravi Kumar* | Junior Phytochemist | ravibeniwal@hau.ac.in 9996501981 | Organic Synthesis, Natural Products Based Drug Discovery, Phytochemistry of Medicinal and Potential Crops |
| 11. | Dr.Vipan Nagpal* | Assistant Scientist (Phytochemist) | vanynagpal@hau.ac.in 9416630867 | Phytochemistry of Medicinal and Potential Crops |
| Faculty posted at COA* | | | | |
| **Faculty retired during 2018-22** | | | | |
| 1 | Dr. Rajvir Singh (30/11/2022) | Professor | singhrajvir1962@gmail.com 9416397283 | Synthetic and Natural Product Chemistry |
| 2 | Dr. V.K. Madan (31/5/2020) | Principal Scientist | vikku60@gmail.com 9416346333 | Phytochemistry |

### Other Achievements of the Faculty

### 6.4.3. Technical and Supporting Staff:

*The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Designation | Sanctioned | In place |
|---|---|---|---|
| 1. | Assistant | - | - |
| | Clerk | 01 | 01 |
| | SSS | 01 | 01 |
| | Messenger | 01 | - |
| 2. | Lab staff | | |
| | ➢ Lab Assistant | 02 | 02 |
| | ➢ Lab Attendant | - | - |
| | ➢ Sr. Lab Asstt. | 01 | 01 |
| 3. | Field staff | - | - |
| | ➢ Beldar | - | - |
| 7. | Technician | - | - |
| 8. | Any other (specify) Mechanic | - | - |
| | Total | 06 | 05 |

Note: All the staff is assigned the responsibilities for the multiple programmes.

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the Degree Programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention Theory and practical batches for the Degree Programme.*

### List of Classroom and Functional Laboratories

| | |
|---|---|
| Name of College/Department | College of Basic Sciences and Humanities/ Chemistry |
| No. of lecture rooms with sitting capacity | One lecture room with 40 sitting |
| No. of lecture rooms with LCD | One |
| No. of laboratories with specialized purpose | Seven Research, one UG and one PG |
| | **1.** Research Lab no. 123: Natural product and heterocyclic Synthesis Lab |
| | 2. Research Lab no. 407: Green Chemistry Nano Innovation Lab |
| | **3.** Research Lab no. 137: Functionalized Materials Lab |
| | 4. Research Lab no. 127: Advanced Organometallics Synthesis Lab |
| | **5.** Research Lab no. 124: Diversity Oriented Organic Synthesis Lab |
| | **6.** Research Lab no. 138: Porous Materials Lab |
| | **7.** Research Lab no. 117: Sustainable Chemistry Lab |
| Farm facilities | - |
| Workshops | - |
| Any other instructional units being utilized for the award of the degree programme | - |

### Other Instructional Units being utilized for the Award of Degree Programme

| **Instructional Units** | **Functioning** |
|---|---|
| 1. Seminar room with LCD | Seminar room is used for presentation of assignments and delivering seminars by PG students and also used for conducting PG classes. |
| 2. Departmental library | Reference material, thesis etc are referred by PG students for preparation of assignments, synopsis and thesis work. |

### List of Major Equipments Available in the Department

| **S. No.** | **Location/ lab No** | **Name of equipment** |
|---|---|---|
| 1. | Lab. No.117 | Orbital Shaking Incubator, Rotosign Rotary Mixer, Autoclave, pH meter, Conductivity Meter |
| 2. | Lab. No.123 | Freezer, Water bath, Electronic balance |
| 3. | Lab. No. 124 | Flash Chromatography System, Multimode Spectrophotometer, UV-Visible Spectrophotometer, Electra Sin 2.0 Pro, Ultrasonic Cleaner, Graphic Processing Unit installed in workstation |

| | | |
|---|---|---|
| 4. | Lab. No. 127 | Conductivity Meter, Oven, Water bath, Electronic balance |
| 5. | Lab. No. 137 | Ultrasonic Probe Sonicator, UV-Visible Spectrophotometer, Photo Chemical Reactor, Microwave Synthesizer, Muffle Furnace, Hydrothermal Autoclave, Double Distillation Unit, Recirculating Chiller, Centrifuge, Orbital Shaking Incubator, pH meter |
| 6. | Lab. No. 138 | Homogeniser, Soxlet Extraction Apparatus, Ultrasonic Probe Sonicator, Rotary Evaporator, Water Quality Analyzer, Non refrigerator Centrifuge, Double Distillation Unit, Furnace, Rotary Shaker |
| 7. | Lab. No. 407 | Water Analyzer Kit, UV-Visible Spectrophotometer, Muffle Furnace, Ultrasonic Cleaner, Rotary Evaporator, Microwave Extraction System, Lyophilizer, Melting Point Apparatus |

**Theory and Practical Batches**

- At UG level, department is offering two courses having both theory and practical components**.**
- At M.Sc. level, the department of chemistry offers 23 courses and 8 courses has practical components. There are limited seats in M.Sc. programme with an average of 4-8 students. Some courses are offered as minor courses for students of other departments. There is only one batch for theory classes and one batch for practical classes in all the courses with an average of 5-12 students.
- Similarly, at Ph.D. level there are limited seats in Ph.D. programmes. Hence, there is only batch for theory classes in all the courses. For Ph.D., the department of chemistry offers 8 courses.
- The department is also offering three pre-requisite courses (Chem 519, 520 & 521) for students of College of Agriculture and two service courses for Home Science students.
- The department is also offering minor and supporting courses (Chem 522 & 523) for students of various colleges of University.

**6.4.5. Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlines any professional degree. But there are some skills that can only be learned through hands-on –practice. It is important that much of the learning material in any given course should be provided in way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hand-on-training as per curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical courses | Course details | How far students are getting desired practical and hands-on-training as per the curriculum |
|---|---|---|---|---|
| UG | 2 | 2 | | |
| | CHEM101 | CHEM101 | Determination of temporary and permanent hardness of water by EDTA method, estimation of chloride, dissolved oxygen, BOD and COD in water sample, available chlorine in | Students learn about the basic concepts of chemistry, which can be utilized for determination of different water parameters, chromate |

| | | | | |
|---|---|---|---|---|
| | | | bleaching powder, viscosity of oil, activity of water sample, carbonate and non-carbonate hardness by soda reagent, coagulation of water and chloride ion content, specific rotation of an optically active compound, $\lambda_{max}$and verification of Lambert's Beer Law, calorific value of fuel, identification of functional groups (alcohol, aldehyde, ketone, carboxylic acid and amide) by infrared spectroscopy, chromatographic analysis, molar refraction of organic compounds | graphic analysis and organic functional groups. |
| | CHEM100 | CHEM100 | Acid-base titration; identification of acid radicals; detections of elements (N,S,X) and functional groups, any two preparations: iodoform, asprin, orange dye; removal of colour stains from clothes. | Identification of radicals, removal of colour stains from cloths, detection of elements and organic functional groups |
| M.Sc. | 23 | 8 | | |
| | CHEM504 | CHEM504 | Applications of spectroscopy for structural studies. | Students get familiar to the different techniques used for characterization techniques used in chemistry |
| | CHEM505 | CHEM505 | Conductivity; potentiometry; pH metry, polarography; amperometric titration, spectrophotometry: flame-photometry; refractometry; cryoscopic and ebulliosopic measurements; chromatography, distribution law; mseasurement of viscosity | Students able to learn about-<br>• pH metry<br>• conductivity<br>• refractometry<br>• chromatography<br>• Viscosity |
| | CHEM509 | CHEM509 | Potentimetric determination of formation constants of 3d-series transition metal ions | Students learn about the formation constants of 3d series transition metals ions using potentiometric titrations. |
| | CHEM510 | CHEM510 | Preparation of inorganic complexes like $Co\{Hg(SCN)_4]$, $Hg[Co(SCN)_4]$, $Co(NH_3)_5Cl]Cl_2$, $[Cu(Gly)_2]$, Preparation of $[Co(NH_3)_5NO_2]Cl_2$,$[Co(acae)_3]$, $K_4[Co_2(C_2O_4)_4(OH)_2]$, $K_2[Cu(C_2O_4)_2]$, $[Co(NH_3)_4]SO_4$ and $Na_3[Co(NO_2)_6]$. Determination of magnetic characteristic of above complexes, Analysis of alloys using conventional physical and chemical techniques, complexometric titrations | Students able to prepare different inorganic complexes. This course will enrich students with the techniques related with inorganic complex characterizations. |
| | CHEM517 | CHEM517 | Separation and identification of the components of a binary organic mixture. Synthetic preparations involving two step. Quantitative analysis of phenol, aniline. Quantitative analysis of sulphur, nitrogen. | The course is based on the identification of extra element and functional group. Students will be able to detect different compounds in an organic mixture. Moreover, |

| | | | | |
|---|---|---|---|---|
| | | | Isolation experiments. | quantitative determination of different organic compounds can also be done in an practically efficient manner with simple laboratory techniques. |
| | CHEM518 | CHEM518 | Testing of pesticidal formulations from point of view of their quality; estimation of active principles of pesticides employing different analytical techniques in different matrices, Determination of pesticide residues in different commodities by GLC. | Students are able to Gas layer chromatography for pesticides estimation, analytical techniques for active pesticides and pesticide formulation |
| | CHEM521 | | Identification and preparation of organic compounds | Students will be able to understand organic compounds preparation |
| | CHEM523 | CHEM523 | Identification of intermediates and derivatives used in dyes. Preparation and isolation of dyes. Determination of copper number, methylene number and carboxylic group in degraded cellulose. | Students will be able to understand the following:<br>• Dyes preparation<br>• Intermediates identification |
| **Ph.D.** | **8** | 0 | | |

**6.4.6. Supervision of Students in PG/ Ph.D. Programmes:** *It is important to have a sound grasp of the theory that underlines any professional degree. But there are some skills that can only be learned through hands-on –practice. It is important that much of the learning material in any given course should be provided in way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hand-on-training as per curriculum and meeting above mentioned requirements.*

**M.Sc. Programme**

| Year | Number of students on roll | Number of PG faculty | Student-teacher ratio |
|---|---|---|---|
| 2018-19 | 4 | 2 | 2 : 0.5 |
| 2019-20 | 8 | 7 | 1: 0.8 |
| 2020-21 | 8 | 7 | 1: 0.8 |
| 2021-22 | 7 | 7 | 1:1 |
| 2022-23 | 6 | 7 | 0.8:1.2 |

**Ph.D. Programmes**

| Year | Number of students on roll | Number of PG faculty | Student-teacher ratio |
|---|---|---|---|
| 2018-19 | 2 | 2 | 1:1 |
| 2019-20 | 11 | 7 | 1.6:0.6 |
| 2020-21 | 8 | 7 | 1:0.8 |
| 2021-22 | 6 | 7 | 0.8:1 |
| 2022-23 | 6 | 7 | 0.8:1.2 |

**6.4.7. Feedback of Stakeholders:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure numbers of qualified faculty in relation to the intake of the students, as pre the guidelines in the matter.*

The stakeholders' feedback on the overall performance and quality of the institutions is obtained through general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are conveyed to the HODs and controlling officers.

**6.4.8. Student Intake and Attrition in the Programme for Last Five Years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the degree programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Sc.** | 1 | 5 | 4 | 7 | 6 | - | - | 25 | 25 | - |
| **Ph.D.** | 3 | 2 | 5 | 3 | 6 | - | - | - | - | - |

**6.4.9. Information and Communication Technology (ICT) Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The department has established one smart class rooms under ICAR smart class room initiative. The faculty members of department of Chemistry use ICT in teaching and practical. There is one seminar Room and one class room equipped with interactive projector, LCD interactive panel and internet connection. All faculty members have computer printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, YouTube, emails and CD ROM in teaching all courses at UG and PG level.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. degree programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of programmes is related to the all India admission from ICAR and also having weight age for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for programme)

I, the Dean **Dr. Neeraj Kumar** hereby certify that the information contained in theSection 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

# Ph.D. Food Science & Technology

### 6.4 About the Centre

The Centre was established in 2002 and is working on different aspects of food processing, preservation and quality control. The faculty, staff and students in this Centre are members of a large interdisciplinary team of scientists at CCSHAU, who are working consistently to improve the availability and quality of food. Students at the Centre enjoy the combined advantages offered by the University programme as well as the compulsory industrial training. The main objective of the Centre is to develop trained manpower and appropriate technology for food processing industry.

The Centre offers M.Sc. and Ph.D. programmes in Food Science and Technology. There is no UG programme going on in the Centre, however, it is offering one UG Course and one Module to Undergraduates of College of Agriculture at Hisar, Kaul and Bawal under Experiential Learning Programme.

| Programme level | Name of the programme/ course | Duration | Number of seats (Gen+ICAR) | Entry qualification | Medium of instruction |
|---|---|---|---|---|---|
| **Food Science & Technology** | M.Sc. | 2 Years | 2+1 | Bachelor's degree in Science/ Agriculture/HomeScience/Agricultural Engineering/FST/Food Technology | English |
| | Ph.D. | 3 Years | 2+1 | M.Sc. (Food Science/Food Science and Technology/Food Technology) | English |

The department has so far conferred degree to 235 M.Sc. and 18 Ph.D. scholars; some of them are occupying high positions at the National level. The students from this Centre have either developed their own entrepreneurship or are well placed at various executive positions in the food industries/government organizations like FSSAI, NRDC, Mother Dairy, Nestle, Parle, Pan Foods, Haldiram, Reliance Fresh, Hindustan Lever, Tops India, Sunfeast, Bakeman, Yalkult, Pepsico, Midas Foods, Del Monte, MARICO, Dabur, Crixus Health, Perfetti Van Melle and Jubilant Food Works, Assistant Professor/Lecturer/JRF/SRF in Government and Private Institutes/Universities in India and Abroad.

From 2018 onwards, 19 Indian students passed ASRB-NET or UGC-NET with or without JRF/SRF, one Ph.D. student placed as ARS scientist in 2023. Students are availing various fellowships like ICAR-India-Afghanistan Fellowship, ICCR-Africa Fellowship, ICAR-India Africa Fellowship Prog.-III, ICAR-JRF, ICAR-PGS Fellowship, UGC-JRF/SRF, ICAR-JRF/SRF and Rajiv Gandhi National Fellowship (RJNF). Since 2018 till date, 4 M.Sc.students from foreign countries (Afghanistan, Botswana and Tanzania) were admitted and have successfully completed their M.Sc. (FST) degree programme. At present, there are 5 M.Sc. students and 10 Ph.D. students enrolled in CFST.

**Objectives of the Department**

- To provide quality education to students and to develop professionals in the field of food science and technology
- To develop and evaluate value added food products
- To develop and refine the technologies for enhancing the shelf life
- To develop value added ready-to-eat and convenient foods

**6.4.1. Brief History of the Degree Programmes:** *Clearly mention in which year the Degree Program was initiated along with its objective and accomplishments.*

Centre of Food Science and Technology (CFST) was established in 2002 with the staff working on different aspects of food processing, preservation and quality control. It has faculty members with specialization in Fruits and Vegetables Processing, Food Microbiology, Postharvest Physiology, Food Nutrition, Food Technology and Dairy Technology. The Centre admits 4-5 students every year in M.Sc. programme through an entrance test, conducted by the University in June-July. The M.Sc. programme involves teaching, laboratory exercises and 4 weeks compulsory In-plant training in various food industries. The students also carry out research work and submit a thesis to become eligible for the award of Degree.

### Objectives of Initiating M.Sc. Programme

In 1996, M.Sc. programme in Food Science and Technology was started under College of Basic Sciences and Humanities. In 2002, a separate Centre of Food Science and Technology was established and M.Sc. programme in Food Science and Technology was continued with the following objectives:

- To develop trained manpower for food processing industry
- To provide the students in depth and multidisciplinary knowledge in the field of food science and technology
- To develop enterprising and innovative skills in the students

### Accomplishment of M.Sc. Programme

- The Centre has well developed infrastructure including seminar room, well equipped laboratories and library facility for M.Sc. programme with 235 M.Sc. pass out students till date.

### During last five years

- Thirteen M.Sc. students were admitted in the Centre **(Annexure FST-I)**
- Three students qualified NET examination and one along with JRF/SRF fellowship **(Annexure FST-VII)**
- Nine students availed various fellowships. Five foreign students got ICAR/ICCR fellowship and 4 Indian students got ICAR-JRF/PGS fellowship **(Annexure FST-VI)**
- Presently, there are five M.Sc. students on roll **(Annexure FST-II)**
- Five M.Sc. students participated in conferences and symposia **(Annexure FST-III)**
- All M.Sc. students completed minimum 4 weeks In-plant training **(Annexure FST-IV)**
- Nine students joined higher education and remaining students are well placed in institutes of national and international repute **(Annexure FST-V)**
- Three students went abroad for higher studies at Botswana, Spain and Italy; and one student got admission at CSIR-CFTRI, Mysore **(Annexure FST-V)**
- M.Sc. students published 31 research papers in the last five years (NAAS rating 0-4: 11 papers; 4-6: 13 papers; >6: 07 papers) (**Annexure FST-IX)**

### Objectives of Initiating Ph.D. Programme

From academic year 2010-11, Ph.D. programme has also been started with the following objectives:

- To produce advanced quality human resource in the discipline of Food Science and Technology
- To conduct applied research with emphasis on agriculture and process engineering

- To contribute in research, especially in thrust areas like:
  - Development of nutritionally rich, value added, high shelf life processed foods
  - Production, standardization, nutritional evaluation and value addition of products based on horticultural crops, underutilized pulses and medicinal plants
  - Development of instant and convenience foods
  - Laboratory to industry scaling up of food processing technologies
  - Food safety and quality management
  - Refinement and transfer of postharvest and value addition technologies

### Accomplishments of Ph.D. Programme

- The department has well developed infrastructure for the Ph.D. programme; including seminar room and well equipped laboratories with two pilot plants

### During last five years

- Twelve Ph.D. students were admitted in the Centre **(Annexure FST-I)**
- Fourteen students qualified NET examination and three along with JRF/SRF fellowship **(Annexure FST-VII and VIII)**
- Fourteen students availed various fellowships. Among these, one student got ICAR/SRF, two students got UGC-JRF/SRF fellowship and eleven students were awarded University merit fellowship **(Annexure FST-VI)**
- Presently, there are ten Ph.D. students on roll and are receiving fellowship like UGC-JRF/SRF, ICAR-SRF and University merit fellowship **(Annexure FST-II)**
- The department has so far conferred degree to 18 Ph.D. scholars and some of them are occupying good positions at the National level **(Annexure FST-V)**
- One student (Ms. Shreya Panwar, 2020FST03D) was selected as ARS scientist in 2023 **(Annexure FST-V)**
- One student (Mr. Naseer) was conferred with best Ph.D. thesis award in 2019 by Society of Integrated Development of Agriculture, Veterinary and Ecological Sciences, Jammu
- Students participated in sixty two conferences and symposia at National and International level **(Annexure FST -III)**
- Ph.D. students attended various training programmes in the last five years **(Annexure FST-IV)**
- Alumni of the department are well placed at higher position in India and abroad. Thirty one students are placed well in institutes of National and International repute **(Annexure FST-V)**
- Fourteen students qualified NET and other national level examinations**(Annexure FST-VII**)
- Ph.D. students published 47 research papers in the last five years (NAAS rating 0-4: 06 papers; 4-6: 23 papers; >6: 18 papers) **(Annexure FST-IX)**

## Student Data for the Last Five Years

| Centre of Food Science and Technology | | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| **Degree programme offered by the department** | **Specialization** | **Year of start** | **No. of seats** | | | | | | **No. of students passed out** | | | | | |
| | | | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total |

| Ph.D. | Food Science and Technology | 2010 | 3 | 3 | 3 | 3 | 3 | **15** | 1 | 0 | 2 | 3 | 1 | **7** |
| **Detail in Annexure I** | | | | | | | | | | | | | | |

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme needs to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of research staff, extension staff, contractual faculty, guest faculty, adjunct faculty or any other arrangements is being made to complete the curriculum, it should be clearly mentioned in the report.*

| Sr. no. | Designation | Sanctioned | In place | Vacant |
|---|---|---|---|---|
| 1. | Professor and equivalent | 01 | 0 | 01 |
| 2. | Associate Professor and equivalent | 01 | 0 | 01 |
| 3. | Assistant Professor and equivalent | 07 | 4*+1** | 02 |
| | Total | 09 | 05 | 04 |

**Note**

1. All the faculty members are assigned the responsibilities for multiple programmes

2. One post of Assistant Professor of FST discipline has also been advertised for COA, Bawal

*Faculty member on deputation in FSSAI since 02.12.2022

**One Professor is personal promotee

## Faculty Profile

There are one Professor (promoted under CAS), three Assistant Professor/equivalent and one Assistant Professor on deputation as Deputy Director (Technical) in FSSAI, New Delhi since December 02, 2022 (AN). Two professors promoted under CAS were superannuated in 2019. Faculty members of this department have published more than 108 research papers in journals of National and International repute during last five years.

## Faculty Profile

| Sr. no. | Name | Designation | Email and Mobile No. | Field of Specialization |
|---|---|---|---|---|
| 1. | Dr. Rakesh Gehlot | Professor and Head | rakagehlot@gmail.com 9416252185 | Fruits and Vegetables Processing |
| 2. | Dr. Rekha | Assistant Professor | rekhaphogat@gmail.com | Food Science and Technology |

| | | | | |
|---|---|---|---|---|
| | | | 9467238876 | |
| 3. | Dr. Anju Kumari | Assistant Professor | anjugaina@hau.ac.in 9034887002 | Food Microbiology |
| 4. | Dr. Ritu | Assistant Professor | ritu3400@gmail.com 9812736768 | Food Science and Technology |
| 5. | Dr. Kanika Pawar* | Assistant Professor | kanikapawar@gmail.com 7015247120 | Food Science and Technology |
| 6. | Dr. Anil Panghal** | AssistantScientist | anilpanghal@hau.ac.in 9988049760 | Food Science and Technology |
| 7. | Dr. D.K. Sharma*** | Associate Director (Training) | dksharma.hau@gmail.com 9416846103 | Processing and Food Engineering |
| **Faculty Retired During 2018-22** | | | | |
| 8. | Dr. Raj Bala Grewal DOR-30.4.2019 | Director | grewalrb@gmail.com 9416252214 | Food Science and Nutrition |
| 9. | Dr. Saleem Siddiqui DOR-30.5.2019 | Professor and Head | saleemcfst@gmail.com 9416397847 | Post Harvest Technology |

*Faculty in PFE, COAE&T, Hisar

***Associated faculty member on deputation in FSSAI since 02.12.2022 (AN)

**Faculty member posted member posted at SNIATTE, Hisar

**6.4.3. Technical and Supporting Staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| Sr. no. | Designation | Sanctioned | In place |
|---|---|---|---|
| 1. | Assistant | 01 | 01 |
| | Clerk | 01 | 01 |
| | SSS | 01 | 01 |
| | Messenger | 01 | 01 |
| 2. | Lab staff | | |
| | ➢ Lab Assistant | 02 | 01 |
| | ➢ Sr. Lab Assistant | 01 | 01 |
| 3. | Field staff | | |
| | ➢ Beldar | 02 | 02 |
| 4. | Lab Technician | 01 | 01 |
| 5. | JRF | 01 | - |
| 6. | Any other (specify) Sweeper | 01 | 01 |
| | Total | 12 | 10 |

Note: All the staff members are assigned the responsibilities for multiple programmes

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the Degree Programme and justify if it is sufficient to meet the course curricula requirement. List major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention theory and practical batches for the Degree Programme.*

**List of Classrooms and Functional Laboratories**

| | |
|---|---|
| No. of lecture rooms with sitting capacity | One Lecture Room for PG Classes (seating capacity 30)<br>One Seminar Room for PG Classes (seating capacity 30) |
| No. of lecture rooms with LCD | Two |

| | |
|---|---|
| No. of labs with specialized purpose | 7 (5 Labs and 2 Pilot Plants) |
| | Fruits and Vegetables Processing Lab (Lab No. 1) |
| | Food Chemistry Lab (Lab No. 3) |
| | Instrumental Analysis Lab (Lab No. 4) |
| | Food Microbiology Lab (Lab No. 5) |
| | Cereal Technology Lab (Lab No. 7) |
| Any other instructional units being utilized for the award of the Degree Programmes | Pilot Plants -Two<br>1. Spray Dryer Pilot Plant (Lab No. 2)<br>2. Fruits and Vegetables Processing Pilot Plant (Lab No. 6) |
| Farm facilities | - |
| Workshops | - |
| Any other instructional unit being utilized for the award of the degree programmes | - |

## Other Instructional Units being Utilized for the Award of Degree Programme

| Instructional Units | Functioning |
|---|---|
| 1. Seminar room with LCD | Seminar room is used for presentation of assignments and delivering seminars by PG students and is also used for conducting PG classes |
| 2. Departmental Library | Reference material, journals, thesis, etc. are referred for PG students to prepare assignments, synopsis, thesis work and writing of review articles/research papers |

## List of Major Equipments Available in CFST

| Sr. no. | Location | Name of equipment |
|---|---|---|
| 1. | Lab No. 1 | Analytical balance, BOD incubator, Deep freezer,Hot air oven, Refractometer |
| 2. | Lab No. 2 | Spray dryer, Papad making machine |
| 3. | Lab No. 3 | Analytical balance, Gas chromatograph, Protein, fat and crude fibreanalyzer, Centrifuge, Hot air oven, pH meter |
| 4. | Lab No. 4 | Analytical balance, Centrifuge, Digital viscometer, Freeze dryer, Research centrifuge, Spectrophotometer, Texture measurement system |
| 5. | Lab No. 5 | Analytical balance, Autoclave, Biosafety cabinet, BOD incubator, Microscopes |
| 6. | Lab No. 6 | Air blast freezer, Aonla pricking machine, Automatic form fill and seal machine, Baby boiler, Colloid mill, Crown corking machine, Deep freezer, Fluidized bed dryer, Fruit pulper, Hot air oven, Skid mounted homogenizer, Slat conveyer, Tray dryer, Vacuum packaging machine |
| 7. | Lab No. 7 | Analytical balance, Coating pan, Electric oven, Dough sheeter, Food extruder laboratory model, Flaking machine, Farinograph, Grit making machine, Modular compact rheometer, Noodle making machine, Orbital shaker incubator, Pasta making machine, Planetary mixer, Quadrant junior mill, Rapid visco-analyser, Rheofermentometer, Sewain making machine, Spectrophotometer, Texture measurement system, Tissue terror homogenizer, Twin screw extruder, Water activity meter |

## Theory and Practical Batches

At UG level, CFST teaches one core course (FST 302) and one professional elective course (Module 9); both the courses have practical components.

- For theory in core course, there are two sections (A and B) in College of Agriculture, CCSHAU, Hisar, one section at College of Agriculture, Kaul and one section at College of Agriculture, Bawal with an average of about 55-65 students in each section.
- For practical classes in FST 302 course, there are two batches, each for two sections at College of Agriculture, Hisar and two section at College of Agriculture, Kaul and two section at College of Agriculture, Bawal, *i.e.*, total eight batches with an average of about 25-30 students in each

batch. For Module 9, there is one batch with an average of about 10-20 students atCollege of Agriculture, Hisar and one batch each of 5-10 students at College of Agriculture, Kaul and at College of Agriculture, Bawal.

- At M.Sc. level, CFST offers 15 courses and all courses have practical components. Some courses are also offered as minor courses for students of other departments. During last five years, on an average, 2 to 4 students were admitted in M.Sc. programme. There is only one batch for theory and practical classes in all the courses with an average of 4-15 students.
- Similarly in Ph.D. programme, on an average, 2-3 students were admitted. CFST offers 8 courses for Ph.D. programme and four courses have practical components. Hence, there is only one batch for theory and practical classes in all the courses.

**6.4.5. Conducting Practicals and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlines any professional degree. But there are some skills that can only be learned through hands-on-practice. It is important that much of the learning material in any given course should be provided in way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hand-on-training as per curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical courses | Course details | How far students are getting desired practical and hands-on-training as per the curriculum (bullet form) |
|---|---|---|---|---|
| **B.Sc.** | **Two** | **Two** | | |
| | FST 302 | FST 302 | • Introduction to the concepts of food science, safety and nutrition<br>• Food composition and chemistry of various food components<br>• Principles and methods of food processing and preservation<br>• Malnutrition, nutritional disorders, energy metabolism, balanced diet<br>• Various aspects of food safety, hazards and risks<br>• Food safety management tools and their basic concepts<br>• Indian food regulatory regime, FSSAI | • Basic knowledge about preparation of solutions and buffers<br>• Determination of physicochemical and phytochemical composition of food<br>• Processing and preservation of foods using different methods of preservation |
| | Module 9 | Module 9 | • Machinery for commercial food processing<br>• Development and quality evaluation of fruits, vegetables, grains and its value added products<br>• FSSAI standards for food products<br>• Establishment of processing unit and visit to commercial processing units | • To develop value added food products through practical demonstrations and hands on practice<br>• Efforts are made for building entrepreneurship spirit and business management competence among the students<br>• Project planning, presentation, business networking and report writing skills |
| **M.Sc.** | **Fifteen** | **Fifteen** | | |
| | FST 452 | FST 452 | • To acquaint the students with history, classification and role of microbiology in agriculture, food and environment<br>• Historical developments in | • Stains and staining techniques<br>• Preparation of media and methods of sterilization, |

| | | | | |
|---|---|---|---|---|
| | | | microbiology and allied disciplines<br>• Classification of prokaryotes, important groups of bacteria, eukaryotic cell: structure and function<br>• Major groups of fungi, algae and protozoa and viruses: general characteristics<br>• Morphology and classification of plant, animal and bacterial viruses<br>• Role of microorganisms in agriculture, food and biotechnology<br>• Food fermentations and principles of food preservation. | isolation, purification and maintenance of microorganisms<br>• Microbiological examination of water and milk |
| | FST 501 | FST 501 | • To acquaint with properties, role of various constituents in foods, interaction and changes during processing<br>• Importance of various foods and nutrients in human nutrition<br>• Food groups and their typical composition, functions<br>• Deficiency diseases, requirements and recommended dietary allowances<br>• Absorption, transport and metabolism of nutrients in human system<br>• Allergens, toxins and anti-nutritional factors in foods | • Students become familiar to proximate analysis of foods<br>• Calorific value of foods<br>• Determination of vitamin C and sugars<br>• Estimation of minerals and anti-nutritional factor |
| | FST 502 | FST 502 | • To study the growth and survival of microorganisms in foods<br>• Physical and chemical methods to control microorganisms.<br>• Biochemical changes caused by microorganisms<br>• Microbes in food fermentation, putrefaction, lipolysis<br>• Antagonism and synergism in microorganism<br>• Food poisoning and food borne infections<br>• Indicator organisms, rapid methods for detection of microorganisms<br>• Food fermentations, probiotics and prebiotics, fermented beverages | • Students are acquainted to microscopic examination of microorganisms<br>• Detection of faecal coliform<br>• Enumeration of physiological groups: psychrophile, thermodurics, osmophiles and halophiles. |
| | FST 503 | FST 503 | • Introduction to food engineering and processes<br>• Fundamentals of heat and heat transfer and analogy to mass transfer<br>• Kinetics of reactions occurring in processed foods<br>• Method for thermal processing, pasteurization and sterilization<br>• General introduction to canning process<br>• Food chilling and freezing, properties of frozen foods<br>• Heat exchanger, process heat transfer, modes of heat transfer and overall heat transfer | • Determination of viscosity of Newtonian fluid, Non Newtonian fluids<br>• Particle size analysis<br>• Determination of thermal properties of foods such as thermal conductivity, thermal diffusivity, calorific value and specific heat<br>• Study of different types of freezers |

| | | | | |
|---|---|---|---|---|
| | | | • Thermal properties of foods such as specific heat and thermal conductivity<br>• Fourier's law, steady state and unsteady state conduction<br>• Heat exchange equipment | |
| | FST 504 | FST 504 | • To acquaint with principles of different techniques used in processing and preservation of foods<br>• Processing and preservation by low-temperature, CA, MA and dehydro-freezing<br>• Processing and preservation by drying, concentration and evaporation<br>• Processing and preservation by non-thermal methods<br>• Use and application of enzymes and microorganisms in processing and smoking<br>• Food additives: definition, types and functions, permissible limits and safety | • To acquaint the students with various operations concerning seaming and testing of cans<br>• Determination of thermal inactivation time of enzymes<br>• Dehydration of foods, refrigeration and freezing of foods<br>• Concentration of foods, use of chemicals in preservation of foods |
| | FST 505/ PFE 510 | FST 505/ PFE 510 | • Introduction of packaging: Package, functions and design<br>• Food containers, corrosion of containers<br>• Flexible packaging materials and their properties<br>• Aluminium as packaging material<br>• Packaging equipments<br>• Retortable pouches<br>• Methods to extend shelf life<br>• Special problems in packaging of food stuff<br>• Different packaging system for various food products<br>• Package standards and regulations<br>• Recent trends in packaging of food stuffs | • Identification and testing of packaging materials<br>• Determination of wax from wax paper<br>• To perform various test concerning reliability of packaging material, grading of glass bottles for alkalinity<br>• Determination of water vapour transmission rate of packaging material<br>• Testing the compression strength of the boxes |
| | FST 506 | FST 506 | • Concept of quality and attributes<br>• Food adulteration and food safety<br>• Quality management<br>• Quality management systems in India<br>• Food Safety and Standards Act, 2006<br>• Indian and International quality systems and standards like ISO and Food Codex<br>• Organizations dealing with inspection, traceability and authentication, certification and quality assurance<br>• International scenario, International food standards<br>• Total quality management; GMP/GHP; GLP, GAP, HACCP<br>• Food export and import | • To acquaint with food quality parameters and control systems, food standards, regulations, and specifications<br>• Quality management systems<br>• Indian and International scenario via documentation, procedure and rules regarding export and import, testing facilities, laboratory accreditation process and method, traceability procedure |
| | FST 507 | FST 507 | • Significance of food analysis, water activity, its measurements<br>• Spectroscopic techniques using UV/Vis, fluorescence, IR, NMR, atomic absorption and emission, flame | • To understand the conventional analysis of raw and processed food products of all commodity technologies used for |

| | | | | |
|---|---|---|---|---|
| | | | photometry, polarimetry, refractometry, nephelometry<br>• Chromatographic techniques: adsorption, partition, affinity, ion exchange, size exclusion, TLC and paper chromatography, GLC, HPLC, GCMS<br>• Separation techniques: Gel filtration, electrophoresis, isoelectric focusing; manometric techniques and gas analysis<br>• Rheology and texture analysis | routine quality control in food industry and their role on nutritional labelling |
| | FST 511 | FST 511 | • Importance and scope of post harvest management of fruits and vegetables<br>• Classes, morphology, structure and composition of fruits and vegetables<br>• Maturity indices and standards for selected fruits and vegetables<br>• Harvesting and handling of important fruits and vegetables<br>• Harvesting tools and their design aspects<br>• Field heat of fruits and vegetables and primary processing for sorting and grading at farm and cluster level<br>• Post-harvest physiological and biochemical changes in fruits and vegetables<br>• Ripening of climacteric and non-climacteric fruits<br>• Storage practices: CA and MA, hypobaric storage, pre-cooling and cold storage, Zero energy cool chamber<br>• Pretreatments: Chemicals, wax coating, prepackaging, VHT and irradiation<br>• Physiological postharvest disorders: chilling injury and disease, prevention of postharvest diseases and infestation<br>• Postharvest handling system for fruits and vegetables<br>• Packaging house operations, principles of transport and commercial transport operations | • Proper handling and management using appropriate technologies for various fruits and vegetables to reduce postharvest losses and value addition |
| | FST 512 | FST 512 | • Indian and global scenario on production and processing of fruits and vegetable<br>• Quality requirements of raw materials for processing<br>• Primary processing: grading, sorting, cleaning, washing, peeling, slicing and blanching; minimal processing<br>• Processing for pulp and juices, puree and concentrates<br>• RTS fruit beverages, IQF and frozen fruits and vegetables<br>• Technology for processed products like pickles, chutneys, sauces, etc. | • Principles and methods of preservation and processing of fruits and vegetables into various products |

| | | | | |
|---|---|---|---|---|
| | | | • Processing of fruits for candies, bars, toffees, jams and jellies, squashes and syrups<br>• Dehydration of fruits and vegetables using various drying technologies | |
| | FST 513 | FST 513 | • Structure and composition of common cereals, pulses and oilseeds<br>• Wheat: Types, physicochemical characteristics and quality parameters, wheat milling: products and by-products and processed products<br>• Rice: Classification, physicochemical characteristics; cooking quality; rice milling technology<br>• Corn: Dry and wet milling, manufacture of value-added products<br>• Processing of barley, oats, sorghum and millets, ready-to-cook, instant products, breakfast cereals<br>• Legumes: Composition, anti-nutritional factors, processing and storage<br>• Oilseeds: Composition, storage, processing for production of edible oil, oilseed cake and meal, fat and oil processing, fat and oil products. | • To understand the processing technologies for product development and value addition of various cereals, pulses and oilseeds |
| | FST 520 | FST 520 | • Food additives- Definitions, classification and functions<br>• Preservatives, antioxidants, colours and flavours, emulsifiers, sequestrants, humectants, hydrocolloids, sweeteners, acidulants, buffering salts, anticaking agents, etc.<br>• Flavour technology: Types of flavours, flavours generated during processing: reaction flavours, flavour composites, stability of flavours during food processing, analysis of flavours, extraction techniques of flavours<br>• Proteins, starches and lipids as functional ingredient; isolation, modification, specifications, functional properties<br>• Manufacturing and applications of dietary fibres, fructo-oligosaccharides | • To get an insight into the additives that are relevant to processed food industry for shelflife extension, processing aids and sensory appeal.<br>• To develop an understanding of isolation of various biopolymers from food resources and their relevant applications |
| | FST 521 | FST 521 | • Isolation, screening and genetic improvement of industrially important organisms<br>• Fermenter design and various types of fermentation systems, fermentation substrates<br>• Principles and production of amino acids, enzymes, nucleotides, organic acids, food colours, Baker's yeast, alcoholic beverages, vinegar<br>• Principles and production of microbial proteins, lipids, polysaccharides and vitamins<br>• Utilization and disposal of industrial | • To acquaint with application of micro-organisms for the production of Industrial products with particular reference to foods and food ingredients |

| | | | | |
|---|---|---|---|---|
| | | | wastes through microorganisms<br>• Use of genetically modified microorganisms in food processing | |
| | FST 591 | FST 591 | • Master's Seminar | • To strengthen teaching skills of students |
| | FST 599 | FST 599 | • Master's Research | • To strengthen research skill of students |
| **Ph.D.** | **Eight** | **Four** | | |
| | FST 602 | FST 602 | • Foods as ecological niches, relevant microbial groups, harmful microbes in raw materials and foods<br>• Newer and rapid methods for qualitative and quantitative assay demonstrating the presence of microbes<br>• Microbial growth in food: Intrinsic, extrinsic and implicit factors<br>• Adaption and resistance development, microbes as test organisms, as sensors and as tools for future applications in energy production<br>• Modern methods of cell culture | • To expose the students to recent advances and applications in the area of food microbiology |
| | FST 691 | FST 691 | Doctoral Seminar-I | To strengthen teaching skills of students |
| | FST 692 | FST 692 | Doctoral Seminar-II | To strengthen teaching skills of students |
| | FST 699 | FST 699 | Doctoral Research | To strengthen research skill of students |

**6.4.6. Supervision of Students in PG/Ph.D. Programmes:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure numbers of qualified faculty in relation to the intake of the students, as per the guidelines in the matter.*

### M.Sc.Programme

| Year | Number of students on roll | Number of PG faculty* | Student-teacherRatio |
|---|---|---|---|
| 2018-19 | 10 | 6+2*=8 | 1.25:1 |
| 2019-20 | 11 | 4+2*=6 | 1.83:1 |
| 2020-21 | 10 | 3+3*=6 | 1.67:1 |
| 2021-22 | 06 | 3+4*=7 | 0.86:1 |
| 2022-23 | 07 | 5**+2*=7 | 1:1 |

*Faculty posted at RRS, Uchani; PFE; DHRM and SNIATTE, CCSHAU, Hisar

**One Facultymember in position from 31.7.2022 to 02.12.2022 and on deputation in FSSAI since 02.12.2022

### Ph.D. Programmes

| Year | Number of students on roll | Number of PG faculty | Student-teacherRatio |
|---|---|---|---|
| 2018-19 | 08 | 6+2*=8 | 1:1 |
| 2019-20 | 08 | 4+2*=6 | 1.33:1 |
| 2020-21 | 11 | 3+3*=6 | 1.83:1 |
| 2021-22 | 11 | 3+4*=7 | 1.57:1 |
| 2022-23 | 11 | 5**+2*=7 | 1.57:1 |

*Faculty posted at RRS, Uchani, PFE, DHRM and SNIATTE, CCSHAU, Hisar

**One facultymember in position from 31.7.2022 to 02.12.2022 and on deputation in FSSAI since 02.12.2022

**6.4.7. Feedback of Stakeholders (Students, parents, industries, employers, farmers, etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the Degree Programme. What action the University has taken in last five years to address the issues raised in the feedback?*

There is a system of annual self appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice-Chancellor. Any suggestions provided by them are incorporated in the curriculum. The stakeholders' feedback on the overall performance and quality of the institutions is obtained through general meetings with parents and interaction with the alumni. The teachers get informal feedback from the students based on their parents' observations and suggestions. These suggestions are conveyed to the HODs and controlling officers.

**6.4.8 Student Intake and Attrition in the programme for last five years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the Degree Programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| M.Sc. | 04 | 02 | 02 | 02 | 03 | 0 | 0 | 0 | 0 | 0 |
| Ph.D. | 02 | 02 | 03 | 02 | 03 | 0 | 0 | 0 | 0 | 0 |

**6.4.9. ICT Application in Curricula Delivery:** *The ICT is now an integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*

The faculty members of CFST use ICT in teaching and practical. There is one seminar room and one lecture room with computer, LCD projector and internet connection. All faculty members have computers with printers and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members use power point presentations, YouTube, emails and CD ROM in teaching all courses at UG, PG and Ph.D. level. During COVID-19 pandemic, the department adopted online teaching platforms such as Google Meet and Microsoft Teams for effective teaching. All the teaching materials were successfully uploaded on the ERP module and Microsoft teams to ensure the accessibility of teaching materials to all the students.

**6.4.10.** The information pertaining to 6.4.1 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. degree programmes, separately; and to be presented college-wise.

**6.4.11.** Since the accreditation of programmes is related to the All India Admission from ICAR and also having weightage for college accreditation, therefore, the data presented in the section 6.4 are liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for programme)

I, the Dean, **Dr. Neeraj Kumar,** hereby, certify that the information contained in thesection 6.4.1 to 6.4.9 are furnished as per the records available in the college, and degree awarding University.

**Signature of Dean of the College with Date and Seal**

# PROGRAMME – 5

# M.Sc. Mathematics & Statistics
# and
# Ph.D. Mathematics & Statistics

VICE-CHANCELLOR'S SECRETARIAT

Prof. B. R. Kamboj
Dr. Atul Dhingra

## 6.4 About the Department

The department of Mathematics and Statistics has been imparting quality education in Statistics and Mathematics since its inception in 1971. It has three major components viz., teaching, research and consultancy. The department offers courses of Mathematics and Statistics for UG and PG students of various colleges of the university i.e., Agriculture, Basic Sciences & Humanities, Agricultural Engineering & Home Sciences, College of Agriculture, Kaul and Bawal. This department has a strong research program on theoretical and applied aspects with emphasis on applications of Statistics in agriculture and allied fields. Besides supporting other disciplines in their research, the department is running its own M.Sc. and Ph.D. programme in Statistics and Mathematics. Advisory and consultancy services are also provided by the faculty members to research scholars and scientists of the entire university.

Well trained students of statistics have great scope and job opportunities in teaching and research in colleges and universities as well as in the private sectors. Competent statisticians are in great demand for business analytics and conducting marketing research in multinational companies. Industrial quality control and consultancy are other areas open to the professional statisticians. The students are trained to face any kind of challenge in their employment career. The courses taught by the department have been revised as per the recommendations of the ICAR at national level. Most of the ex-students of this department are very well placed at national and international levels. Some of them are in faculty and others on responsible positions in universities and institutes of national and international repute. During last five years on an average two students were admitted in M.Sc. and six students in Ph.D. Presently there are thirteen M.Sc. students and twenty-six Ph.D. students on roll.

There is no UG programme in the department, however, the department is offering two UG courses to undergraduates of College of Agricultural Engineering & Technology and one UG course to undergraduates of Indira Chakravarty College of Home Science.

### Objectives of the Department

- To provide statistical consultancy to the researchers/ students of the university and conduct need based training for researcher
- To develop framework for applications of modern statistical techniques used in agricultural/ allied sciences

**6.4.1. Brief History of the Degree Programme:** *Clearly mention in which year the Degree Program was initiated along with its objective and accomplishments.*

M.Sc. and Ph.D. programme in Statistics was initiated in the year 1971. Entry qualification for Masters programme is B.Sc./B.Sc. (Hons.) in Medical/Non-Medical/ Statistics/ Agriculture. Minimum duration of the programme is 2 years and maximum duration is 4 years. Medium of instruction is English. However, entry qualification for Ph.D. Statistics is Master degree in any Statistics/ Agricultural Statistics/ Applied Statistics.

However, entry qualification for M.Sc. Mathematics is graduate degree as one of the subject with Mathematics whereas qualification for Ph.D. is master degree in Mathematics/ Applied Mathematics.

### Objectives of Initiating M.Sc. and Ph.D. Programme

A. M.Sc. and Ph.D. programme in Statistics was initiated with the following objectives:

- To produce quality human resource in the discipline of Statistics
- To provide knowledge to students in following research areas

- Experimental Designs for agricultural and agro-forestry trials
- Statistical models for Multi-environment and Multi-Locational trials
- Time series models for crop forecasting
- Structural equation modelling and mating designs
- Bayesian and reliability models in agricultural research
- Statistical techniques for estimation of harvest and post-harvest losses
- Regression and econometrics models

**B. M.Sc. and Ph.D. programme in Mathematics was started in year 2019 with the following objectives:**

- To produce quality human resource in the discipline of Mathematics
- To provide knowledge to students in following research areas
  - Image processing
  - Fluid dynamics
  - Cryptography
  - Optimization techniques
  - Complex analysis
  - Mathematical computing
  - Knot theory

### Accomplishments of M.Sc. Programme

- The Department has well developed infra-structure for the M.Sc. Programme with seminar room, classroom and well equipped laboratories.
- Seven students were encouraged to participate in conferences and symposia. (**Annexure MATHSTAT-III**)
- Five students have participated in different trainings. (**Annexure MATHSTAT-IV**)
- Ten studentshave been placed in Government sector job. (**Annexure MATHSTAT-V**)
- Most of the students got fellowships/ stipend from university and other sources (**Annexure MATHSTAT-VI**)
- Eighteen students cleared NET, ARS, and GATE. (**Annexure MATHSTAT-VII**)
- In last five years, students of the department have published thirty three research papers in reputed journals having NAAS Rating from 5.21 to 12.29. (**Annexure MATHSTAT-IX**)

### Accomplishments of Ph.D. programme

- The Department has well developed infra-structure for the Ph.D.programme with seminar room, class room and well equipped Computer Lab
- Nine students participated in conferences and symposia of national and international level **(Annexure MATHSTAT-III)**
- Students in doctoral programme attended the trainings from time to time. In last five years, nine students have participated in different trainings **(Annexure MATHSTAT-IV).**
- Eleven students have been availing national level scholarships like, CSIR JRF, UGC etc. **(Annexure MATHSTAT-VI)**
- Fifteen students have qualified NET, GATE and other national level exams. **(Annexure MATHSTAT-VII)**

- Ph.D. students of this department have published their research outcomes in form of 22 research paper in last five years (NAAS rating 4.75-14.07). **(Annexure MATHSTAT-IX)**
- Alumni of the department are well placed at higher position in India and abroad.

### Student Data for the Last Four Years

| Name of the Department | | | Mathematics and Statistics | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Degree programme | Specialization | Year of start | No. of seats | | | | | | No. of students passed out | | | | | |
| | | | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | Total |
| M.Sc. | Statistics | 1970 | 03 | 03 | 03 | 02 | 01 | **12** | 02 | 02 | 03 | 01 | 02 | **10** |
| Ph.D. | Statistics | 1970 | 03 | 05 | 02 | 02 | - | **12** | 01 | 05 | 01 | - | 02 | **09** |
| M.Sc. | Mathematics | 2019 | - | 01 | 01 | 01 | 02 | **05** | - | - | - | 01 | - | **01** |
| Ph.D. | Mathematics | 2019 | - | 05 | 03 | 03 | 02 | **13** | - | - | - | - | - | - |
| **Details in Annexure MATHSTAT I** | | | | | | | | | | | | | | |

**6.4.2. Faculty Strength:** *The faculty strength of the Degree Programme needs to be given cadre-wise, both sanctioned and in-place (under the table mentioned below). Clearly mention the number of permanent faculty appointed for the Degree Programme, part time faculty being deputed from the other departments (in such case mention the name of these departments). If the Degree Programme is also taking the help of research staff, extension staff, contractual faculty, guest faculty adjunct faculty or any other arrangements is being made to complete the curriculum, it should be clearly mentioned in the report.*

| S. No. | Designation | Faculty sanctioned | Faculty in place | Vacant |
|---|---|---|---|---|
| 1. | Professor and equivalent | 1 | 0 | 01 |
| 2. | Associate Professor and equivalent | 3 | 0 | 03 |
| 3. | Assistant Professor and equivalent | 8 | 5+2* | 01 |
| 4 | Assistant Scientist | 02 | 0 | 02 |
| | Total | 14 | 07 | 07 |

**Note:** All the faculty of this programme is assigned theresponsibilities for the multiple programmes.

### Faculty Profile

At present there are seven Assistant Professors/ equivalents. Seven copyrights have been granted to the faculty members for the development of online software tools.

Faculty of the department published three course manuals, three books more than 45 research papers in journals of national and international repute, seven book chapters during period under report. One vacancy of associate professor and one vacancy of assistant professor have already been advertised.

| S. No. | Name | Designation | Email and Mobile No. | Specialization |
|---|---|---|---|---|
| 1. | Dr. O.P. Sheoran | Professor & Head | opsheoran1968@gmail.com 9416241326 | Statistical Programming, Multivariate & Genetical Statistics |
| 2. | Dr. ManjuTonk | Professor | manjutonk@gmail.com 9996210277 | Real and Complex Analysis |
| 3. | Dr. Manoj Kumar | Assistant Professor | m25424553@gmail.com 9416078701 | Sampling and Regression Analysis |
| 4. | Dr. Hemant Poonia | Assistant Professor | pooniahemant80@gmail.com9468192071 | Fluid Dynamics, Optimization Techniques |
| 5. | Dr. Sarita Rani | Assistant Professor | saritamalik@hau.ac.in 9467772688 | Design of Experiment |
| 6. | Dr.Vinay Kumar | Assistant Professor | vinay.stat@gmail.com 9896221071 | Computational Statistics, Bayesian Inference |
| 7. | Dr. Vikash | Assistant Professor | vikash@hau.ac.in 9569254780 | Knot Theory, Topology |
| 8. | Dr. Nitin Bhardwaj* | Assistant Scientist | nitinbhardwaj.mdu@hau.ac.in 7289857340 | Reliability Theory |
| 9. | Dr. Joginder* | Assistant Scientist | joginder.stats@hau.ac.in 9541341233 | Reliability and Statistical Modelling |
| 10. | Dr. Monika* | Assistant Scientist | monika1804@hau.ac.in 8130447714 | Sample Surveys, Statistical Modelling |
| 11. | Mr. Sunny** | Assistant Professor | sunnymaths21@gmail.com 7027223984 | - |
| **Faculty Retired during 2018-22** | | | | |
| 1. | Dr. D.R. Aneja (30/11/2022) | Professor | 19draneja57@gmail.com 9813776060 | Genetics Statistics |
| 2. | Dr.UrmilVerma (31/07/2020) | Professor | verma21@hotmail.com 9416926933 | Time Series Modelling |
| 3. | Dr. B.K. Hooda (30/04/2022) | Professor | bkhooda@gmail.com 9315385447 | Statistical Inference and Multivariate |

* Faculty posted at COA, Hisar, ** posted at **COA, Kaul**

**6.4.3. Technical and Supporting Staff:** *The position of the technical and supporting staff of the Degree Programme including farm and field workers need to be mentioned for both sanctioned and in-place.*

| S. No. | Designation | Sanctioned | Technical and supporting staff in place |
|---|---|---|---|
| 1. | Assistant | - | - |
| | Clerk | 01 | 01 |
| | PA/Steno | 01 | - |
| | Messenger | - | - |
| | Computer Lab Attendant | - | - |
| | Total | 02 | 01 |

Note: All the staff is assigned the responsibilities for the multiple programmes.

**6.4.4. Classrooms and Laboratories:** *Mention the number of class rooms and functional laboratories available for the Degree Programme and justify if it is sufficient to meet the course curricula requirement. Lists major equipments, laboratories, farm facilities, workshops and other instructional units being utilized for the award of the Degree Programme may be given. Mention Theory and practical batches for the Degree Programme.*

### List of Classroom and Functional Laboratories

| | |
|---|---|
| Name of College/Department | College of Basic Sciences and Humanities/ Mathematics & Statistics |
| No. of lecture rooms with seating capacity | One lecture room with seating capacity of 40 |
| No. of lecture rooms with LCD | Two |
| No. of laboratories for specialized purpose | One Advanced Computational Lab and One Statistical lab |
| Farm facilities | - |
| Workshops | - |
| Any other instructional units being utilized for the award of the Degree Programme | - |

### Other Instructional Units being utilized for the Award of Degree Programme

| Instructional Units | Functioning |
|---|---|
| 1. Seminar room with LCD | Seminar room is used for presentation of assignments and delivering seminars by PG students and also used for conducting PG classes. |
| 2. Departmental library | Reference material, thesis etc. are referred by PG students for preparation of assignments, synopsis and thesis work. |

### List of Major Equipments available in the Department: Nil

### Theory and practical batches

- At UG level, department is offering four theory and eight practical courses of B.Sc. Agri. (Hons), two courses of B.Sc. Home Science and six theory and six practical courses of Agricultural Engineering & Technology.
- At M.Sc. level, the department offers total 27 and 19 courses in discipline of statistics and mathematics respectively in which 15 and 8 courses in discipline of statistics and mathematics respectively have practical components. There are limited seats in M.Sc. programme with an average of 2-3 students. Some courses are offered as minor courses for students of other departments. There is only batch for theory classes and one batch for practical classes in all the courses with an average of 30 students.
- Similarly, at Ph.D. level there are limited seats in Ph.D. programmes. Hence, there is only batch for theory classes in all the courses. For Ph.D., the department offers 14 courses.
- The department is also offering five services courses for students of college of Agriculture, Home science and fisheries sciences. The department is also offering minor and supporting courses for students of various colleges of University.

**6.4.5. Conduct of Practical and Hands-on-Training:** *It is important to have a sound grasp of the theory that underlines any professional degree. But there are some skills that can only be learned through hands-on –practice. It is important that much of the learning material in any given course should be provided in way that allows students to get as involved as possible to increase their knowledge and abilities. Clearly mention how far students are getting desired practical and hand-on-training as per curriculum and meeting above mentioned requirements.*

| Degree programme | Total courses | Practical courses | Course details | How far students are getting desired practical and hands-on-training as per the curriculum (bullet form) |
|---|---|---|---|---|
| UG (Statistics) | 02 | 02 | 02 | As per course curriculum the practical and hands-on-training are given |
| 1 | STAT-100 | Elementary Statistics | 2+1 | • Graphical representation of data. Measures of central tendency |

| | | | | |
|---|---|---|---|---|
| | | | | • Measure of central tendency<br>• Measure of dispersion<br>• Moments, measure of skewness, kurtosis<br>• Correlation, regression analysis. Application of one sample t-test. Application of two sample Fisher's t-test. Chi-square test.<br>• Selection of random sample using Simple random sampling. |
| 2 | STAT-102 | Statistical Methods | 1+1 | • Graphical representation of data. Measures of central tendency with calculation of quartiles, deciles, percentiles<br>• Measure of dispersion, moments, measure of Skewness, kurtosis<br>• Correlation and regression analysis application of one sample t-test. Application of two sample Fisher's t-test.<br>• Chi-square test of goodness of fit, Chi-square test of independence of attributes for 2x2 contingency table<br>• Analysis of variance one-way classification<br>• Selection of random sample using simple random sampling |
| UG (Mathematics) | 05 | 04 | | |
| 1 | MATH-101 | Elementary Mathematics | 1+1 | • Finding distance between two points, section formula and area of a triangle<br>• Different forms of straight lines, angle between two lines and simple problems on finding equation of a circle<br>• Applications of trigonometry. Simple problems on finding limit, continuity and derivatives of different type of functions<br>• Application of derivatives to find maxima and minima of functions<br>• Integration of functions by different methods and application of integration to find area under simple curves<br>• Addition, multiplication, transpose and inverse of the matrix; problems based on solution of system of equations |
| 2 | MATH-104 | Engineering Mathematics-I | 2+1 | • Tutorials on rank of a matrix, reduction to normal form<br>• Consistency and solution of linear equations,eigen values and eigen vectors<br>• Cayley-Hamilton theorem, diagonalization of matrices, quadratic forms<br>• Tutorials on Taylor's and Maclaurin's expansion, indeterminate forms, curvature, tracing of curves,<br>• Partial differentiation, maxima and minima, volume and surface of revolution, multiple integrals<br>• Beta and Gamma functions, differentiation of vectors, gradient, divergence and curl of a vector point function, line, surface and volume integrals, Stoke's, divergence and Green's |

| | | | | |
|---|---|---|---|---|
| | | | | theorems |
| 3 | MATH-105 | Engineering Mathematics-II | 2+1 | • Tutorials on solution of ordinary differential equations of first and higher orders<br>• Series solutions of differential equations, Bessel's and Legendre's differential equations<br>• Convergence of infinite series. Fourier series, harmonic analysis<br>• Analytical functions, Cauchy-Riemann equations, harmonic functions<br>• Solution of partial differential equations, Application of partial differential equations |
| 4 | MATH-201 | Engineering Mathematics-III | 2+1 | • Interpolation, Numerical differentiation and integration solutions of difference equations<br>• Numerical solution of ordinary differential equations of first order and first degree<br>• Laplace and inverse Laplace transformations and their application to solution of ordinary and simultaneous differential equations<br>• Problems on one sample, two sample Z-tests when population S.D. is known and unknown<br>• Problems on one sample, two sample and paired t-test Chi-Square test – 2x2 and m x n<br>• Calculation of correlation coefficient and its testing, contingency table and F-test |
| PG (Statistics) | 27 | 15 | | |
| 1 | STAT 561 | Statistical Methods | 2+1 | • Fitting of discrete distributions and test for goodness of fit;<br>• Fitting of continuous distributions and test for goodness of fit;<br>• Fitting of truncated distribution;<br>• Computation of simple, multiple and partial correlation coefficient, correlation ratio and intra-class correlation;<br>• Regression coefficients and regression equations;<br>• Fitting of Pearsonian curves;<br>• Analysis of association between attributes, categorical data and log-linear models |
| 2 | STAT 562 | Statistical Inference | 2+1 | • Methods of estimation - maximum likelihood, Minimum c2 and Moments;<br>• Confidence interval estimation; MP and UMP tests; Large sample tests; Non-parametric tests,<br>• Sequential probability ratio test;<br>• Decision functions |
| 3 | STAT 563 | Multivariate Analysis | 2+1 | • Maximum likelihood estimates of mean-vector and dispersion matrix;<br>• Testing of hypothesis on mean vectors of multivariate normal populations;<br>• Cluster analysis,<br>• Discriminant function,<br>• Canonical correlation,<br>• Principal component analysis,<br>• Factor analysis;<br>• Multivariate analysis of variance and covariance, |

| | | | | |
|---|---|---|---|---|
| | | | | • Multidimensional scaling. |
| 4 | STAT 564 | Design Of Experiments | 2+1 | • Determination of size and shape of plots and blocks from uniformity trials data; Analysis of data generated from completely randomized design,<br>• Randomized complete block design;<br>• Latin square design,<br>• Youden square design;<br>• Analysis of data generated from a BIB design, lattice design, PBIB designs;<br>• 2n, 3n factorial experiments without and with confounding; split and strip plot designs, repeated measurement design; missing plot techniques, analysis of covariance; analysis of groups of experiments, analysis of clinical trial experiments |
| 5 | STAT 565 | Theory of Sampling Techniques | 2+1 | • Determination of sample size and selection of sample;<br>• Simple random sampling,<br>• Inverse sampling,<br>• Stratified random sampling,<br>• Cluster sampling,<br>• Systematic sampling;<br>• Ratio and regression methods of estimation; double sampling,<br>• Multi-stage sampling,<br>• Imputation methods;<br>• Randomized response techniques;<br>• Sampling with varying probabilities |
| 6 | STAT 566 | Statistical Genetics | 2+1 | • Test for the single factor segregation ratios, homogeneity of the families with regard to single factor segregation;<br>• Detection and estimation of linkage parameter by different procedures; estimation of genotypic and gene frequency from a given data. Hardy-Weinberg law;<br>• Estimation of changes in gene frequency due to systematic forces, inbreeding coefficient, genetic components of variation, heritability and repeatability coefficient, genetic correlation coefficient;<br>• Examination of effect of linkage, epistasis and inbreeding on mean and variance of metric traits;<br>• Mating designs;<br>• Construction of selection index including phenotypic index, restricted selection index. correlated response to selection |
| **7** | STAT 567 | Regression Analysis | 2+1 | • Multiple regression fitting with three and four independent variables;<br>• Estimation of residuals, their applications in outlier detection, distribution of residuals Test of homoscedasticity, and normality, Box-Cox transformation;<br>• Restricted estimation of parameters in the model, hypothesis testing, step wise regression |

| | | | | |
|---|---|---|---|---|
| | | | | analysis;<br>• Least median of squares norm,<br>• Orthogonal polynomial fitting. |
| 8 | STAT 568 | Statistical Computing | 1+1 | • Data management, graphical representation of data, descriptive statistics<br>• General linear models ~ fitting and analysis of residuals, outlier detection<br>• Fitting and testing the goodness of fit of probability distributions<br>• Testing the hypothesis for one sample t-test, two sample t-test, paired t-test, test for large samples - Chi-squares test, F test, One-way analysis of variance, contrast and its testing, pairwise comparisons<br>• Mixed effect models, estimation of variance components<br>• Categorical data analysis, dissimilarity measures, similarity measures<br>• Analysis of discrete data, analysis of binary data; numerical algorithms<br>• Spatial modeling, cohort studies<br>• Clinical trials, analysis of survival data handling missing data. analysis of time series data - fitting of ARIMA models |
| 9 | STAT 569 | Time Series Analysis | 2+1 | • Time series analysis, autocorrelations, correlogram and periodogram;<br>• Linear stationary model<br>• Linear non-stationary model<br>• Model identification and model estimation; Intervention analysis and outlier detection |
| 10 | STAT 511 | Statistical Methods For Applied Sciences | 3+1 | • Exploratory data analysis<br>• Fitting of distributions ~ Binomial, Poisson, Negative Binomial, Normal<br>• Large sample tests, testing of hypothesis based on exact sampling distributions ~ chi square, t and F<br>• Confidence interval estimation and Correlation and regression analysis<br>• Fitting of linear and quadratic model. Non-parametric tests<br>• ANOVA: one way, two way, SRS |
| 11 | STAT 512 | Experimental Designs | 2+1 | • Uniformity trial data analysis, formation of plots and blocks<br>• Fairfield Smith Law, analysis of data obtained from CRD, RBD, LSD,<br>• Analysis of factorial experiments,<br>• Analysis with missing data<br>• Split plot and strip plot designs |
| 12 | STAT 513 | Sampling Techniques | 2+1 | • Random sampling ~ use of random number tables, concepts of unbiasedness, variance, etc.<br>• Simple random sampling, determination of sample size, inverse sampling<br>• Stratified sampling<br>• Cluster sampling and systematic sampling; estimation using ratio and regression |

| | | | | |
|---|---|---|---|---|
| | | | | estimators<br>• Estimation using multistage design, double sampling |
| 13 | STAT 521 | Applied Regression Analysis | 2+1 | • Correlation coefficient, various types of correlation coefficients<br>• Partial and multiple, testing of hypotheses; multiple linear regression analysis, partial regression coefficients, testing of hypotheses, residuals and their applications in outlier detection<br>• Handling of correlated errors, multi Co linearity<br>• Fitting of quadratic, exponential and power curves, fitting of orthogonal polynomials |
| 14 | STAT 532/ BIF 505 | Statistics for Biological Sciences | 2+1 | • Construction and representation of frequency distribution<br>• Descriptive measures<br>• Probability distribution |
| 15 | STAT 534/ MBB 553/ FST 531/ SOC 512 | Biostatistics And Computers | 2+1 | • Data analysis using probability, test of significance<br>• Correlation and regression analysis<br>• Usage of MS-Windows<br>• SPSS |
| **Ph.D. (Statistics)** | **14** | **07** | | |
| 1 | STAT 601 | Advanced Statistical Computing | 2+1 | • Analysis of qualitative data; generalized linear for correlated data; generalized linear models for discrete data<br>• Robust methods of estimation and testing of non-normal data; robust multivariate analysis<br>• Cluster analysis<br>• Analysis of incomplete data; classification and prediction using artificial neural networks<br>• Markov chain<br>• Analysis of data having random effects using linear mixed effects models; analysis of data with missing observations<br>• Applications of multiple comparison procedures<br>• Building simultaneous confidence intervals<br>• Fitting of growth curve models to growth data<br>• Fitting of dose response curves and estimation of parameters |
| 2 | STAT 602 | Simulation Techniques | 2+1 | • Simulation from various probability models<br>• Resampling methods, jackknife and the bootstrap<br>• Randomization tests; simulating multivariate distributions<br>• MCMC methods and Gibbs sampler; ARMA and transfer-function models, spectral-domain regression<br>• Simulated data sets to be analysed using popular computer software packages<br>• Markov chain, Monte Carlo, Gibbs' sampling |

| | | | | |

**6.4.6. Supervision of Students in PG/Ph.D. Programmes:** *Number of students being supervised by Faculty in case of Masters/Ph.D. Programme (as per ICAR/UGC guidelines). Mention the realistic figure numbers of qualified faculty in relation to the intake of the students, as pre the guidelines in the matter.*

### M.Sc. (Statistics) Programme

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 03 | 04 | 0.75:1 |
| 2019-20 | 03 | 05 | 0.6:1 |
| 2020-21 | 03 | 07 | 0.43:1 |
| 2021-22 | 02 | 07 | 0.3:1 |
| 2022-23 | 01 | 07 | 0.14:1 |

### Ph.D. (Statistics) Programme

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 03 | 04 | 0.75:1 |
| 2019-20 | 05 | 05 | 1:1 |
| 2020-21 | 02 | 07 | 0.3:1 |
| 2021-22 | 02 | 07 | 0.3:1 |
| 2022-23 | 00 | 07 | 0:1 |

### M.Sc. (Mathematics) Programme

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 00 | 2 | 0:1 |
| 2019-20 | 1 | 3 | 0.33:1 |
| 2020-21 | 1 | 3 | 0.33:1 |
| 2021-22 | 1 | 3 | 0.33:1 |
| 2022-23 | 2 | 3 | 0.66:1 |

### Ph.D. (Mathematics) Programme

| Year | Number of students on roll | Number of PG faculty | Student-teacher Ratio |
|---|---|---|---|
| 2018-19 | 00 | 2 | 0:1 |
| 2019-20 | 05 | 3 | 1.66:1 |
| 2020-21 | 03 | 3 | 1:1 |
| 2021-22 | 03 | 3 | 1:1 |
| 2022-23 | 02 | 3 | 0.66:1 |

**6.4.7. Feedback of stake holders (Student, parents, industries, employees, farmers etc.):** *Mention the feedback mechanism (duly supported by the documents) from different stakeholders of the Degree Programme. What action the University has taken in last five years to address the issues raised in the feedback?*

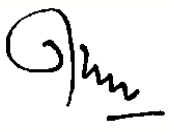
There is a system of annual self-appraisal report (SAR) with respect of all teaching faculty. SARs are reviewed by the Deans and Directors for performance appraisal and finally approved by the Vice-Chancellor. Any suggestions provided by them are incorporated in the curriculum. The stakeholders' feedback on the overall performance and quality of the institutions is obtained through

general meetings with parents and interaction with alumni. The teachers get informal feedback from the students based on their parents' observation and suggestions. These suggestions are considered by the HODs and controlling officers.

**6.4.8. Student Intake and Attrition in the Programme for Last Five Years:** *Year wise information on sanctioned strength, actual intake and attrition in the last five years of the Degree Programme, in the tabular form, shall be provided.*

| Name of the degree programme | Actual student admitted in last five years | | | | | Attrition (%) | | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 | 2018-19 | 2019-20 | 2020-21 | 2021-22 | 2022-23 |
| **M.Sc. (Statistics)** | 03 | 03 | 03 | 02 | 02 | 0 | 33 | 66 | 0 | 0 |
| **Ph.D.(Statistics)** | 03 | 05 | 02 | 02 | - | 0 | 0 | 0 | 0 | 0 |
| **M.Sc. (Mathematics)** | - | 01 | 01 | 01 | 02 | 0 | 0 | 0 | 0 | 0 |
| **Ph.D. (Mathematics)** | - | 05 | 03 | 03 | 02 | 0 | 0 | 0 | 0 | 0 |

**6.4.9. Information Communication Technology (ICT) Application in Curricula Delivery:** *The ICT is now integral part of the teaching programme. ICAR has also been promoting the use of ICT in teaching and practical. Mention whether the Degree Programme is meeting the expectations. If there is any shortfall, it shall be clearly mentioned.*



The department has established two smart class rooms under ICAR smart class room initiative. The faculty members of department of Statistics use ICT in teaching and practical classes. There is one Seminar Room and one class room equipped with interactive projector, LCD interactive panel and internet connection. All faculty members have computer printer and internet connection in their offices. There is Wi-Fi facility for faculty, staff and students. This infrastructure provides opportunities for the use of ICT in quality teaching, research and extension. Faculty members also use power point presentations, YouTube, emails, Google meet, Microsoft team, Webex and CD ROM in teaching all courses at UG and PG level.

**6.4.10.** The information pertaining to 6.4.10 to 6.4.9 shall be provided for each one of UG, PG and Ph.D. degree programmes, separately, and to be presented College-wise.

**6.4.11.** Since the accreditation of programmes is related to the All India admission from ICAR and also having weight age for College accreditation, therefore the data presented in the section 6.4 is liable to the verification at any stage.

**6.4.12.** Certificate (Applicable when SSR is submitted for Programme)

I, the Dean **Dr. Neeraj Kumar** hereby certify that the information contained in theSection- 6.4 to 6.4.9 are furnished as per the records available in the college, and degree awarding university.

**Signature of Dean of the College with Date & Seal**

# M.Sc. Microbiology

# and

# Ph.D. Microbiology

## 6.4 About the Department

The department of Microbiology was established in 1964 in the erstwhile Punjab Agricultural University under the supervision of Dr. S.R. Vyas as the founder Professor & Head, who laid solid foundation for the subsequent growth and development of the department. With the establishment of CCS HAU in 1970, the department of Microbiology became a part of the College of Basic Sciences & Humanities. Over the years, the department has made significant contribution in research, teaching and extension. The department developed a solid state fermentation process for the production of citric acid from cane molasses using improved strains of *Aspergillus niger*. Technology for the production of wine from locally grown grapes was developed by Professor S.R. Vyas and the technical know-how for the large scale production of wine was later transferred to Panipat Cooperative Distillery, Panipat. Subsequently, a process for the direct fermentation of sugarcane molasses for alcohol production was also developed. Yeast strain, HAU-I has been developed for the production of ethanol and is being supplied to various Indian distilleries on demand. Usefulness of organic manures in maintaining soil organic matter status and their role in pollution abatement has been worked out. Technology for enrichment of compost with (i) *Azotobacter* for increased nitrogen content, (ii) rock phosphate for increased phosphate availability and (iii) urea for increased organic nitrogen content has been developed. Use of neem cake in controlling nitrification and slow release of nitrogen from nitrogenous fertilizers has been worked out. Since the late sixties, the department has been in the forefront in carrying basic and applied research towards producing efficient rhizobial strains for chickpea, mungbean, urdbean, cowpea, berseem, soybean and other legumes and *Azotobacter* for non-leguminous crops. The department was awarded National Productivity Council Award for 1985-86. Biofertilizers of phosphate solubilizing bacteria (PSB) and biocontrol inoculants of *Gluconacetobacter* are also being produced by the department. Since July 2018, various biofertilizers are being produced through PPP mode with Habitat Genome Primary Producers Company, village Ramayan, Hisar. Microbial parameters for anaerobic digestion of organic wastes for biogas production have been studied and conditions for increasing biogas production in winter through recycling of spent slurry and effective use of brackish water for biogas production have been worked out. Family size Janta biogas plant has been modified for solid state fermentation of cattle dung that has been tested all over India and has been found satisfactory. During last five years on an average eight students were admitted in M.Sc. and in Ph.D. Presently there are 23 M.Sc. students and 38 Ph.D. students on roll.

There is no UG programme going on in the department, however, department is offering two core UG Courses and one professional course to Undergraduates of College of Agriculture and one UG Course to Undergraduate students of I.C. College of Home Science.

### Objectives of the Department

- To provide quality education to students and develop skilled manpower in the field of Microbiology
- To develop professionals in Microbiology
- To conduct research in thrust areas related to Agriculture, Industry, Environment and Molecular Microbiology

**6.4.1 Brief History of the Degree Programme:** *Clearly mention in which year the Degree Program was initiated along with its objective and accomplishments.*

M.Sc. programme in Microbiology was initiated in the year 1964. Entry qualification for masters programme is: B.Sc. (Botany + Zoology + Chemistry)/B.Sc. (Hons.) Agri./ B.Sc. Ag. 4 year/

B.Sc. (Hons.) Biochemistry (Chemistry +Botany + Biochemistry)/B.Sc. (Hons.) Biochemistry (Chemistry +Zoology + Biochemistry)/

B.Sc. (Hons.) Biotechnology (Chemistry + Botany + Biotechnology)/ B.Sc. (Hons.) Biotechnology (Chemistry +Zoology + Biotechnology)/B.Sc. (Hons.) Microbiology (Chemistry + Botany +Microbiology)/B.Sc. (Hons.) Microbiology (Chemistry + Zoology +Microbiology)/B.Sc. Agri. Biotechnology (Botany + Biotechnology)/B.Sc. Agri.Biotechnology (Zoology + Biotechnology)/B.Sc. Biochemistry (Chemistry + Botany + Biochemistry)/B.Sc. Biochemistry (Chemistry + Zoology +Biochemistry)/B.Sc. Biotechnology (Chemistry + Botany + Biotechnology)/ B.Sc. Biotechnology (Chemistry + Zoology + Biotechnology)/ B.Sc. Microbiology (Chemistry +Botany+ Microbiology)/ B.Sc. Microbiology (Chemistry +Zoology + Microbiology) / B.Sc. Biotechnology/ B.Sc. (Hons.) Biotechnology (Zoology +Botany + Biotechnology) / B.Sc. Microbiology / B.Sc. (Hons.) Microbiology (Zoology+Botany+Microbiology). Minimum duration of the programme is 2 years and maximum duration is 4 years. Medium of instruction is English.

### Objectives of Initiating M.Sc. Programme

- To teach Microbiology for meeting up the technical support to Industry and Education system
- To create the Masters in Microbiology with specialization in different areas

### Accomplishments of M.Sc. Programme
